Arnold H. Diamond, Special Assistant to the Deputy Assistant Secretary for Economic Affairs

PREFACE AND ACKNOWLEDGMENTS

This report presents data from the Annual Housing Survey, which was sponsored by the U.S. Department of Housing and Urban Development and conducted by the U.S. Bureau of the Census. It was developed under the direction of Arnold H. Diamond, Special Assistant to the Deputy Assistant Secretary for Economic Affairs, Department of Housing and Urban Development; and Arthur F. Young, Chief, Housing Division, Bureau of the Census.

Arnold H. Diamond, Duane McGough, and David Yentis were responsible for overseeing the Annual Housing Survey and the resultant report on behalf of the Department of Housing and Urban Development.

Within the Bureau of the Census, this report was developed in the Housing Division. It was prepared under the supervision of Leonard J. Norry, Assistant Division Chief, by Elmo E. Beach, Chief, Current Surveys Branch, assisted by Aneda E. France, Edward D. Montfort, and George Spraggins. Specific activities related to data collection procedures, statistical presentation, organization of the report, and preparation of text materials were performed by Edward Cary Bean Jr., Robert W. Bonnette, Mary C. Carroll, Margaret W. Harper, Paul P. Harple, Jr., Patricia A. Holloway, Richard G. Knapp, Mary A. Knoll, Richard G. Kreinsen, Jane S. Maynard, Marjorie Shelton, Janet A. Tippett, and Jeanne M. Woodward. Important contributions were made by Aaron Josowitz, Nathan Krevor, and Herbert Shapiro in the planning and coordination of the survey.

The operational aspects of the Annual Housing Survey were coordinated by the Demographic Surveys Division under the direction of Earle J. Gerson, Chief, by Stanley Greene, Assistant Division Chief, and Edward F. Knowles, assisted by John C. Cannon and Joan F. Garrett. Systems and processing procedures were performed under the direction of Barry M. Cohen, Assistant Division Chief. The computer programming and processing were performed under the supervision of D. Richard Bartlett, assisted by Merritt Woodard, Margaret Goldsworth, Robert St. Laurent, and Lee Rian. Leonard Goldberg, assisted by David B. Lipscomb and Robert Smith, Jr., was responsible for the clerical and keying procedures.

The planning of sample design, weighting, and computation of sampling variances were developed in the Statistical Methods Division under the supervision of Morton Boisen, Charles Jones, and Gary Shapiro, by David Bateman, Dennis Schwanz, and Mason Malmuth. The implementation of the sample selection was performed under the supervision of David Diskin and Leonard Baer, by Jerome Roth and Patricia Clark (Data Preparation Division, Jeffersonville, Indiana). The standard errors were computed under the supervision of David Diskin, by Robert Aquilino and Robert Jewett. Implementation of field sample control and reinterview procedures was carried out under the supervision of Irene C. Montie, by Fay F. Nash and John J. Paletta. Reinterview design and analysis was conducted under the supervision of Irwin Schreiner.

Data collection activities were administered by the Field Division under the supervision of Richard C. Burt, Chief; by Stanley D. Matchett, Assistant Division Chief; Dean C. Schroeder, and Kenneth A. Frail as well as the directors of the Bureau's regional offices.

Clerical processing of the questionnaires was performed in the Data Preparation Division under the direction of O. Bryant Benton, Chief, by Don L. Adams and Harry Myers.

Within the Publications Services Division, many individuals made significant contributions in the areas of publication planning and design, editorial review, composition, and printing procurement.

GENERAL

This report presents cross-tabulations of financial characteristics by indicators of housing and neighborhood quality from the 1974 Annual Housing Survey for the United States by inside and outside standard metropolitan statistical areas (SMSA's) and each of the four geographic regions. In 1973 this report was designated as series H-151-73, No.1.

The Annual Housing Survey was designed to provide a current series of information on the size and composition of the housing inventory, the characteristics of its occupants, the changes in the inventory resulting from new construction and losses, the indicators of housing and neighborhood quality, and the characteristics of recent movers. The survey, performed for the Department of Housing and Urban Development, is authorized under sections 501 and 502 (d), 502(e), and 502(f) of the Housing and Urban Development Act of 1970, Title 12, United States Code 1701z-1 and 1701z-2. The Bureau of the Census is authorized under Title 31, United States Code 686, to perform special work or services for Federal agencies.

The statistics presented in this report are based on information from a sample of housing units. The information for the survey was collected by personal interview from August to October 1974.

This report series consists of six parts (see list on page III) issued jointly by the Department of Housing and Urban Development and the Bureau of the Census. Part A provides data on general housing characteristics, part B on indicators of housing and neighborhood quality, part C on financial characteristics, part D on recent mover households, part E on urban and rural housing characteristics, and part F on financial characteristics cross-classified by indicators of housing and neighborhood quality. Part E is being published for the first time as part of the 1974 final reports publication program.

The content and procedures of the Annual Housing Survey were determined after consultation with a variety of users of housing data and through field pretesting. Most of the data in this report are for items that have not been collected before in Bureau of the Census surveys and censuses. The new items include such diverse indicators of housing quality as water leakage in basement and roof, the physical condition of interior ceilings, floors, and stairways, and breakdowns or failures in plumbing facilities and equipment. They also include measures of neighborhood quality such as the presence of heavy street traffic and noise and the inadequacy of neighborhood services such as public transportation.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C., 20233.

Organization of the text.—The text consists of this introduction and appendixes A and B, which appear after the data tables. Appendix A describes the geographic area classifications and provides definitions and explanations of the subjects covered in this report. Appendix B presents information on sample design, estimation, and accuracy of the data.

Content of the tables.—The tables in this report present cross-tabulations of the data for occupied units for each area shown in this report. The numbers presented in these tables are rounded to the nearest thousand. Tables 1 to 36 are shown for the United States and tables 37 to 84 for the regions. The tables show cross-tabulations of the indicators of housing and neighborhood quality by income, value, and gross rent. Tables 1 to 4 present characteristics of owner- and renter-occupied housing units by income of the family or primary individual; tables 5 to 8 present characteristics of owner-occupied, one-family homes by value of property; and tables 9 to 12 present characteristics of renter-occupied housing units by gross rent. The same subject

content as shown in tables 1 to 12 is presented for households with Negro head in tables 13 to 24 and for households with head of Spanish origin in tables 25 to 36.

The same subject content as shown in tables 1 to 12 is also presented for regions: Tables 37 to 48 present characteristics for the Northeast region; tables 49 to 60 for the North Central region; tables 61 to 72 for the South region; and tables 73 to 84 for the West region.

Sample size.—The statistics presented in this report are based on a sample of housing units and are, therefore, subject to sampling variability. The designated sample consisted of approximately 78,000 housing units located throughout the United States. The sample was selected from units enumerated in the 1970 census and updated to include units constructed since 1970. Detailed information on the sample design, size of sample, estimation procedure, and sampling variability associated with these data is given in appendix B.

Derived figures (medians, etc.).—Shown in this report are medians and percents. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half the cases fall below the median and one-half the cases exceed the median. Derived figures are not presented (but indicated by three dots ". . . ") if there are less than 25 sample cases in the distribution or the base.

Medians for value and income are rounded to the nearest hundred dollars and for rent to the nearest dollar. In computing median rent, units reported as "no cash rent" are excluded. The medians presented are generally computed on the basis of the distributions as shown in this report.

When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; thus, for example, if the median falls in the category "Less than $5,000," it is shown as "$5,000–." When the median falls in the upper terminal category of an open-end distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; thus, for example, if the median falls in the category "$50,000 or more," it is shown as "$50,000+."

Symbols.—A dash "–" signifies zero. Three dots ". . . " in a data column mean not applicable or that the base for a derived figure is too small for it to be shown.

Boundaries.—The data shown in this report relate to the areas as defined for the 1970 census. See appendix A for a discussion of these areas. Additional information and definitions of the 1970 boundaries are given in the 1970 Population Census PC(1)-A reports.

Other reports from the Annual Housing Survey.—In addition to the six basic reports in the Annual Housing Survey Series H-150, one or more supplementary reports (Series H-151) may be published for the United States. Also, as part of the 1974 H-150 series, four advance reports containing preliminary data from the 1974 survey were published for parts A through D; these reports were superseded by the publication of final reports A through D.

A series of reports (H-170) similar to H-150 will also be published for 60 selected standard metropolitan statistical areas. The data for the SMSA's are based on an independent sample of the 60 SMSA's divided into 3 groups of approximately 20 each, with one group interviewed every 3 years on a rotating basis. Enumeration for the first group began on April 1, 1974, and continued through March 1975; enumeration for the second group began on April 1, 1975, and continued through March 1976. Publication of the first group is scheduled for the summer of 1976. Below is a list of the SMSA's in each group:

GROUP I	GROUP II	GROUP III
Albany-Schenectady-Troy, N.Y.	Atlanta, Ga.	Allentown-Bethlehem-Easton, Pa.-N.J.

*Included with Group II for the first enumeration.

DATA COLLECTION PROCEDURES

The 1974 Annual Housing Survey was conducted by enumerators who made personal visits to each sample unit and obtained the information from the occupants or, if the unit was vacant, from informed persons (landlords, rental agents, or knowledgeable neighbors). The information reported by the enumerator reflected the situation at the time of enumeration, which began in August and extended through October 1974.

Data were collected for sample housing units located in the counties and independent cities comprising the 461 sample areas used in current surveys of the Census Bureau. A sample of housing units was selected in these areas from the 1970 census and updated by a sample of addresses from building permits to include housing units added since 1970. Estimates of the counts and characteristics of the 1974 inventory were obtained for these sample units.

For the estimates of losses from the 1973 housing inventory, the interviewer located the 1973 sample unit. If the 1973 sample unit no longer existed or no longer was a separate housing unit, the disposition of the unit was determined; i.e., lost through means such as demolition, disaster, merger, and conversion to nonresidential use. Data on losses are shown in part A of this series.

A more detailed description of the survey design and sampling procedures can be found in appendix B.

PROCESSING PROCEDURES

The questionnaires used for the 1974 Annual Housing Survey were of the conventional type, on which the enumerator recorded the information by marking a precoded check box or by writing in the entries. Census clerks edited and coded the schedules. The information from the questionnaires was data-keyed directly to magnetic tape which was processed on the Census Bureau's computers through a number of editing and tabulation steps. A facsimile of the questionnaire appears in appendix A.

The 1973 characteristics of units lost from the housing inventory were obtained by matching those units to the 1973 Annual Housing Survey records. The 1973 data for the losses were then extracted from the 1973 Annual Housing Survey record tapes. (As indicated above, data on losses are shown in part A of this series.)

QUALIFICATIONS OF THE DATA

Since the estimates in this report are based on a sample, they may differ somewhat from the figures that would have been obtained from a complete census, using the same schedules, instructions, and enumerators. Particular care should be exercised, therefore, in the interpretation of figures based on relatively small numbers of sample cases as well as small differences between figures. As in any survey work, the results are subject to errors of response and nonreporting and to sampling variability. For a further discussion of accuracy of the data, see appendix B.

The data in this report are intended to serve as broad *"indicators"* of housing quality and not as precise measurements. A housing unit, for example, that is reported to have signs of a leaking roof or a breakdown or failure in plumbing facilities is not necessarily "inadequate" or "poor" housing. Conversely, a housing unit that is reported as *not* having such defects is not necessarily a house of "good quality." The data presented for items such as "street conditions" and "neighborhood services" are based on the individual respondent's opinion of conditions in his neighborhood. The respondent's opinion may or may not reflect the "actual" situation. Furthermore, two respondents in the same neighborhood may view the same condition differently; for example, one respondent may indicate that the streets need repair while the other does not.

Statistics for many of the characteristics shown in this report are based on restricted universes; therefore, care should be exercised in relating the statistics for one characteristic to another. For example, water supply is restricted to units occupied 3 months or longer prior to the date of enumeration. Therefore, the totals for owner-occupied units in the "water supply" universe do not agree with the totals for owner-occupied units for some of the other universes such as "bathrooms" or "complete kitchen facilities."

Most of the statistics in part F are for new items which were published by the Bureau of the Census for the first time in the reports from the 1973 Annual Housing Survey. Other than the series H-151-73, No. 1 report for 1973, only a small portion of the data can be compared with that from other Census Bureau reports. In addition, data for some of the items are not comparable because of the different universes used. For example, the statistics on sewage disposal in this report are limited to "units occupied 3 months or longer," whereas decennial census data on sewage disposal are shown for "all" units, including units which were occupied less than 3 months.

In this report, statistics on income relate to the income of the family or primary individual. Therefore, no data are provided on household income; i.e., income of persons unrelated to the head of the household is excluded.

See appendix A for a more detailed discussion of the definitions and qualifications of all items in this report.

TABLE 1. INCOME OF FAMILIES AND PRIMARY INDIVIDUALS BY TENURE AND OCCUPANCY AND UTILIZATION CHARACTERISTICS, AND SERVICES AVAILABLE: 1974

(NUMBERS IN THOUSANDS. DATA BASED ON SAMPLE, SEE TEXT. FOR MINIMUM BASE FOR DERIVED FIGURES (PERCENT, MEDIAN, ETC.) AND MEANING OF SYMBOLS, SEE TEXT)

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1974 ..... App-10

AREA CLASSIFICATIONS

Counties

The primary divisions of most of the States are termed counties; in Louisiana the corresponding units are termed parishes. Alaska has no counties; in this State, areas designated census divisions have been defined for general statistical purposes by the State in cooperation with the Census Bureau, and are treated as county equivalents. Four States (Maryland, Missouri, Nevada, and Virginia) contain one or more cities that are independent of any county; for statistical purposes these independent cities are treated as county equivalents.

Standard Metropolitan Statistical Areas

The definitions of standard metropolitan statistical areas used in the Annual Housing Survey correspond to the 243 SMSA's used in the 1970 census. These include the 228 SMSA's as defined and named in the Bureau of the Budget publication, **Standard Metropolitan Statistical Areas: 1967**, U.S. Government Printing Office, Washington, D.C. 20402. After 1967, 15 SMSA's were added of which 2 were defined in January 1968 and an additional 13 were defined in February 1971 on the basis of the results of the 1970 census. Changes in SMSA definition criteria, boundaries, and titles made after February 1971 are not reflected in this series of reports. SMSA's are defined by the Office of Management and Budget (formerly Bureau of the Budget).

Except in the New England States, a standard metropolitan statistical area is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Bureau of the Budget publication cited above.

In this report, figures for "in central cities" refer to all housing units within the legal city boundaries. For a few central cities, the figures include some housing units in parts of the city classified as rural in the 1970 census.

DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

General

As stated in the introductory text of this report, the 1974 Annual Housing Survey was conducted by direct interview. The survey enumerators were instructed to read the questions directly from the questionnaire. The definitions and explanations given below for each subject are, to a considerable extent, drawn from various technical and procedural materials used in the collection of the data. This material helped the enumerative personnel to understand more fully the intent of each question and thus to resolve problem or unusual cases. Additional explanatory information has been added

to this portion of the text to assist the user in the proper utilization of the statistics.

Comparability with 1973 Annual Housing Survey.—The concepts and definitions are essentially the same for items that appear in both the 1974 and the 1973 reports. Year to year comparisons of counts and characteristics reveal that many of the differences are small. Small differences, particularly when based on small subclasses of housing units, should be interpreted with care.

Living Quarters

Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a one-family home, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars.

Housing units.—A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hall used by the occupants of another unit or by the general public or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units, the criteria of separateness, direct access, and complete kitchen facilities for exclusive use are applied to the intended occupants, whenever possible. If the information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that mobile homes, trailers, tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

Group quarters.—Group quarters are living arrangements for institutional inmates or for other groups containing five or more persons not related to the person in charge. Group quarters are located most frequently in institutions, boarding houses, military barracks, college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and five or more persons unrelated to him, or if there is no person in charge, by six or more unrelated persons. Information on the housing characteristics of group quarters was not collected.

Rules for mobile homes, hotels, rooming houses, etc.—Mobile homes or trailers, tents, boats, or railroad cars are not considered housing units if vacant, used only for business, or used only for vacations.

Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents, i.e., persons who consider the hotel as their usual place of residence or have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only in those hotels, motels, and similar places in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have either direct access or complete kitchen facilities for exclusive use, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain four or fewer roomers unrelated to the head, they are classified as one housing unit; if the combined quarters contain five or more roomers unrelated to the head or person in charge, they are classified as group quarters. In a dormitory, residence hall, or similar place, living quarters of the supervisory staff and other employees are separate housing units if they satisfy the housing unit criteria; other living quarters are considered group quarters.

Institutions.—Living quarters of staff personnel are separate housing units if they satisfy the housing unit criteria. Other living quarters are considered group quarters.

Occupancy Characteristics

Occupied housing units.—A housing unit is classified as occupied if a person or group of persons is living in it at the time of enumeration or if the occupants are only temporarily absent—for example, on vacation. However, if the unit was occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

Persons.—All persons occupying the housing unit are counted. These persons include not only occupants related to the head of the household but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the household head.

A person is enumerated at his usual place of residence, which refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile.

Race.—The classification by race shown here refers to the race of the head of the household occupying the housing unit. The concept of race as used by the Census Bureau does not denote clear-cut scientific definitions of biological stock. The enumerator was to report the race of the head of the household in three categories: White, Negro, and other. The last category includes American Indian, Chinese, Eskimo, Japanese, Korean, and any other race except white and Negro. Figures on tenure are given separately for

white and Negro heads of household; units with household heads of other races are included in the total in tables 1, 37, 49, 61, and 73 and may be derived by subtracting the sum of white and Negro from the total. More detailed characteristics of units with Negro head of household are presented in separate tables. The classification of race in the 1974 Annual Housing Survey was made by the enumerator based on his own observations. In the 1970 census, race was essentially a self-classification by people according to the race with which they identified themselves.

Spanish origin.—The classification by Spanish origin here refers to the origin of the head of the household occupying the housing unit. Detailed characteristics of units with head of Spanish origin are presented in separate tables. Spanish origin was determined on the basis of a question that asked for self-identification of a person's origin or descent. Respondents were asked to select their origins from a "flash card." Persons of Spanish origin were those who indicated that their origin was either Mexican-American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American, or other Spanish.

In the 1970 census and current surveys' reports, Spanish persons are identified according to various criteria: Birthplace, birthplace of parents, language, surname, and origin or descent. For this reason, care should be taken in making comparisons of Spanish origin estimates from the Annual Housing Survey and other surveys.

Tenure.—A housing unit is "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. A cooperative or condominium unit is "owner occupied" only if the owner or co-owner lives in it. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent.

Duration of occupancy.—Data on duration of occupancy are based on information for the head of household; the data refer to the period when present occupancy began. Statistics are shown on whether the head lived in the unit "less than 3 months" or "3 months or longer." A head who "lived here last winter" must have moved into his unit prior to the previous February.

Household Characteristics

Household.—A household consists of all the persons who occupy a housing unit. By definition, the count of households is the same as the count of occupied housing units.

Head of household.—One person in each household is designated as the "head," that is, the person who is regarded as the head by the members of the household. However, if a married woman living with her husband is reported as the head, her husband was considered the head for the purpose of simplifying the tabulations.

Type of household.—Statistics are presented separately for two-or-more-person households and for one-person households. Households having two or more persons are further subdivided as follows:

Husband-wife.—In this report and in the series H-150-74, part B report, each household in this group consists of the head and his wife, and all other persons occupying the unit whether or not they are related to the head. In parts A, C, D, and E of the series H-150-74 reports, the category "male head, wife present, no nonrelatives" excludes persons not related to the head.

Other male head.—This category includes households with male heads who are widowed, divorced, or single and households with male heads who are married but with wife absent because of separation or other reason where husband and wife maintain separate residences.

Female head.—This group comprises households with female heads regardless of their marital status. Included are female heads with no spouse and female heads whose husbands are living away from their families, as for example, husbands in the Armed Forces living on military installations.

Households consisting of only one person are shown separately as "one-person households" and are not included in the subcategories "other male head" and "female head."

Family or primary individual.—Housing units are occupied by either "families" or "primary individuals." The term "family" refers to the head of a household and all (one or more) other persons living in the same household who are related to the head by blood, marriage, or adoption. If the head lives alone or with nonrelatives only, then the head is considered a "primary individual."

Married couples related to the head of a family are included in the family and are not considered as separate families. A lodger, servant, or other person unrelated to the head is considered a member of the household but not of the family.

In the statistics on household composition, families are always included in one of the three major groups of two-or-more-person households. Primary individuals with nonrelatives living with them are tabulated as "other male head" or "female head." Primary individuals living alone are always tabulated as "one-person households."

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including the head of the household or his wife. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents.

Own children.—Statistics on presence of "own" children of household heads are shown in this report. A child under 18 years old is defined as an "own" child if he or she is a single (never married) son, daughter, stepchild, or adopted child of a household head. Own children of subfamilies are excluded from the total count of own children.

Other relative of head.—This category includes all persons related to the head by blood, marriage, or adoption except wife or child of head and members of subfamilies.

Nonrelative.—A nonrelative of the head is any person in the household who is not related to the head by blood, marriage, or adoption. Roomers, boarders, lodgers, partners, resident employees, wards, and foster children are included in this category.

Selected Characteristics, by Breakdowns or Failures

Bedrooms.—The number of bedrooms in the unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping such as guest rooms, even though used infrequently, are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hideaway bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified, by definition, as having no bedroom.

Data on bedrooms lacking privacy are shown for housing units with two or more bedrooms. Units have bedrooms lacking privacy when it is necessary to pass through a bedroom to get to another room, such as a den, and/or to get to the bathroom. The bathroom access criteria is applied only to units with one complete bathroom or one bathroom plus half bath in which the half bath lacks a flush toilet.

Statistics on the number of bedrooms regularly used by three or more persons are shown separately for three-or-more-person households. Not included are bedrooms used for sleeping by three or more persons only on an occasional basis such as by visitors.

Rooms.—In this report, rooms include whole rooms used for living purposes, such as living rooms, dining rooms, bedrooms, finished attic or basement rooms, recreation rooms, permanently enclosed porches that are suitable for year-round use, and lodgers' rooms. Also included are rooms used for offices by a person living in the unit. Not included as rooms are kitchens, bathrooms, halls, foyers or vestibules, balconies, closets, alcoves, pantries, laundry or furnace rooms, unfinished attics or basements, other unfinished space used for storage, open porches, trailers used only as bedrooms, and offices used only by persons not living in the unit.

Plumbing facilities.—The category "with all plumbing facilities" consists of units which have hot and cold piped water inside the structure, as well as a flush toilet and a bathtub or shower inside the structure for the exclusive use of the occupants of the unit. All plumbing facilities must be located in the structure but they need not be in the same room. "Lacking some or all plumbing facilities" means that the unit does not have all three specified plumbing facilities (hot and cold piped water, as well as flush toilet and bathtub or shower inside the structure), or that the toilet or bathing facilities are also for the use of the occupants of other housing units.

Complete bathrooms.—A housing unit is classified as having a complete bathroom if it has a room with a flush toilet and bathtub or shower and a wash basin, as well as piped hot water in the structure for the exclusive use of the occupants of the unit. A half bathroom has either a flush toilet or a bathtub or shower for exclusive use, but does not have all the facilities for a complete bathroom.

The category "none or also used by another household" consists of units with no bathroom facilities, units with only a half bathroom, units with bathroom facilities which are also for the use of the occupants of other housing units, and units with all bathroom facilities but not in one room.

Flush toilet, water supply, sewage disposal, and heating equipment.—Data on breakdowns or failures of flush toilet, water supply, and sewage disposal are shown if the housing unit was occupied by the head of the household at least three months prior to enumeration and if the breakdown or failure lasted six consecutive hours or longer during the three months prior to enumeration. For breakdowns or failures of heating equipment, data are shown for units occupied by the household head during the winter prior to enumeration if the equipment was unusable for six consecutive hours or longer during that time. To qualify as having lived here "last winter," the household head must have moved into the unit prior to the previous February. Further discussion of each item is given below:

Flush toilet.—The statistics on breakdowns or failures of flush toilet are limited to units that had all plumbing facilities with only one flush toilet, that is, one complete bathroom or one complete bathroom plus half bath without flush toilet. The flush toilet may be completely unusable because of broken pipes, stopped up soil pipe, lack of water supplied to the flush toilet, or some other reason.

Units with breakdown or failure in flush toilet are classified according to the number of breakdowns or failures and to the most common source of the problem. "Problems inside the building" refer to such breakdowns or failures as broken pipes in the unit (or building), a cracked or broken bowl, or faulty flushing mechanism. "Problems outside the building" refer to such breakdowns or failures as breaks in the main water or sewer line or shutdown by the water company for maintenance or repairs.

Water supply.—Breakdowns or failures in the water supply were asked when the unit had piped water inside the structure. The water may be available from sources such as a sink, wash basin, bathtub, or shower. A unit is classified as having no piped water inside structure if the unit has no piped water or if the only piped water avail-

able is outside the structure, for example, on an open porch or in another building. A breakdown or failure in the water supply means that the unit was completely without running water from its regular source. A unit was considered to be completely without running water if (1) the water system servicing the unit supplied no water at all, or (2) no water was available in the unit due to a breakdown or failure in the water supply inside the structure, or (3) the equipment and facilities (i.e., faucets in the kitchen and the bathroom sinks, faucet and shower in the bathtub, flush toilet, etc.) were all inoperable. If the faucet in the kitchen sink was broken but the one in the bathtub was working, the unit was not classified as being completely without water.

Units with a breakdown or failure in the water supply are classified according to the number of breakdowns or failures and to the most common source of the problem. "Problems inside the building" refer to such problems as broken pipes in the unit (or building) or turning the water off in the unit (or building) for maintenance and repairs. "Problems outside the building" refer to such problems as power failures, breaks in the main water line, or shutdown by the water company for maintenance and repairs.

Sewage disposal.—A public sewer is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. It may be operated by a governmental body or private organization. A septic tank or cesspool is an underground tank or pit used for disposal of sewage. Small sewage treatment plants which in some localities are called neighborhood septic tanks are classified as public sewers. A chemical toilet uses chemicals to break down or dissolve sewage. A privy refers to an "outhouse" or other small shelter outside the unit which contains a toilet. Sewage that is disposed of in some other way is classified as other means; for example, it may be an individual sewer line running to a creek, lake, or swamp.

The number of breakdowns or failures in the means of sewage disposal is limited to units in which the means of sewage disposal was a public sewer, septic tank, or cesspool. The breakdown or failure may have been the result of an overloaded sewage disposal system, lack of running water, a broken or cracked tank, etc.

Heating equipment.—Warm-air furnace refers to a central system which provides warm air through ducts leading to various rooms; central heat pumps are included in this category. Steam or hot water refers to a central heating system in which heat from steam or hot water is delivered through radiators or other outlets. Built-in electric units are permanently installed in floors, walls, ceilings, or baseboards. A floor, wall, or pipeless furnace delivers warm air to the room right above the furnace or to the room(s) on one or both sides of the wall in which the furnace is installed. Other means include room heaters with or without flue, fireplaces, stoves, and portable heaters of all types.

Heating equipment is considered unusable if it cannot be used for the purpose intended; the breakdown or failure may be caused by broken pipes, electrical or gas parts out of order, or downed power lines.

Insufficient heat.—The statistics presented refer to housing units in which the household head occupied the unit during the winter prior to the date of enumeration. To qualify as having lived here "last winter," the household head must have moved into the unit prior to the previous February.

Separate data are shown for units with additional heat source, rooms which lacked specified heat source, and units with closed rooms. The term "specified heating equipment" includes warm-air furnace; steam or hot water system; built-in electric units; floor, wall, or pipeless furnace; and room heaters with flue. Excluded are room heaters without flue or vent, fireplace, stoves, and portable heaters.

The data on additional heat source refer to units with "specified heating equipment" which *had* to use additional sources of heat to supplement the regular heating system because the regular system did not provide enough heat. Additional sources of heat such as kitchen stoves, fireplaces, or portable heaters, may have been used only in the mornings or on very cold evenings. Electric blankets, heating pads, or hot water bottles are not considered additional sources of heat.

"Rooms lacking specified heat sources" include rooms lacking hot air ducts, registers, radiators, and room heaters. The intent of this item was to identify rooms in units with "specified heating equipment" which did not contain the means of conveying the heat to the room. The kitchen was not considered to be a room for this item.

Separate data are also shown for rooms which were closed because they could not be kept warm. The rooms must have been closed for 7 consecutive days or longer during the previous winter and the unit must have "specified heating equipment." For this item, also, the kitchen was not considered a room.

Complete kitchen facilities.—A unit has complete kitchen facilities when it has all three of the following for the exclusive use of the occupants of the unit: (1) An installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure. They need not be in the same room. Quarters with only portable cooking equipment are not considered as having a range or cookstove. An icebox is not included as a mechanical refrigerator.

The kitchen facilities are for the exclusive use of the occupants when they are used only by the occupants of one housing unit, including lodgers or other unrelated persons living in the unit. When a structure consists of only one housing

unit, all equipment located inside the structure is classified, by definition, for exclusive use.

Basement.—Statistics on basements are presented in terms of the number of housing units located in structures built with a basement. A structure has a basement if there is enclosed space in which persons can walk upright under all or part of the building.

Basements in structures with occupied units are further classified by signs of water leakage. The category "with water leakage" consists of units in which the basement shows signs of water having leaked in from the outside, even if the signs only appear when it rains or during other similar situations. "No water leakage" means that the basement shows no signs of water leakage, or that the signs of water leakage are caused by a problem inside the structure such as faulty plumbing. If the basement shows signs of water having leaked in from the outside but the problem causing the leakage has been corrected, the unit was classified as having no water leakage.

Units in structure.—In the determination of the number of units in a structure, all housing units, both occupied and vacant, were counted. The statistics are presented in terms of the number of housing units in structures of specified type and size, not in terms of the number of residential structures. A structure is a separate building that either has open space on all sides or is separated from other structures by dividing walls that extend from ground to roof.

Roof.—Units "with water leakage" are those in which the roof shows signs of water having leaked in from the outside or where the roof leaks when it rains. "No water leakage" means that the roof shows no signs of water having leaked in from the outside or that the roof shows signs of water leakage but the problem causing the leakage has been corrected. If the signs of water leakage are caused by a problem inside the structure such as faulty plumbing, the unit was classified as having no water leakage.

Interior ceilings and walls.—Statistics are presented on whether or not there are open cracks or holes and broken plaster or peeling paint on the interior ceilings or walls of a housing unit. Included are cracks or holes that do not go all the way through to the next room or to the outdoors. "Hairline cracks" or cracks that appear in the walls or ceilings but are not large enough for a fingernail file to be inserted in, and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

Broken plaster or peeling paint must be on the inside walls or ceilings, and at least one area of the broken plaster or peeling paint must be approximately one square foot or larger.

Interior floors.—Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go through the floor. Excluded are very small holes caused by nails or other similar objects.

Common stairways.—The statistics on common stairways are presented for housing units in structures of two or more units with common stairways. The figures reflect the physical condition of the stairway, i.e., whether there are loose, broken, or missing steps or stair railings. Common stairways are stairways which are usually used by the occupants of more than one unit or by the general public. They may be either inside the structure or attached to the outside of the building.

Light fixtures in public halls.—The statistics on light fixtures in public halls are presented in terms of the number of housing units in structures of two or more units with public halls which have light fixtures and whether the light fixtures are in working order. Light fixtures include wall lights, ceiling lights, or table lamps in the public halls of the building. Public halls are used by the occupants of more than one unit or by the general public.

Electric wiring.—A housing unit is classified as having exposed electric wiring if the unit has any wiring that is not enclosed, either in the walls or in metal coverings, or if the wiring is outside the walls but enclosed in some material other than metal. Extension cords and other types of wiring that extend from a wall outlet to an appliance or lamp are not considered as exposed wiring.

Electric wall outlets.—A housing unit is classified as having electric wall outlets in each room if there is at least one working electric wall or wall plug in each room of the unit. A working electric wall outlet or wall plug is one that is in operating condition, i.e., can be used when needed. If a room does not have an electric wall outlet, an extension cord used in place of a wall outlet is not considered to be an electric wall outlet.

Electric fuse blowouts.—These statistics are presented for occupied housing units in which an electrical circuit fuse had blown or a breaker switch had tripped during the 3 months prior to enumeration. The data are restricted to households that had been at their present address for at least 3 months prior to the date of enumeration. A blown fuse or tripped breaker switch results in the temporary loss of electricity until the fuse is replaced or the breaker switch is reset. Blown fuses inside certain appliances or equipment (such as some large air conditioners) are counted as "fuse or switch blowouts."

Garbage collection service.—A housing unit is classified as having garbage collection service if either a private or public company collects the trash or garbage on a regular basis and carries it to public disposal areas. In some areas where the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, data are obtained only for the garbage collection service.

If the household does not have garbage collection service, the means of garbage disposal is classified as follows:

Incinerator, trash chute, or compactor.—An incinerator is a large unit on the property designed to burn all trash and garbage. Trash chutes and compactors were marked as the means of garbage disposal when the final means of disposal was not known, that is, if the respondent knew only that he put his garbage down a trash chute or that his garbage goes into a compactor. A compactor is a unit which packs trash and garbage into smaller units for disposal.

Garbage disposal unit.—A garbage disposal unit is connected to the kitchen sink and grinds up the garbage, which is disposed through the sewage system.

Other means.—If the method of disposal does not fall into any of the classifications specified above, it is classified as "other means."

Exterminator service.—The statistics on exterminator service refer to households that have been at their present address for at least 3 months prior to the date of enumeration and who reported that they had seen mice or rats or signs or traces of their presence *inside* the house or building during the last 3 months. Signs of mice and rats or traces of their presence include droppings, holes in the wall, or ripped or torn food containers. "Regular extermination service" refers to periodic visits by a licensed company or individual who uses chemicals and sprays to control or kill pests and rodents. The regular service interval may be once a month, four times a year, or any other such interval. "Irregular extermination service" includes visits by an exterminator who is called only when needed by the household or building manager, or where it is known that a building is serviced but not whether the service is regular or irregular. "No extermination service" includes units in a house or building that have not been serviced during the 12 months prior to enumeration and units where it is not known if there is any exterminator service.

Street conditions and neighborhood services.—The statistics presented are based on the respondent's opinion and attitude toward the street and neighborhood in which he lives. Thus, the respondent's answer may or may not reflect the "actual" description of the street and neighborhood. Furthermore, the respondent may not have the same opinion as his neighbor about the street conditions and/or neighborhood services; for example, the respondent may feel that the street lighting or neighborhood shopping facilities are inadequate while his neighbor may not.

Street conditions.—The respondent was asked whether or not certain conditions were present on his street. The following is a list of the conditions:

1. Noise.—This category refers to street noises, such as children playing outdoors, noise from a factory or business, noises from airplane traffic, or any other sound that the respondent considers noise.

2. Heavy traffic.—This category reflects the respondent's opinion on whether there is heavy traffic from cars and/or trucks.

3. Odors.—This category refers to the presence of fumes, smoke, or gas coming from cars, trucks, nearby industries, factories, businesses, etc., in the opinion of the respondent.

4. Litter.—Included are all types of trash, debris, or junk such as paper, cans, or abandoned cars in the street, on empty lots, or on properties on the street which the respondent considers as litter.

5. Abandoned buildings.—Abandoned buildings refer to both single and multiunit buildings which the respondent reported to be abandoned or boarded up. Included in this category are remains of previous buildings.

6. Deteriorating housing.—Deteriorating housing refers to occupied housing units which in the respondent's opinion are in rundown condition.

7. Commercial or industrial.—This category refers to commercial, industrial, or other activities, including both large and small industries as well as businesses and stores, that the respondent considers to be nonresidential.

8. Streets need repair.—The data are based on the respondent's opinion that the streets, either paved or unpaved, are continually in need of repair or are bordered by open ditches used for water or sewage drainage.

9. Inadequate street lighting.—Inadequate street lighting includes areas, in the opinion of the respondent, that have no street lighting, streets with insufficient lighting, and streets where the lighting does not work adequately.

10. Crime.—This category refers to all forms of street and neighborhood crime such as petty theft, assaults against the person, burglary, etc., or any related activities that the respondent judges to be a crime.

The figures shown for the categories under "undesirable conditions" will not add to the total because more than one undesirable street condition may be reported for the same unit.

Street conditions and wish to move.—The category "would like to move" consists of housing units in which the respondent considers one or more street conditions (such as street noise) disturbing, harmful, or dangerous and *so* objectionable that he would like to move from the neighborhood.

Neighborhood services.—The data shown are based on the respondent's opinion of the adequacy of the following neighborhood services:

1. Public transportation.—The data are based on the respondent's opinion of the availability of public transportation such as bus, subway, or taxicab service.

2. Schools.—The statistics are based on the respondent's opinion about the schools in his neighborhood, such as the proximity of the school, population of the student body, etc.

3. Neighborhood shopping.—This category refers to the respondent's opinion regarding stores such as grocery or drug stores and their merchandise, prices, or services in his vicinity.

Neighborhood services and wish to move.—The category "household would like to move" consists of housing units in which the respondent considers one or more neighborhood services (such as public transportation) *so* inadequate or unsatisfactory that he would like to move from the neighborhood.

The figures shown for the categories under "household would like to move" will not add to the total because more than one inadequate service may have been reported for the same unit.

Overall opinion of neighborhood.—The data presented are based on the respondent's overall opinion of the neighborhood according to the street conditions and the neighborhood services available (described in preceding paragraphs). The respondent was asked to rate the street or neighborhood as excellent, good, fair, or poor. Data are also shown for "wish to move" because of undesirable street conditions cross-classified by the respondent's overall opinion of his neighborhood.

Financial Characteristics

Income.—The statistics on income in the Annual Housing Survey are based on the respondent's reply to questions on income for the 12 months prior to enumeration and is the sum of the amounts reported for wage and salary income, net self-employment income, Social Security or railroad retirement income, public assistance or welfare payments, and all other money income. The figures represent the amount of income received before deductions for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, Medicare deductions, etc.

In this report, the statistics relate to the money income of the family or primary individual occupying the housing unit, i.e., the sum of the income of the head of the family and all other members of the family 14 years old and over, or the income of the primary individual. Incomes of persons living in the unit but not related to the head of the household are not included in this sum.

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to enumeration. It includes wages, salary, piece rate payments, commission, tips, cash bonuses, and Armed Forces pay. Net self-employment income is defined as net money income (gross receipt minus operating expenses) received from a business, professional practice, partnership, or farm in which the person was engaged on his own account.

Social Security or railroad retirement income includes cash receipts of Social Security pensions; survivors' benefits; disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers; and deductions for Medicare and health insurance premiums. Cash receipt of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from estates and trust funds; dividends; interest; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; money received for transportation and/or subsistence by persons participating in special governmental training programs such as the Area Redevelopment Act and the Manpower Development and Training Act; workmen's compensation cash benefits; periodic payments by the Veterans Administration to disabled members of the Armed Forces or to survivors of deceased veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from persons who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind" such as free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank deposits; accrued interest on "uncashed" savings bonds; exchange of money between relatives living in the same household; and gifts and lump-sum insurance payments, inheritances, and other types of lump-sum receipts.

The income statistics and the characteristics of the household refer to different periods in time, i.e., the income data refer to the 12 months prior to enumeration whereas the household characteristics refer to the date of enumeration. Thus, the income of the family does not include amounts received by persons who were members of the family during all or part of the income period if these persons no longer resided with the family at the time of enumeration. On the other hand, family income includes amounts reported by related persons who did not reside with the family during the income period but who were members of the family at the time of enumeration. For most families, however, the income reported was received by persons who were members of the family throughout the income period.

There may be significant differences in the income data between the Annual Housing Survey and other Bureau of the Census' surveys and censuses. For example, the time period for income data in the Annual Housing Survey refers to the 12 months prior to enumeration while other income data generally refer to the calendar year prior to the date of enumeration. Additional differences in the income data may be attributed to factors such as the various ways income questions are asked, the sampling variability and nonsampling errors between the Annual Housing Survey and other Bureau surveys and censuses, survey procedures and techniques, and processing procedures.

Value.—Value is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. The statistics on value are shown only for one-family homes on less than 10 acres, without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, mobile homes, and trailers are excluded from the value tabulations.

Gross rent.—The computed rent termed "gross rent" is the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water) and fuels (oil, coal, kerosene, wood, etc.), if these items are paid for by the renter (or paid for him by someone else, such as a relative, welfare agency, or friend) in addition to rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Thus, gross rent is intended to eliminate differentials which result from varying practices with respect to the inclusion of utilities and fuel as part of the rental payment. The estimated costs of water and fuels are reported on a yearly basis but they are converted to monthly figures in the computation process.

The statistics on rent exclude one-family houses on 10 acres or more. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1974 (Continued)

Section I – OCCUPIED UNITS *(Include URE's)*

17. When did . . . (head) move into this house (apartment)?

After April 1, 1970 ↘

(017) Month (01–12) / Year

1 ☐ 1965 to April 1, 1970
2 ☐ 1960 to 1964
3 ☐ 1950 to 1959
4 ☐ 1949 or earlier
} *Skip to 20*

18. In which county and State did . . . (head) live on April 1, 1970?

_____ County

_____ State

OR

(018) 0 ☐ Outside the United States – *Skip to 20*

19. Did . . . (head) live inside the limits of a city, town or village?

(019) 1 ☐ Yes – Name of place ↘

_____

2 ☐ No

(020) ☐☐☐☐☐

20. Was . . . (head) in the U.S. Armed Forces on April 1, 1970?

(021) 1 ☐ Yes
2 ☐ No

CHECK ITEM A

Mark all 3 parts (See item 17)

(1) Household head lived here last 90 days . . . . . (022) 1 ☐ Yes 2 ☐ No

(2) Household head lived here last winter . . . . . (023) 1 ☐ Yes 2 ☐ No

(3) Household head moved here during the last 12 months . . . . (024) 1 ☐ Yes 2 ☐ No

21a. How many living quarters, both occupied and vacant, are there in this house (building)?

(025)
1 ☐ Mobile home or trailer
2 ☐ One, detached from any other house
3 ☐ One, attached to one or more houses
4 ☐ 2 . . . . . .
5 ☐ 3 or 4 . . . . . .
} *Skip to 21d*
6 ☐ 5 to 9
7 ☐ 10 to 19
8 ☐ 20 to 49
9 ☐ 50 or more
} *Skip to 22a*

b. Is your mobile home (trailer) anchored, that is, secured with tiedowns or by other means?

(026) 1 ☐ Yes
2 ☐ No
3 ☐ Don't know

OBSERVATION

c. Is the mobile home in a group of 6 or more mobile homes?

(027) 1 ☐ Yes
2 ☐ No
} *Skip to 23*

OBSERVATION

d. Is any part of this property used as a commercial establishment?

(028) 1 ☐ Yes
2 ☐ No

OBSERVATION

e. Is any part of this property used as a medical or dental office?

(029) 1 ☐ Yes
2 ☐ No

Section I – OCCUPIED UNITS *(Include URE's)* – Continued

22a. How many stories (floors) are in this house (building)? *(Exclude basement)*

(030)
1 ☐ 1 to 3 – *Skip to 23*
2 ☐ 4 to 6
3 ☐ 7 to 12
4 ☐ 13 or more

OBSERVATION

b. Is there a passenger elevator in this building?

(031) 1 ☐ Yes
2 ☐ No

23. How many rooms do you have in your house (apartment)? Do not count bathrooms, porches, balconies, foyers, halls, or half-rooms.

(032) _____ Number

24. Does each room in your house (apartment) have a working electric wall outlet (wall plug)?

(033) 1 ☐ Yes
2 ☐ No

25. How many bedrooms do you have in your house (apartment)? Count rooms used mainly for sleeping even if used for other purposes.

(034) _____ Number

OR

0 ☐ None – *Skip to 28*

26a. Is it necessary to pass through anyone's bedroom to get from one room to another – excluding bathrooms?

(035) 1 ☐ Yes – *Skip to Check Item B*
2 ☐ No

b. Is it necessary to pass through anyone's bedroom to get to the bathroom?

(036) 1 ☐ Yes
2 ☐ No

CHECK ITEM B

(See cc 15a) Do not count persons with usual residence elsewhere unless entire household is URE.

☐ Household has 1 or 2 persons – *Skip to 28*
☐ Household has 3 or more persons – *Ask 27a*

27a. Are any bedrooms used for sleeping by 3 or more persons?

☐ Yes – **How many bedrooms are used for sleeping by 3 or more persons?**

(037)
1 ☐ 1 bedroom
2 ☐ 2 or more bedrooms
3 ☐ No – *Skip to 28*

b. Are any of the persons who use this bedroom (these bedrooms) 13 years of age or older?

(038) 1 ☐ Yes
2 ☐ No

28. Do you have complete kitchen facilities in this house (building); that is, a kitchen sink with piped water, a refrigerator and a range or a cookstove?

(039) 1 ☐ Yes – Exclusive use
2 ☐ Yes – Also used by another household
3 ☐ No – *Skip to 30*

29a. Are the kitchen sink, refrigerator, and range or cookstove all in usable condition?

(040) 1 ☐ Yes – *Skip to 30*
2 ☐ No

b. Which of the items are not in usable condition?
(Mark all that apply)

(041)
1 ☐ Kitchen sink
* 2 ☐ Refrigerator
3 ☐ Range or cookstove

30. Which fuel is used most for cooking?

(042)
Gas ↘
1 ☐ From underground pipes serving the neighborhood
2 ☐ Bottled, tank or LP
3 ☐ Electricity
4 ☐ Fuel oil, kerosene, etc.
5 ☐ Coal or coke
6 ☐ Wood
7 ☐ Other fuel
8 ☐ No fuel used

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1974 (Continued)

Section I – OCCUPIED UNITS *(Include URE's)* – Continued

31a. Do you get water from a public system (city water department, etc.) or private company, an individual well, or some other source (a spring, creek, river, cistern, etc.)?

(043) 1 ☐ A public system or private company – *Skip to 32*
2 ☐ An individual well – *Ask 31b*
3 ☐ Some other source – *Specify* ↘ _____ } *Skip to 32*

b. Is the well drilled or dug?

(044) 1 ☐ Drilled
2 ☐ Dug

32. INTERVIEWER *(Mark one)* ➡ Complete kitchen facilities *(See item 28)*
☐ Yes – *Skip to 33*
☐ No

Do you have piped water –

a. In this building?

(045) 1 ☐ Yes – *Skip to 33*
2 ☐ No

b. Available within 1/4 mile?

(046) 1 ☐ Yes
2 ☐ No } *Skip to 37b*

33. INTERVIEWER *(Mark one)* ➡ Household head lived here last 90 days *(See Check Item A (1), page 3)*
☐ Yes
☐ No – *Skip to 34*

a. At any time in the last 90 days were you COMPLETELY without running water?

(047) 1 ☐ Yes
2 ☐ No – *Skip to 34*

b. Were you completely without running water for 6 consecutive hours or more?

(048) 1 ☐ Yes
2 ☐ No . . . . . } *Skip to 34*
3 ☐ Don't know

c. How many times?

(049) 1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

d. What was the (most common) reason you were completely without water for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building?

(050) 1 ☐ Inside – *Specify problem* ↘ _____
2 ☐ Outside – *Specify problem* ↘ _____

34. Do you have complete plumbing facilities in this house (building); that is, hot and cold piped water, a flush toilet and a bathtub or shower?

(051) 1 ☐ Yes – Exclusive use
2 ☐ Yes – Also used by another household . . . . . } *Skip to 37a*
3 ☐ No . . . . . .

35. How many bathrooms do you have?
A complete bathroom is a room with a flush toilet, bathtub or shower, and a washbasin with piped water.
A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.

(Mark only one box)

(052) 1 ☐ Complete plumbing facilities but not in one room
* 2 ☐ 1 complete bathroom
One complete bathroom plus half bath(s)
3 ☐ Half bath does NOT have flush toilet
4 ☐ Half bath has flush toilet
5 ☐ 2 complete bathrooms } *Skip to 37a*
6 ☐ More than 2 complete bathrooms

(061) 1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

39. How is your house (apartment) heated – by gas, oil, electricity, or with some other fuel?

Gas →
(062) 1 ☐ From underground pipes serving the neighborhood
2 ☐ Bottled, tank, or LP
3 ☐ Fuel oil, kerosene, etc.
4 ☐ Electricity
5 ☐ Coal or coke
6 ☐ Wood
7 ☐ Other fuel
8 ☐ No fuel used

FORM AHS-2 (5-1-74)

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1974 (Continued)

Section I – OCCUPIED UNITS *(Include URE's)* – Continued

40. What type of heating equipment does your house (apartment) have? *(Read answer categories)* *(Mark heating equipment used most)*

(063)
1 ☐ A central warm-air furnace with ducts in individual rooms, or a heat pump
2 ☐ Steam or hot water system
3 ☐ Built-in electric units (permanently installed in wall, ceiling, or baseboard)
4 ☐ Floor, wall, or pipeless furnace
5 ☐ Room heaters with flue or vent burning gas, oil, or kerosene
6 ☐ Room heaters without flue or vent burning gas, oil, or kerosene } *Skip to 43*
7 ☐ Fireplaces, stoves, or portable room heaters } *Skip to 43*
8 ☐ Unit has no heating equipment – *Skip to 45*

41. INTERVIEWER *(Mark one)* Household head lived here LAST WINTER *(See Check Item A(2), page 3)*
☐ Yes
☐ No – *Skip to 42*

During the past winter, when your regular heating system was working, did you, at any time, have to use additional sources of heat because your regular system did not provide enough heat? Do not include additional sources of heat used solely because of the current energy shortage. (Additional sources of heat may be the kitchen stove, a fireplace, or a portable heater.)

(064)
1 ☐ Yes
2 ☐ No

42. How many rooms do you have without hot air ducts or registers, radiators, or room heaters? *(Exclude kitchen and bathrooms)*

(065)
1 ☐ None
2 ☐ 1 room
3 ☐ 2 rooms
4 ☐ 3 or more rooms

43. INTERVIEWER *(Mark one)* Household head lived here LAST WINTER *(See Check Item A(2), page 3)*
☐ Yes
☐ No – *Skip to 45*

a. At any time during the past winter, was there a breakdown in your heating equipment; that is, was it completely unusable for 6 consecutive hours or more?

(066)
1 ☐ Yes
2 ☐ No – *Skip to 44a*

b. How many times did that happen?

(067)
1 ☐ 1
2 ☐ 2
3 ☐ 3
4 ☐ 4 or more

44a. During the past winter did you completely close certain rooms for a week or longer because you couldn't get them warm? Do not include rooms closed solely for the purpose of saving fuel due to the current energy shortage. *(Include kitchens and bathrooms)*

(068)
1 ☐ Yes
2 ☐ No – *Skip to 45*

b. Which rooms? *(Mark all that apply)*

(069)
1 ☐ Living room
2 ☐ Dining room
3 ☐ One or more bedrooms
4 ☐ Other – *Specify* _____

FORM AHS-2 (5-1-74)

Section I – OCCUPIED UNITS *(Include URE's)* – Continued

45. INTERVIEWER *(See item 21a, page 3)* *(Mark one)*
☐ One-unit structure, or a mobile home or trailer
☐ Two-or-more-unit structure – *Skip to 46a*

Does your house (mobile home or trailer) have –

a. Storm windows, double-glazed glass, or other protective covering over the window openings, such as closeable shutters, plastic, etc.?

(070)
1 ☐ Yes, all windows
2 ☐ Yes, some windows
3 ☐ No

b. Storm doors?

(071)
1 ☐ Yes, all doors
2 ☐ Yes, some doors
3 ☐ No

c. Attic or roof insulation?

(072)
1 ☐ Yes
2 ☐ No
3 ☐ Don't know

46a. Do you have air conditioning?

(073)
1 ☐ Yes
2 ☐ No – *Skip to 47*

b. Do you have a central air-conditioning system or individual room units?

(074)
1 ☐ Central – *Skip to 47*
2 ☐ Room units

c. How many room units do you have?

(075)
1 ☐ 1
2 ☐ 2 or more

47. INTERVIEWER *(Mark one)* Household head lived here last 90 days *(See Check Item A(1), page 3)*
☐ Yes
☐ No – *Skip to 48*

a. Have any electric fuses or breaker switches blown in your house (apartment) in the last 90 days?

(076)
1 ☐ Yes
2 ☐ No . . . . . } *Skip to 48*
3 ☐ Don't know } *Skip to 48*

b. How many times did this happen?

(077)
1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

48. Is all the wiring in this house (apartment) concealed in the walls or in metal coverings? Do not count appliance cords, extension cords or chandelier cords.

(078)
1 ☐ Yes
2 ☐ No

49a. Does your house (apartment) have garbage collection service (either public or private)?

(079)
1 ☐ Yes
2 ☐ No . . . . . } *Skip to 49c*
3 ☐ Don't know } *Skip to 49c*

b. How often is the garbage collected?

(080)

4 ☐ 13 or more

OBSERVATION

b. Is there a passenger elevator in this building?

(285)
1 ☐ Yes
2 ☐ No

4. How many rooms are in this house (apartment)? Do not count bathrooms, porches, balconies, foyers, halls or half-rooms.

(286) _____ Number

5. Does each room in this house (apartment) have a working electric wall outlet (wall plug)?

(287)
1 ☐ Yes
2 ☐ No

6. How many bedrooms are in this house (apartment)?

(288) _____ Number

OR

0 ☐ None – *Skip to 8*

7a. Is it necessary to pass through a bedroom to get from one room to another, excluding bathrooms?

(289)
1 ☐ Yes – *Skip to 8*
2 ☐ No

b. Is it necessary to pass through a bedroom to get to the bathroom?

(290)
1 ☐ Yes
2 ☐ No

8. Does this house (building) have complete kitchen facilities; that is, a kitchen sink with piped water, a refrigerator, and a range or a cookstove?

☐ Yes – **Are these facilities only for the use of the intended occupants?**

(291)
1 ☐ Yes – Exclusive use
2 ☐ No – Also used by another household
3 ☐ No

FORM AHS-2 (5-1-74)

Section II – VACANT UNITS – Continued

9a. Does the water for this house (apartment) come from a public system (city water department, etc.) or private company, an individual well, or some other source (a spring, creek, river, cistern, etc.)?

(292)
1 ☐ A public system or private company – *Skip to 10*
2 ☐ An individual well
3 ☐ Some other source – *Skip to 10*

b. Is the well drilled or dug?

(293)
1 ☐ Drilled
2 ☐ Dug

10. Does this house (building) have complete plumbing facilities; that is, hot and cold piped water, a flush toilet and a bathtub or shower?

☐ Yes – **Are these facilities only for the use of the intended occupants?**

(294)
1 ☐ Yes – Exclusive use – *Ask 11*
2 ☐ No – Also used by another household – *Skip to 12a*
3 ☐ No – *Skip to 12a*

11. How many bathrooms does this house (apartment) have?
A complete bathroom is a room with a flush toilet, a bathtub or shower, and a washbasin with piped water.
A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.

(Mark only one box)

(295)
1 ☐ Complete plumbing facilities but not in one room
* 2 ☐ 1 complete bathroom

One complete bathroom plus half bath(s)
3 ☐ Half bath does NOT have flush toilet
4 ☐ Half bath has flush toilet
5 ☐ 2 complete bathrooms
6 ☐ More than 2 complete bathrooms

12a. Is this house (building) connected to a public sewer?

(296)
1 ☐ Yes – *Skip to 13*
2 ☐ No

b. What means of sewage disposal does it have?

(297)
1 ☐ Septic tank or cesspool
2 ☐ Chemical toilet
3 ☐ Privy
4 ☐ Use facilities in another structure
5 ☐ Other – *Describe* _____

13. What type of heating equipment does this house (apartment) have?
(If more than one, mark MAIN type of heating equipment)

(298)
1 ☐ A central warm-air furnace with ducts in individual rooms, or a heat pump
2 ☐ Steam or hot water system
3 ☐ Built-in electric units (permanently installed in wall, ceiling, or baseboard)
4 ☐ Floor, wall, or pipeless furnace
5 ☐ Room heaters with flue or vent burning gas, oil, or kerosene
6 ☐ Room heaters without flue or vent burning gas, oil, or kerosene
7 ☐ Fireplaces, stoves, or portable room heaters
8 ☐ Unit has no heating equipment
} *Skip to 15a*

14. How many rooms are there without hot air ducts or registers, radiators, or room heaters?
(Exclude kitchen and bathrooms)

(299)
1 ☐ None
2 ☐ 1 room
3 ☐ 2 rooms
4 ☐ 3 rooms or more

FORM AHS-2 (5-1-74)

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1974 (Continued)

Section II – VACANT UNITS – Continued

15a. Does this house (apartment) have air conditioning? (300) 1 ☐ Yes 2 ☐ No – *Skip to 16*

b. Does it have a central air-conditioning system or individual room units? (301) 1 ☐ Central – *Skip to 16* 2 ☐ Room units

c. How many room units? (302) 1 ☐ 1 2 ☐ 2 or more

16. Is all wiring in this house (apartment) concealed in the walls or in metal coverings? Do not count appliance cords, extension cords, or chandelier cords. (303) 1 ☐ Yes 2 ☐ No

17. Is there a basement in this house (building)? (A basement is an enclosed space in which persons can walk upright under all or part of the building) (304) 1 ☐ Yes 2 ☐ No

CHECK ITEM A

VACANCY STATUS (cc item 26)

FOR SALE ONLY

(See item 2a, page 25)
- ☐ One-unit structure – *Ask 18*
- ☐ Two-or-more-unit structure, or a mobile home or trailer – *Skip to 20*

FOR RENT

(See item 2a, page 25)
- ☐ One-unit structure – *Ask 18*
- ☐ Two-or-more-unit structure, or a mobile home or trailer – *Skip to 21*

☐ **ALL OTHERS** (Other vacants, units rented or sold, units held for occasional use and similar units) – *Skip to Check Item C*

(If rural transcribe from cc item 11b. If urban ask or fill by observation.)

18. Does this place have 10 acres or more? (305) 1 ☐ Yes, 10 acres or more 2 ☐ No, less than 10 acres

CHECK ITEM B

VACANT FOR SALE ONLY

If this is a –

☐ One-unit structure on less than 10 acres and there is no commercial establishment or medical or dental office on the property (*Items 2b and 2c, page 25*) – *Ask 19*

☐ All others – *Skip to 20*

VACANT FOR RENT

If this is a –

☐ One-unit structure on less than 10 acres – *Skip to 21*

☐ One-unit structure on 10 acres or more – *Skip to 26a*

Section II – VACANT UNITS – Continued

19. What is the sale price asked for this property? (306)

SHOW FLASHCARD B

1 ☐ Less than $2,500
2 ☐ $ 2,500 – $ 4,999
3 ☐ 5,000 – 7,499
4 ☐ 7,500 – 9,999
5 ☐ 10,000 – 12,499
6 ☐ 12,500 – 14,999
7 ☐ 15,000 – 17,499
8 ☐ 17,500 – 19,999
9 ☐ 20,000 – 24,999
10 ☐ 25,000 – 29,999
11 ☐ 30,000 – 34,999
12 ☐ 35,000 – 39,999
13 ☐ 40,000 – 49,999
14 ☐ 50,000 – 59,999
15 ☐ 60,000 or more

20. Is there a garage or carport on this property which is available for the use of occupants? (307) 1 ☐ Yes 2 ☐ No } *Skip to 26a*

21. What is the MONTHLY rent? (308) $_____ .00 Per month

(If rent is not to be paid by the month, mark the time period covered, compute the monthly rent in the "Notes" space, and enter the monthly rent on the line provided.)

(Include site rent for mobile homes if it is to be paid separately.)

(309) 1 ☐ More frequently than once a month 2 ☐ Less frequently than once a month 3 ☐ Once a month

Notes

22. Is this house (apartment) in a public housing project; that is, is it owned by a local housing authority or other public agency? (310) 1 ☐ Yes 2 ☐ No

23. In addition to rent, does the renter also pay for –

a. Electricity? (311) 1 ☐ Yes 2 ☐ No, included in rent 3 ☐ No, electricity not used

b. Gas? (312) 1 ☐ Yes 2 ☐ No, included in rent 3 ☐ No, gas not used

c. Water? (313) 1 ☐ Yes 2 ☐ No, included in rent or no charge

d. Oil, coal, kerosene, wood, etc.? (314) 1 ☐ Yes 2 ☐ No, included in rent 3 ☐ No, these fuels not used or obtained free

24. In addition to rent, does the renter also pay for garbage and trash collection? (315) 1 ☐ Yes 2 ☐ No

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1974 (Continued)

Section II – VACANT UNITS – Continued

CHECK ITEM C (See item 2a, page 25)
- ☐ One-unit structure, or a mobile home or trailer – *Skip to 26a*
- ☐ Two-or-more-unit structure – *Ask 25a*

25a. Does the owner of this building live on this property? (316) 1 ☐ Yes – *Skip to 26a* 2 ☐ No 3 ☐ Don't know

b. Is there a resident manager, superintendent or janitor who lives on this property? (317) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know

OBSERVATION
26a. Is the unit boarded-up? (318) 1 ☐ Yes 2 ☐ No

OBSERVATION
b. Are there any buildings (other than this building) that appear to be abandoned and/or are there any buildings with windows broken or boarded-up on this street? (319) 1 ☐ Yes 2 ☐ No

CHECK ITEM D (See item 2a, page 25)
- ☐ One-unit structure, or a mobile home or trailer – ***END INTERVIEW***
- ☐ Two-or-more-unit structure – *Ask 27a*

OBSERVATION
27a. Do the public halls in this building have light fixtures? (320) 1 ☐ Yes 2 ☐ No . . . . . 3 ☐ No public halls } *Skip to 28a*

b. Are the light fixtures in working order? (321) 1 ☐ All in working order 2 ☐ Some in working order 3 ☐ None in working order

28a. Are there loose, broken, or missing steps on any common stairways inside this building or attached to this building? (322) 1 ☐ Yes 2 ☐ No 3 ☐ No common stairways – ***END INTERVIEW***

b. Are all stair railings firmly attached? (323) 1 ☐ Yes 2 ☐ No 3 ☐ No stair railings } ***END INTERVIEW***

Notes

Section III – PURCHASES AND OWNERSHIP (Automobiles and Home Appliances)

Now I have some questions about vehicles and household items you might have.

1. Does anyone in this family own a car or station wagon? (324) ☐ Yes – How many? _____ 0 ☐ No
2. Does anyone in your family own any other 4-wheel vehicle such as a pickup truck, passenger van, jeep type vehicle, or other similar vehicle? (325) ☐ Yes – How many? _____ 0 ☐ No

Ask 3–19 for each vehicle owned. Ask for four newest if more than four are owned.	☐ Newest vehicle	☐ Second newest vehicle
3. What kind of vehicle is your (newest vehicle, second newest vehicle) – a car, station wagon, truck or what?	(326) 1 ☐ Car, station wagon 2 ☐ Pickup truck 3 ☐ Passenger van (with windows) 4 ☐ Motor home (self contained) 5 ☐ Other vehicle	(327) 1 ☐ Car, station wagon 2 ☐ Pickup truck 3 ☐ Passenger van (with windows) 4 ☐ Motor home (self contained) 5 ☐ Other vehicle
4. What is the model year?	(328) 19 _____	(329) 19 _____
5. How many cylinders does it have?	(330) 1 ☐ None (rotary) 2 ☐ Four 3 ☐ Six 4 ☐ Eight	(331) 1 ☐ None (rotary) 2 ☐ Four 3 ☐ Six 4 ☐ Eight
6. Was this vehicle new or used when you purchased it?	(332) 1 ☐ New – *Skip to 8* 2 ☐ Used – *Ask 7*	(333) 1 ☐ New – *Skip to 8* 2 ☐ Used – *Ask 7*
7. Was it purchased from an automobile dealer or a private party?	(334) 1 ☐ Auto dealer 2 ☐ Private party	(335) 1 ☐ Auto dealer 2 ☐ Private party
8. Is it used for any business purpose other than driving to and from work?	(336) 1 ☐ Yes – *Ask 9* 2 ☐ No – *Skip to 10*	(337) 1 ☐ Yes – *Ask 9* 2 ☐ No – *Skip to 10*
9. About what percentage of the mileage for this vehicle is for business purposes other than driving to and from work?	(338) _____ %	(339) _____ %
10. Was this vehicle purchased within the past 12 months; that is, since (month), 1973?	(340) 1 ☐ Yes – *Skip to 13* 2 ☐ No – *Ask 11*	(341) 1 ☐ Yes – *Skip to 13* 2 ☐ No – *Ask 11*
11. In what year was it purchased?	(342) 19 _____	(343) 19 _____
12. How many thousands of miles was this vehicle driven during the past 12 months?	(344) _____ ,000 *(Go to next vehicle or question 20)*	(345) _____ ,000 *(Go to next vehicle or question 20)*
13. In what month was it purchased?	(346) _____	(347) _____
14. How many thousands of miles has this vehicle been driven since you purchased it?	(348) _____ ,000 0 ☐ Less than 1,000	(349) _____ ,000 0 ☐ Less than 1,000
15. How much did the car cost after any deduction for a trade-in?	(350) $ _____ .00	(351) $ _____ .00
16. How much was your trade-in allowance?	(352) $ _____ .00 OR 1 ☐ No trade-in – *Go to next vehicle or q.20, page 32*	(353) $ _____ .00 OR 1 ☐ No trade-in – *Go to next vehicle or q.20, page 32*
17a. Twelve months ago; that is, in (month), 1973, did you own the vehicle that you traded in?	(354) 1 ☐ Yes 2 ☐ No	(355) 1 ☐ Yes 2 ☐ No
b. What type of vehicle was it?	(356) 1 ☐ Car, station wagon 2 ☐ Pickup truck 3 ☐ Passenger van (with windows) 4 ☐ Motor home (self contained) 5 ☐ Other vehicle	(357) 1 ☐ Car, station wagon 2 ☐ Pickup truck 3 ☐ Passenger van (with windows) 4 ☐ Motor home (self contained) 5 ☐ Other vehicle
18. What was the model year?	(358) 19 _____	(359) 19 _____
19. How many cylinders did it have?	(360) 1 ☐ None (rotary) 2 ☐ Four 3 ☐ Six 4 ☐ Eight	(361) 1 ☐ None (rotary) 2 ☐ Four 3 ☐ Six 4 ☐ Eight

SAMPLE DESIGN

The estimates are based on data collected in August through October 1974 for the Annual Housing Survey (AHS), which was conducted by the Bureau of the Census, acting as collection agent for the Department of Housing and Urban Development. The sample for this survey was spread over 461 sample areas (called primary sampling units), comprising 923 counties and independent cities with coverage in each of the 50 States and the District of Columbia.

Approximately 71,300 sample housing units (both occupied and vacant) were eligible for interview in the 1974 AHS. Of this number, 2,200 interviews were not obtained because, for occupied housing units, the occupants were not found at home after repeated calls or were unavailable for some other reason; or, for vacant housing units, no informed respondent could be found after repeated visits. In addition to the 71,300, there were also 7,000 sample units which were visited but found not to provide information relevant to the 1974 housing inventory.

Selection of sample areas.—The United States was divided into areas made up of counties and independent cities referred to as primary sampling units (PSU's). Then the PSU's were grouped into 376 strata, 156 of which consisted of only one PSU which was in sample with certainty. These 156 strata were mostly the larger SMSA's and were called self-representing (SR) since the sample from the sample area represented just that PSU. Each one of the other 220 strata consisted of a group of PSU's and were referred to as non-self-representing (NSR), since the sample of housing units from the sample PSU in a stratum represented the other PSU's in the stratum as well.

One PSU was selected from each NSR stratum with probability proportionate to the 1970 census population of the PSU. (This resulted in 220 NSR sample PSU's.) In addition, the NSR strata were grouped into 110 pairs and one stratum was picked at random from each pair. From this stratum, an additional PSU was selected independently of the other PSU selected from this stratum. Since the two PSU's were independently selected, it was possible for the same PSU to be selected twice. This occurred in 25 instances, producing an additional 85 NSR sample PSU's.

Designation of sample housing units for the 1974 enumeration.—The sample housing units designated to be interviewed in the 1974 enumeration consisted of the following categories, which are described in detail in succeeding sections.

1. All sample housing units that were interviewed in the 1973 enumeration.
2. All 1973 sample housing units that were either Type A noninterviews, i.e., units eligible to be interviewed, or Type B noninterviews, i.e., units not eligible for interview at the time of enumeration but which could become eligible in the future. (For a list of Type A and Type B noninterviews, see facsimile of 1974 AHS questionnaire, page 2.)
3. All sample housing units that were selected in the 1974 rural supplementation.
4. All sample housing units that were selected from the list of building permits issued since the 1973 enumeration. (This sample represents the housing units built since the 1973 enumeration.)

Selection of the 1973 sample housing units.—The overall sampling rate used to select the sample for the 1973 AHS was about 1 in 1,366. The within-PSU sampling rate for AHS was determined so that the overall probability of selection for each sample housing unit was the same (e.g., if the probability of selecting a NSR PSU was 1 in 10, then the within-PSU sampling rate would be 1 in 136.6).

Within the sample PSU's, a sample of the housing units enumerated in the 1970 Census of Population and Housing was selected for AHS. In addition, a sample of new construction building permits was also selected to represent the units constructed since the 1970 census. These samples were selected at about twice the rate mentioned previously (i.e., at 2 in 1,366), thereby producing a sample twice as large as needed. This sample was split into two equal-sized samples—one to be used for AHS and one to be held in reserve for possible future use for AHS. The procedure used to split this sample into half-samples is described in the next section.

The sample of 1970 census units was selected in several stages of sampling. The first step was the selection of a sample of census enumeration districts (ED's), administrative units used in the 1970 census. The probability of selection for an ED was proportionate to its 1970 population. The next step was to select a cluster of about four neighboring housing units within each sample ED. For most of the ED's, the selection was

accomplished using the list of addresses for the ED as compiled in the 1970 census. However, in those ED's where addresses were incomplete or inadequate (mostly rural areas), the selection process was accomplished using area sampling methods. These ED's were divided into segments, i.e., small land areas with well-defined boundaries, having an expected size of four, or a multiple of four, housing units. Those segments with an expected size which was a multiple of four were further subdivided into areas with an expected size of four housing units.

The sample of new construction units was selected from building permits issued since January 1970. Within each sample PSU, the building permits were chronologically ordered by month issued, and compact clusters of approximately four housing units were created. These clusters were then sampled for inclusion in the AHS at the sampling rate of 2 in 1,366. As a result of the area sampling methods described above, housing units constructed since the 1970 census in areas which do not issue building permits were brought into the sample.

Splitting of the sample.—The sample selection procedure as described above produced segments of size-four housing units for the sample taken from the census address frame, the new construction frame, and the area sampling frame (mainly rural areas). One can expect a minimum loss in precision for segments of size-four housing units in rural areas because of the heterogeneity of this type of housing unit. Segments of size two, however, were considered to be more optimal for sampling within those areas where one could expect neighboring units to be very similar (e.g., urban areas and new construction units). It is felt that if one were to go to segments of size-four housing units in this type of area, a significant loss in precision would result. A splitting operation was then carried out for segments selected from the census address and new construction frames. This consisted of halving each segment of four housing units that was selected for the sample. Two housing units from each segment were to be included in the survey and two were to be held in reserve. No splitting operation was carried out within the segments selected from the area sampling frame; every other area sample segment of four housing units was used for the survey and the remaining segments were assigned to the reserve sample.

Selection of supplemental sample housing units in rural areas.—In 1974, it was decided to increase the reliability of the AHS estimates of rural housing characteristics, by doubling the number of sample housing units from rural areas. This was accomplished by reactivating the reserve sample, selected in the original sampling operations in 1973, from rural areas only. For the reserve sample selected in census address and new construction segments, this meant that the other half of the segment (an expected two housing units) was reactivated in 1974 if the segment was rural. Similarly for area segments, this meant the entire reserve segment (an expected four housing units) was reactivated in 1974 if the segment was rural. This supplementation increased the overall probability of selection for sample housing units in rural areas to about 2 in 1,366; whereas, the overall probability of selection for sample housing units in urban areas remained at 1 in 1,366.

ESTIMATION

The 1974 AHS estimates employed a three-stage ratio estimation procedure. However, prior to implementation of the procedure, the basic weight (i.e., the inverse of the probability of selection) was adjusted to account for the Type A noninterview housing units encountered in AHS. This noninterview adjustment was done separately for occupied and vacant units. The noninterview adjustment was equal to the following ratio:

$$\frac{\text{Interviewed housing units + noninterviewed housing units}}{\text{Interviewed housing units}}$$

The first-stage ratio estimation procedure was employed for sample housing units from non-self-representing (NSR) PSU's only. The procedure was designed to reduce the contribution to the variance arising from the sampling of PSU's. The first-stage ratio estimation procedure takes into account the differences that existed at the time of the 1970 census in the distribution by tenure and residence of the housing population estimated from the sample NSR PSU's and that of the NSR housing population in each of the four census regions of the country.

The first-stage ratio estimate factor for each specified category was as follows:

$$\frac{\text{The 1970 census housing population in the residence-tenure category for all NSR strata in a census region}}{\text{Estimate of the housing population category using 1970 census housing counts for sample NSR PSU's in a census region}}$$

The numerators of the ratios were calculated by obtaining the 1970 census housing counts for each of the residence-tenure categories for each NSR stratum and summing these counts across the NSR strata in each census region. The denominators were calculated by obtaining the 1970 census housing counts for each of the residence-tenure categories for each NSR sample PSU, weighting these counts by the inverse of the probability of selecting that PSU and summing these weighted counts across the NSR PSU's in each census region.

The computed first-stage ratio estimate factor was then applied to the existing weight for each NSR sample unit in each first-stage ratio estimation category.

The second-stage ratio estimation procedure was only employed for AHS new construction sample units (i.e., sample units built April 1, 1970, or later). This procedure was designed to adjust the AHS sample estimates of new construction units to independently derived current estimates for six categories of new construction units (i.e., four categories for conventional new construction units and two for new construction mobile homes). These independent estimates

were considered to be the best estimates available for the number of new construction units. This adjustment was necessary so as to correct for known deficiencies in the AHS sample with regard to representation of new construction units (see the section on nonsampling error).

The second-stage ratio estimate factor for each specified category was as follows:

$$\frac{\text{Current independent estimate of new construction units in the category}}{\text{AHS sample estimate of new construction units in the category}}$$

The numerators of the ratios for conventional new construction units were derived from data based on the Survey of Construction (SOC), a survey of building permits conducted monthly by the Bureau of the Census. The numerators of the ratios for new construction mobile homes were derived from estimates of mobile home shipments adjusted to account for mobile homes shipped and actually occupied as primary residences.

The denominators of the ratios were obtained from the weighted estimates for the AHS sample units, using the existing weight after the first-stage ratio estimation procedure (i.e., the estimates employing the noninterview and first-stage adjustments).

The computed second-stage ratio estimate factor was then applied to the existing weight for each sample unit in each second-stage ratio estimation category.

The third-stage ratio estimation procedure was employed for all AHS sample units. This procedure was designed to adjust the AHS sample estimates of housing (i.e., the estimates employing the noninterview, first-stage, and second-stage adjustments) to independently derived current housing estimates for 4 types of vacant housing units and for 24 residence-tenure-race of head-sex of head categories for occupied housing units.

The third-stage ratio estimate factor for each specified category was as follows:

$$\frac{\text{Current independent estimate of housing units in the category}}{\text{AHS sample estimate of housing units in the category}}$$

The numerators of the ratios for occupied housing units were derived from data based on the Current Population Survey (CPS), a household survey conducted monthly by the Bureau of the Census. The numerators of the ratios for vacant housing units were derived from data based on the Housing Vacancy Survey (HVS), a quarterly vacancy survey conducted by the Bureau of the Census.

The denominators of the ratios were obtained from the weighted estimates for the AHS sample units, using the existing weight after the second-stage ratio estimation procedure.

The computed third-stage ratio estimate factor was then applied to the existing weight for each sample unit in each third-stage ratio estimation category.

The second- and third-stage ratio estimation procedures were repeated in an iterative process in order to bring the AHS estimates into close agreement with both sets of independent estimates (i.e., the independent estimates employed for the second-stage ratio estimation process as well as those employed for the third-stage ratio estimation process). The factors resulting from this iterative process were then applied to the existing weight on the appropriate records, and the resulting product was used as the final weight for tabulation.

The effect of the third-stage ratio estimation procedure, as well as the overall estimation procedure, was to reduce the sampling error for most statistics below what would have been obtained by simply weighting the results of the sample by the inverse of the probability of selection. The distribution of the housing population selected for the sample differed somewhat, by chance, from that of the nation as a whole in such basic housing characteristics as tenure, vacancy status, residence, race of head, and sex of head. These characteristics are probably closely correlated with other housing characteristics measured for AHS. Therefore, through the use of the three-stage ratio estimation procedure, one can expect the sample estimate to be improved substantially when the sample housing population is brought into close agreement with a known distribution of the entire housing population with respect to these basic housing characteristics.

RELIABILITY OF THE ESTIMATES

There are two types of possible errors associated with estimates based on data from sample surveys, sampling and nonsampling errors. The following is a description of the sampling and nonsampling errors associated with the AHS-National sample.

Sampling errors.—The particular sample used for this survey is one of a large number of possible samples of the same size that could have been selected using the same sample design. Even if the same schedules, instructions, and enumerators were used, estimates from each of the different samples would differ from each other. The deviation of a sample estimate from the average of all possible samples is defined as the sampling error. The standard error of a survey estimate attempts to provide a measure of this variation among the estimates from the possible samples and thus is a measure of the precision with which an estimate from a sample approximates the average result of all possible samples.

As calculated for this report, the standard error also partially measures the variation in the estimates due to response and enumerator errors (nonsampling errors), but it does not measure, as such, any systematic biases in the data. Therefore, the accuracy of the estimates depends on both the sampling and nonsampling errors measured by the standard error and biases and some additional nonsampling errors not measured by the standard error.

The sample estimate and its estimated standard error enable one to construct interval estimates such that the interval includes the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these surveyed under essentially the same general conditions and an estimate and its estimated stand-

ard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.

2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.

3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples may or may not be contained in any particular computed interval. However, for a particular sample one can say with specified confidence that the average result of all possible samples is included in the constructed interval.

The figures presented in the tables below are approximations to the standard errors of various estimates shown in this report. In order to derive standard errors that would be applicable to a wide variety of items and also could be prepared at a moderate cost, a number of approximations were required. As a result, the tables of standard errors provide an indication of the order of magnitude of the standard errors rather than the precise standard error for any specific item.

Tables I and II present the standard errors applicable to housing unit estimates in this report. Table I shows the approximate standard errors applicable to all housing unit estimates except those pertaining to the specified items in the table. The standard errors shown in table II should be used for those specified items. Linear interpolation should be used to determine standard errors for levels of estimates not specifically shown in tables I and II.

The reliability of an estimated percentage, computed by using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more.

Tables III and IV present the standard errors of estimated percentages. Table III shows the approximate standard errors of all estimated percentages of housing units except those pertaining to the specified items in table II.

The standard errors shown in table IV should be used for those specified items. Two-way linear interpolation should be used to determine standard errors for estimated percentages not specifically shown in tables III and IV.

For ratios where x is not a subclass of y, tables III and IV underestimate the standard error of the ratio when there is little or no correlation between x and y. For this type of ratio, a better approximation of the standard error may be obtained by letting the standard error of the ratio be approximately equal to:

$$(100)\,(x/y)\sqrt{\left(\frac{\sigma_x}{x}\right)^2 + \left(\frac{\sigma_y}{y}\right)^2}$$

Let x = the numerator
y = the denominator
σ_x = the standard error of the numerator
σ_y = the standard error of the denominator

Illustrations of the use of the standard error tables.—Illustration I.—Table 1 of this report shows that in the United States there were 20,242,000 owner-occupied housing units in 1974 with garbage collection service once a week. Interpolation in table I of this appendix shows that the standard error on an estimate of this size is approximately 142,000. Consequently, the 68-percent

500	0.6	0.9	1.4	1.9	2.2	2.7	3.1
1,000	0.4	0.6	1.0	1.3	1.6	1.9	2.2
2,500	0.3	0.4	0.6	0.8	1.0	1.2	1.4
5,000	0.2	0.3	0.4	0.6	0.7	0.9	1.0
10,000	0.1	0.2	0.3	0.4	0.5	0.6	0.7
25,000	0.1	0.1	0.2	0.3	0.3	0.4	0.4
50,000	0.1	0.1	0.1	0.2	0.2	0.3	0.3

confidence interval as shown by these data is from 20,100,000 to 20,384,000. Therefore, a conclusion that the average estimate (derived from all possible samples) of 1974 housing units of this type lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate, derived from all possible samples, lies within the interval from 20,015,000 to 20,469,000 housing units with 90 percent confidence and that the average estimate lies within the interval from 19,958,000 to 20,526,000 housing units with 95 percent confidence.

Table 1 also shows that of the 20,242,000, 1974 owner-occupied housing units with garbage collection service once a week, 1,482,000, or 7.3 percent, had a family or primary individual income between $5,000 and $6,999. Interpolation in table III (i.e., interpolation on both the base and percent) of this appendix shows that the standard error of the above percentage is approximately .2 percentage points. Consequently, the 68-percent confidence interval, as shown by these data, is from 7.1 to 7.5 percent; the 90-percent confidence interval is from 7.0 to 7.6 percent; and the 95-percent confidence interval is from 6.9 to 7.7 percent.

Illustration II.—Table 25 of this report shows that in the United States there were 450,000 owner-occupied housing units with head of Spanish origin in 1974 that had garbage collection service once a week. Interpolation in table II of this appendix shows that the standard error on an estimate of this size is approximately 29,000 (table II should be used since this estimate pertains to households with Spanish head). Consequently, the 68-percent confidence interval as shown by these data is from 421,000 to 479,000. Therefore, a conclusion that the average estimate (derived from all possible samples) of 1974 housing units of this type lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate, derived from all possible samples, lies within the interval from 404,000 to 496,000 housing units with 90 percent confidence and that the average estimate lies within the interval from 392,000 to 508,000 housing units with 95 percent confidence.

Table 25 also shows that of the 450,000, 1974 owner-occupied housing units with head of Spanish origin that had garbage collection service once a week, 30,000, or 6.7 percent, had a family or primary individual income between $5,000 and $6,999. Interpolation in table IV (i.e., interpolation on both the base and percent) of this appendix shows that the standard error of the above percentage is approximately 1.7 percentage points. Consequently, the 68-percent confidence interval, as shown by this data, is from 5.0 to 8.4 percent; the 90-percent confidence interval is from 4.0 to 9.4 percent; and the 95-percent confidence interval is from 3.3 to 10.1 percent.

Differences.—The standard errors shown are not directly applicable to differences between two sample estimates. The standard error of a difference between estimates is approximately equal to the square root of the sum of the squares of the standard errors of each estimate considered separately. This formula is quite

accurate for the difference between estimates of the same characteristic in two different areas or the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive correlation between the two characteristics, the formula will overestimate the true error.

Illustration of the computation of the standard error of a difference.—Table 1 of this report shows that in the United States there were 4,873,000 owner-occupied housing units in 1974 with garbage collection service once a week that had a family or primary individual income between $10,000 and $14,999. Thus, the apparent difference between the number of owner-occupied housing units with garbage collection service once a week that had a family or primary individual income between $5,000 and $6,999 and the number that had a family or primary individual income between $10,000 and $14,999 is 3,391,000. Table I shows that the standard error on an estimate of 1,482,000 to be approximately 45,000 and table I also shows that the standard error on an estimate of 4,873,000 to be approximately 81,000. Therefore, the standard error of the estimated difference of 3,391,000 is about

$$93{,}000 = \sqrt{(45{,}000)^2 + (81{,}000)^2}$$

Consequently, the 68-percent confidence interval for the 3,391,000 difference is from 3,298,000 to 3,484,000 housing units. Therefore, a conclusion that the average estimate of this difference, derived from all possible samples, lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, the 95-percent confidence interval is from 3,205,000 to 3,577,000 housing units, and, thus, we can conclude with 95 percent confidence that of the 1974 owner-occupied housing units with garbage collection service once a week, the number with an income between $10,000 and $14,999 was greater than the number with an income between $5,000 and $6,999.

Medians.—For the medians presented in certain tables, the sampling error depends on the size of the base and on the distribution upon which the median is based. An approximate method for measuring the reliability of the estimated median is to determine an interval about the estimated median such that there is a stated degree of confidence that the average median from all possible samples lies within the interval. The following procedure may be used to estimate confidence limits of a median based on sample data:

1. From the tables, determine the standard error of a 50-percent characteristic on the base of the median;
2. Add to and subtract from 50 percent the standard error determined in step 1; and
3. Using the distribution of the characteristic, read off the confidence interval corresponding to the two points established in step 2.

For about 68 out of 100 possible samples, the average median from all possible samples would lie between these two values.

A two-standard-error confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step 1. For about 95 out of 100 possible samples, the average median from all possible samples would lie between these two values.

Illustration of the computation of the 95-percent confidence interval of the median.—Table 1 of this report shows that the median family or primary individual income of owner-occupied housing units in the United States with garbage collection service once a week was $13,700 in 1974. The base of the distribution, from which this median was determined, is 20,242,000 housing units.

1. Table III shows that the standard error of 50 percent on a base of 20,242,000 is .5 percentage points.

2. To obtain a two-standard-error confidence interval on the estimated median, add to and subtract from 50 percent twice the standard error determined in step 1. This yields percentage limits of 49.0 and 51.0.

3. From table 1, it can be seen by cumulating the frequencies for the first four categories that 6,548,000 housing units, or 32.3 percent, had a family or primary individual income up to $9,999 and that an additional 4,873,000 or 24.1 percent, had a family or primary individual income between $10,000 and $14,999. By linear interpolation, the lower limit of the 95-percent confidence interval is found to be about

$$\$9{,}999 + (\$15{,}000 - \$10{,}000)\left(\frac{49.0 - 32.3}{24.1}\right) = \$13{,}500$$

Similarly, the upper limit of the 95-percent confidence interval is found to be about

$$\$9{,}999 + (\$15{,}000 - \$10{,}000)\left(\frac{51.0 - 32.3}{24.1}\right) = \$13{,}900$$

Thus, the 95-percent confidence interval ranges from $13,500 to $13,900.

Nonsampling errors.—In general, nonsampling errors can be attributed to many sources: Inability to obtain information about all cases, definitional difficulties, differences in the interpretation of questions, inability or unwillingness to provide correct information on the part of respondents, mistakes in recording or coding the data, and other errors of collection, response, processing, coverage, and estimation for missing data. As can be seen from the above list, nonsampling errors are not unique to sample surveys since they can, and do, occur in complete censuses as well.

Obtaining a measurement of the total nonsampling error associated with the estimates from a survey is very difficult, considering the number of possible sources of error.

Reinterview program.—For the 1974 AHS-National sample, a study was conducted to obtain a measurement of some of the nonsampling errors associated with the AHS estimates. A reinterview program was conducted for a sample of the AHS households. These households were revisited and answers to some of the questions on the AHS questionnaire were obtained again. The two observations (i.e., the original interview and the reinterview) were assumed to be two independent readings and thus were the basis

for the measurement of the accuracy of the AHS estimates.

As part of the reinterview, a check was made at each of these households to determine if the following was done during the original interview:

1. The correct unit was visited.
2. The correct number of housing units was interviewed at that address.
3. The correct information on "Year Built" was obtained.
4. The correct information on "Tenure" was obtained.
5. The correct information on "Household Composition" was obtained.
6. The correct information on "Type of Housing Unit" was obtained.
7. The correct information on "Occupancy Status" was obtained.

This check was for interviewer evaluation and control.

The results of the reinterview study are presented in the Census Bureau memorandum, "Reinterview Results for the Annual Housing Survey—National Sample: 1974." Twenty-five items were included in the reinterview, some for the first time. The estimated indexes of inconsistency of these items ranged from 4 to 35 with most items in the 20 to 30 range. (A 20-50 interval is considered moderate on a range of 0-100 with a high index associated with a high level of response variability.) The items with the higher levels of inconsistency tended to be the attitude and opinion items which were expected to have higher inconsistency levels.

The 1970 census reinterview results provided illustrations of possible nonsampling errors for some of the items which also appear in the AHS. For example, median value of homes was consistently underestimated by about 5 percent, and the average monthly costs of electricity and utility gas were consistently overestimated although the effect on the average gross rent figures was fairly small.

A possible explanation for the results of the AHS and census reinterview studies, as well as the surveys themselves, is that the data are based on the answers given by respondents, who may lack precise information. Also, the results of the reinterview studies are derived from sample surveys so there is sampling error associated with these estimates of nonsampling error.

Coverage errors.—With respect to errors of coverage and estimation for missing data, it was mentioned previously in the section on estimation that the AHS new construction sample had deficiencies with regard to the presentation of both conventional new construction in permit-issuing areas and new construction mobile homes. During the sampling of building permits, only those issued January 1, 1970, or later were eligible to be sampled to represent conventional new construction in permit-issuing areas. It had been assumed that units with permits issued prior to 1970 would have been completed by the time of the 1970 census (i.e., April 1970), and therefore would have been represented in the sample selected from 1970 census units. However, it has been estimated that the 1974 AHS sample misses about 6 percent (i.e., about 600,000 units) of all conventional new construction (i.e., in both permit-issuing and non-permit-issuing areas) because the permits for these units, which were built after April 1970, were issued before 1970.

In addition, unlike the procedure for conventional new construction, there is no sampling procedure specifically for new construction mobile homes. New mobile homes in area segments, however, do come into the AHS sample. In addition, new mobile homes in address segments also come into sample if the mobile homes are located in mobile home parks, identified as such in the 1970 census. However, new mobile homes in address segments that are located in mobile home parks, not in existence at the time of the 1970 census or not identified as such in the 1970 census, have no chance of coming into the AHS sample. It has been estimated that the 1974 AHS sample missed about one-fourth of all new mobile homes (i.e., about 400,000 units). The second-stage ratio estimation procedure was employed to reduce the effect of both these deficiencies, although some bias in the AHS sample still exists.

Rounding errors.—With respect to errors associated with processing, the rounding of estimates introduces another source of error in the data, the severity of which depends on the statistic being measured. The effect of rounding is significant relative to the sampling error only for small percentages, median number of persons, and median number of rooms when these figures are derived from relatively large bases. This means that confidence intervals formed from the standard errors given may be distorted, and this should be taken into account when considering the results of the survey.
