CURRENT POPULATION REPORTS

POPULATION ESTIMATES

March 23, 1962 | Washington 25, D.C. | Series P-25, No. 246

ESTIMATES OF THE POPULATION OF THE UNITED STATES, BY AGE, COLOR, AND SEX JULY 1, 1960 AND 1961

This report presents the first set of postcensal estimates of the population of the United States by age, color, and sex which takes account of the results of the 1960 Census. The estimates pertain to July 1, 1960 and 1961. The totals for all ages shown in this report differ from and supersede those shown in Current Population Reports, Series P-25, No. 245, and earlier reports.

Estimates are presented according to three definitions of the population--total including Armed Forces abroad, total resident, and civilian resident (table A). Figures corresponding to these three definitions for the census dates, April 1, 1960, and April 1, 1950, are also presented. The total resident population conforms to the definition of the United States population for which the principal tabulations are made for the census reports. Thus, it excludes residents of Puerto Rico, residents of other outlying areas under United States sovereignty or jurisdiction, and American citizens living abroad. As shown here, it includes Alaska and Hawaii for all dates. The "total population including Armed Forces abroad" includes the total resident population and the Armed Forces stationed in foreign countries or in the outlying areas, but not their dependents. The "civilian resident population" represents the total resident population less the Armed Forces stationed in the United States.

Table A.--AGE BY TYPE OF POPULATION: JULY 1, 1961
(Numbers in thousands)

Age	Total population including Armed Forces abroad		Total resident population		Civilian resident population	
	Number	Percent	Number	Percent	Number	Percent
All ages	183,642	100.0	182,943	100.0	181,124	100.0
Under 5 years	20,609	11.2	20,609	11.3	20,609	11.4
5 to 13 years	33,271	18.1	33,271	18.2	33,271	18.4
14 to 17 years	12,035	6.6	12,027	6.6	11,975	6.6
18 to 24 years	16,923	9.2	16,544	9.0	15,623	8.6
25 to 34 years	22,668	12.3	22,473	12.3	21,965	12.1
35 to 44 years	24,383	13.3	24,284	13.3	24,008	13.3
45 to 64 years	36,743	20.0	36,725	20.1	36,663	20.2
65 years and over	17,011	9.3	17,011	9.3	17,011	9.4

For sale by the Bureau of the Census, Washington 25, D.C. Price 10 cents.
Annual subscription (Series P-20, P-23, P-25, P-27, and P-60, combined), $3.00.

INDICATED CHANGES

The population of the United States including Armed Forces abroad continued to grow rapidly (by 2.0 percent) in the 15 months after the census of April 1, 1960 (table B). However, there was considerable variation in growth by age, color, and sex with consequent changes in the composition of the population.[1]

The population of high school age (14 to 17) grew by 873,000 or 7.8 percent in the 15 months from April 1960 to July 1961 (table B) as the first children of the postwar baby boom reached age 14. However, the population of school and preschool ages (5 to 13 and under 5), which had grown so rapidly in the previous decade, now had rates of growth somewhat less than the average for all ages.

[1] For trends in composition from 1950 to 1960 in terms of the total resident population, see U.S. Bureau of the Census, U.S. Census of Population: 1960. General Population Characteristics, United States Summary. Final Report PC(1)-1B, pp. X to XIII.

Table B.--POPULATION CHANGE, BY AGE: 1950 TO 1961

(Numbers in thousands)

Age	Population including Armed Forces abroad			Population change				Average annual change			
	July 1, 1961	Apr. 1, 1960	Apr. 1, 1950	Apr. 1, 1960, to July 1, 1961		Apr. 1, 1950, to Apr. 1, 1960		Apr. 1, 1960, to July 1, 1961		Apr. 1, 1950, to Apr. 1, 1960	
				Number	Percent	Number	Percent	Number	Rate of change	Number	Rate of change

25 to 34 years..	22,668	23,007	23,999	-339	-1.5	-992	-4.1	-271	-1.18	-99	-0.42
35 to 44 years..	24,383	24,181	21,572	+201	+0.8	+2,609	+12.1	+161	0.66	+261	1.14
45 to 64 years..	36,743	36,076	30,731	+667	+1.9	+5,345	+17.4	+534	1.46	+535	1.60
65 and over.....	17,011	16,560	12,295	+451	+2.7	+4,265	+34.7	+361	2.15	+426	2.98

The population aged 25 to 34 years declined slightly in the period since April 1960 whereas those aged 18 to 24 increased sharply--by 6.0 percent. On the other hand, both of these age groups had declined during the past decade. These are the ages for entering adult life, and their growth should have ramifications in college enrollment, family formation, growth of the labor force, and the availability of military manpower. The number of adults in the middle range of years (35 to 64) grew somewhat more slowly from 1950 to 1960 than the population of all ages. The population aged 65 and over on the other hand, grew by about 450,000 or 2.7 percent, or a little faster than the total population.

These varied trends are best illustrated by two summary measures. First, the average age of the population continues to drop. The median age (the one which exactly divides the older half of the population from the younger half) dropped from 29.5 years in 1960 to 29.1 in 1961 (table C). Secondly, the ratio of the population in the dependent ages to those in the working ages continues to increase. For every 100 persons aged 18 to 64, there were, in 1961, 82 persons under age 18 or age 65 and over (table D). In comparison, the ratio stood at 64 in 1950 and 60 in 1940. On the other hand, it was 80 at the beginning of this century.

Table C.--MEDIAN AGE OF THE POPULATION: 1900 TO 1961

(Beginning with 1940, medians are based on population including Armed Forces abroad; beginning with 1950, they are based on population including Alaska and Hawaii)

Year	Age (years)	Year	Age (years)
1961 (July 1)...	29.1	1930 (April 1)..	26.5
1960 (April 1)..	29.5	1920 (Jan. 1)...	25.3
1950 (April 1)..	30.2	1910 (April 15).	24.1
1940 (April 1)..	29.0	1900 (June 1)...	22.9

Table D.—DEPENDENCY RATIOS: 1900 TO 1961

(Number of persons under 18 and 65 years and over, per 100 persons ages 18 to 64. Beginning with 1940, ratios are based on population including Armed Forces abroad; beginning with 1950, they are based on population including Alaska and Hawaii)

Year	Dependency ratio	Year	Dependency ratio
1961 (July 1)....	82	1930 (April 1)...	68
1960 (April 1)...	81	1920 (Jan. 1)....	72
1950 (April 1)...	64	1910 (April 15)..	73
1940 (April 1)...	60	1900 (June 1)....	80

The excess of females over males in the population continues. For every 100 females, there were, in 1961, 97.7 males (table E). The ratio of males to females has been declining steadily for the past 50 years, reflecting the more rapid growth of the female population, the result of the greater increase of life expectancy among women than among men and of the passing of a generation of immigrants, among whom males predominated. The sex ratio in the older ages is also declining as a consequence. Under age 45, however, relatively little change is occurring in the sex ratio.

Table E.—SEX RATIO OF THE POPULATION, BY AGE: 1900 TO 1961

(Males per 100 females. Beginning with 1940, ratios are based on population including Armed Forces abroad; beginning with 1950, they are based on population including Alaska and Hawaii)

Year	All ages	Under 15 years	15 to 24 years	25 to 44 years	45 to 64 years	65 and over
1961 (July 1).....	97.7	103.5	101.5	96.9	95.3	81.6
1960 (April 1).....	97.8	103.4	101.3	96.9	95.8	82.8
1950 (April 1).....	99.3	103.7	99.8	97.2	100.2	89.7
1940 (April 1).....	100.7	103.0	98.5	98.5	105.2	95.5
1930 (April 1).....	102.5	102.6	97.9	101.8	109.1	100.5
1920 (Jan. 1).....	104.0	102.1	96.8	105.1	115.2	101.3
1910 (April 15).....	106.0	102.2	101.0	110.2	114.4	101.1
1900 (June 1).....	104.4	102.1	98.1	108.8	110.7	102.0

The nonwhite population continues to grow more rapidly than the white population. The nonwhite population increased by 3.0 percent from April 1960 to July 1961 (table F). The white population grew by 1.9 percent in the same period. By 1961, the nonwhite population was 21 million, or 11.5 percent of the total.

Although this growth differential between the white and nonwhite population is spread over most age groups, the nonwhite population aged 14 to 17 years and 18 to 24 years grew at a slower rate than the white population in these groups. The nonwhite population is considerably younger than the white. Its median

Table F.—CHANGES IN THE WHITE AND NONWHITE POPULATION, BY AGE: 1950 TO 1961

(Numbers in thousands. Population includes Armed Forces abroad)

Age	White					Nonwhite				
	Population			Annual rate of change		Population			Annual rate of change

45 to 64 years.....	33,267	32,673	28,090	1.44	1.51	3,477	3,403	2,641	1.71	2.53
65 and over.....	15,711	15,304	11,381	2.10	2.96	1,300	1,256	914	2.74	3.18

age in 1961 was 23.0 years as compared with 30.0 years for the white. The dependency ratio for the nonwhite population was higher. For every 100 persons in the working ages, there were 97 in the dependent ages in the nonwhite population. The corresponding ratio for the white population was 81.

At most ages the sex ratio is lower for the nonwhite than for the white population. Overall, in 1961, there were 95.0 males per 100 females in the nonwhite population compared with a ratio of 98.0 in the white (table G). Only for ages 65 and over is the sex ratio higher for nonwhites.

Table G.--SEX RATIOS OF THE WHITE AND NONWHITE POPULATION, BY AGE: JULY 1, 1961

(Ratios are based on population including Armed Forces abroad)

Age	White	Nonwhite
All ages	98.0	95.0
Under 15 years	104.0	100.1
15 to 24 years	102.2	96.2
25 to 44 years	98.0	88.5
45 to 64 years	95.3	95.1
65 years and over	81.1	88.6

SOURCES AND METHOD

The estimates shown in this report are based on statistics from the 1960 Census of Population; statistics and estimates of births and deaths provided by the National Vital Statistics Division, National Center for Health Statistics, United States Public Health Service; statistics on the number of immigrant aliens admitted to the United States as reported by the Immigration and Naturalization Service of the Department of Justice, supplemented by data reported by the government of Puerto Rico, and data on the size and distribution of the Armed Forces obtained from the Statistical Services Center of the Department of Defense and the various branches of service.[2]

The estimates for July 1, 1960 and 1961 have been made by the component method applied to the total population including Armed Forces abroad as of April 1960. This method entails bringing forward the population from the census date to the estimate date by aging the population in proportion to the length of the estimate period and by assigning births, deaths, and migrants during the estimate period to the proper age group.

The statistics on births and deaths are based on preliminary tabulations of vital statistics for 1960 and 1961. Births were corrected for underregistration by factors obtained by extending the results of the Birth Registration Test conducted by the Public Health Service in conjunction with the 1950 Census to subsequent years. No similar registration test was conducted in 1960.

The estimates are based on the results of the 1960 Census tabulated by age, color, and sex.[3] In the computations the five-year age groups were distributed by single years of age to facilitate the aging of the population. For ages under 25, each five-year age group has been distributed by single years proportionately to the estimated survivors of births for the corresponding period. Prior to 1935, however, the reported births were too incomplete to be used in this way. Therefore, fifth-difference osculatory interpolation was used for age groups beginning with 25 to 29 years. This form of interpolation provides a series of figures for single years of age which are consistent with the five-year age totals and show a smooth transition from one age group to the next. Complete single-year-of-age data from the census are not yet available except for ages under 21, and the extent of heaping and other age biases has not yet been investigated.

The estimates have not otherwise been adjusted for bias in the census enumeration. Such adjustments, although theoretically possible, have not been made because at this time it is not possible to evaluate the net undercount or overcount for most ages. Furthermore, there is evidence that the counting of, and age reporting for, young children is improving and the net error may now be no greater than in some other age groups. Preliminary estimates indicate that for children under 5 there was a net undercount of 2.6 percent in the 1960 Census as compared with 4.7 percent in

[2] This source of Armed Forces data is used because it provides a consistent series over time required for a continuing program of population estimates. Census data on the size and distribution of our military personnel, on the other hand, are available only for the census date.

[3] Ibid., pp. 1-153.

the 1950 Census.[4] For the group 5 to 9 years the corresponding figures are 2.4 percent and 3.6 percent, respectively. At a later date, statistics on age bias may be presented for the full age range.

Estimates of the population of the United States by age, color, and sex for each year from 1950 to 1959 appear in Current Population Reports, Series P-25, Nos. 146, 170, 193, and 212. These estimates are not comparable with the ones published in this report inasmuch as they do not take account of the results of the 1960 Census. Furthermore, they excluded Hawaii in 1959 and both Alaska and Hawaii for earlier years. Ages 55 to 69 in the nonwhite population were adjusted for misreporting of age. The estimates for 1950 to 1959 presented an alternative set of estimates of the population under 5 years of age adjusted for net census undercount. The estimates of net census undercount for this age group for 1950 are shown at the bottom of table 1 of this report.

Intercensal estimates of the population of the United States by age, color, and sex from 1950 to 1959 which take account of the 1960 Census counts and are comparable to the estimates shown in this report in other respects will be published later this year.

[4] Ibid., p. XII.

Table 1.—ESTIMATES OF THE TOTAL POPULATION OF THE UNITED STATES INCLUDING ARMED FORCES ABROAD, BY AGE, COLOR, AND SEX, JULY 1, 1961 AND 1960 WITH COMPARABLE FIGURES FOR APRIL 1, 1960 AND 1950

(Figures represent the sum of the total resident population and Armed Forces stationed outside the United States. Figures have been rounded to the nearest thousand; hence, the sums of parts may differ slightly from the totals shown. Medians are based on the unrounded figures)

Date and age	All classes			White			Nonwhite		
	Total	Male	Female	Total	Male	Female	Total	Male	Female
JULY 1, 1961

Table 2.—ESTIMATES OF THE TOTAL RESIDENT POPULATION OF THE UNITED STATES BY AGE, COLOR, AND SEX, JULY 1, 1961 AND 1960 WITH COMPARABLE FIGURES FOR APRIL 1, 1960 AND 1950

(Figures include Armed Forces stationed in the United States but excludes those stationed outside the United States. All figures (except for census counts) have been rounded to the nearest thousand; hence, the sums of parts may differ slightly from the totals shown. Medians are based on unrounded figures)
