CURRENT HOUSING REPORTS H-150-85

American Housing Survey for the United States in 1985

U.S. Department of Commerce
BUREAU OF THE CENSUS

U.S Department of Housing and Urban Development
OFFICE OF POLICY DEVELOPMENT AND RESEARCH

Acknowledgments

This report presents data from the American Housing Survey, which was sponsored by the U.S. Department of Housing and Urban Development and conducted by the U.S. Bureau of the Census. It was prepared primarily under the direction of **Duane T. McGough**, Director, Housing and Demographic Analysis Division, Department of Housing and Urban Development, and **Leonard J. Norry**, Acting Chief, Housing and Household Economic Statistics Division, Bureau of the Census.

Duane T. McGough, assisted by **Connie Casey, Kathryn Nelson, Paul Burke, David Crowe**, and **Iredia Irby**, was responsible for overseeing the American Housing Survey resultant report on behalf of the Department of Housing and Urban Development.

Within the Bureau of the Census, this report was developed in the Housing and Household Economic Statistics Division. It was prepared under the supervision of **Leonard J. Norry**, Assistant Division Chief for Housing Programs, by **Edward D. Montfort**, Chief, Coordination and Operations Branch, assisted by **Paul P. Harple, Jr.**, and **Jane S. Maynard**. Specific activities related to data collection procedures, statistical presentation, organization of the report, and preparation of text materials were performed by **Walter L. Busse, Mary Lynn Fessler, William L. Hartnett, Richard G. Kreinsen, Georgina Torres, and Barbara T. Williams**.

The operational aspects of the American Housing Survey were coordinated by the Demographic Surveys Division under the direction of **Thomas C. Walsh**, Chief, by **John C. Cannon**, assisted by **Anastacio Aguilar**. Systems and processing procedures were performed under the direction of **Thomas J. Meerholz**, Assistant Division Chief. The computer programming and processing were performed under the supervision of **D. Richard Bartlett**, assisted by **Thomas Blatt, Nathan P. Call, Thomas A. Iseman**, and **Janet Spratley**. **Kenneth M. McKinnis** was responsible for the clerical and keying procedures and scheduling.

The planning of the sample design, weighting, and computation of sampling variances and standard errors was developed in the Statistical Methods Division by **James Hartman**. Implementation of the sample selection and preparation of sample controls were performed by **Diane Barrett, Wendy Gelber, Gary Fenstamaker, Howard Speizer, Stephen Heacock, Sherry Kronhaus**, and **Juanita Jones** (Data Preparation Division, Jeffersonville, IN). The preparation of field sample control and reinterview procedures were performed by **Fay Nash** and **Barbara McCorkle**. Reinterview design, analysis, and programming were conducted by **Irwin Schreiner**.

Data collection, clerical processing, and data entry activities were administered by the Field Division under the management of **Stanley D. Matchett**, Chief. Publication planning, design, composition, editorial review, and printing planning and procurement were performed by the staff of Publications Services Division, **Walter C. Odom** , Chief. Publication coordination and editing were performed by **Linda H. Ambill**.

GENERAL

This report presents statistics on housing and household characteristics from the 1985 American Housing Survey National Sample (AHS-N), for the United States, inside and outside MSA's, urban and rural, and the four census regions. Prior to 1984, the AHS was called the Annual Housing Survey. The name was changed to the American Housing Survey since the National sample (AHS-N) is no longer conducted annually but every other year in odd numbered years. The last even numbered year for the National sample was 1980. The AHS was designed to provide a current series of information on the size and composition of the housing inventory, the characteristics of its occupants, changes in the inventory resulting from new construction, indicators of housing and neighborhood quality, and the characteristics of recent movers. The survey, performed for the Department of Housing and Urban Development, is authorized under sections 501 and 502 (d), 502 (e), and 502 (f) of the Housing and Urban Development Act of 1970, Title 12, United States Code 1701z-1 and 1701z-2. The Bureau of the Census is authorized under Title 31, United States Code, section 686, to perform special work or services for Federal agencies.

The statistics presented in this report are based on information from a sample of housing units. The information for the 1985 AHS-National was collected by interviewers from August 1985 through December 1985. (See paragraph "Sample size.")

This report is issued jointly by the Department of Housing and Urban Development and the Bureau of the Census. The content and procedures of the American Housing Survey were determined after consultation with a variety of users of housing data and through field pretesting. The data for many of the subjects covered in this report are the same as those collected in the 1980 Census of Housing and the 1973 through 1983 Annual Housing Survey. The data for a few items may not be comparable due to definitional changes in the American Housing Survey in 1984 and beyond (redesigned AHS). See the section titled "Qualifications of the data." A number of new items were introduced in the redesigned survey on subjects such as household income, type of primary mortgage, lot size, square footage of the housing unit, and heating degree days.

More detailed information on the technical and procedural matters covered in the text of the report can be obtained by writing to the Director, Bureau of the Census, Washington, DC 20233.

Sample size. The statistics presented in this report are based on a sample of housing units and are, therefore, subject to sampling variability. The designated sample consisted of approximately 47,200 housing units located throughout the United States. The sample was selected from units enumerated in the 1980 census and updated to include units constructed since 1980. Detailed information on the sample design, size of sample, estimation procedure, and sampling variability associated with these data is given in appendix B.

Organization of the text. The text consists of this introduction and appendixes A and B, which appear after the data tables. Appendix A describes the geographic area classifications, provides definitions and explanations of the subjects covered in this report, and contains a facsimile of the questionnaire and control card. Appendix B presents information on sample design, estimation, and accuracy of the data.

Contents of the tables. The tables in this report are organized into 10 chapters. Chapter 1 presents statistics on the total housing inventory including vacant units; chapter 2, statistics on total occupied housing units; chapter 3, statistics on owner-occupied housing units; chapter 4, statistics on renter-occupied housing units; chapter 5, on occupied housing units with a black householder; chapter 6, on occupied housing units with a householder of Hispanic origin; chapter 7, on occupied housing units with an elderly householder; chapter 8, on occupied housing units in central cities; chapter 9, on occupied housing units in the suburbs; and chapter 10, on occupied housing units outside metropolitan areas.

In chapter 1, table 1 presents general housing characteristics; tables 2 and 6, condition and quality of the unit and the neighborhood; table 3, size of the unit and lot; tables 4 and 5, equipment and fuels; and table 7, financial characteristics. In chapters 2 through 10, table 1 presents general housing characteristics; tables 2, 7, and 8, condition and quality of the units and the neighborhood; tables 3, 17, and 18, size of unit and lot; tables 4 through 6, equipment and fuels; table 9, household composition; tables 10 and 11, recent movers; tables 12 through 16 and 19 through 22, financial characteristics; table 23 presents heating degree days; and tables 24 and 25, previous residence characteristics. All tables are not shown in all chapters when the universes are restricted. For example, tables 14 through 16 are not shown in the renter-occupied chapter (chapter 4) as these tables are restricted to owner-occupied units.

Tables 20 through 22 are cross tabulations of financial characteristics by a variety of other characteristics. Table 20 cross tabulates income of families and primary individuals by selected housing and household characteristics. Table 21 cross tabulates monthly housing costs by most of the same characteristics as shown in table 20. Table 22 cross tabulates value by similar characteristics.

All of the financial characteristics shown in this report, except those in table 19, are shown for all renters and/or all owners. Prior to the redesigned AHS, the Annual Housing Survey reported characteristics such as value and rent for specified owners and specified renters only. Specified owner units are single-family owner-occupied units on less than 10 acres with no business or medical office. Specified renter units exclude single-family units on 10 acres or more. Table 19 in this report presents financial characteristics for specified owners and specified renters for the redesigned AHS. This table can be used when making comparisons with 1983 and earlier years.

Derived figures (medians, rates, etc.). Shown in this report are percents, medians, ratios, and rates. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half of the cases fall below the median and one-half of the cases exceed the median. Derived figures are not presented (but indicated by three dots (...)) if there are less than 25 sample cases in the distribution or the base.

The medians shown in this report are based on unrounded data and may differ from medians calculated from the published rounded data. All medians are rounded. The method of rounding depends on the characteristic being measured. For the method of rounding with each specific median, see the definitions in appendix A for the specific characteristic being measured.

The rental vacancy rates shown in chapter 1 are computed by dividing the total vacant for-rent units with a given characteristic by the total rental inventory with the same characteristic. The total rental inventory consists of the renter-occupied units, vacant units rented but not yet occupied at the time of interview, and the vacant units for rent.

Poverty level as used in the American Housing Survey is based on household income, rather than the income of families, unrelated subfamilies, and unrelated individuals separately as is the case in officially published poverty statistics. The AHS may underestimate poverty by as much as 6 percent. See page A-17 of appendix A for a complete discussion.

Shown in chapters 2 through 10 are data for units with severe or moderate problems. Units with severe problems include those units with severe problems in one or more of the following: plumbing facilities, heating equipment, electricity, upkeep, and hallways. Units with moderate problems include those units with moderate problems in one or more of the following: plumbing facilities, heating equipment, upkeep, hallways, and kitchens. A unit with one or more severe problems is counted as such whether or not it has a moderate problem and is not counted with units having moderate problems even if one exists. For a detailed description of how moderate and severe problems are derived, see appendix A, page A-14.

Symbols. A dash (-) signifies zero or a number which rounds to zero. Three dots (...) in a data column mean not applicable or that the base for a derived figure is too small for it to be shown. The symbol "NA" means not available.

Boundaries. The data shown in this report relate to the areas as defined for the 1980 census. See appendix A for a discussion of these areas.

Reports from the American Housing Survey. Reports from the AHS-National are published under series H-150. Any supplemental national reports are published under series H-151. Data for the national reports are collected every other year in odd numbered years from a sample of housing units that is independent of the sample housing units used to produce metropolitan reports. AHS-N reports present data for the United States, inside and outside

MSA's, urban and rural, and the four census regions. The first AHS national was conducted from August to December 1973.

The AHS-MS survey is conducted in 44 selected metropolitan areas divided into 4 groups of approximately 11 each with a group to be interviewed once every 4 years on a rotating basis. A listing of these areas by the year of their first interview can be found on page XIII. Reports from the AHS-MS are published under Series H-170. Any supplemental metropolitan reports are published under Series H-171.

SMSA reports from the Annual Housing Survey. From 1974 through 1983, the AHS SMSA surveys were conducted in 60 selected SMSA's originally divided into groups of 20 each, with a group to be interviewed once every 3 years on a rotating basis. A listing of the SMSA's by the original three groups can be found on page XIII. The years for which reports are available for individual SMSA's are provided on this listing.

ADDITIONAL DATA

Public-use microdata files. For the data user whose needs are not met by the available tabulations, the Census Bureau also has made available computerized microdata (individual respondent records) from both the metropolitan and national samples. Except for names and addresses, the AHS microdata provide essentially all the information obtained from each household or vacant unit. The Census Bureau's confidentiality guidelines prescribe that individuals and specific addresses remain anonymous.

Confidentiality guidelines further prescribe that individual records cannot be associated with areas having fewer than 100,000 people based on 1980 census results. The redesigned AHS national file identifies the four census geographic regions, urban/rural residence, and metropolitan/nonmetropolitan residence as well as all central cities and urbanized areas in the sample which satisfy the 100,000 population confidentiality requirement. The redesigned AHS metropolitan file identifies all central cities, counties, and zones (selected groups of census tracts) which have a 1980 population of 100,000 or more persons. Prior to the redesigned AHS, public-use microdata files only identified geographic areas having a 1970 census population of 250,000 persons.

Microdata computer tapes from the AHS are available on a cost-per-reel basis from Data User Services Division, Customer Services (Tapes). Bureau of the Census, Washington, DC 20233.

Microfiche of published reports. Microfiche copies for national and MSA published reports are available from Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, DC 20233.

DATA COLLECTION PROCEDURES

The 1985 American Housing Survey was conducted by interviewers who obtained the information from the occupants or, if the unit was vacant, from informed persons such as landlords, rental agents, or knowledgeable neighbors. The information reported by the interviewer reflected the situation at the time of the survey, which began in August 1985 and continued through December 1985.

Data were collected for sample housing units located in the counties and independent cities that make up the 394 sample areas for the 1985 AHS. A sample of housing units was selected in these areas from the 1980 census and updated by a sample of addresses from building permits to include housing units added since 1980. Estimates of the counts and characteristics of the 1985 inventory were obtained for these sample units.

A more detailed description of the survey design and sampling procedures can be found in appendix B.

PROCESSING PROCEDURES

The questionnaire and control card used for the redesigned AHS were of the conventional type on which the interviewer recorded the information by marking a precoded check box or by writing in the entries. Census clerks edited and coded the documents. The information was then data keyed directly to magnetic tape which was processed on the Census Bureau's computers through a number of editing and tabulating steps. A facsimile of both the control card and the questionnaire appears at the end of appendix A.

QUALIFICATIONS OF THE DATA

Since the estimates in this report are based on a sample, they may differ somewhat from the figures that would have been obtained from a complete census using the same questionnaire, instructions, and interviewers. Particular care should be exercised, therefore, in the interpretation of figures based on relatively small numbers of cases as well as small differences between figures. As in any survey work, the results are subject to errors of response and nonreporting and to sampling variability. For a further discussion of the accuracy of the data, see appendix B.

Comparison with the 1973 through 1983 Annual Housing Surveys. Most of the subjects in the 1985 American Housing Survey National sample (AHS-N) are the same as those published in the 1973 through 1983 Annual Housing Survey National Samples. The 1985 AHS-N, however, was completely redesigned. A new sample was chosen, a new questionnaire designed, and new weighting procedures developed. Most of the changes made in the 1985 AHS-N were made to improve the quality of the data. As a result of

these changes, however, several items in the 1985 AHS-N are not comparable to similar data in 1973 through 1983. All comparisons between 1985 and 1973 through 1983 should be made with caution. Listed below are major differences noted as a result of the redesign. The list may not be all inclusive. Differences noted as of the time of this publication include:

1983 to 1985 Total Inventory Increase. The total housing inventory increased from 93,519,000 housing units in 1983 to 99,931,000 in 1985, a total of 6,412,000 housing units. A significant proportion of this apparent growth is due to changes in the redesigned AHS-N. In 1985, vacant mobile homes were included in the inventory for the first time. There were 1,340,000 vacant mobile homes in 1985. In 1983, such units were not counted. In 1985, all vacant units were adjusted for undercount. This resulted in the addition of 400,000 to the 1985 inventory. No such adjustment was done in 1983. In 1985 the 1980 census count of occupied units was adjusted for undercount and projected to 1985 using the 1980 to 1985 Current Population Survey's (CPS) rate of change. The redesigned AHS-N was then ratio-estimated into this number. In the 1983 AHS, occupied units were ratio-estimated directly into CPS estimates. The 1985 occupied ratio-estimation procedure resulted in 200,000 additional occupied units that would not have been estimated if the 1983 procedures had been employed in 1985. For a complete description of the 1985 weighting procedures, see appendix B of this report. For a complete description of the 1983 weighting procedures, see appendix B of the 1983 Annual Housing Survey reports, Series H-150-83.

When considering growth between the 1983 AHS-N and 1985 AHS-N, the 1,340,000 1985 vacant mobile homes, the 400,000 1985 vacant undercount adjustment, and the 200,000 1985 occupied units added as a result of changes to the occupied weighting should not be considered. A more appropriate level of 1983 to 1985 inventory growth would be 4,472,000 housing units or 6,412,000 minus 1,340,000, minus 400,000, and minus 200,000.

1983 to 1985 Increase in Vacant Units. Seasonal vacant housing units grew from 1,845,000 in 1983 to 3,182,000 housing units in 1985, an increase of 1,337,000 units. Year-round vacants grew from 7,037,000 to 8,324,000, an increase of 1,287,000. Approximately 698,000 of the vacant seasonal growth and 642,000 of the vacant year-round growth are due to the inclusion of vacant mobile homes in 1985. An additional 98,000 of the seasonal growth and 302,000 of the year-round growth are due to the 1985 adjustment of vacant units for undercount. It was also discovered that the 1983 AHS weighting for vacant units was in error. The 1983 seasonal vacants were underestimated by approximately 239,000 units, while the 1983 year-round vacants were overestimated by 239,000 units.

When measuring change between 1983 and 1985 AHS-N for vacant units, vacant mobile homes and 1985 adjustments for undercount should not be considered, and adjustments should be made for the weighting errors discovered in the 1983 procedures. A more reasonable level of 1983 to 1985 growth for year-round vacants would be 582,000 housing units or 1,287,000 minus 642,000 year-round vacant mobile homes, minus 302,000 1985 adjustment for undercount, plus the 239,000 1983 overestimation of year-round vacants. A more reasonable level of 1983 to 1985 growth for seasonal vacants would be 302,000 housing units or 1,337,000 minus 698,000 seasonal vacant mobile homes minus 98,000 1985 adjustment for undercount, minus the 239,000 1983 underestimation of seasonal vacants.

Units in Structure. Year-round single-family detached units grew from 57,029,000 in 1983 to 58,773,000 in 1985, a 1,744,000 increase. For single-family attached, the number of units decreased from 4,453,000 in 1983 to 4,451,000 in 1985 or minus 2,000. Units in multiunit structures (2-or-more units in structure) grew from 26,193,000 in 1983 to 28,128,000, an increase of 1,935,000. In 1983, data on units in structure were based on the respondents answer to one question, "How many living quarters, both occupied and vacant, are there in this house (building)"? In 1985, data on units in structure were based on the respondents answer to a series of questions (see item 20 through 23 on page 3 of the questionnaire in appendix A). The method of collecting units-in-structure data in 1985 was revised as previous AHS experience has shown the concept to be difficult for respondents. Respondents particularly had difficulty distinguishing between single-family attached and units in multiunit structures. It is estimated that the 1983 AHS overestimated single-family detached by 125,000 units and single-family attached by 696,000 units. The 1983 AHS underestimated units in multiunit structures by approximately 898,000. More reasonable levels of 1983 to 1985 growth are 1,869,000 units for single-family detached (1,744,000 + 125,000), 694,000 for single-family attached (-2,000 +696,000), and 1,037,000 for units in multiunit structures (1,935,000 - 898,000.)

Mobile Homes. Occupied mobile homes grew from 3,999,000 in 1983 to 4,754,000 in 1985, an increase of 755,000. This level of growth seems excessive as data from the Survey of Mobile Home Placements shows approximately 570,000 new mobile homes placed for residential use during the same time period. In the 1985 redesigned AHS-N, estimates of mobile homes with a model year of 1980 or later were

ratio-estimated into independent counts of mobile placements from the Survey of Mobile Home Placements. No such adjustment was done in 1983. The 1983 count of occupied mobile homes may be deficient leading to an unrealistic estimate of 1983 to 1985 changes.

Rooms in Unit. The number of year-round units with 1 or 2 rooms dropped from 4,056,000 in 1983 to 2,486,000 in 1985. As a result, the median number of rooms per unit increased from 5.1 to 5.3. This does not necessarily indicate an increase in the average size of housing units. In the 1983 AHS, respondents answered a single question asking for a total count of rooms in the unit. The potential to miss specific rooms is high in a question of this type. In the 1985 AHS, respondents were asked for a count of each specific type of room. The answers to these questions are then added together in the tabulations to provide a total count of rooms. Far fewer rooms are missed in this series of questions which has apparently resulted in lower counts of 1- and 2-room units.

Plumbing Facilities. The data on plumbing facilities are suppressed in this report. Changes in the questionnaire have resulted in serious deficiencies in these data. The number of year-round units lacking complete plumbing facilities dropped from 2,233,000 in 1983 to 405,000 in 1985, a drop of 1,828,000 units. This is not realistic considering the fact that year-round units lacking plumbing dropped from 2,375,000 in 1981 to 2,233,000 in 1983, a 142,000 unit decrease. In the 1983 AHS and earlier, respondents were asked a question on complete plumbing facilities which specified to the respondent the components necessary for complete plumbing (i.e. hot and cold piped water, a flush toilet, and a bathtub or shower). The question further insured that these facilities were **only** for the use of the occupants of the unit in which they were located (exclusive use). In those units with complete plumbing, an additional question was asked as to how many bathrooms there were.

In the 1985 AHS, respondents are first asked how many bathrooms they have. If they answer one or more, questions on plumbing facilities are not asked; the unit is assumed to have complete plumbing facilities for exclusive use. Although the 1985 definition of a bathroom requires hot and cold piped water, a sink, a flush toilet, and a bathtub or shower, this definition is not read to the respondent. Also, nothing in the question requires the bathroom to be **only** for the use of the occupants of the sample unit (exclusive use). We believe that the 1985 AHS is counting a significant number of units as having complete plumbing for exclusive use of because respondents for these units reported having a bathroom when, in fact, either the bathroom does not contain all plumbing facilities or the facilities are shared by persons living in another unit. Based on previous years AHS data, we believe that "completeness" is more of a problem than "exclusive use."

In future AHS surveys, the questionnaire items on bathrooms and plumbing will be redesigned to provide more accurate estimates. Units lacking complete plumbing facilities are included in the count of units with severe physical problems. The number of units with severe physical problems may also be underestimated. The level of underestimation, however, may not be too large, as units which should have been counted as having severe problems due to plumbing but were not so counted, may still be included as having severe problems for some other reason (heating, electrical, upkeep, or hallway problems).

Kitchens. The number of year-round units lacking complete kitchen facilities increased from 1,493,000 in 1983 to 3,806,000 in 1985 or by 2,313,000 units. For occupied units, the increase was 489,000 units, from 827,000 in 1983 to 1,316,000 in 1985; while, for vacant units, the increase was 1,825,000 units, from 665,000 in 1983 to 2,490,000 in 1985. The large increase for vacant units is, to a considerable extent, due to the fact that, in 1983, vacant units lacking kitchen facilities were counted as having them if it was intended for future occupants to have the facilities. It was felt that this 1983 instruction caused underestimates of units lacking kitchen facilities in some areas of the country where kitchen facilities are made available to prospective tenants. The instruction was dropped in 1985. In the 1985 AHS, vacant units are counted as lacking complete kitchen facilities if one or more of the facilities is absent regardless of what will be present when new occupants move in. It is now felt that the 1985 procedures produce overestimates of units lacking facilities in areas of the country where the facilities are normally provided by the incoming tenants. It may well be that a simple, ideal way of measuring kitchen facilities for vacant units does not exist.

Some of the 1983 to 1985 increase in vacant units lacking complete kitchen facilities and much of the 1983 to 1985 increase in occupied units lacking complete kitchen facilities is due to the fact that, in 1985, the existence of each component of a kitchen is asked separately. In 1983, the existence of complete kitchen facilities was obtained through the answer to one question. It is felt that the 1983 AHS underestimated the number of units lacking complete kitchen facilities as some of the respondents who reported having complete kitchen facilities lacked one or more of them. This is less likely to happen when the existence of each facility is asked separately as in the 1985 AHS.

In addition to the inclusion of vacant mobile homes as housing units as mentioned above, there are two additional minor changes to the housing unit definition. One minor difference in the definition is the 1973 through 1983 AHS requirement that a housing unit must have either direct access from the outside or through a common hallway, or complete kitchen facilities for the exclusive use of the occupants. In the redesigned American Housing Survey, the complete kitchen facilities alternative was dropped, with direct access required of all units. A second minor difference is in the definition of group quarters. In the 1973 through 1983 Annual Housing Survey, a household containing 5 or more persons unrelated to the householder was considered to be group quarters. In the redesigned AHS-N, the cutoff was changed to 9 or more persons unrelated to the householder.

There are also some minor differences in the definition or presentation of several subjects. The 1973 through 1983 AHS reports presented data on gross rent for renter-occupied units, contract rent for vacant for-rent units, and selected monthly housing costs for owner-occupied housing units. The same basic data is presented for all three groups in the redesign except that the subject is titled "monthly housing costs" for all three universes on all tables to ease presentation of the data on tables where more than one of the universes occur. For a detailed definition of "monthly housing costs" see appendix A-20.

The characteristics of new-construction units are based on units constructed during the last 4 years in the 1985 AHS-N. Prior to the redesigned AHS-N, characteristics of new construction were based on units built since the last survey year, which was a 1-year period except for the 1983 survey that was a 2-year period.

In the redesigned AHS-N, some of the data for recent movers are based on the householder's characteristics and some are based on characteristics of the respondent who may or may not be the householder. Before the redesigned AHS-N, all recent-mover data were based on the householder's characteristics.

A number of new items were introduced in the redesigned AHS-N including lot size, square footage, units with severe or moderate problems, elderly householder, heating degree days, and detailed information on mortgages, etc. For detailed definitions and qualifications of these and other items, please see appendix A.

Comparisons with the 1980 Census of Housing. Care should be exercised in making comparisons between the redesigned AHS-N reports and the 1980 Census of Housing results. Differences in the data may reflect such factors as the use of direct interview in the AHS contrasted with extensive use of self-enumeration in the census, the time periods during which the data were collected (possible seasonal effects), sample designs, estimation procedures used, sampling variability of the estimates, and the processing procedures.

See the sections on "Comparability with the 1980 Census of Housing Data" in appendix A for further discussion.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director of the Bureau of the Census, Washington, DC 20233.

DATA FOR MINORITY HOUSEHOLDS

In the 1985 AHS National report, separate chapters are shown for housing units with a Black householder and housing units with a Hispanic householder (chapters 5 and 6, respectively).

Table 2-5. **Fuels - Occupied Units**

[Numbers in thousands. ... means not applicable or sample too small. - means zero or rounds to zero.]

	Characteristics	Total occupied units	Tenure		Housing unit characteristics				Household characteristics				
			Owner	Renter	New construction 4 yrs	Mobile homes	Physical problems		Black	Hispanic	Elderly (65+)	Moved in past year	Below poverty level
							Severe	Moderate

Table 4-7. Additional Indicators of Housing Quality - Renter Occupied Units

[Numbers in thousands. ... means not applicable or sample too small. - means zero or rounds to zero.]

	Characteristics	Total occupied units	Housing unit characteristics				Household characteristics				
			New construction 4 yrs	Mobile homes	Physical problems		Black	Hispanic	Elderly (65+)	Moved in past year	Below poverty level
					Severe	Moderate					
1	**Total**	**32 280**	**1 940**	**848**	**1 108**	**3 178**	**5 593**	**3 066**	**5 062**	**12 168**	**8 163**
	Selected Amenities[1]										
2	Porch, deck, balcony, or patio	18 551	1 420	479	397	1 819	2 968	1 339	2 484	7 382	4 129
3	Not reported	31	-	3	4	6	4	3	2	22	9
4	Telephone available	27 889	1 730	583	709	2 460	4 383	2 376	4 596	10 002	6 107
5	Usable fireplace	3 679	513	36	69	258	342	201	295	1 718	408
6	Separate dining room	7 668	319	94	176	732	1 275	592	998	2 712	1 625
7	With 2 or more living rooms or recreation rooms, etc.	3 307	156	37	49	291	405	174	361	1 171	508
8	Garage or carport included with home	9 360	585	110	94	672	814	843	1 093	3 575	1 374
9	Not included	22 851	1 355	738	1 014	2 498	4 771	2 215	3 953	8 574	6 778
10	Offstreet parking included	15 647	1 271	667	433	1 459	2 779	1 118	2 465	6 703	4 151

AREA CLASSIFICATIONS

Regions. Regions are large groups of States that form the first-order subdivisions of the United States for census purposes. The four regions are the Northeast, Midwest, South, and West. Data for the regions are shown in chapters 2 through 10.

Places. Two types of places are recognized by the Census Bureau, incorporated places and census designated places as defined below.

Incorporated places. Incorporated places are those which are incorporated under the laws of their respective states as cities, boroughs, towns and villages.

Census designated places (CDP's). The Census Bureau has delineated boundaries for closely settled population centers without corporate limits. To be recognized for the census, CDP's must have a minimum population. If located in urbanized areas which have one or more cities of 50,000 or more population, CDP's must have a minimum population of 5,000. All other areas except for areas in Alaska and Hawaii require a minimum population of 1,000. The requirements are a population of 25 in Alaska and 300 in Hawaii.

Place size as shown in this report reflects the place size as of the 1980 census. More detailed information on places appears in the 1980 Population Census PC (1)-A reports.

Urban and rural residence. As defined for the 1980 census, urban housing comprises all housing units in urbanized areas and in places of 2,500 or more inhabitants outside urbanized areas. More specifically, urban housing consists of all housing units in (a) places of 2,500 or more inhabitants incorporated as cities, villages, boroughs (except in Alaska and New York) and towns (except in the New England States, New York, and Wisconsin), but excluding those housing units in the rural portions of extended cities; (b) census designated places of 2,500 or more inhabitants; and (c) other territory, incorporated or unincorporated, included in urbanized areas. Housing units not classified as urban constitutes rural housing. Information on the historical development of the urban-rural residence definition appears in the 1980 Census of Population Report, *Characteristics of the Population, Number of Inhabitants,* PC80-1-A.

Urbanized areas. The major objective of the Census Bureau in delineating urbanized areas is to provide a better separation of urban and rural housing in the vicinity of large cities. In the 1980 census, an urbanized area comprised an

incorporated place and adjacent densely settled surrounding area that together have a minimum population of 50,000. For more information on urbanized areas, refer to the 1980 Population Census PC(1)-A reports.

Farm-nonfarm residence. In rural areas, occupied housing units are subdivided into rural-farm housing, which comprises all rural units on farms and rural-nonfarm housing, which comprises the remaining rural units. Occupied housing units are classified as farm units if the sales of agricultural products amounted to at least $1,000 during the 12-month period prior to the interview. Occupied units in rural territory which do not meet the definition for farm housing are classified as nonfarm.

Metropolitan statistical areas. Metropolitan statistical areas (MSA's) shown in the American Housing Survey are defined by the Office of Management and Budget. By current standards, as published in the Federal Register on January 3, 1980, an area qualifies for recognition as an MSA in one of two ways: if there is a city of at least 50,000 population, or a Census Bureau-defined urbanized area of at least 50,000 with a total metropolitan population of at least 100,000 (75,000 in New England). Except in the New England States, an MSA is defined in terms of entire counties. In New England, MSA's are composed of cities and towns. In addition to the county containing the main city, additional counties are included in an MSA if they are socially and economically integrated with the central county. An MSA may contain more than one city of 50,000 population and may cross State lines.

Primary metropolitan statistical areas. Within the metropolitan statistical areas classified as Level A (population size of 1,000,000 or more), some areas may qualify for separate recognition as primary metropolitan statistical areas (PMSA's). PMSA is a large urbanized county, or cluster of counties, that demonstrates very strong internal economic and social links, in addition to close ties to the other portions of the Level A metropolitan statistical area.

Consolidated metropolitan statistical areas. Consolidated metropolitan statistical areas (CMSA) are a Level A metropolitan statistical area when at least two primary metropolitan statistical areas are defined.

Central cities. Every metropolitan statistical area has at least one central city, which is usually its largest city. Smaller cities are also identified as central cities if they have at least 25,000 population and meet the following two commuting requirements. First, the city must have at least 75 jobs for each 100 residents who are employed. Second, no more than 60 percent of the city's resident workers may commute to jobs outside the city limits. In addition, any city with at least 250,000 population or at least 100,000 persons working within its corporate limits qualifies as a central city even if it fails to meet the above two commuting requirements. Finally in certain smaller metropolitan statistical areas, there are places with between 15,000 and 25,000 population that also qualify as central cities, because they are at least one-third the size of the metropolitan statistical area's largest city and meet the two commuting requirements.

Standard metropolitan statistical areas. The definitions of standard metropolitan statistical areas (SMSA's) used in the Annual Housing Survey prior to 1984 corresponded to the 243 SMSA's used in the 1970 census. Except in the New England States, an SMSA is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities.

DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

General

As stated in the introduction, the 1985 American Housing Survey was conducted by personal interview. The survey interviewers were instructed to read the questions directly from the questionnaire. The definitions and explanations given for each subject are, to a considerable extent, drawn from various technical and procedural materials used in the collection of the data. These materials helped the field interviewers to understand more fully the intent of each question and thus to resolve problems or unusual cases. Additional explanatory information has been added to this portion of the text to assist the user in understanding the statistics.

Comparability with the 1973 through 1983 Annual Housing Survey data. Most of the concepts and definitions used in the 1973 through 1983 Annual Housing Survey are essentially the same for items that also appear in the American Housing Survey in 1984 and beyond (redesigned AHS).

There are one major and two minor differences in the housing unit definition. The major difference is that the redesigned American Housing Survey includes vacant mobile homes as housing units. The 1973 through 1983 Annual Housing Surveys excluded these units. A minor difference in the definition is the 1973 through 1983 requirement that a housing unit must have either direct access from the outside or through a common hallway, or complete kitchen facilities for the exclusive use of the occupants. In the redesigned American Housing Survey,

the complete kitchen facilities alternative was dropped with direct access required of all units. A second minor difference is in the definition of group quarters. In the 1973 through 1983 Annual Housing Surveys, a household containing 5 or more persons unrelated to the householder was considered to be group quarters. In the redesigned American Housing Survey the cutoff was changed to 9 or more persons unrelated to the householder. Differences which relate to specific subject areas are discussed under the subjects in this appendix.

Some differences in the data may exist for subjects covered in both the 1973 through 1983 AHS and the redesigned AHS as a result of the redesign of the questionnaires used. For a detailed discussion of those characteristics which show significant differences between 1973 through 1983 AHS and the redesigned AHS see the "qualifications of the data section" in the introduction.

Comparability with 1980 Census of Housing data. The concepts and definitions are essentially the same for items that appear in both the 1980 census and the redesigned AHS survey.

There is a major difference, however, in the time period of the recent mover classification. In the redesigned American Housing Survey, recent movers are households that moved into their unit during the 12 months prior to interview, a period of 1 year or less. In the 1980 Census of Housing, Volume III, *Mover Households* reports, the time period was from January 1, 1979, through March 31, 1980, a period of 15 months or less.

A variety of data on mortgages and homeowner properties are presented in the 1980 Census of Housing, Volume V, *Residential Finance* report. Differences in the concepts and definitions in the redesigned American Housing Survey and Volume V include the following: The basic unit of tabulation in AHS is the housing unit; in Volume V, it is the property. All the data in AHS are provided by the occupant; in Volume V, mortgage is reconciled with responses from the lender.

In the redesigned American Housing Survey, units are classified as new construction if constructed 4 years or less from the date of interview. In the 1980 Census of Housing, Volume VI, *Components of Inventory Change* report, units are classified as new construction if constructed in 1974 through October of 1980.

Data on poverty level in the 1980 Census of Housing do not contain the income of household members unrelated to the householder. In the redesigned American Housing Survey, data on poverty level include the income of all household members whether or not they are related to the householder.

Differences between the redesigned American Housing Survey data and the 1980 census may also be attributed to several other factors. These include the extensive use of self-enumeration in the census in contrast to personal interview in the survey; differences in processing procedures and sample designs; the sampling variability associated with the sample data from the redesigned AHS; the nonsampling errors associated with the survey estimates; and the nonsampling errors associated with census data.

Comparability with 1980 Census of Population data. In the 1980 census, data for years of school completed were based on responses to two questions: the highest grade or year of regular school each household member attended, and whether or not that grade was completed. In the redesigned AHS, data for years of school completed were based on responses to a single question: the highest grade or year of regular school completed by the householder. Therefore, the redesigned AHS may overstate the education level of the householder; that is, respondents may have reported the grade or year the householder was currently enrolled in or had last been enrolled in whether or not the grade or year was completed.

Comparability with Current Construction Reports from the Surveys of Construction. The Census Bureau issues several publications under the general titles, "Current Construction Reports." The data for these reports are primarily from the Surveys of Construction.

The Surveys of Construction consists of approximately 8,300 permit-issuing places throughout the United States. The reports from the survey contain current data on housing starts and completions, construction authorized by building permits, housing units authorized for demolition in permit-issuing places for selected areas, new one-unit structures sold and for sale, characteristics of new housing, and value of new construction put in place. The concepts and definitions used in this report differ from some of those used in the Surveys of Construction. The major difference is that the Surveys of Construction shows counts and characteristics of housing units in various stages of construction through completion. The redesigned American Housing Survey shows counts and characteristics of the existing housing inventory. Additional differences between the redesigned American Housing Survey and the Surveys of Construction may be attributed to factors such as the sampling variability and nonsampling errors of the data from the two surveys, survey procedures and techniques, and processing procedures.

Comparability with other Bureau of the Census data. Statistics in this report refer, for the most part, to the housing unit, household or householder. Data on the individual household members may differ from other similar data compiled by the Bureau of the Census. For these types of data, write to Chief, Population Division, Bureau of the Census, Washington, DC 20233.

Comparability with housing vacancy surveys. There may be differences between this survey and Federal, State, local, and other surveys which present vacancy

rates. The differences may be attributed to such factors as differing interview periods, survey designs, survey techniques, and processing procedures, as well as differences in concepts and definitions. In addition, there are sampling and nonsampling errors.

Living Quarters

Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a one-unit structure, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars.

Housing units. A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and which have direct access from the outside of the building or through a common hall which is used or intended for use by the occupants of another unit or by the general public. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units, the criteria of separateness and direct access are applied to the intended occupants whenever possible. If the information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

For a detailed discussion of changes to the housing unit definition see the "comparability with the 1973 through 1983 Annual Housing Survey data section" in this appendix.

Group quarters. Group quarters are living arrangements for institutional inmates or for other groups containing nine or more persons not related to the person in charge. Group quarters are located most frequently in institutions, boarding houses, military barracks, college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and nine or more persons not related to the person in charge or, if there is no person in charge, by ten or more unrelated persons. Information on the housing characteristics of group quarters was not collected.

Hotels, motels, rooming houses, etc. Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents; i.e., persons who consider the hotel as their usual place of residence or have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only in those hotels, motels, and similar places in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have direct access, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain eight or fewer roomers unrelated to the householder, they are classified as one housing unit; if the combined quarters contain nine or more roomers unrelated to the householder, or person in charge, they are classified as group quarters. In a dormitory, residence hall, or similar place, living quarters of the supervisory staff and other employees are separate housing units if they satisfy the housing unit criteria; other living quarters are considered group quarters.

Institutions. Living quarters of staff personnel are separate housing units if they satisfy the housing unit criteria. Other living quarters are considered group quarters.

Year-round housing units. Year-round housing units include all units occupied by one or more persons for whom it is their usual residence and all vacant units which are intended by the owner for occupancy at any time of the year. If a unit in a resort area is intended for occupancy on a year-round basis, it is a year-round housing unit, even if vacant.

Seasonal units. Seasonal units include all vacant units which are intended by the owner to be occupied during only certain seasons of the year. A seasonal unit may be used in more than one season; for example, both in the summer for summer sports and in the winter for winter sports. Counts of seasonal units in this report also include housing units held for occupancy by migratory farm workers.

Occupied housing units. A housing unit is classified as occupied if a person or group of persons is living in it at the time of the interview or if the occupants are only temporarily absent, for example, on vacation. However, if the unit is occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

Race. The classification of "race" refers to the race of the householder occupying the housing unit. The concept of race as used by the Census Bureau does not denote a clear-cut scientific definition of biological stock. Race was determined on the basis of a question that asked for self-identification of a person's race. Figures on tenure are given separately for White, Black, and other householders in table 2-1. The last category includes Asian, Pacific

Islander, American Indian, Aleut, Eskimo, and any other race reported. Detailed characteristics of units with Black householders are presented in chapter 5.

Hispanic. The classification "Hispanic" refers to the origin of the householder occupying the housing unit. Detailed characteristics of housing units with Hispanic householder are presented in chapter 6. Hispanic origin was determined on the basis of a question that asked for self-identification of persons living in the unit who were Hispanic or Spanish American. Hispanic persons may be of any race.

In the 1980 census and the 1973 through 1983 Annual Housing Survey, the concept Spanish origin was used. Spanish origin is basically the same as Hispanic according to Census Bureau definitions. Both the census and the 1973 through 1983 AHS asked respondents to choose from a list or flashcard containing a variety of Spanish origin categories. For this reason, care should be taken in making comparisons of Spanish-origin estimates from the 1973 through 1983 Annual Housing Survey, the 1980 census, and the 1985 American Housing Survey.

Tenure. A housing unit is owner occupied if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. Also, a cooperative or condominium unit is owner occupied only if the owner or co-owner lives in it. All other occupied housing units are classified as renter occupied, including housing units rented for cash rent and those occupied without payment of cash rent.

Condominiums and cooperatives. A condominium is a type of ownership that enables a person to own an apartment or house in a project of similarly owned units. The owner has the deed and very likely the mortgage on the unit occupied. The owner may also hold common or joint ownership in some or all common areas such as grounds, hallways, entrances, elevators, etc.

A cooperative is a type of ownership whereby a group of housing units are owned by a corporation of member-owners. Each individual member is entitled to occupy an individual housing unit and is a shareholder in the corporation which owns the property.

Condominium and cooperative ownership may apply to various types of structures including single-family houses, rowhouses, townhouses, etc., as well as apartment units.

Year householder moved into unit. The data are based on the information reported for the householder and refer to the year of latest move. Thus, if the householder moved back into a housing unit he/she previously occupied, the year of the latest move was to be reported; if the householder moved from one apartment to another in the same building, the year the householder moved into the present unit was to be reported. The intent is to establish the year the present occupancy by the householder began. The year the householder moves is not necessarily the same year other members of the household move; although, in the great majority of cases the entire household moves at the same time. The median year householder moved into unit is rounded to the nearest year.

Owner or manager on property. These statistics are based on the number of rental housing units in structures of two or more units with the owner or resident manager living on the property.

Vacant housing units. A housing unit is vacant if no one is living in it at the time of the interview, unless its occupants are only temporarily absent. In addition, a vacant housing unit may be one which is occupied entirely by persons who have a usual residence elsewhere (URE).

New housing units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if unfit for human habitation; that is, if the roof, walls, windows, or doors no longer protect the interior from the elements, or if there is positive evidence (such as a sign on the house or block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store, or an office; or quarters used for storing business supplies or inventory, machinery, or agricultural products.

For a detailed discussion of changes in the estimates of the vacant unit inventory see the "qualifications of the data section " in the introduction.

Vacancy status. Vacant housing units are classified as either "seasonal" or "year-round." See definitions of seasonal and year-round on page App-5. Year-round vacant housing units are subdivided as follows:

For sale only. Vacant year-round units "for sale only" also include vacant units in a cooperative or condominium building if the individual units are offered for sale only.

For rent. Vacant year-round units "for rent" also include vacant units offered either for rent or for sale.

Rented or sold, not occupied. If any money rent has been paid or agreed upon, but the new renter has not moved in as of the date of the interview, or if the unit has recently been sold, but the new owner has not yet moved in, the year-round vacant unit is classified as "rented or sold, not occupied."

Held for occasional use. This category consists of vacant year-round units which are held for weekend or other occasional use throughout the year. The intent of this question is to identify homes reserved by their owners as second homes. Because of the difficulty of distinguishing between this category and seasonal vacancies, it is possible that some second homes are classified as seasonal and vice versa.

Temporarily occupied by persons with usual residence elsewhere (URE). If all the persons in a housing unit usually live elsewhere, that unit is classified as vacant, provided the usual place of residence is held for the household and is not offered for rent or for sale. For example, a beach cottage occupied at the time of the interview by a family which has a usual place of residence in the city is included in the count of vacant units. If the house in the city was in the survey sample, the house would be reported occupied and would be included in the count of occupied units, since the occupants are only temporarily absent.

Held for other reasons. If a vacant year-round unit does not fall into any of the classifications specified, it is classified as "held for other reasons." For example, this category includes units held for settlement of an estate, units held for occupancy by a caretaker or janitor, and units held for personal reasons of the owner. The "other vacant" category includes all housing units held for other reasons.

Duration of vacancy. The statistics on duration of vacancy refer to the length of time (in months) from the date the last occupants moved from the housing unit to the date of the interview. The data, therefore, do not provide a direct measure of the total length of time that units remained vacant. For newly constructed units which have never been occupied, the duration of vacancy is counted from the date construction was completed. For recently converted or merged units, the time is reported from the date that conversion or merger was completed.

Previous occupancy. The statistics presented are restricted to housing units built in 1980 or later. "Previously occupied" indicates that some person or persons not now in the household occupied the housing unit prior to the householder or other related household member's occupancy. "Not previously occupied" indicates that either the householder or some other current household member was the first occupant of the housing unit.

Last used as a permanent residence. The statistics on "last used as a permanent residence" refer to the length of time (in months) since units which are currently seasonal vacants or URE's were last used as a permanent residence, and is measured as of the date of interview. Units which have always been used for short-term or seasonal occupancy, are classified as "Never occupied as permanent home."

Rental vacancy rate. The rental vacancy rate is the number of vacant year-round units for rent as a percent of the total rental inventory; i.e., all renter-occupied housing units and all year-round vacant housing units for rent or rented, not occupied.

Suitability for year-round use. For vacant housing units that were not intended for year-round use (i.e. seasonal and migratory), the respondent was asked whether the construction and heating of the housing unit made it suitable for the unit to be occupied on a year-round basis. A housing unit is suitable for year-round use if it is built as a permanent structure, properly equipped and insulated for heating as necessitated by the climate, and if it has a heating system which would be adequate during extended cold periods.

Housing Units Occupied by Recent Movers

Recent movers. Data for recent movers are shown for two categories of movers: Units where the householder moved into the present unit during the 12 months prior to the interview, and units where the respondent moved into the present housing unit during the 12 months prior to the interview. In most cases the two groups represent the same households.

Present and previous units. The present unit is the housing unit occupied by the householder or respondent at the time of the interview. The previous unit is the housing unit from which the householder or respondent moved. If the householder or respondent moved more than once during the 12 months prior to the date of the interview, the previous unit is the one from which they last moved.

Location of previous unit. These data are shown for units where the householder moved within the United States during the past year. The location of the previous unit is reported as being inside the same metropolitan area, and either in the central city(s) or not in the central city(s); inside a different metropolitan area in the same State, in a different State, and in a central city or not in a central city; outside any metropolitan area, and either in the same State or a different State; or in a different nation.

Tenure of previous unit. These data are shown for units where the householder moved within the United States during the past year. The previous unit was owner occupied if the owner or co-owner lived in the unit, even if it was mortgaged or not fully paid for. If the previous unit was a cooperative or condominium it was owner occupied only if the owner or co-owner lived in it. All other previous units were renter occupied including housing units rented for cash rent and those occupied without payment of cash rent.

Structure type of previous residence. These data are shown for units where householders moved within the United States during the past year. They are based on the respondent's classification of structure type of the previous residence.

Persons—previous residence. These data are shown on table 10 of all chapters for units where the householder moved within the United States during the past year. Data

for units where the respondent moved during the past year are shown separately on table 25 of all chapters. All persons are counted who lived at the previous residence at the time of the move, and those who usually lived there but were temporarily away for reasons such as visiting, traveling in connection with their jobs, attending school, in general hospitals, and in other temporary locations. Children, infants, lodgers, servants, hired hands, and anyone else who usually lived there are included. Persons who were staying at the previous residence at the time of move, but who had a usual residence elsewhere are not counted.

Previous home owned or rented by someone who moved here. These data are shown for units where the householder moved within the United States during the past year. Data are shown for the number of households where the previous home was owned or rented by someone living in the current housing unit and the number of households where the previous unit was owned or rented by a relative or nonrelative other than a current household member.

Change in housing costs. These data are shown for units where the householder moved within the United States during the past year. Housing costs include mortgage and rent payment, real estate taxes, insurance, upkeep of place, utilities, homeowner membership fees, land rent, mobile home park fees paid, etc. Comparison is made of the share the householder and those who moved with the householder (from the same place at the same time) actually paid in the previous unit with the share they actually pay in the present residence.

Reasons for leaving previous unit. These data are shown for units where the respondent moved during the past year. The categories refer to reasons causing the move from the previous residence.

Private displacement includes situations in which a private company or person wanted to use the housing unit for some other purpose (to develop the land or building commercially, to occupy the unit himself/herself, to convert the unit to a condominium or cooperative, to make repairs and renovate the unit, etc.).

Government displacement means the respondent was forced to leave by the government (local, State or Federal), because the land was being used to build a road or highway, for urban renewal or other public activity, the building was condemned or some other similar reason.

Disaster loss includes damage by a tornado, storm, flood, earthquake, fire, landslides or other similar occurrences.

New job or job transfer indicates that the respondent moved to begin a new job or was transferred from the previous location to the present location.

To be closer to work/school/other means that the respondent moved because commuting was too far and respondent wanted to live closer to work, school, or some other commuting purpose.

Other, financial/employment related refers to financial or employment related reasons, such as wanting to look for a new or different job, because he/she entered or left the U.S. Armed Forces, established a retirement home, or some other financial employment reason.

To establish own household means that the respondent left his/her previous residence (parent's home, rooming or boarding house, shared apartment, etc.) to establish own household.

Needed larger house or apartment refers to moves which were necessary because of crowding and not for aesthetic reasons.

Married, widowed, divorced or separated is marked if the respondent moved because of marital reasons.

Other family/personal related indicates that the respondent moved because of family or personal reasons such as wanting to live closer to relatives.

Wanted better home was marked if the respondent moved because the previous residence was too old, run-down, in need of too many repairs, etc., or if there was nothing wrong with the previous home, but the respondent simply wanted to move to a better one.

Change from owner to renter, or *Change from renter to owner,* indicates a change in tenure.

Wanted lower rent or less expensive maintenance indicates that the respondent moved because the rent (or mortgage) payments were too high at the previous residence or that the taxes or upkeep were too high.

Other housing related reasons includes respondent wanted larger yard, different zoning, wanted a better investment, etc.

Other category includes examples such as respondent wanted a change in climate, neighborhood crime problem, racial or ethnic composition of neighborhood.

Choice of present neighborhood and neighborhood search. These data are shown for units where the respondent moved during the past year. The respondent was asked a three part question on choice of present neighborhood: (1) if the respondent looked for a house/apartment in any other neighborhood, (2) the reasons why the respondent chose the present neighborhood, and (3) the

main reason the present neighborhood was chosen. The distribution for choice of present neighborhood may not add to the total as the respondent was not limited to one response.

Choice of present home and home search. These data are shown for units where the respondent moved during the past year. The respondent was asked a three part question on choice of present home: (1) if the respondent looked at both houses/mobile homes and apartments, (2) the reasons why the respondent chose the present house/apartment, and (3) the main reason the present house or apartment was chosen. The distribution for choice of present home may not add to the total as the respondent was not limited to one response as to which was better.

Recent mover comparison to previous home. This item is based on the respondent's comparison between the present unit and previous unit as to which was better.

Recent mover comparison to previous neighborhood. This item is based on the respondent's comparison between the present neighborhood and the previous neighborhood as to which was better. The definition of neighborhood is whatever the respondent considers it to be.

Utilization Characteristics

Persons. All persons occupying the housing unit are counted. These persons include not only occupants related to the householder but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the householder. The data on persons show categories of the number of one-person through seven-or-more-person households. The median for persons is rounded to the nearest tenth.

A person is counted at the usual place of residence for that person. This refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as a legal residence, voting residence, or domicile.

Rooms. The statistics on rooms are for the number of housing units with a specified number of rooms. Rooms counted include whole rooms used for living purposes, such as bedrooms, living rooms, dining rooms, kitchens, recreation rooms, permanently enclosed porches that are suitable for year-round use, lodgers' rooms and other finished and unfinished rooms. Also included are rooms used for offices by a person living in the unit. The median for rooms is rounded to the nearest tenth.

A dining room, to be counted, must be a separate room. It must be separated from adjoining rooms by built-in floor-to-ceiling walls extending at least a few inches from the intersecting walls. Movable or collapsible partitions or partitions consisting solely of shelves or cabinets are not considered built-in-walls. Bathrooms are not counted as rooms.

Data on the number of rooms are not completely comparable with data on the number of rooms collected prior to the redesigned AHS. For a detailed discussion see the "qualifications of the data section" in the introduction.

Persons per room. Persons per room is computed for each occupied housing unit by dividing the number of persons in the unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room.

Bedrooms. The number of bedrooms in the housing unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping, such as guest rooms, even though used infrequently, are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hideaway bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified by definition as having no bedroom.

Square footage of unit. Housing size is shown for single detached housing units and mobile homes. Excluded from the calculation of square footage are unfinished attics, carports, attached garages, and porches that are not protected from the elements (i.e. screened porches). Both finished and unfinished basements are included. Median square footage is rounded to the nearest foot. Square footage is based on the respondent's estimate of the size of the unit. If the respondent did not know the square footage, the interviewer measured the outside dimensions of the unit. Preliminary evaluation indicates that this item is somewhat unreliable.

Square feet per person. Square feet per person is computed for each single detached housing unit and mobile home by dividing the number of persons in the unit by the square footage of the unit. The figures shown refer to the number of housing units having the specified square feet per person. Median square footage is rounded to the nearest foot.

Lot size. Lot size includes all connecting land that is owned or rented with the home. Excluded are two-or-more unit buildings and two-or-more-unit mobile homes. Median lot size is shown to hundredths of an acre.

Structural Characteristics

New construction. Housing units built in the 4 years prior to the date of the interview are classified as new construction.

Year structure built. Year structure built refers to when the building was first constructed, not when it was remodeled, added to, or converted. The figures refer to the number of housing units in structures built during the specified periods and in existence at the time of the interview. For mobile homes and trailers, the manufacturer's model year was assumed to be the year built. Median year built is rounded to the nearest year.

Units in structure. In determining the number of housing units in a structure, all units, both occupied and vacant, were counted. The statistics are presented for the number of housing units in structures of specified type and size, not for the number of residential structures.

A structure is a separate building if it has either open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. Structures containing only one housing unit are further classified as detached or attached.

A one-unit structure is detached if it has open space on all four sides even though it has an adjoining shed or garage. A one-unit structure is attached if it has one or more walls extending from ground to roof which divide it from other adjoining structures and does not share a furnace or boiler with adjoining structures such as in rowhouses, townhouses, etc.

Mobile homes and trailers are shown as a separate category. When one or more rooms have been added to a mobile home or trailer, it is classified as a mobile home. In previous AHS reports, these units were classified as a house, apartment, or flat.

Data on units in structure including mobile homes are not completely comparable with data on units in structure collected prior to the redesigned AHS. For a detailed discussion see the "qualifications of the data section" in the introduction.

Foundation. This item is restricted to one-unit buildings and excludes mobile homes. A structure has a basement if there is enclosed space at least partially underground in which a person can walk upright under all or part of the building. The basement is under all the building if it is under the entire main structure, excluding garages, carports, and porches. Crawl space is space between the ground and the first floor of the house, but it is not high enough for a person to walk upright. A house is built on a concrete slab if it is built on concrete that has been poured on the ground. The "other" category refers to a house built on stilts or pilings (for example, beach houses) and boats, motorhomes, etc.

Site placement. This item is restricted to mobile homes. "Site" refers to location and does not have to be a mobile home park site. The mobile home does not have to have been occupied; it only needs to have been set up for occupancy.

Stories in structure. Finished attics are included in the number of stories. Unfinished attics are not. For split levels and bilevels, the number of stories is determined by the highest number of floors that are physically over each other.

Stories between main and apartment entrances. Data are presented for multiunit structures with two or more floors and is concerned with the number of floors from the main residential entrance level of the building to the main entrance of the unit. "Same floor" indicates that the main entrance of the sample unit is on the same level as the main entrance which residents use to enter the building.

Elevator on floor. Statistics are shown for the number of housing units in structures with two or more floors which have one or more passenger elevators on the same floor as the sample unit and whether they are in working or nonworking condition. Excluded are elevators used only for freight.

Common stairways. The statistics on common stairways are presented for multiunit structures with two or more floors which have common stairways. The figures reflect the physical condition of the stairway; i.e. whether there are loose, broken, or missing steps or stair railings. Common stairways are stairways which are usually used by the occupants and guests to get to the doors of the unit. They may be either inside the structure or attached to the outside of the building.

Light fixtures in public halls. These statistics are presented for housing units in two-or-more-unit structures. Data include whether or not there are light fixtures in the public halls and whether or not some, none, or all of the light fixtures are in working order. Light fixtures include wall lights, ceiling lights, or table lamps in the public halls of the building. Public halls are used by the occupants and guests to get to their apartment doors.

Water leakage during last 12 months. Data on water leakage are shown if the leakage occurred in the 12 months prior to the interview or while the household was living in the unit if less than 12 months. Housing units with water leakage are classified by whether the water leaked in from inside or outside the building and by the most common areas (roof, basement, walls, closed windows, or doors, etc.) or reasons (fixtures backed up or overflowed, pipes leaked, etc.) of water leakage.

External building conditions. The external condition of the building that contains the sample unit was determined by interviewer observation, as visible from the front of the building or the roadway. The categories were grouped into the following: roof, walls, windows, and foundation.

Roof. A "sagging roof" is a defect indicating continuous neglect, or deep or serious damage to the structure. Only

roofs with substantial sagging were included. "Missing roofing material" includes rotted, broken, loose or missing shingles, tiles, slate, shake, tin, etc. caused by extensive damage from fire, storm, or serious neglect. "Hole in roof" occurs when the missing roof materials expose the interior of the unit directly to the elements. Holes caused by construction activity were not counted unless the construction had been abandoned. "Could not see roof" occurs when possible situations like a high tree, evening interviews, or a flat roof prevent the roof from being visible.

Walls. "Missing bricks, siding, other outside wall material" applies to the exterior walls (including chimney) of the structure. Those defects may have been caused by storm, fire, flood, extensive neglect, vandalism, and so forth. Materials may include clapboard siding, shingles, boards, brick, concrete stucco, etc. The missing materials do not necessarily expose the interior of the unit openly to the elements. Missing materials due to construction activity were not counted unless construction had been abandoned. "Sloping outside walls" are a critical defect indicating continuous neglect or serious damage to the structure. Only walls with substantial sagging were included.

Windows. "Boarded-up windows" have been sealed off to protect against weather or entry and include windows and/or doors covered by board, brick, metal, or some other material. "Broken windows" indicate several broken or missing window panes. "Bars on windows" are to protect against unlawful entry. The condition of the windows has no bearing on this item. The bars can be vertical, horizontal, a metal grating, etc. Windows completely covered with metal sheeting are not included in this category.

Foundation crumbling or has open crack or hole. This category includes large cracks, holes, and rotted, loose or missing foundation material.

Could not see foundation. This occurs when landscaping, night interviewing, or some other reason prevents observation.

Plumbing Characteristics

Plumbing facilities. The data on plumbing facilities are suppressed in this report. For a detailed discussion see the "qualifications of the data section" in the introduction. The category "with all plumbing facilities" consists of housing units which have hot and cold piped water as well as a flush toilet and a bathtub or shower for the exclusive use of the occupants of the unit. All plumbing facilities must be located in the housing unit but they need not be in the same room. Lacking some plumbing facilities or no plumbing facilities for exclusive use means that the housing unit does not have all three specified plumbing facilities (hot and cold piped water, flush toilet, and bathtub or shower) inside the housing unit, or that the toilet or bathing facilities are also for the use of the occupants of other housing units.

Complete bathrooms. A housing unit is classified as having a complete bathroom if it has a room with a flush toilet, bathtub or shower, a sink, and hot and cold piped water. All facilities must be in the same room to be a complete bathroom. A half bathroom has either a flush toilet or a bathtub or shower but does not have all the facilities for a complete bathroom.

Source of water and water supply stoppage. A public system or private company refers to any source supplying running water to six or more housing units. The water may be supplied by a city, county, water district, or private water company, or it may be obtained from a well which supplies six or more housing units. An individual well which provides water for five or fewer housing units, is further classified by whether it is "drilled" or "dug." Water sources such as springs, cisterns, streams, lakes, or bottled water are included in the "other" category.

Water supply stoppage means that the housing unit was completely without running water from its regular source. Completely without running water means that the water system servicing the unit supplied no water at all, that is, no equipment or facility using running water (in kitchen and bathroom sinks, shower, in bathtub, flush toilet, dishwasher and other similar items) had water supplied to it, or all were inoperable. The reason could vary from a stoppage because of a flood or storm, to a broken pipe, to a shutdown of the water system, to a failure to pay the bill, or other reasons.

Data on water supply stoppage are shown if the stoppage occurred in the 3 months prior to the interview or while the household was living in the unit if less than 3 months, and if the breakdown or failure lasted 6 consecutive hours or more. Housing units with water supply stoppage are also classified according to the number of times the stoppages occurred.

Sewage disposal and sewage disposal breakdowns. A public sewer is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. Included are only systems operated by a government body or private organization with a system serving 6 or more units. Small sewage treatment plants, which in some localities are called neighborhood septic tanks, are classified as public sewers. A septic tank or cesspool is an underground tank or pit used for disposal of sewage (serving 5 or fewer units). A chemical toilet, which may be inside or outside the unit, uses chemicals to break down or dissolve sewage. Housing units for which sewage is disposed of in some other way are included in the "other" category.

The data on breakdowns in the means of sewage disposal are limited to housing units in which the means of sewage disposal was a public sewer, septic tank, or

cesspool. Breakdowns refer to situations in which the system was completely unusable. Examples include septic tank being pumped because it no longer perked, tank collapsed, tank exploded, sewer main broken, sewer treatment plant not operating due to electric failure or water service interruption, etc.

Data on breakdowns are shown if they occurred in the 3 months prior to the interview or while the household was living in the unit if less than 3 months, and if the breakdown lasted 6 consecutive hours or more. Housing units with a breakdown in sewage disposal are also classified according to the number of breakdowns.

Flush toilet and flush toilet breakdowns. A privy or chemical toilet is not considered a flush toilet. Flush toilets outside the unit were not counted. The statistics on breakdowns of flush toilet are shown for housing units with at least one flush toilet for the household's use only. The flush toilet may be completely unusable because of a faulty flushing mechanism, broken pipes, stopped up soil pipe, lack of water supplied to the flush toilet, or some other reason.

Data on breakdowns are classified by whether any of the flush toilets were working in the 3 months prior to the interview, or while the household was living in the unit if less than 3 months, and the number of times the breakdown lasted 6 hours or more.

Equipment and Fuels

Heating equipment and heating equipment breakdowns. Data are shown for the main heating equipment and other heating equipment used in addition to the main heating equipment. More than one category of "other heating equipment" could be reported for the same household. Only one type of equipment was reported as the "main heating equipment." Warm-air furnace refers to a central system which provides warm air through ducts leading to various rooms. Steam or hot water system refers to a central heating system in which heat from steam or hot water is delivered through radiators or other outlets. It also includes solar heated hot water which is circulated throughout the home. An electric heat pump refers to a heating-cooling system which utilizes indoor and outdoor coils, a compressor, and a refrigerant to pump in heat during the winter and pump out heat during the summer. Only heat pumps that are centrally installed with ducts to the rooms are included in this category. Built-in electric units are permanently installed in floors, walls, ceilings, or baseboards. A floor, wall, or other built-in hot-air unit without ducts delivers warm air to the room right above the furnace or to the room(s) on one or both sides of the wall in which the furnace is installed. Room heaters with flue include non-portable room heaters in the wall or free standing heaters that burn liquid fuel, and which are connected to a flue, vent, or chimney to remove smoke and fumes. Room heaters without flue include any room heater that burns gas, oil, or kerosene which does not connect to a flue, vent, or chimney. Portable electric heaters include heaters that receive current from an electrical wall outlet. Stoves refer to ranges, stoves, or Franklin stoves that burn wood, coal, or other solid fuel. Fireplaces with inserts have a fan-forced air circulation system to force the heat into the room. A fireplace without inserts or with only glass door fire screens or firebacks inserted in the back of the fireplace to passively reflect heat is included in the category "fireplace without inserts."

For vacant housing units from which the heating equipment had been removed, the equipment used by the last occupants was to be reported.

For breakdowns of heating equipment, statistics are shown for housing units occupied by the householder during the winter prior to the interview. The data are classified by whether the housing unit was uncomfortably cold for 24 hours or more, the number of times equipment breakdowns occurred lasting 6 hours or more, and causes for the breakdowns.

The heating equipment is broken down if it is not providing heat at its normal heating capacity through some fault in the equipment. Utility interruptions occur when there is a cut off in the gas, electricity, or other fuel supplying the heat. Inadequate heating capacity refers to heating equipment which is providing heat at its normal capacity but the housing unit is still too cold for the occupants. Inadequate insulation refers to air drafts through window frames, electrical outlets or walls that are cold.

Heating degree day. Each degree that the average temperature for a day is below 65 degrees Farenheit produces one heating degree day. For example if the maximum temperature is 70 degrees F and the minimum temperature is 52 degrees F, the average temperature for the day is 61 degrees, resulting in four heating degree days. The information on heating degree days was provided by the National Oceanic and Atmospheric Administration (NOAA) and based on averages for the 30 year period, 1951-1980. Each sample unit was assigned a heating and cooling degree day using the NOAA data. The categories presented in tables of this report represent the total heating degree days for the entire year.

Cooling degree day. Each degree that the average temperature for a day is above 65 degrees Farenheith produces one cooling degree day. For example, if the maximum temperature is 80 degrees F and the minimum temperature is 62 degrees F, the average temperature for the day is 71 degrees, resulting in six cooling degree days. The information on cooling degree days was provided by the National Oceanic and Atmospheric Administration (NOAA) and based on averages for the 30 year period, 1951-1980. Each sample unit was assigned a heating and cooling

degree day using the NOAA data. The categories presented in tables of this report represent the total cooling degree days for the entire year.

Fuels. Electricity is generally supplied by means of above or underground electric power lines. Piped gas is gas piped through underground pipes from a central system to serve the neighborhood. Bottled gas is pressurized gas stored in tanks or bottles which are filled or exchanged when empty. Fuel oil is heating oil normally supplied by truck to a storage tank for use by the heating system. Kerosene or other liquid fuel includes kerosene, gasoline, alcohol, and other similar combustible liquids. Coal or coke refers to coal or any coal derivative usually delivered by means of truck. Wood refers to the use of wood or wood charcoal, etc., as a fuel. Solar energy refers to the use of energy available from sunlight as a heating fuel source. Other includes briquettes made of pitch and sawdust, coal dust, waste material like corncobs, purchased steam, or any other fuel not listed.

Electric fuses and circuit breakers. These statistics are presented for occupied housing units. The data show whether an electric fuse has blown or circuit breaker has tripped in the home in the 3 months prior to the interview or while the household was living in the unit if less than 3 months. A blown fuse or tripped breaker switch results in the temporary loss of electricity until the fuse is replaced or the breaker switch reset. Blown fuses inside major pieces of installed equipment (such as some air conditioners) are counted as blown fuses or tripped breaker switches.

Equipment. This item refers to selected equipment which is in working order and for the household's exclusive use. If there are two or more of a specified appliance in the housing unit, the age of the newest is reported.

Complete kitchen facilities. A housing unit has complete kitchen facilities when it has all four of the following for the exclusive use of the occupants of the unit: (1) an installed kitchen sink, (2) an oven, (3) burners, and (4) a mechanical refrigerator. Quarters with only portable cooking equipment are not considered as having a range or cookstove. An icebox is not included as a mechanical refrigerator.

The kitchen facilities are for the exclusive use of the occupants when they are used only by the occupants of one housing unit, including lodgers or other unrelated persons living in the unit. The same criteria were used for occupied and vacant units in determining complete kitchen facilities. In previous years for vacant units from which one or all of the kitchen facilities had been removed, the kitchen facilities used by the last occupant were reported. As a result, the total vacant units lacking complete kitchen facilities in this report may appear higher than in previous survey years. Data on complete kitchen facilities are not completely comparable with data on complete kitchen facilities collected prior to the redesigned AHS. For a detailed discussion see the "qualifications of the data section" in the introduction.

Kitchen sink. The sink must be in the unit or on an enclosed porch. A bathroom sink does not count as a kitchen sink.

Refrigerator. The refrigerator must be a working mechanical refrigerator. Ice boxes are not counted.

Burners and oven. The cookstove or range does not have to be mechanical; for example, it can be a wood-burning stove. Microwaves are included in the count of ovens, although toaster ovens are not. Portable burners are excluded from the count of cooking burners. The Data show whether the equipment is less than 5 years old.

Dishwasher. All mechanical dishwashers are included except counter top dishwashers. The data show whether the equipment is less than 5 years old.

Clothes washer. The clothes washer must be mechanical. A wringer washing machine which must be plugged in to run is included in this count. The data show whether the equipment is less than 5 years old.

Clothes dryer. Clothes dryer must be mechanical. Excluded from this count are hand operated wringers, hand turned spin dryers, etc. The data show whether the equipment is less than 5 years old.

Disposal in sink. Only garbage disposals in working order or only temporarily out of order are included. The data show whether the equipment is less than 5 years old.

Air conditioning. Air conditioning is defined as the cooling of air by a refrigeration unit; excluded are evaporative coolers, fans, or blowers which are not connected to a refrigeration unit. A room air-conditioning unit is an individual air conditioner which is installed in a window or an outside wall and generally intended to cool one room, although it may sometimes be used to cool several rooms. A central system is a central installation which air conditions the entire housing unit. In an apartment building, a central system may cool all apartments in the building; each apartment may have its own central system; or there may be several systems, each providing central air conditioning for a group of apartments. A central installation with individual room controls is a central air-conditioning system.

Housing and Neighborhood Quality

Selected amenities:

Porch, deck, balcony, or patio. The porch, deck, balcony, or patio must be attached to the sample unit, not just to the building or free standing. Porches may be enclosed or open.

Telephone available. A housing unit is classified as having a telephone if there is a telephone for receiving calls available to the occupants of the unit. The telephone may be located outside or inside the housing unit, and one telephone may serve the occupants of several units. The number of housing units with a telephone available, therefore, does not indicate the number of telephones installed in homes.

Usable fireplace. Excludes the following: fireplaces that have been blocked off or whose chimney or flue have been filled, decorative or artificial fireplaces, and Franklin stoves. Free standing fireplaces are included in this item.

Separate dining room. A separate dining room is an area separated from adjoining rooms by a built-in floor-to ceiling wall extending at least a few inches from its intersecting wall. Built-in walls do not include movable or collapsible partitions, or partitions consisting solely of shelves and cabinets.

Living rooms, recreation rooms, etc. Includes family rooms, dens, recreation rooms and/or libraries.

Garage or carport. The garage or carport must be on the same property but does not have to be attached to the house. Off street parking is considered driveway or parking lot privileges that is paid for as part of the rent.

Selected deficiencies:

Signs of rats. The statistics on signs of rats refer to respondents who reported seeing rats or signs of rats inside the house or building during the last 3 months or while the household was living in the unit if less than 3 months. Signs of rats include droppings, holes in the wall, or ripped or torn food containers.

Holes in floors. Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go all the way through to a lower floor or to the exterior of the unit. The holes must be large enough to cause someone to trip.

Open cracks or holes (interior). Statistics are presented on whether or not there are open cracks or holes in the interior walls or ceilings of the housing unit. Included are cracks or holes that do not go all the way through to the next room or to the exterior of the housing unit. Hairline cracks or cracks that appear in the walls or ceilings but are not large enough to insert the edge of a dime and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

Broken plaster or peeling paint (interior). The area of peeling paint or broken plaster must be on the inside walls or ceilings and at least one area of broken plaster or peeling paint must be larger than 8 inches by 11 inches.

Electric wiring. A housing unit is classified as having exposed electric wiring if the unit has any wiring that is not enclosed, either in the walls or in metal coverings, or if the unit has any wiring outside the walls enclosed in some material other than metal. Excluded from the tabulation are appliance cords, extension cords, chandelier cords, and telephone or antenna wires.

Electric wall outlets. A housing unit is classified as having rooms without electric wall outlets if there is not at least one working electric wall outlet in each room of the unit. A working electric wall outlet is one that is in operating condition; i.e., can be used when needed. If a room does not have an electric wall outlet, an extension cord used in place of a wall outlet is not considered to be an electric wall outlet.

Cars and Trucks Available:

Cars. Included are passenger cars and station wagons owned or regularly used by one or more household members and ordinarily kept at home. Company cars are counted if used regularly for non-business purposes and kept at home as well as taxicabs if they are owned by a household member and kept at the sample unit. To obtain a count of all units lacking cars, the lines "no cars, trucks, or vans" and "other households without cars" must be added together.

Trucks and vans. Included are pickups and small panel trucks of one-ton capacity or less , and small vans which are owned or regularly used by one or more members of the household and ordinarily kept at home. Company trucks and vans are included if used regularly for non-business purposes and kept at home. To obtain a count of all units lacking trucks or vans, the lines "no cars, trucks, or vans" and "with cars, no trucks or vans" must be added together. Except for units falling in the category "no cars, trucks, or vans," all units will fall into two categories. For example, a unit with one car only would fall both in the category "1 car with or without trucks or vans" and "with cars, no trucks or vans."

Severe physical problems. A unit has severe physical problems if it has any of the following five problems:

Plumbing. Lacking hot or cold piped water or a flush toilet, or lacking both bathtub and shower, all inside the structure for the exclusive use of the unit.

Heating. Having been uncomfortably cold last winter for 24 hours or more because the heating equipment broke

down, and it broke down at least three times last winter for at least 6 hours each time.

Electric. Having no electricity, or all of the following three electric problems: exposed wiring; a room with no working wall outlet; and three blown fuses or tripped circuit breakers in the last 90 days.

Upkeep. Having any five of the following six maintenance problems: water leaks from the outside, such as from the roof, basement, or around windows and doors; leaks from inside structure such as pipes or plumbing fixtures; holes in the floors; holes or open cracks in the walls or ceilings; more than 8 inches by 11 inches of peeling paint or broken plaster; or signs of rats or mice in the last 90 days.

Hallways. Having all of the following four problems in public areas: no working light fixtures; loose or missing steps; loose or missing railings; and no elevator.

Moderate physical problems. A unit has moderate physical problems if it has any of the following five problems, but none of the severe problems.

Plumbing. On at least three occasions during the last 3 months or while the household was living in the unit if less than 3 months, all the flush toilets were broken down at the same time for 6 hours or more.

Heating. Having unvented gas, oil, or kerosene heaters as the primary heating equipment.

Upkeep. Having any three of the overall list of six upkeep problems mentioned above under severe physical problems.

Hallways. Having any three of the four hallway problems mentioned above under severe physical problems.

Kitchen. Lacking a sink, refrigerator, or either burners or oven all inside the structure for the exclusive use of the unit.

Overall opinion of structure. The data presented are based on the respondent's overall opinion of the house or apartment as a place to live. The respondent was asked to rate the structure based on a scale from 1 to 10, where 10 is the best and 1 is the worst.

Overall opinion of neighborhood. The data presented are based on the respondent's overall opinion of the neighborhood. The respondent defines neighborhood. The respondent was asked to rate the neighborhood based on a scale from 1 to 10, where 10 is the best and 1 is the worst.

Neighborhood conditions. The statistics presented are based on the respondent's opinion and attitude toward the neighborhood. The respondent defines neighborhood.The respondent was asked a two part question: (1) If anything about the neighborhood bothered the respondent and (2) if so, what? The interviewer coded the responses into the following categories: crime; noise; traffic; litter or housing deterioration; poor city/county services;undesirable commercial, institutional, or industrial property; people; and other. Multiple responses were allowed. The respondent may not have the same opinion as a neighbor about neighborhood conditions. The respondent's opinion may or may not reflect the actual neighborhood situation.

Description of area within 300 feet. The interviewer, through personal observation, marked all of the following categories which describe the area within 300 feet of the building in which the sample unit is located. The interviewer's best estimate of distance was considered to be acceptable. The categories include: single-family, detached house(s); single-family, attached house(s) or low rise (1-3 story) multi-unit building(s); mid-rise (4-6 story) multiunit building(s); high-rise (7-or-more story) multiunit buildings; and mobile home(s), excluding campers. The category "commercial, institutional, industrial building(s)" includes all varieties of nonresidential structures, —offices, banks, hospitals, prisons, pumping stations, water treatment plants, factories, parking garages, churches, hotels, restaurants, barns, junkyards, etc. "Residential parking lot(s)" exclude driveways of single-family homes and parking garages where parking is on more than one level. "Body of water" refers to lakes, ponds, streams, reservoirs, rivers, etc. Swimming pools, bird baths, temporary pools of water, etc. are excluded. "Open space, park, farm, or ranch" include cemeteries, golf courses, woods, forest preserves, vacant lots, undeveloped land, airport land, ball fields, school fields, etc.

Age of other residential buildings within 300 feet. The statistics presented are based on the interviewer's personal observation. "About the same" indicates all homes within 300 feet appear to have been built at about the same time as the sample unit. If the sample unit was built after 1940, residences built more than 10 years before or after the sample unit are considered as not being built at about the same time. "Older than sample unit" and "newer than sample unit" indicate that the sample unit appears to be decidedly newer or older than the homes within 300 feet. "Very mixed" indicates the predominant ages appear to be very mixed, and if there are no other residential buildings within 300 feet, "no other residential buildings" is marked.

Mobile homes in group. Mobile homes or mobile home sites gathered close together are considered to be in a "group." This may be a mobile home park or it may be a

number grouped together on adjacent individually owned lots but not in a mobile home park.

Other buildings vandalized or with interior exposed. The statistics presented are based on the interviewer's personal observation. A unit is considered to be vandalized if it has most of the visible windows broken, doors pulled off, been badly burned, words or symbols printed on it, portions of the roof missing or gone, or in some other way has the interior exposed to the elements.

Bars on windows of buildings. The statistics presented are based on the interviewer's personal observation. The condition of the windows has no bearing on this item. The windows might be in perfect condition but the bars might be there to protect against vandalism. Windows which are boarded up or covered with tin are not included.

Condition of streets. The statistics presented are based on the interviewer's personal observation. Major repairs include large potholes, badly crumbling or deteriorating shoulders and roadsides, deep ruts, etc. Minor repairs include small cracks, shallow holes, or missing minor surfacing.

Trash, litter, or junk on streets or any properties. The statistics presented are based on the interviewer's personal observations. Major accumulation includes tires, appliances or large amounts of trash accumulated over a period of time. Minor accumulation includes small amounts of paper, cans or bottles but that do not give the impression of long neglect. The building in which the sample unit is located is included.

Financial Characteristics

All of the financial characteristics shown in this report, except those in table 19, are shown for all renters and/or all owners. In 1983 and earlier, the Annual Housing Survey reported characteristics such as value and rent for specified owners and specified renters only. Specified owners are single-family, owner-occupied units on less than 10 acres with no business or medical office. Specified renters exclude single-family units on 10 acres or more. Table 19 in this report presents financial characteristics for specific owners and specified renters which can be used when making comparisons with 1983 and earlier years.

Value. Value is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. Any nonresidential portions of the property are excluded from the cost. For vacant units, value represents the sale price asked for the property at the time of the interview, and may differ from the price at which the property is sold. Medians for value are rounded to the nearest dollar.

Income. The statistics on income in the American Housing Survey are based on the respondent's reply to questions on income for the 12 months prior to the interview and are the sum of the amounts reported for wage and salary income, self-employment income, interest or dividends, Social Security or railroad retirement income, public assistance or welfare payments, alimony or child support, and all other money income. The figure represents the amount of income received before deductions for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, Medicare deductions, etc. Medians for income are rounded to the nearest hundred dollars.

In this report, the statistics are shown separately for the money income of families and primary individuals occupying the housing unit (the sum of the income of the householder and all other members of the family 14 years old and over, or the income of the primary individual), and the money income of the household (the sum of the income of the householder and all household members 14 years old and over).

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to the interview. It includes wages, salary, piece-rate payments, commissions, tips, cash bonuses, and Armed Forces pay. Self-employment income is defined as money income received from a business, professional practice, partnership, or farm in which the person was self-employed. Social Security or pensions includes cash receipts of Social Security pensions; survivors' benefits, disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers; and deductions for Medicare and health insurance premiums. Cash receipts of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from interest or dividends; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs, such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; workmen's compensation cash benefits; periodic payments by the Veteran's Administration to disabled veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from persons who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind," such as, free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from

the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank deposits; accrued interest on uncashed savings bonds; exchange of money between relatives living in the same household; gifts of money; and lump-sum payments from inheritances, insurance policies, estates, trusts, gifts, etc.

The income statistics and the characteristics of the household refer to different periods in time. For 1985, the income data refer to the 12 months prior to the interview, whereas the household characteristics refer to the date of interview. Thus, family or household income does not include amounts received by persons who were members of the family during all or part of the income period if these persons no longer resided with the family at the time of the interview. On the other hand, family or household income includes income reported by persons who did not reside with the household during the income period but who were members at the time of the interview. For most households, however, the income reported was received by persons who were members of the household throughout the income period.

There may be significant differences in the income data between the American Housing Survey and other Bureau surveys and censuses. For example, the time period for income data in the American Housing Survey refers to the 12 months prior to the interview while other income data generally refer to the calendar year prior to the date of the interview. Additional differences in the income data may be attributed to factors such as the various ways income questions are asked, the sampling variability and nonsampling errors between the American Housing Survey and other Bureau surveys and censuses, survey procedures and techniques, and processing procedures.

Value-income ratio. The value-income ratio is computed by dividing the value of the housing unit by the total money income of the family or primary individual. The ratio was computed separately for each housing unit and was rounded to the nearest tenth. For value and income, the dollar amounts were used. Units occupied by families or primary individuals who reported no income or a net loss comprise the category "zero or negative income." Medians for value-income ratio are rounded to the nearest tenth. The 1985 income statistics are for the 12 months prior to the date of the interview.

Amount of savings and investments. These data are restricted to families and primary individuals with total incomes of $20,000 per year or less. Savings include savings in the bank or other financial institution. It also includes savings in money market accounts. Investments in a farm or business must be owned shares in a business or farm, owned percentage of the capital or assets, investment in a farm or business for which the investor holds a promissory note, or membership in a partnership which has any of the above. Other investments include stocks, bonds, rental property, real estate, antiques, art, certificates of deposit, IRA or KEOGH accounts, commodities, etc.

Food stamps. These data are restricted to families and primary individuals with total incomes of $20,000 per year or less. Food stamps are government issued coupons that can be used to purchase food. The food stamp program is a joint Federal-state program which is administered by state and local governments.

Poverty status. The poverty data in this report differs from official poverty estimates in two important respects. The first important difference is the use of a poverty definition that is based on household income in place of the official method that is based on the income of the family or the unrelated individual. Under the official approach, the poverty status of two unrelated individuals living together would be determined by comparing the income of each individual to the poverty threshold for an unrelated individual. The result might be that both were in poverty, both were out of poverty, or one was in poverty and one was not. Under the approach used in this report, the two unrelated individuals were treated as members of a two-person family and their poverty status was determined by comparing their combined income to the poverty threshold for a two-person family. The effect of using a poverty concept that is based on household income is to undercount the number of persons in poverty relative to the official estimate. A study based on the March 1975 Current Population Survey found that poverty estimates based on a household income concept were about six percent lower than official estimates. For more information, see Technical Paper X, *Effect of Using a Poverty Definition Based on Household Income,* U.S. Department of Health, Education, and Welfare, 1976. A second important difference between the poverty estimates in this report and the official poverty estimates has to do with the method used to measure income. The official annual poverty estimates are based on data collected in the March supplement to the Current Population Survey. The income questions asked in that survey are very detailed and measure the amount of income received during the previous calendar year. The income questions asked in the AHS are much less detailed and measure the amount received during the previous twelve months. Because interviews were conducted during the period August through December, the income measures do not pertain to a fixed period. Many of the income questions in the AHS were asked on a household rather than an individual income basis. The lack of data for individuals made it necessary to adopt a poverty definition based on household income.

Officially, families and unrelated individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by the Federal Interagency

Committees in 1969 and 1980. The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food stamps, Medicaid, and public housing. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index (CPI). For further details, see Current Population Reports, Series P-60, No. 158, Poverty in the United States: 1985.

Year unit acquired. The year the unit was acquired or inherited refers to the year in which the present owner acquired or inherited the house or apartment; for example, the year the contract was signed. This date may be different from the date when the occupants moved in. If the land and building were bought at different times, the year of the building only was recorded. If there was a land contract only, the year the contract was signed was recorded. Median year acquired is rounded to the nearest year.

First-time owners. If both the owner and any co-owners have never owned or co-owned another home as a usual place of residence, then the housing unit was reported as the first home ever owned. Previous homes purchased solely as vacation homes or homes purchased for commercial rental purposes are not to be considered usual residences. However, if a previously owned home was originally purchased as a usual residence and later used as a vacation home or for commercial or rental purposes, the home is considered as being owned as a usual residence.

Purchase price. The purchase price refers to the price of the house or apartment and lot at the time the property was purchased. Closing costs are excluded from the purchase price, and for mobile homes the value of the land is excluded. Median purchase price is rounded to the nearest dollar.

Major source of down payment. This item refers to the source of the cash used for down payment or outright purchase of the property (house and lot). If more than one source applied, the one providing the largest portion of the down payment or outright purchase was recorded. Sale of previous home was indicated only if the previous home was sold during the 12-month period preceding the acquisition of the present home. Savings or cash on hand includes money drawn from savings, such as bank deposits, credit unions, share accounts, savings bonds, certificates of deposits (CD's), money market funds, IRA or KEOGH accounts. Sale of other investment includes the sale of other real property or real estate other than the previous home or from the sale of other investments such as securities (common and preferred stock, municipal or corporate bonds, mutual funds), dissolved business ventures, etc. Borrowing other than a mortgage on this property was indicated if the present owner borrowed the down payment, even if the property was mortgaged.

Money received as a gift regardless of the source was categorized "inheritance or gift." "Land where building built used for financing" means the land on which the structure was built was used as the present owner's equity in the property. Sources of down payment which do not fit any of the above categories were recorded in the "other category."

Mortgages currently on property. The owner or the owner's spouse was asked the number of mortgages or similar loans currently in effect on the home. For mobile homes, if there was a separate loan for the mobile home and for the land, two mortgages were recorded. A mortgage or similar debt refers to all forms of debt where the property is pledged as security for payment of the debt. It includes such debt instruments as deeds of trust, trust deeds, mortgage bonds, and vendors' liens. In the first three arrangements, usually a third party, known as the trustee, holds the title to the property until the debt is paid. In the vendor lien arrangement, the title is kept by the buyer but the seller (vendor) reserves, in the deed to the buyer, a lien on the property to secure payment of the balance of the purchase price. Also included as a mortgage or similar debt are contracts to purchase, land contracts, and lease-purchase agreements where the title to the property remains with the seller until the agreed upon payments have been made by the buyer.

Primary mortgage. Data are shown in this report for primary mortgages and secondary mortgages. A mortgage is primary if it is the only one on the property. If two or more mortgages exist, one was designated as the primary mortgage. Detailed information on mortgages was collected in the AHS on the first two mortgages reported even if the unit had three or more mortgages. On the basis of this information one of the first two mortgages was considered to be the primary mortgage. The definition of the primary mortgage may not in all cases totally agree with legal definitions of a "first mortgage." The following hierarchy was used to determine primary mortgage: (1) A VA, FHA or FmHA mortgage was automatically considered to be the primary mortgage. (2) If neither mortgage was a VA, FHA, or FmHA mortgage, an assumed mortgage was considered to be the primary mortgage. (3) If none of the above conditions existed, the mortgage obtained the year the home was purchased was considered to be the primary mortgage. (4) If both mortgages were obtained after the year of purchase, the one taken out first was considered to be the primary mortgage. (5) If all the above failed to designate a primary mortgage, the mortgage for the largest initial amount borrowed was considered the primary mortgage. All other mortgages were considered to be secondary.

Type of primary mortgage. Mortgage insurance is financial protection provided to the lender in case the borrower fails to keep up the required mortgage payments and defaults on the loan. Such insurance protection is offered by both the government, acting as an insurance agent, and by private mortgage insurance companies. The Federal government agencies that currently insure or guarantee mortgages or similar debts include the Federal Housing Administration (FHA), the Veteran's Administration (VA), and the Farmers Home Administration. The FHA insures home loans made by private lenders. The Farmers Home Administration provides much the same service as the FHA, but confines its assistance to rural areas. The VA guarantees or insures loans under the Servicemen's Readjustment Act (GI Bill). Mortgage loans that are not insured or guaranteed by the FHA, VA, or Farmers Home Administration are referred to as "conventional" mortgages. Conventional mortgages and mortgage debts insured or guaranteed by State or local government agencies are shown in the tables as "Other Types."

Lower cost State and local mortgages. Data are shown for owners with one or more mortgages. These are loans generally one to three percent below the current mortgage interest rate at the time the loan was made. The loans are managed through State or local governments, and financed from the proceeds from mortgage revenue bonds. Excluded are Federally funded VA programs.

Mortgage origination. Data are shown for owner occupied units with one or more mortgages. For units with new mortgages, data are classified by the date the new mortgage was obtained in relation to the date the property was acquired. An assumed mortgage indicates that the present mortgage is the same mortgage that was assumed from the previous owner when the property was acquired and has not been refinanced. A wrap-around mortgage is a mortgage whose face value encompasses the unpaid balance of the first mortgage(s) plus the amount of any new funds extended by the wrap-around lender. "Combination of the above" means that there were more than one method of origination for the outstanding mortgages on the property.

Payment plans of primary and secondary mortgages. Data are presented separately for primary and secondary mortgages. The term "payment" refers to regular principal and interest payments only, and not to payments for real estate taxes, property insurance, etc. Fixed payment, self amortizing mortgages have payments that do not change during the term of the loan, with the principal payments sufficient to pay off the loan completely within the stated term. Adjustable rate mortgages are mortgages whose interest rates could be changed during the life of the mortgage changing the amount of the payments required. In adjustable term mortgages, the amount of the payments stays constant, but the number of payments required to pay off the loan can change over time as interest rates change. Graduated payment mortgages allow monthly payments to change during the term of the mortgage by means other than a change in interest rate. These mortgages begin with lower payments which rise later in the life of the mortgage. Balloon mortgages are mortgages in which only part or none of the principal is paid off during the term of the loan (which commonly is about 5 years). At the end of the term the principal is paid off in one lump sum, refinanced with a new loan, or extended by renewal of the loan.

Lenders of primary and secondary mortgages. This item is restricted to units with two or more mortgages. The data are classified by whether the money was borrowed from a firm (bank or other organization), the seller of the property, or from another individual. Other organizations consist of mortgage corporations, pension plans, credit unions, savings and loan associations, etc. Individuals include anyone who was not the most recent owner.

Items included in primary mortgage payment. The respondent was asked to indicate which items were included in the monthly mortgage payment besides principal and interest. These items included property taxes, property insurance, and other charges. Other charges which may include insurance premiums, disability insurances, life insurances, etc., may tally in more than one category.

Year primary mortgage originated. The year the primary mortgage was originated is the year the mortgage was signed. Medians for year primary mortgage originated are rounded to the nearest year.

Term of primary mortgage at origination or assumption. Term is the number of years from the date the new owners first obtained the present mortgage to the date the last payment is due according to the terms of the contract. Medians for term of primary mortgage are rounded to the nearest year.

Remaining years mortgaged. The respondent or respondent's spouse was asked the length of time it would take to pay off the loan at the current payments. The response reflects the amortization schedule. Medians for remaining years mortgage are rounded to the nearest year.

Current interest rate. This item refers to the annual percentage rate in effect as of the date of the interview, not the rate when the mortgage was made, nor any imminent changes of which the respondent may be aware. Medians for current interest rate are rounded to the nearest tenth.

Total outstanding principal amount. The statistics shown represent the total amount of principal that would have to be paid off if the loan were paid off in full on the date of

interview. Medians for outstanding principal amount are rounded to the nearest dollar.

Current total loan as percent of value. This percentage is computed by dividing the outstanding principal amount by the value of the housing unit. Medians for loan as a percent of value are rounded to the nearest tenth of a percent.

Monthly housing costs. The data are presented for owner- and renter-occupied housing units. Monthly housing cost for owner-occupied units is the sum of monthly payments for the mortgage or installment loan or contract, real estate taxes (including taxes on mobile homes or trailer sites if the site is owned), property insurance, homeowners association fee, cooperative or condominium fee, mobile home park fee, land rent, utilities (electricity, gas, water, and sewage disposal), fuels (oil, coal, kerosene, wood, etc.), and garbage and trash collection. Monthly housing costs are not computed for households with a mortgage or similar debt that failed to report the amount of their loan or contract payment.

For renter-occupied housing units, monthly housing costs include the contract rent plus the estimated average monthly cost of utilities (electricity, gas, and water), fuels (oil, coal, kerosene, wood, etc.); property insurance, mobile home land rent and garbage and trash collection if these items are paid for by the renter (or paid for by someone else, such as a relative, welfare agency, or friend) in addition to rent. Renter housing units occupied without payment of cash rent are shown separately as no cash rent. Monthly housing costs for vacant-for-rent housing units include rent asked.

Monthly housing costs are shown for all renters and all owners. In 1983 and earlier, the Annual Housing Survey published selected monthly housing costs and gross rent for specified owners and specified renters only. Table 19 in this report presents financial characteristics for specified owners and specified renters which can be used for making comparisons with 1983 and earlier years. Medians for monthly housing costs are rounded to the nearest dollar.

Monthly housing costs as percent of income. The yearly housing costs (monthly housing costs multiplied by 12) are expressed as a percentage of the total income of the family or primary individual. This percentage is calculated for the same owner-and renter-occupied housing units for which "monthly housing costs" were computed (for exclusions, see "Monthly housing costs"). The percentage was computed separately for each unit and rounded to the nearest percent. The measure was not computed for units where occupants reported no income or a net loss.

Rent paid by lodgers. This item refers to a regular fixed rent, a set amount of money, billed or charged, that is paid at regular intervals by a lodger (usually weekly or monthly) to a member of the household. The data are restricted to lodgers who are 14 years of age or older, nonrelatives of the householder or any co-owners or co-renters, and not a co-owner or co-renter themselves. Medians for rent paid by lodgers are rounded to the nearest dollar.

Property insurance. This item refers to homeowner's/household's property insurance on the structure and its contents (such as furniture, appliances, clothing, etc.) and usually contains some liability insurance to protect occupants should visitors have an accident on the premises. Renters usually have household property insurance. The total cost is the most recent charges for the 12 month period preceding the interview for which the occupants have actually been billed. Yearly cost was divided by 12 before calculating a monthly median cost. Medians for property insurance are rounded to the nearest dollar.

Cost and ownership sharing. This item is restricted to owner-occupied housing units. Shared ownership is two or more names on a deed or title. Shared costs include only payments designated for mortgage or utility costs, whether paid directly to a mortgage or utility company, or to household members. "Not living here" means that one of the persons sharing the ownership or costs is not a household member.

Monthly payment for principal and interest. The data present the monthly dollar amount paid on the mortgage for principal and interest only. It does not include that portion of the monthly payment used for property taxes, homeowner insurance, and/or other charges. Medians for monthly payment for principal and interest are rounded to the nearest dollar.

Real estate taxes. This item includes special assessments, school taxes, county taxes, and any other real estate taxes. Excluded are payments on delinquent taxes due from prior years. Rebates are subtracted from the total. When the real estate taxes are included with the mortgage, a separate amount for the taxes is obtained. To determine average monthly cost, yearly cost was divided by 12. Medians for real estate taxes are rounded to the nearest dollar.

Annual taxes paid per $1,000. The annual real estate taxes paid per $1,000 value of the property (house and lot) are presented. Medians for taxes per $1,000 value are rounded to the nearest dollar.

Routine maintenance in last year. Routine maintenance consists of regular maintenance activities necessary for the preventive care of the structure, property and fixed equipment items. Included are such things as painting, papering, floor sanding, restoration of some shingles, fixing of water pipes, replacement of parts of large equipment, such as furnace, repairing fences, gutters, sidewalks,

decks, or patios, removal of dangerous trees, termite inspection, etc. Housecleaning is not included. Routine maintenance does not include work reported under the section on repairs, improvements and alterations. Medians for routine maintenance are rounded to the nearest dollar.

Condominium and cooperative fee. A condominium fee is a fee charged to the owners of the individual condominium unit on a regular basis. The fee covers all operating and maintenance costs of the common property; for example, halls, lobby, parking areas, laundry room, swimming pool, etc. and related administrative costs, such as utilities billed communally, management fees, etc.

The cooperative maintenance fee for a cooperative unit (also called carrying charges) is based on a percentage developed by dividing the value of the unit by the total value of the project at the time the cooperative corporation was formed. A cooperative maintenance fee is the share of the annual budget to be borne by the member living in the sample unit, including his/her share of the annual amount paid by the cooperative for real estate taxes, mortgage interest and operating cost. Medians for condominium and cooperative fees are rounded to the nearest dollar.

Other housing costs per month. A homeowners' association fee (excludes condominiums and cooperatives fees) is a fee charged for services such as upkeep of common property (painting hallways, cleaning lobbies, mowing lawns, repairing laundry facilities, paving parking areas, repairing street lights, etc.). The fee may include the use and maintenance of either indoor or outdoor swimming facilities or other recreational facilities (party rooms, tennis courts, basketball courts, exercise rooms, playground areas, etc.). Also the homeowners' association fee can include payments for security personnel such as security guards or services such as telephone answering service, maid service or other domestic help. Mobile home park fees are regular payments to the park management which could include site rental, utility charges, mail handling, and/or fees for the maintenance of common areas. In a few areas of the country, the people may own the unit, but not the land on which it stands. Land rent refers to land which is rented or leased from the land owner, and "ground rent" is paid. These leases are for long periods of time (50-100 years) when originated. The lease obligation transfers with the property and cannot be cancelled. Medians for other housing costs are rounded to the nearest dollar.

Rent reductions. Rent control means that an increase in rent is regulated by law. The jurisdiction, state or local, mandates that percentage rent increases are set and must be approved by a board, agency, department, division, office etc.

A housing unit is classified as being in a public housing project if the structure in which the unit is located is owned by any local or state government agency, such as a housing and redevelopment authority or a housing development agency, and operated as public housing. These organizations may receive subsidies from the Federal or State government, but the local agency owns the property.

A housing unit is classified as being subsidized if under certain programs the respondent pays a lower rent because a Federal, State, or local government program pays part of the cost of construction, building mortgage, or operating expenses. These programs include (1) the rental assistance program where part of the rent for low-income families occupying the rental housing units is paid by the Department of Housing and Urban Development (HUD), (2) the FHA interest subsidy programs for rental and cooperative housing for low-income families, (3) the rent supplement program where part of the rent for low-income families occupying certain types of HUD-assisted rental housing projects is paid by the FHA, and (4) the direct loan program of HUD for housing the elderly.

Units requiring income verification are subsidized units.

Other activities on property. Data presented excludes rental units. Property consists of one or more tracts of land which the respondent considers to be the same property, farm, ranch, estate. The tracts may be adjoining or they may be separated by a road, creek, or other piece of land. A commercial establishment may be located in the same building as the sample unit or it may be located elsewhere on the property (grocery store, restaurant, gasoline station, or veterinary office). Those housing units which have no recognizable alterations to the outside of the house are not considered as having a commercial establishment. For a condominium, this item refers to the sample unit only. A farm is not classified as a commercial establishment. A medical or dental office is a doctor's or dentist's office regularly visited by patients.

Repairs, improvements, alterations in last 2 years. The statistics refer to the 24 months prior to the date of the interview and are restricted to owner-occupied, one unit structures on less than 10 acres. The data are presented according to whether the repairs, improvements and alterations cost less than $500 or $500 or more. The total cost of the labor and materials was to be reported. However, if the labor was performed by the occupants or provided without charge, only the cost of the materials was obtained. The cost pertains to the sum of the costs of the jobs if there were more than one job within the 2-year period.

Repairs

Roofs. Work begun, but never completed, was not counted unless the work was currently in progress. All jobs were included no matter how small.

Additions. An addition is floor space built onto, above, or below an existing house in order to increase the enclosed

space within the house. All work must have been done after the original construction.

Kitchens. Kitchens added to space already enclosed within the structure were counted. Remodeling a kitchen could include replacing or adding installed equipment such as a garbage disposal, trash compactor, stove, or refrigerator; or it could include replacing or adding cabinets, counter tops, floors or lighting.

Bathrooms. Bathrooms added to space already enclosed within the structure were counted. Remodeling a bathroom could include replacing or adding installed equipment such as a shower door and fixtures, or vanity; or replacing or adding cabinets, counter tops, floors or lighting.

Siding. Work begun, but never completed, was not counted unless the work was currently in progress. All jobs were included no matter how small.

Storm doors/windows. Used storm doors/windows were counted if new to the unit. Window or doors which were purchased but not yet installed were counted as long as the intentions were to install them.

Major equipment. Only installed equipment was counted. Dehumidifiers, heating equipment, portable dishwashers, or any other equipment which simply plugged in was not counted. Water heaters and heat pumps were counted as major equipment.

Insulation. Insulation included all forms of materials (foam, weather stripping, caulking) which is to remain in place. Plastic taped over windows in winter, but removed in summer was not counted.

Other major work. This category includes other major repairs, alterations, or improvement totaling over $500 each.

Government subsidy for repairs. Low interest loans are loans more than one percent below the current market rate for home improvements at the time the loan was made. The loans are designed by specific government programs for the purpose of home repair, and the money must be spent that way. Government programs can be Federal, State, or local.

Household Characteristics

Household. A household consists of all the persons who occupy a housing unit. By definition, the count of households is the same as the count of occupied housing units.

Householder. The householder is the first household member who is 18 years old and over and is the owner or renter of the sample unit. If no household member occupying the sample unit owns or rents the unit, the householder is the first household member listed who is 18 years old or older. In case where no household member listed owns or rents the unit or is 18 years or older, the first household member listed is the householder. Prior to 1980, the concept "head of household" was used. One person in each household was designated as the head, that is the person who was regarded as the head by the respondent. However, if a married woman living with her husband was reported as the head, her husband was considered the head for the purpose of simplifying the tabulations.

Household composition by age of householder Statistics by age of householder are presented separately for two-or-more-person households and for one-person households. Households having two or more persons are further subdivided as follows:

Married-couple families, no nonrelatives. Each household in this group consists of the householder and spouse, and other persons, if any, all of whom are related to the householder.

Other male householder. This category includes households with male householders who are married, but with wife absent because of separation or other reason where husband and wife maintain separate residences; and male householders who are widowed, divorced, or single. Also included are households with male householder, wife present and nonrelatives living with them.

Other female householder. This category includes households with female householders who are married, but with husband absent because of separation or other reason where husband and wife maintain separate residences; and female householders who are widowed, divorced, or single. Also included are households with female householder, husband present, and nonrelatives living with them.

Households consisting of only one person are shown separately for male householder and female householder under the category "one-person households."

Family or primary individual. Housing units are occupied by either families or primary individuals. The term "family" refers to the householder and all (one or more) other persons living in the same household who are related to the householder by blood, marriage or adoption. If the householder lives alone or with nonrelatives only, then the householder is considered a primary individual.

Married couples related to the householder of a family are included in the family and are not considered as separate families unless they reside in separate living quarters. A lodger, servant, or other person unrelated to the householder is considered a member of the household but not of the family.

In the statistics on household composition, families are always included in one of the three major groups of two-or-more-person households. Primary individuals with nonrelatives living with them are tabulated as two-or-more-person households and further subdivided as other male householder or female householder. Primary individuals living alone are always tabulated as one-person households.

Subfamily. A subfamily is a married couple with or without children or one parent with one or more own single (never married) children under 18 years old living in a household and related to the householder or spouse. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents.

Age of householder. The age classification refers to the age reported for the householder as of that person's last birthday.

Elderly. Data for elderly include all households with a householder of 65 years of age or over.

Own never-married children under 18 years old. Statistics on presence of own children of householders are shown in this report. A child under 18 years old is defined as an own child if he or she is a single (never married) son, daughter, stepchild, or adopted child of a householder. Own children of subfamilies are excluded from the total count of own children.

Other relative of householder. This category includes all persons related to the householder by blood, marriage, or adoption except spouse or own child under 18 years old.

Nonrelative. A nonrelative of the householder is any person in the household who is not related to the householder by blood, marriage, or adoption. Roomers, boarders, lodgers, partners, resident employees, wards, and foster children are included in this category.

Years of school completed by householder. The statistics refer to the highest grade of regular school completed, not to the highest grade attended. For persons still attending school, the highest grade completed is one less than the one in which they are currently enrolled. Regular school refers to formal education obtained in graded public, private, or parochial schools, colleges, universities, or professional schools, whether day or night school, and whether attendance was full or part time. That is, regular schooling is formal education which may advance a person toward an elementary or high school diploma, college, university, or professional school degree. Schooling or tutoring in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system. Householders whose highest grade completed was in a foreign school system or in an upgraded school were instructed to report the approximate equivalent grade (or years) in the regular United States school system. Householders were not reported as having completed a given grade if they dropped out or failed to pass the last grade attended. Education received in the following types of schools is not counted as regular schooling: Vocational schools, trade schools, business schools, and noncredit adult education classes.

Single children under 18 years old. Single children include all persons under 18 years of age, who may or may not be related to the householder and who are not married (i.e., widowed, divorced, separated, or never been married) at the time of the interview.

Adults and single children under 18 years old. Data are shown for all single children whether related to the householder or not by the age categories under 6 years old, 6 to 17 years old, and householders containing children in both age groups. The data are further divided by households headed by a married couple, other households with 2 or more adults, and households with one adult or none.

Persons other than spouse or children. Data are shown for households with the following types of people:

Single adult offspring 18 to 29. This category is restricted to persons who are offspring of the householder or the householder's spouse 18 to 29 years of age and not currently married.

Single adult offspring 30 years of age or over. This category is restricted to persons who are offspring of the householder or the householder's spouse 30 years of age or over and not currently married.

Households with three generations. This category includes situations where (1) both one or more children of the householder or spouse and one or more parents of the householder or spouse live in the unit, (2) both one or more parents of the householder or spouse and one or more grandparents of the householder or spouse, and (3) both one or more children of the householder or spouse and one or more grandchildren of the householder or spouse.

Households with subfamilies. For households with only one subfamily, data are shown for subfamily householders under 30 years of age, 30 to 64 years of age and 65 years of age, and over.

Households with other types of relatives. This category excludes households where the only relatives of the householder present are the householder's spouse or children, and households where no relative of the householder is present.

Co-owners or co-renters. This category includes all households where more than one household member's name is on the deed of ownership, mortgage, land contract, contract to purchase or similar document; or more than one household members' name is on the lease, or, if there is no lease, more than one household member is responsible for paying the rent.

Lodgers. Counts of lodgers are restricted to households with members unrelated to the householder, and who are 14 years of age and over and are not co-owners, co-renters, or children of co-owners or co-renters who pay rent to another household member.

Unrelated children under 18 years old. This category includes all households with members under 18 years of age who are unrelated to the householder or spouse. The members under 18 cannot be co-owners, co-renters, or lodgers.

Other non-relatives. This category includes all households with members 18 years of age and over who are unrelated to the householder or spouse. The members 18 and over cannot be co-owners, co-renters or lodgers.

One or more secondary families. This category includes households which have two or more persons meeting the sub-family definition except that none of the secondary family members are related to the householder or spouse.

Households, none related to each other. None of the household members are related to any other household member. Persons other than the householder may be co-owners, co-renters, or lodgers.

Household moves and formation. Data are shown separately for households which moved into the present unit during the 12 months prior to the date of the interview and for those that moved in after 1979. The distributions are further classified by (1) whether the household moved together from the same unit, from two or more units, or moved at separate times, and (2) if previous householder(s) moved into the present unit.

1 ☐ **A house**
2 ☐ **An apartment**
3 ☐ **A mobile home**
4 ☐ **Or some other type of residence?** — *Skip to item 61n.*

g. Was that home —

(Read all answer categories.)

2390
1 ☐ **Owned or being bought by someone in that household**
2 ☐ **Rented for cash**
3 ☐ **Occupied without payment of cash rent?**

h. Was that part of a condominium or cooperative?

2400
3 ☐ No . . . . . } *Skip to item 61j*
2 ☐ Yes, condominium
1 ☐ Yes, cooperative

i. To the Census Bureau, a cooperative is property which is owned by a corporation. Each shareholder is entitled to occupy an individual unit. Is this what you mean when you say this is a cooperative?

☐ Yes
☐ No — *Reask item 61h and correct entry*

j. How many people lived in that household just before the move?

2410
____ — *If one, skip to item 61m; if more than one, ask item 61k*

k. Was that home (owned/ rented) by someone who moved here?

2420
1 ☐ Yes — *Skip to item 61m*
2 ☐ No

l. Was it (owned/rented) by a relative?

2430
1 ☐ Yes
2 ☐ No

m. When . . . *(Specify names in mover group)* moved, did (your/their) housing costs increase, decrease, or stay about the same, including utilities and (mortgage/rent)?

(Compare their share, if not whole household.)

2440
1 ☐ Increased
2 ☐ Stayed about same
3 ☐ Decreased
4 ☐ Don't know

n.

Go to next mover group. If none, go to item 62, page 14.

REGULAR OCCUPIED — Continued

121a. Housing size is important for analysis of other information from this survey. How many square feet are there in this (house/apartment)? (Include basements and finished attics. Exclude unfinished attics, carports, and attached garages. Also exclude porches that are not protected from the elements/- - - -.) (- - - - /Exclude the mobile home hitch.)

~6 11 — 4600 _____ Square feet — *Go to item 121f*

0 ☐ Don't know — *Ask item 121b*

b. How many (floors/ stories) are there in this (house/apartment)? (Include basements and finished attics /- - - -.) *(In apartments, floors refers only to the apartment itself.)*

4610 _____ Number

c. *MARK OR ASK —* **Is the (house/apartment) a split level?**

4620 1 ☐ Yes 2 ☐ No

d. What is the length and width of each floor of the (house/apartment)? (Include basements and finished attics. Exclude unfinished attics, carports, and attached garages. Also exclude porches that are not protected from the elements/- - - -.) (- - - - /Exclude the mobile home hitch.)

(Record dimensions of all rooms, if respondent is unable to give dimensions for the total floor size.)

	Rectangles or squares							
	First (a)		Second (b)		Third (c)		Fourth (d)	
	Length	Width	Length	Width	Length	Width	Length	Width
Basement								
1st floor of unit								
2nd floor of unit								
3rd floor of unit								
4th floor of unit								

4640 0 ☐ Don't know — *Skip to item 121h*

e. SKETCH *(If enough information is available, draw sketch of sample unit below.)*

OFFICE USE ONLY 4640 _____ Square feet

f. *Describe characteristics of the sample unit that would help to determine total number of square feet, such as ranch, cape cod, split level, etc.*

Dimensions →
☐ Do not include a garage
☐ Include a garage for →
☐ One car
☐ Two cars
☐ Three or more cars

g. INSTRUCTION — *GO TO ITEM 122, PAGE 31.*

h. Check Item *(See item 23, page 3.)*
☐ One-unit building — detached
☐ One-unit mobile home . . . . . } *Ask item 121i*
☐ All others — *Go to item 122, page 31*

i. Because housing size is so important, I would like to measure the length and width of this house from the outside. May I do that after I finish the interview?

4650 1 ☐ Yes 2 ☐ No

URE INTERVIEWS – Continued

Now I have some questions about utility costs. You may check your records if you wish.
When two or more utilities are billed together, try to determine the cost of each.

171a. In the past 12 months what was the average MONTHLY cost for electricity?

3670 $ _____ . 00 per month – *If "All electric home," mark "Not used" in items 171b and d without asking*

3680
1 ☐ Not used
2 ☐ Included in rent, site rent, condominium or other fee, etc.
3 ☐ Obtained free

b. In the past 12 months what was the average MONTHLY cost for gas?

(1)
3690 $ _____ . 00 per month, OR →

3700
1 ☐ Not used – *Skip to item 171d*
2 ☐ Included in rent, site rent, condominium or other fee
3 ☐ Obtained free

(2)
Billed with – *(Mark all that apply.)*
3710
1 ☐ Electricity
2 ☐ Fuel oil
3 ☐ Other fuel
4 ☐ Garbage and trash
5 ☐ Water and sewage

c. Is the gas from underground pipes or bottled gas?

3720
1 ☐ Underground pipes serving neighborhood
2 ☐ Bottled gas

d. In the past 12 months what was the total ANNUAL cost for fuel oil?

3730 $ _____ . 00 per year, OR →

3740
1 ☐ Not used
2 ☐ Included in rent, site rent, condominium or other fee
3 ☐ Obtained free

Billed with – *(Mark all that apply.)*
3750
1 ☐ Electricity
2 ☐ Gas
3 ☐ Other fuel
4 ☐ Garbage and trash
5 ☐ Water and sewage

e. In the past 12 months what was the total ANNUAL cost for wood, coal, kerosene, or any other fuel?

3760 $ _____ . 00 per year, OR →

3770
1 ☐ Not used
2 ☐ Included in rent, site rent, condominium or other fee
3 ☐ Obtained free

Billed with – *(Mark all that apply.)*
3780
1 ☐ Electricity
2 ☐ Gas
3 ☐ Fuel oil
4 ☐ Garbage and trash
5 ☐ Water and sewage

f. In the past 12 months what was the total ANNUAL cost for garbage and trash collection?

3790 $ _____ . 00 per year, OR →

3800
1 ☐ Not used
2 ☐ Included in real estate taxes, rent, site rent, condominium or other fee
3 ☐ Obtained free

Billed with – *(Mark all that apply.)*
3810
1 ☐ Electricity
2 ☐ Gas
3 ☐ Fuel oil
4 ☐ Other fuel
5 ☐ Water and sewage

g. In the past 12 months what was the total ANNUAL cost for water supply and sewage disposal?

3820 $ _____ . 00 per year, OR →

3830
2 ☐ Included in real estate taxes, rent, site rent, condominium or other fee
3 ☐ Obtained free

Billed with – *(Mark all that apply.)*
3840
1 ☐ Electricity
2 ☐ Gas
3 ☐ Fuel oil
4 ☐ Other fuel
5 ☐ Garbage and trash

172. Check Item

a. *(See Control Card item 8b.)*
☐ Owned – *Skip to item 174a, page 43*
☐ Rented or occupied without payment of cash rent – *Go to item 172b*

b. *(See item 127, page 32.)*
☐ Two-or-more unit building or two-or-more unit mobile home – *Ask item 173a*
☐ All others – *Skip to item 173b*

173a. Does either the owner or a resident manager live in the (building/complex)?
(Exclude staff who do only maintenance.)

4400 1 ☐ Yes
2 ☐ No

b. What is the owner's name and address?
If don't know, ask –
Where do you send your rent?

– 8 67 ↓
Name *(Please print)*
Address *(Number, street)*
City State ZIP Code
Title
1 ☐ Owner
2 ☐ Other
Location
1 ☐ Home
2 ☐ Office

c. What is the (owner's/office's) telephone number?

Area code, number, extension
1 ☐ Home 2 ☐ Business

Page 42

FORM AHS 22 (3-25-85)

Facsimile of the American Housing Survey Questionnaire: 1985

URE INTERVIEWS — Continued

174a. Housing size is important for analysis of other information from this survey. How many square feet are there in the (house/apartment)? (Include basements and finished attics. Exclude unfinished attics, carports, and attached garages. Also exclude porches that are not protected from the elements/- - - -.) (- - - -/Exclude the mobile home hitch.) ~661+

4600 _____ Square feet — *Skip to item 174f*

0☐ Don't know — *Ask item 174b*

b. How many (stories/floors) are there in this (house/apartment)? (Include basements and finished attics/- - - -.) *(In apartments, floors refers only to the apartment itself.)*

4610 _____ Number

c. *MARK OR ASK —* **Is the (house/apartment) a split level?**

4620 1☐ Yes 2☐ No

d. What is the length and width of each floor of the (house/apartment)? (Include basements and finished attics. Exclude unfinished attics, carports, and attached garages. Also exclude porches that are not protected from the elements/- - - -.) (- - - -/Exclude the mobile home hitch.)

(Record dimensions of all rooms, if respondent is unable to give dimensions for the total floor size.)

	Rectangles or squares							
	First (a)		Second (b)		Third (c)		Fourth (d)	
	Length	Width	Length	Width	Length	Width	Length	Width
Basement								
1st floor of unit								
2nd floor of unit								
3rd floor of unit								
4th floor of unit								

4640 0☐ Don't know — *Skip to item 174h*

e. SKETCH *(If enough information is available, draw sketch of sample unit below.)*

OFFICE USE ONLY 4640 _____ Square feet

f. *Describe characteristics of the sample unit that would help to determine total number of square feet, such as ranch, cape cod, split level, etc.*

Dimensions →
☐ Do not include a garage
☐ Include a garage for →
☐ One car
☐ Two cars
☐ Three or more cars

g. *SKIP TO ITEM 175, PAGE 44*

h. Check Item *(See item 127, page 32.)*
☐ One-unit building — detached
☐ One-unit mobile home . . . . . } *Ask item 174i*
☐ All others — *Skip to item 175, page 44*

i. Because housing size is so important, I would like to measure the length and width of this house from the outside. May I do that after I finish the interview?

4650 1☐ Yes 2☐ No } *Go to item 175, page 44*

FORM AHS-22 (3-26-85)

MOBILITY SUPPLEMENT

175. Check Item *(See item 6, page 1 and Control Card items 14 and 18.) (Mark first box that applies.)* ~034+

☐ URE interview — *Skip to item 184a, page 46*
☐ No household members 18+ — *Skip to item 184a, page 46*
☐ Any household members 18+ — *Enter line numbers, then ask items 176—183 for each*

5510 ☐☐ Line number

☐ Callback required, household member 18+ not present — *Mark item 16, page 1*

NOTE: Husbands and wives may respond for each other. All other household members 18+ must be asked these questions individually.

176. In what State (was . . . /were you) born? *(Enter 2-character State code from flashcard.)*

5520 ☐☐ State code
OR
00☐ Outside the United States

177a. At age 16, did . . . live in this area or a different place? *(Area is city, suburb, town or rural area where sample unit located.)*

5530 1☐ This area — *Skip to item 177c*
2☐ Different place

b. In what State was that place located? *(Enter 2-character State code from flashcard.)*

5540 ☐☐ State code
OR
00☐ Outside the United States

c. Which of these categories best describes (this area/that place) AT THAT TIME?

(Read all answer categories.)

5550
1☐ **A large city**
2☐ **A suburb near a large city**
3☐ **A medium-sized city or its suburbs**
4☐ **A small city**
5☐ **A town or village**
6☐ **Open country, but not a farm**
7☐ **A farm**
8☐ Other — *Specify* _____

178. Five years from now, would . . . PREFER to be living in this (house/apartment) or someplace else?

5560 1☐ Same house/apartment
2☐ Someplace else — *Skip to item 180*

179. Five years from now, how LIKELY (is . . . /are you) still to be living in this unit—very likely, likely, not very likely, or no chance at all?

5570 1☐ Very likely
2☐ Likely
3☐ Not very likely
4☐ No chance at all
5☐ Don't know
} *Go to next household member 18+; if none, go to item 184a, page 46*

180. Five years from now, would . . . prefer to be living in another home in this area, or outside this area?

5580 1☐ Another home in this area — *Skip to item 183*
2☐ Outside the area

181. Which of these categories best describes the area in which . . . would prefer to live 5 years from now?

(Read all answer categories.)

5590
1☐ **A large city**
2☐ **A suburb near a large city**
3☐ **A medium-sized city or its suburbs**
4☐ **A small city**
5☐ **A town or village**
6☐ **Open country, but not a farm**
7☐ **A farm**
8☐ Other — *Specify* _____

182. In what State would . . . prefer to be living 5 years from now?

(Enter 2-character State code from flashcard.)

5600 ☐☐ State code
OR
00☐ Outside the United States

183. Within the next 5 years, how LIKELY (is . . . /are you) to move to the place just indicated—very likely, likely, not very likely, or no chance at all?

5610 1☐ Very likely
2☐ Likely
3☐ Not very likely
4☐ No chance at all
5☐ Don't know
} *Go to next household member 18+; if none, go to item 184a, page 46*

c. General assistance or other public assistance? [5960] 1☐ Yes 2☐ No

d. Food stamps? [5970] 1☐ Yes 2☐ No

194. The government has an energy assistance program which helps to pay home heating and cooling costs. This assistance can be received directly by the household or it can be paid directly to the electric or gas company or fuel dealer. Between October 1984 and September 1985 did your household receive government energy assistance either directly or through the fuel dealer for —

a. Help in paying home HEATING costs? [5980] 1☐ Yes 2☐ No

b. Help in paying home COOLING costs? [5990] 1☐ Yes — *Skip to item 195* 2☐ No

c. Check item *(see item 194a)*

☐ "Yes" in item 194a — *Skip to item 195*
☐ "No" in item 194a — *Ask item 194d*

d. Any government help in paying home energy costs? [6000] 1☐ Yes 2☐ No

195. Between October 1984 and September 1985 because of loss of heat in your home, did your household receive government energy assistance in the form of blankets, space heaters, temporary shelter, heating equipment repairs or minor home repairs? [6010] 1☐ Yes 2☐ No

196a. Check Item — *(See Control Card items 14, 25, and 26)*

☐ Any household member moved in since October 1984 — *Fill item 196b*
☐ No household member moved in since October 1984 — *Skip to item 198*

b. *(See item 194a)*

☐ "Yes" in item 194a — *Ask item 197*
☐ "No" in item 194a — *Skip to item 198*

197. Was the heating assistance received at this address, a previous address, or both? [6020] 1☐ Current 2☐ Previous 3☐ Both

198. Between October 1984 and September 1985 did anyone in your household receive help from the Federal, state, or local government for obtaining or installing such things as insulation, storm windows, storm doors, weather stripping and caulking, furnace tuneups, or for repairing broken doors and windows? [6030] 1☐ Yes 2☐ No } *Go to item 199, page 50*

SECOND HOME SUPPLEMENT

189. INTRODUCTION: **Now I have some questions about second homes.**

200. **(Do/Does) . . . (Specify names with "X" in Control Card item 17) own or co-own (any residential property/any other residential property, not counting this home)?**

~041↓

6040 1 ☐ Yes
2 ☐ No – *Go to Control Card item 9a*

201. **How many (–/other) residential units (do/does) . . . (Specify names with "X" in Control Card item 17) own or co-own?**
(In a multi-unit building, count each unit owned.)

6050 _____ Number

202a. **Where (is this unit/are these units) located?**
(Enter multi-unit properties only once.)

For residential units listed ask –

Property	Location: (If needed, enter location information to uniquely identify residential units) (1)	Location: (Enter 2-character State code from flashcard) (2)	202b. Who in this household owns or co-owns the residential unit(s) located in . . . (location information in item 202a) (Enter line numbers) (3)	202c. Was this unit ever . . . (Specify names for line numbers in item 202b) usual residence? (4)	202d. How many units (do/does) . . . (Specify names for line numbers in item 202b) own or co-own in . . . (location information in item 202a)? (5)
1		6060 ☐☐ State code OR 00 ☐ Outside the United States	6070 ☐☐☐ 6080 ☐☐☐	6090 1 ☐ Yes 2 ☐ No	6095 _____ Number

INTERVIEWER OBSERVATION

213a. How many stories are in the building, including the basement?
(If split level, count greatest number of stories on top of each other.)

~6 09

4760 _____ Stories in building (If 1–20)
OR
21 ☐ 21 or more

b. What is the condition of the light fixtures in the public halls?

4790
1 ☐ No public halls
2 ☐ All in working order
3 ☐ Some in working order
4 ☐ None in working order
5 ☐ No light fixtures
6 ☐ Fixtures turned off, unable to determine if working, not obviously broken

c. How many stories are there from main entrance of building to main entrance of sample unit?

4800 _____ Stories up or down to home
0 ☐ Same floor

d. Is there a passenger elevator on this floor?

4810
1 ☐ No elevator
2 ☐ At least one working elevator
3 ☐ All elevators not working

e. Are there loose, broken, or missing steps on any common stairways inside this building or attached to this building?

4820
1 ☐ No common stairways — *Skip to item 213g*
2 ☐ Yes
3 ☐ No

f. Are all railings on the common stairways firmly attached?

4830
1 ☐ No stair railings
2 ☐ Yes
3 ☐ No

g. What is the external condition of the building that contains the sample unit, as visible from front of building or roadway?
(Mark all that apply.)

4840
1 ☐ Sagging roof
2 ☐ Missing roofing material
3 ☐ Hole in roof
4 ☐ Could not see roof
} Roof

5 ☐ Missing bricks, siding, or other outside wall material
6 ☐ Sloping outside walls
} Walls

4850
7 ☐ Boarded up window(s)
8 ☐ Broken window(s)
9 ☐ Bars on window(s)
} Windows

4860
10 ☐ Foundation crumbling or has open crack or hole
11 ☐ Could not see foundation
} Foundation

4870
12 ☐ Observed, but no listed conditions for roofs, walls, windows, or foundations
OR
13 ☐ Unable to observe

h. How many mobile homes are in the group?
(Including sample mobile home)

4880 _____ Exact number (If 1–20)
OR
21 ☐ 21 or more
0 ☐ Sample unit not a mobile home

Notes

FORM AHS-22 (3-25-86)

INTERVIEWER OBSERVATION — Continued

The items on this page concerns the area within 300 feet of the building in which sample unit is located.

214a. Which of these are within 300 feet of building containing the sample unit?
(Exclude this building.)
(Mark all that apply.)

4890
1 ☐ Single-family, detached house(s)
2 ☐ Single-family, attached house(s) or low-rise (1–3 story) residential multiunit building(s)
3 ☐ Mid-rise (4–6 story) residential multiunit building(s)
4 ☐ High-rise (7 + story) residential multiunit building(s)
5 ☐ Mobile home(s) (exclude campers)
6 ☐ Commercial, institutional, industrial building(s)

4900
7 ☐ Residential parking lot(s)
8 ☐ Body of water
9 ☐ Open space, park, woods, farm, or ranch

4910
10 ☐ Other — *Specify* _____
11 ☐ Could not observe

b. What is the predominant age of residential buildings within 300 feet?
(Exclude this building.)

4920
1 ☐ Older than sample unit
2 ☐ About the same
3 ☐ Newer than sample unit
4 ☐ Very mixed
5 ☐ No other residential buildings

c. Are any buildings vandalized, or interior exposed to the elements?
(Exclude this building.)

4930
1 ☐ Yes, only one vandalized or exposed
2 ☐ Yes, more than one
3 ☐ None vandalized or exposed
4 ☐ No other buildings within 300 feet — *Skip to item 214e*

d. Are there bars on windows of buildings in area?
(Exclude this building.)

4940
1 ☐ Yes, only one building with bars
2 ☐ Yes, more than one
3 ☐ No bars on windows

e. What is the condition of streets?

4950
1 ☐ Major repairs needed
2 ☐ Minor repairs needed
3 ☐ No repairs needed
4 ☐ No streets within 300 feet

f. Is there trash, litter, or junk in streets, roads, empty lots, or on any properties?
(Include this building.)

4960
1 ☐ Major accumulation
2 ☐ Minor accumulation
3 ☐ None

INTERVIEW COMPLETED

PGM 3 — UPDATE EVERY SURVEY

10 Line number

11 HOUSEHOLD ROSTER

SUBSEQUENT INTERVIEW OF HOUSEHOLD — Skip to item 12b below.

FIRST INTERVIEW OF HOUSEHOLD — Ask item 11.

What are the names of all persons living or staying here? Start with the name of the person or one of the persons who (owns/rents) this home.

Enter names below — last name first, then ask item 12a below.

13 RELATIONSHIP TO REFERENCE PERSON

If necessary, ask:

What is . . .'s relationship to *(Reference person)?*

Examples:

Reference person, husband, wife, son, daughter-in-law, partner, lodger, lodger's wife, etc.

(Enter Code)

14 HOUSEHOLD MEMBER

Does . . . usually live here?

If "No," probe for URE.

If "No," STOP questions on this person.

If "No," for all persons, go to AHS-22.

16 *Enter Line Number of Parent Listed* *(Enter two digits)*

17 OWNER/RENTER

In whose name is this home (owned/rented)?

Mark (X) all lines that apply.

18 BIRTH DATE/AGE

a. What is . . .'s date of birth?

Enter two digit month, day, and year.

Examples: 01-20-63
12-01-24

Verify age using flashcard.

b. . . . is now *(Read age)* **years old.**

Is that correct?

19 SEX

Ask if necessary.

Is . . . male or female?

Circle 1 for Male and 2 for Female.

20 RACE

What is the race of each person in this household?

If needed, show flashcard.

1 White
2 Black
3 American Indian, Aleutian, Eskimo
4 Asian or Pacific Islander
5 Other — *Specify*

(Enter code)

21 ORIGIN

Is anyone living here Hispanic or Spanish American?

If "Yes," ask who and mark "Yes."

Mark "No" for all others.

UPDATE EVERY SURVEY FOR PERSONS 14 YEARS OF AGE OR OLDER

22 MARITAL STATUS

Is . . . now —

1 **Married?**
2 **Widowed?**
3 **Divorced?**
4 **Separated?**
OR has . . .
5 **Never been married?**

(Enter code)

23 *Enter Line Number of Spouse Listed* *(Enter two digits)*

24 EDUCATION

What is the highest grade or year of regular school . . . has ever completed?

00 Never attended or preschool or kindergarten only
01-12 1st grade through 12th grade
21-24 1st-4th year of college
25 1 year of graduate school
28 2 or more years of graduate school

(Enter code)

25 MOBILITY

When did . . . move to this (home/site)?

If mother lived here when person was born, enter "XX."

26 *Ask only for those who moved in after 1979.*

What month was that? *(Enter two digits)*

27 CHANGES IN HOUSEHOLD COMPOSITION

Continue in notes if necessary.

Enter status and date discovered, for example:

Added 8/85
Left 8/85
Returned 8/85
Deceased 8/85

SAMPLE DESIGN

The 1985 estimates contained in this report are based on data collected from August 1985 through December 1985 for the American Housing Survey (AHS) which was conducted by the Bureau of the Census, acting as collection agent for the Department of Housing and Urban Development. The sample for this survey was spread over 394 sample areas (called primary sampling units) comprising 878 counties and independent cities with coverage in each of the 50 States and the District of Columbia.

Approximately 47,200 sample housing units were selected for interview for the 1985 AHS. Of this number, about 2,900 were found to be ineligible because they no longer existed or information relevant to the 1985 housing inventory could not be obtained for the unit. Of the approximately 44,300 units (both occupied and vacant) which were eligible for interview, about 1,800 were classified as "noninterviews" because either no one was home after repeated visits, the respondent refused to be interviewed, or the interviewer was unable to locate the unit.

Selection of sample areas. The United States was divided into areas made up of counties and independent cities referred to as primary sampling units (PSU's). Of these PSU's, 170 were known as self-representing since the sample from the PSU represented only that PSU. These 170 PSU's were in sample with certainty. The remaining PSU's were grouped into strata and were referred to as non-self-representing, since the sample of housing units from the sample PSU represented all PSU's, both sample and nonsample, in the stratum. These non-self representing sample PSU's were selected in two steps.

First, the Current Population Survey (CPS) formed groups consisting of one or more PSU's. In groups consisting of more than one PSU, one PSU was selected to represent all PSU's in a CPS stratum. The second step involved selecting a subset of PSU's selected by the CPS. The PSU's selected for the CPS sample (some of which were self-representing for the CPS and some of which were non-self representing for the CPS) were grouped again for the AHS. For groups consisting of only one PSU selected for the CPS, that PSU was also selected for the AHS. For groups consisting of more than one PSU selected for the CPS, one PSU was selected for the AHS.

Selection of the sample housing units from the 1980 Census. The overall sampling rate used to select the sample of housing units from the 1980 census for the 1985 AHS was about 1 in 2,148. The within-PSU sampling rate was determined so that the overall probability of selection for each sample housing unit was the same (e.g., if the probability of selecting a non-self representing PSU was 1 in 10, then the within-PSU sampling rate would be 1 in 214.8).

In areas where addresses were, for the most part, complete and where new construction is monitored by permits (these areas will be referred to as address enumeration districts [ED's]), a sample of housing units which received long-form questionnaires in the 1980 census was selected directly from a list of all such housing units based on certain housing and geographic information of the housing unit. A sample of living quarters which did not meet the definition of a housing unit (e.g., military barracks, college dorm) was selected independently from housing units in address ED's. This sample of living quarters which were not housing units was used to identify units which converted to housing units since the census.

In areas where at least 4 percent of the addresses were incomplete or inadequate, or where new construction was not monitored by building permits (most rural areas), a sample of 1980 census units which received long-form questionnaires was selected in several steps (these areas

will be referred to as area ED's). First, the areas were grouped and a sample of areas was chosen. Next, an area of land, known as a segment, was chosen within each sample area. Finally, a sample of housing units which received 1980 census long forms was selected within the segment.

Selection of new construction housing units in permit issuing areas. The sample of permit new construction was selected from building permits issued such that the units are expected to be completed after April 1, 1980. For certain areas and structure sizes, this included permits issued as early as March 1979, but, for the most part, includes permits issued since July 1979. Only nonmobile home new construction is covered by the building permit frame. Within each PSU, building permits were selected so that the sample would be representative in terms of geography and month of issue for permits. Clusters of approximately four housing units were created. Housing units in these clusters were subsampled at the rate of 1 in 4, yielding clusters of size 1.

Housing Unit Coverage Study sample. Housing units at addresses missed in the 1980 census or units which were at inadequately described addresses in the census address registers did not have a chance of being selected for the AHS sample. A special study, done as part of the 1980 census, called the Housing Unit Coverage Study identified such units. A sample of the units was included in the AHS sample.

Housing units added since the 1980 census. Housing units added to the inventory since the 1980 census were represented using two methods. One method identified within-structure additions. These are units in structures which had a chance of being in sample because they contained at least one unit enumerated in the 1980 census.

This method was used for the Housing Unit Coverage Study sample as well. The other method identified whole structure additions. These are units in structures for which none of the units in the structure were enumerated in the 1980 census.

In area ED's, all within-structure additions in structures containing at least one sample unit were interviewed for the AHS. In address ED's, all within-structure additions in 1- to 15-unit structures containing at least one sample unit were interviewed for the AHS. In 16-or-more-unit structures in address ED's, only units falling on AHS sample lines were interviewed for the AHS.

In address ED's, whole structure additions were identified using area sampling methods. Under area sampling, all housing units within a land area are first listed, and then a systematic sample is selected using a random start with and take every so that a desired sample size is achieved based on the expected number of units within the segment. Land areas in sample for the Health Interview Survey in 1985 were used. Only Health Interview Survey areas which were in AHS PSU's or in Health Interview Survey PSU's adjacent to AHS PSU's were used. Also, only units which were not already assigned to the Health Interview Survey were eligible. These units were then matched to the 1980 census address registers. If the address matched to the census, the unit was ineligible. (Only the basic address, i.e., 801 Main Street, had to match. Apartment number, mobile home site number, etc., did not have to match). At the time of listing, eligible units were then screened further so that only units with no previous chance of coming into sample were picked up. (The screening eliminated units such as nonmobile home new construction, which is covered by building permits, and census misses).

In area ED's where new construction is not monitored by building permits, all land areas chosen for the sample in area ED's were used. An expected four units were chosen using area sampling methods within these land areas to identify whole structure additions. This sample was screened at the time of listing using the same criteria as for address ED's. However, this sample was not matched to the census. One important difference to note is that new construction was not eliminated during the screening process.

In area ED's where new construction is monitored by building permits, only one-third of the land areas chosen for the sample in area ED's was used. An expected eight units were chosen using area sampling methods within these segments to identify whole structure additions. This sample was screened at the time of listing using the same criteria as for address ED's. Again, this sample was not matched to the census. Nonmobile home construction was eliminated by the screening process since it is covered by the building permit frame.

ESTIMATION

After assigning each unit a weight which reflected the correct probability of selection for the unit, the AHS weighting procedure consisted of two phases. In the first phase, a series of adjustments were made to account for units which could not be interviewed for a number of reasons. For each of these adjustments, a factor was computed and applied to the appropriate units. The factors were equal to the following ratio:

$$\frac{\text{Housing units to be kept after factor applied} + \text{Housing units to be dropped after factor applied}}{\text{Housing units to be kept after factor applied}}$$

The housing units which are to be kept after a factor is applied will have that factor applied to them. The first of these adjustments was done in permit segments only, to account for permits which could not be sampled and units which could not be located. These were represented by all other units in permit segments including both interviews and noninterviews (excluding unable-to-locate units).

The second of the adjustments was done for units in structures built before April 1, 1980; it was done to account for units which could not be located. The unlocatable units were represented by both interviews and noninterviews (excluding unable-to-locate units).

The last of these adjustments was done to account for units which could not be interviewed because either no one was home after repeated visits or the respondent refused to be interviewed. When 1980 census data was available, this information was used to determine the noninterview adjustment cell. The cells included characteristics such as tenure, geography, units in structure, and number of rooms. When 1980 census data was not available, adjustment factors were computed separately using more general characteristics such as type of area and type of housing unit (i.e., mobile home, nonmobile home).

The second phase involved a three-stage ratio estimation procedure to adjust for the sampling of non-self-representing PSU's, to account for known sampling deficiencies in new construction and to bring the sample estimate of housing unit into close agreement with estimates derived from independent sources for several key characteristics.

The first stage of this procedure was employed to reduce the contribution to the variance due to the sampling of non-self-representing PSU's. The procedure takes into account the differences that existed at the time of the 1980 census between the housing units estimated from the non-self representing sample PSU's and the actual 1980 census count of housing units from all non-self-representing strata. Factors accounting for these differences were computed separately for 15 place-of-residence/tenure cells for the Northeast and Midwest regions, 35 place-of-residence/ethnicity-race/tenure cells for the South region and 25 place-of-residence/ethnicity/tenure cells for the West region. The first-stage ratio estimation factor was equal to the following ratio:

$$\frac{\text{Actual 1980 census housing units for all non-self-representing strata in a cell}}{\text{Number of 1980 housing units in the same cell estimated from the sample non-self-representing PSU's}}$$

The numerators of the ratios were calculated by summing the 1980 census housing unit counts for each cell across all nonself representing strata. For each cell, the denominators were calculated by weighting the 1980 census housing unit counts from each non-self representing sample PSU by the inverse of the probability of selection for that PSU and summing the weighted counts across all non-self-representing sample PSU's.

The second stage of the ratio estimation procedure was employed to adjust the AHS sample estimate of new construction (i.e., units built since the 1980 census) to account for known deficiencies in the AHS sample (see the section on nonsampling error). For nonmobile homes, the sample estimates were controlled to independently derived estimates from the Survey of Construction. For mobile homes, the sample estimates are controlled to independently derived estimates from the Survey of Mobile Home Placements. These estimates were considered to be the best estimates available for these types of units. Factors were computed separately for each region. The second-stage factor was equal to the following ratio:

$$\frac{\text{Independently derived estimate for a cell}}{\text{AHS sample estimate in that cell}}$$

The denominators of the above ratio were obtained by summing the existing weight on each record after the first stage of ratio estimation over all records for each cell in each region.

The third stage of the ratio estimation procedure was employed to adjust the AHS sample estimate of housing units to independently derived current estimates for certain key characteristics. It is believed that these characteristics are highly correlated with other characteristics of interest for the AHS. This stage of the procedure was actually done in two steps for occupied units. During the first step, the sample estimate of the occupied housing units was controlled to an independently derived estimate for 12 tenure/ethnicity (i.e., Spanish head of household—non-Spanish head of household)/household-status cells for each region. After applying the factor computed in this step to the interviewed occupied units, the new sample estimate of occupied housing units was controlled to an independently derived estimate for 12 tenure/race (i.e., Black head of household—non-Black head of household)/household-status cells for each region. The sample estimate of vacant housing units was controlled to an independently derived estimate for four type-of-vacant cells for each region. All third-stage factors were calculated in a similar manner using the following ratio:

$$\frac{\text{Independently derived estimate of housing units in a cell}}{\text{AHS sample estimate of housing units in that cell}}$$

For occupied units, the numerators of the factors were derived from data based on the CPS and the 1980 census. The 1980 census count of housing units was adjusted for

net undercoverage and overcoverage. The CPS was used to measure changes since the census and to derive the distribution for the third-stage occupied cells.

For vacant units, the numerators of the factors were derived from data based on the Housing Vacancy Survey (HVS), a quarterly vacancy survey conducted by the Bureau of the Census.

The denominators of the factors were obtained by summing the weights, with all previous factors applied, on all records in a cell. For the Spanish/non-Spanish and vacant cells, this was the weight after the second stage of the ratio estimation procedure. For the Black/non-Black cells, this was the weight after the Spanish/non-Spanish portion of the third stage of the ratio estimation procedure.

The second stage and third stage of the ratio estimation procedure were iterated to bring the AHS sample estimates into closer agreement with all independent estimates used. The numerators of the factors were the same ones used previously. The denominators of the factors in this iterative process were obtained by summing the existing weights on all records in a cell. For example, for the second stage of the ratio estimation procedure, the existing weight after the third stage of the ratio estimation procedure from the previous iteration was used. The final weight that resulted from all iterations was used to produce the tabulations in this report.

The overall estimation procedure reduced the sampling error for most statistics below what would have been obtained by simply weighting the sample by the inverse of the probability of selection. The use of the estimation procedure attempted to correct for these differences, and one can expect the sample estimate to be improved substantially.

RELIABILITY OF THE ESTIMATES

There are two types of possible errors associated with estimates based on data from sample surveys-sampling and nonsampling errors. A description of the sampling and nonsampling errors associated with the AHS national sample is given below.

Sampling errors. These errors result from the fact that the particular sample used for this survey is only one of a large number of possible samples which could have been selected using the same sample design. Even if all interviewing conditions were the same, estimates from each of the samples would differ from each other. The amount by which the estimates from all possible samples differ from one another is known as the sampling error. The standard error is commonly used to measure sampling error. It indicates how precisely an estimate from a particular sample measures the average result from all possible samples. However, it does not measure any systematic biases in the data. The accuracy of the estimates contained in this report depends on the sampling and nonsampling error, as measured by the estimated standard error, and biases and other nonsampling errors not measured by the standard error.

The sample estimate and the estimated standard error permit the construction of intervals such that the average result from all possible samples lies within the interval with a known level of confidence. For example, if all possible samples were selected and surveyed under the same general conditions and the estimate and the estimated standard error were computed for all the samples, then approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result from all possible samples.

For intervals computed using estimates and estimated standard errors from this report, the average result from all possible samples either is or is not contained within the interval. However, it can be said that there is only a 1 in 10 chance that the sample selected will yield a 90-percent confidence interval which does not contain the average result from all possible samples.

The figures presented in the standard error tables are approximations to the standard errors for the estimates in this report. These approximations were necessary in order to produce standard errors applicable to a wide range of characteristics at a reasonable cost. The standard error tables provide an indication of the order of magnitude of the standard errors rather than the actual standard errors for any specific characteristic.

There are various types of estimates which can be made using the data in this report. For example, one can make an estimate of the total number of housing units having a specific characteristic (known as an estimate of a level), a percentage of housing units having a specific characteristic, a ratio of two different characteristics, the difference between two estimates, or medians. Other types of estimates can be made but these are the most commonly used. Procedures for computing estimated standard errors for these types of estimates are given below.

Standard error table locator. To help identify which standard error table to use for a specific type of estimate from this report, a Standard Error Table Locator is provided. The rows of this table identify the population groups on the boxhead of the tables in this report, and the columns indicate the types of housing characteristics. For example, for general characteristics of the national housing inventory, table 1a should be used for estimating standard errors of estimates of levels, and table 1b should be used for estimating standard errors of estimated percentages of these housing units; for fuels and type of heating and cooling equipment in rural areas, table 6a

should be used for estimating standard errors of estimates of levels, and table 6b should be used for estimating standard errors of estimated percentages of these housing units.

Standard errors of estimates of levels. Tables 1a to 7a present estimated standard errors for estimates of national and regional characteristics for 1985. Linear interpolation should be used to determine estimated standard errors for estimates not specifically shown in tables 1a to 7a. The following is an illustration of the use of table 1a.

Table 3-9 of this report shows that there were 19,152,000 owner-occupied housing units with two persons in 1985. The Standard Error Table Locator shows that table 1a should be used for this type of characteristic. Interpolation in standard error table 1a shows that the estimated standard error of an estimate of this size is 202,000. The following procedure was used in interpolating.

The information in the table below was taken from standard error table 1a. The entry for X is the one sought.

Size of estimate (thousands)	Standard error (thousands)
17,500	195
19,152	X
20,000	205

By vertically interpolating between 195,000 and 205,000 "x" is determined to be 202,000.

$$195{,}000 + \frac{19{,}152{,}000 - 17{,}500{,}000}{20{,}000{,}000 - 17{,}500{,}000}\ (205{,}000 - 195{,}000) = 202{,}000$$

The 90-percent confidence interval for the estimated number of owner-occupied housing units with two persons is from 18,829,000 to 19,475,000. Thus, the average estimate from all possible samples of these types of housing units will lie within an interval computed in this way for approximately 90 percent of all possible samples.

Standard errors of estimates of percentages. Estimated percentages from this report are computed using sample data for both the numerator and the denominator. The numerator is a subclass of the denominator. The reliability of an estimated percentage depends upon both the size of the percentage and the total upon which the percentage is based (i.e., the denominator). Estimated percentages are more reliable than the corresponding estimates of the numerators of the percentages, particularly if the estimated percentages are 50 percent or more. Tables 1b-7b present estimated standard errors of national and regional estimated percentages of housing units for 1985. Two-way interpolation should be used for standard errors of estimated percentages not specifically shown in tables 1b-7b.

Included in tables 1b-7b are estimated standard errors for estimates of zero percent. These are considered to be overestimates of the true standard error and should be used primarily for the construction of confidence intervals for characteristics when an estimate of zero is obtained. The following is an illustration of the use of table 1b.

Table 3-9 shows that of the 19,152,000 owner-occupied housing units with two persons in 1985, 13,977,000 or 73.0 percent were in (P)MSA's. The Standard Error Table Locator shows that table 1b should be used. Interpolation in standard error table 1b (i.e., interpolation on both the denominator and the percent) shows that the standard error on the above percent is 0.5 percentage points. The following procedure was used in interpolating.

The information in the table below was taken from standard error table 1b. The entry for p is the one sought.

Denominator of percent (thousands)	Estimated percent		
	50	73.0	75
17,500	0.6	a	0.5
19,152		p	
20,000	0.6	b	0.5

First, interpolate horizontally between 0.6 and 0.5 to get the entry for cell "a." The entry for cell "a" is 0.5.

$$0.6 + \frac{73.0 - 50}{75 - 50}\ (0.5 - 0.6) = 0.5$$

Next, interpolate horizontally between 0.6 and 0.5 to get the entry for cell "b." The entry for cell "b" is 0.5.

$$0.6 + \frac{73.0 - 50}{75 - 50}\ (0.5 - 0.6) = 0.5$$

Finally, interpolate vertically between 0.5 and 0.5 to get the entry for cell "p." The entry for cell "p" is 0.5.

$$0.5 + \frac{19{,}152{,}000 - 17{,}500{,}000}{20{,}000{,}000 - 17{,}500{,}000}\ (0.5 - 0.5) = 0.5$$

Thus, the 90-percent confidence interval for this estimated percentage is between 72.2 and 73.8 percent.

Standard errors of ratios. For ratios of the form (100) (x/y), where x is not a subclass of y, the standard error tables for estimated percentages underestimate the standard error of the ratio when there is little or no correlation between x and y. For this type of ratio, a better approximation of the standard error may be obtained by letting the standard error of the ratio be approximately equal to:

$$(100)\ \frac{x}{y}\sqrt{\left(\frac{s_x}{x}\right)^2 + \left(\frac{s_y}{y}\right)^2}$$

where x = numerator of the ratio
y = denominator of the ratio
s_x = estimated standard error of the numerator
s_y = estimated standard error of the denominator

Sx and Sy are computed according to the method used for estimated standard errors of levels. The following is an illustration of how to compute the estimated standard error of a ratio.

Table 4-9 of this report shows that there were 9,086,000 renter-occupied housing units with two persons in 1985. The estimated standard error of this estimate is determined to be 148,000 using linear interpolation in standard error table 1a. The ratio of renter-occupied, two-person households to owner-occupied, two-person households is 47.4. The estimated standard error of this ratio is 0.9 and was calculated as follows:

$$100\left(\frac{9{,}086{,}000}{19{,}152{,}000}\right)\sqrt{\left(\frac{148{,}000}{9{,}086{,}000}\right)^2+\left(\frac{202{,}000}{19{,}152{,}000}\right)^2} = 0.9$$

Standard errors of differences. The estimated standard errors shown in tables 1a to 7a are not directly applicable to the difference between two estimates. The estimated standard error of a difference can be computed by the following:

$$s_{x\text{-}y} = \sqrt{s_x^2 + s_y^2}$$

where Sx and Sy are the estimated standard errors for the two estimates x and y, respectively. They can be computed in the same manner as for estimated standard errors of levels. This formula is quite accurate for the difference between estimates of the same characteristics in two different areas or the difference between separate and uncorrelated characteristics in the same area. If a high positive correlation exists between the two characteristics, the formula will overestimate the true error. If there is a high negative correlation, the formula will underestimate the true standard error. The following illustration shows how to compute the estimated standard error of a difference.

Table 3-9 shows that there were 10,206,000 owner-occupied housing units with three persons in 1985. The estimated standard error on this estimate is 156,000. Recall that there were 19,152,000 owner-occupied housing units with two persons in 1985 with an estimated standard error of 202,000 housing units. The estimated difference between 1985 owner-occupied housing units with two persons and with three persons is 8,946,000, and the estimated standard error of this difference is 255,000 as computed by the following:

$$255{,}000 = \sqrt{(202{,}000)^2 + (156{,}000)^2}$$

The 90-percent confidence interval for the difference of 8,946,000 is from 8,538,000 to 9,354,000, and it can be concluded that the average estimate of this difference, derived from all possible samples, lies within an interval computed in this way for approximately 90 percent of all possible samples.

Standard errors of medians. For medians presented in certain tables in this report, the estimated standard error depends on the distribution of the characteristic and the total number of housing units which comprise the distribution. A common method for approximating the reliability of the estimated median is to construct an interval about the estimated median such that the average median from all possible samples lies within the interval with a known level of confidence. The following procedure should be used to estimate the upper and lower limits of a 90-percent confidence interval of a median.

1. From the appropriate standard error table for estimated percentages, determine the estimated standard error of a 50-percent characteristic based on the total number of housing units from the distribution.
2. Add to and subtract from 50 percent 1.6 times the estimated standard error determined in step one to obtain the upper and lower percentage limits from which the confidence interval will be determined.
3. Determine the lower endpoint of the confidence interval by linearly interpolating within the category of the distribution which contains the lower percentage limit. The upper endpoint of the confidence interval is determined in the same manner using the upper percentage limit.

For about 90 out of 100 possible samples, the average median from all possible samples will lie within this 90-percent confidence interval. The following example illustrates how to compute a 90-percent confidence interval for a median.

Table 3-9 of this report shows the median number of persons in owner-occupied housing units was 2.5 in 1985. The total number of housing units upon which the distribution was based is 56,145,000.

1. From table 1b, the standard error of a 50-percent characteristic based on 56,145,000 is 0.4 percentage points.
2. To obtain a 90-percent confidence interval, add to and subtract from 50 percent 1.6 times the estimated standard error from step one giving upper and lower percentage limits of 49.4 and 50.6.

3. From table 3.9, it can be seen that 9,667,000 housing units or 17.2 percent had one person and 19,152,000 housing units or 34.1 percent had two persons (actually, for purposes of calculating the median, the category of two persons is considered to be from 1.5 to 2.5 persons).

By linear interpolation, the lower endpoint of the 90-percent confidence interval is found to be about 2.4.

$$1.5 + (2.5 - 1.5)\frac{(49.4 - 17.2)}{34.1} = 2.4$$

Similarly, the upper endpoint of the 90-percent confidence interval is found to be about 2.5.

$$1.5 + (2.5 - 1.5)\frac{(50.6 - 17.2)}{34.1} = 2.5$$

Thus, the 90-percent confidence interval ranges from 2.4 to 2.5 persons.

Nonsampling errors. Nonsampling errors can be attributed to many sources. The respondent may be unable or unwilling to provide the correct response. The interviewers may be unable to find the unit or they may be unable to obtain information about all the cases. They may record the data incorrectly. Either the respondent or the interviewer may interpret the questions differently than they were intended. The collected data may be keyed incorrectly. The sample frames may be incomplete, introducing some coverage error. Processing of the data introduces errors due to rounding or adjusting for missing values. In addition to these errors, there are other errors of collection, response, processing, coverage, and estimation of missing data. Not all of these errors are unique to sample surveys since they can, and do, occur in complete censuses as well.

Reinterview program. A study was done for the AHS sample to measure some of the nonsampling errors associated with the survey. A subsample of the original households was revisited and certain questions from the original questionnaire were re-asked. The original and reinterview were assumed to be two independent readings and thus were the basis for the measurement of the response error of these AHS estimates. The reinterview also served as a check for interviewer evaluation and quality control. This check was made at each of these households to determine if the following was done during the original interview:

- The sample unit and all units within the same structure were listed correctly.
- The correct unit was visited.
- The correct information on "tenure" was obtained.
- The correct information on "household composition" was obtained.
- The correct information on "type of housing unit" was obtained.
- The correct information on "occupancy status" was obtained.

The 1985 AHS-N reinterview study was done for three groups of items. They are units in structure and description of structure, number and type of rooms, and appliances including the age and fuel of the appliances. All items measured showed low levels of inconsistency except those listed in the following table.

Item	Level of inconsistency	
	Occupied units	Vacant units
Number of Living Rooms	Moderate to High	-
Number of Dining Rooms	Moderate	Moderate
Number of Family Rooms	Moderate	-
Number of "Other" Types of Rooms	Moderate	-
Age of Refrigerator	High	Moderate
Age of Garbage Disposal	-	Moderate to High
Age of Oven/Cooking Burner	-	Moderate
Age of Dishwasher	-	Moderate
Age of Clotheswasher	Moderate	-
Central Air Conditioning Fuel	Moderate to High	-
Cookstove or Range with oven	Moderate to High	Moderate

Dashes in the table represent items for which there were not enough observations to compute reliable estimates or items which had low levels of inconsistency. Low levels of inconsistency indicate that the response error is insignificant relative to the standard error in this report. Moderate levels of inconsistency indicate that the response error is not insignificant compared to the standard error in this report. High levels of inconsistency indicate that the response error is very significant compared to the standard error in this report, and caution should be used when examing estimates of these characteristics.

Cross-tabulations involving those items which are subject to high levels of inconsistency may also be subject to a large distortion as a consequence and thus are considered to be less reliable than comparable cross-tabulations which do not involve these data. Since the reinterview programs only measured inconsistencies for a sample of the items on the AHS questionnaire, there may be other items with high levels of inconsistency.

Reinterview studies were also conducted in conjunction with previous AHS enumerations. These studies included items dealing with poor housing quality, attitudes about the neighborhood, certain housing costs, journey-to-work, and mobility data. The following table shows the items which had moderate or high levels of inconsistency. While these questions were not included in the 1985 reinterview study, questions from previous enumerations were not altered

enough to lead one to believe that the level of inconsistent responses would change.

Item	Level of inconsistency
Open cracks or holes on inside of building	Moderate to High
Holes in floors	Moderate to High
Broken plaster or peeling paint on ceilings and floors	High
Mice or rats	Moderate
Working electric outlet in all rooms	High
Concealed wiring	High
Blown fuses/tripped circuit breakers	Moderate to High
Neighborhood conditions: street noise; roads in need of repair; crime; trash, litter, junk in streets or on properties; boarded up/ abandoned structures; nonresidential activities; odors, smoke, gas	Moderate to High
Satisfactory neighborhood services: police protection; hospitals/health clinics; public transportation; shopping; elementary schools	High
Electricity cost	High
Gas cost	High
Oil, coal, kerosene, wood or other fuel cost	Moderate to High
Fire/hazard insurance	Moderate to High
Real estate taxes	Moderate to High
Cost of real estate taxes	Moderate to High
Cost of water supply and sewage disposal	High
Cost of garbage collection	Moderate to High
Gross income	High
Type of vacant	Moderate to High
Prefer to live in same area or somewhere else	Moderate

A possible explanation for the results of the reinterview studies, as well as the surveys themselves, is that respondents may lack precise information. Also, since the results of the reinterview studies are derived from sample surveys, there is sampling error associated with these estimates of nonsampling error. The possibility of such errors should be taken into account when considering the results of these studies.

Coverage errors. The AHS misses approximately 25 percent of the new mobile homes (i.e., those built after January 1, 1980). It is believed that most of the difference is due to poor coverage of new mobile home parks in address ED's.

The coverage of old construction housing units is only as good as the coverage of the 1980 census. The third stage of the ratio estimation procedure attempted to correct for these deficiencies.

Another area of the AHS sample where coverage deficiencies exist is the sampling of building permits to represent conventional (i.e., nonmobile home) new construction. Due to time constraints, only permits issued more than 6 months before interviewing began were eligible to be selected to represent conventional new construction. This is more of a problem for single-unit as opposed to multiunit structures. In fact, for multiunit structures, the time between when a permit is issued and construction is completed is generally more than 6 months depending on the size of the structure. Also, new construction in special places such as colleges or military bases is not covered. This is a deficiency in both permit and nonpermit areas.

In identifying whole structure additions in address and area ED's, units which were in sample were screened to see if they were eligible for interview. The screening operation involved asking a series of questions. Therefore, the quality of coverage in these areas is only as good as the quality of the responses to these questions. It is conceivable that eligible units were omitted and ineligible units were included because the respondents' answers to the screening questions were incorrect. In addition, the quality of the listing of addresses will also affect the coverage of whole structure additions. In area ED's, the listings for the 1987 AHS have identified housing units which were missed in the 1985 listings.

It is also believed that a coverage deficiency exists for units which were nonresidential at the time of the 1980 census, but which have since converted to residential units. The magnitude of this deficiency is not known.

The second and third stages of ratio estimation correct these deficiencies for the total number of housing units only. Biases of subtotals will still exist.

Processing errors. Several types of errors are associated with the processing of the data. The first type of processing error which may be introduced is keying error. A quality assurance operation conducted in conjunction with the keying of the data helps to insure that less than 0.4 percent of the fields keyed from the questionnaire will be in error.

Another type of processing error is imputation error. If certain fields on a questionnaire are blank, values are assigned by the computer. These are generally items for which 1980 census data is available. It is not known how close these imputed values are to the actual values.

A problem may also exist for items for which there are no imputations for item response. Totals for these items and any subcategories of these items may be underestimated. Percent distributions may also be distorted.

Nonsampling error also occurs because of noninterview. The noninterview adjustments assume that interviewed units of similar size and geographic location (i.e., MSA status, urban/rural status) can adequately represent noninterviews. The extent to which this assumption does not hold true will determine the magnitude of the nonsampling error from these units.

Finally, another type of processing error is rounding error. The data are processed using double precision to minimize the effect of the rounding error. However, the error may still be significant for small percentages and small medians when these figures are derived from relatively large bases. Thus, confidence intervals formed from the standard errors may be distorted. This should be taken into consideration when analyzing the results of this survey.

Standard Error Table Locator: Population Group by Type of Characteristic

(Tables "a" used for estimates; tables "b" used for percentages)

Population group[1]	Table number by characteristics group			
	General[2]	Fuel and type of heating/cooling equipment	Neighborhood[3]	Special[4]
United States:				
Total[5]	1a, 1b	5a, 5b	5a, 5b	6a, 6b
Year-round or seasonal vacants	4a, 4b	5a, 5b	5a, 5b	6a, 6b
Black	1a, 1b	5a, 5b	5a, 5b	6a, 6b
Hispanic	[6]2a, [6]2b	5a, 5b	5a, 5b	6a, 6b
Elderly	1a, 1b	5a, 5b	5a, 5b	6a, 6b
Urban	2a, 2b	5a, 5b	5a, 5b	6a, 6b
Rural	3a, 3b	6a, 6b	5a, 5b	6a, 6b
Mobile home	1a, 1b	6a, 6b	5a, 5b	6a, 6b
New construction	1a, 1b	5a, 5b	5a, 5b	6a, 6b
In (P)MSA's—Central Cities	2a, 2b	5a, 5b	5a, 5b	6a, 6b
In (P)MSA's—Suburbs	2a, 2b	5a, 5b	5a, 5b	6a, 6b
Outside (P)MSA's	4a, 4b	7a, 7b	7a, 7b	7a, 7b
Regions:				
Northeast	2a, 2b	5a, 5b	5a, 5b	6a, 6b
Midwest	1a, 1b	5a, 5b	5a, 5b	6a, 6b
South	3a, 3b	6a, 6b	5a, 5b	6a, 6b
West	1a, 1b	5a, 5b	5a, 5b	6a, 6b

[1]For multiple population groups (for example; Blacks in the Northeast or new construction in central cities) use the standard error table with the highest standard error for a given estimate.

[2]General includes all characteristics except fuels and heating/cooling equipment, neighborhood items, and special items.

[3]Neighborhood items include all characteristics in "neighborhood" tables except "mobile home in group."

[4]Special items include all characteristics pertaining to cooperatives or condominiums; no complete bathroom; less than 1,500 square feet of detached one-family or mobile homes; well serving 1 to 5 units; mobile homes in a group of seven or more; area within 300 feet includes open space, park, farm or ranch; and major street repairs needed.

[5]Total includes total housing units, year-round, occupied, owner, renter, physical problems, moved in past year, below poverty level.

[6]Use table 1 for the following Hispanic deficiency items: sagging roof; missing bricks, siding, and other outside material; broken windows; fuel other than electricity, gas, or oil; bars on windows of buildings within 300 feet; 1.51 or more persons per room; 400 to 699 square feet per person; water supply stoppage in last 3 months; no toilet working for at least 6 hours in last 3 months; sewage disposal—public sewer with breakdown lasting 6 hours or more in last 3 months; uncomfortably cold for 24 or more hours last winter; signs of rats in last 3 months; and broken plaster or peeling paint in interior.

Table 1a. Standard Errors of Estimated Numbers of Housing Units

(Numbers in thousands)

Size of estimate	Standard error				Size of estimate	Standard error

current housing reports

Data on housing vacancies and housing characteristics

U.S. Department of Commerce
BUREAU OF THE CENSUS

CURRENT DATA ON HOUSING

HOUSING VACANCIES (SERIES H-111)

Current statistics on housing vacancies, based on a scientifically selected sample. This series of four quarterly reports and one annual report provides rental vacancy rates, homeowner vacancy rates and homeownership rates for the United States, each of the four regions, and inside and outside standard metropolitan Statistical areas. The statistics for the current quarter are compared with data for the same quarter in the preceding year. Percent distributions are presented for rental vacancies and homeowner vacancies by the following housing characteristics:

- Number of rooms
- Number of bedrooms
- Number of housing units in structure
- Duration of vacancy
- Plumbing facilities
- Monthly rent and sales price asked
- Year structure built

Also shown are percent distributions of all vacant housing units by year-round and seasonal status, figures on occupancy and vacancy rates based on the total housing inventory. The annual report, in addition to the above, presents percent distribution of housing characteristics for both renter- and owner-occupied units.

HOUSING CHARACTERISTICS (H-121)

This series of reports is published on an irregular schedule. Individual reports present data for the United States, regions, or local areas on one or more selected housing characteristics. (Publications in this series include 15 reports on television ownership, 1 report on second homes, 1 report on housing units by plumbing facilities and condition, a special study on housing characteristics classified by the 1959 income of occupants and a report on homeownership trends.) Stocks of these reports are exhausted. Photocopies only are available. For information, write to: Housing Division, Bureau of the Census, Washington, D.C. 20233

HOW TO ORDER

Both series of current housing reports described in this announcement are available from the Superintendent of Documents in a combined subscription for $6 per year (individual copies vary in price). Use the order form furnished below.

RELATED REPORTS

The Bureau of the Census also issues several series of monthly reports on the construction industry. Subjects covered include housing starts; construction activity, building permits, and housing sales. An announcement and order form covering these reports is available free of charge upon request to: Customer Services, Bureau of the Census, Washington, D.C. 20233.
