CURRENT POPULATION REPORTS

Consumer Income

s P-60, No. 83
July 1972

U. S. DEPARTMENT OF COMMERCE • Social and Economic Statistics Administration • BUREAU OF THE CENSUS

IEY INCOME IN 1971 OF FAMILIES AND PERSONS HE UNITED STATES

nce data from the March 1972 sample survey)

Median income of the Nation's families went above $10,000 in 1971 for the first time in U.S. history, according to the most recent estimates of the Bureau of the Census, part of the U.S. Department of Commerce's Social and Economic Statistics Administration.

Of the 53.3 million families in the United States in March 1972, 27.6 million or 51.7 percent received income of $10,000 or more in 1971. There were 9.9 million (18.5 percent) with incomes between $7,000 and $10,000; 6.0 million families (11.2 percent) with incomes between $5,000 and $7,000; and 9.8 million families (18.5 percent) with incomes below $5,000 in 1971.

The 1971 median family income of $10,290 was 4.2 percent higher than the 1970 median of $9,870. However, because of price rises, 1971 income was about the same as 1970 income in terms of constant dollars.[1]

In 1971, the median income of Negro families was $6,440 which was about 60 percent of the median income for white families ($10,670). Statistically, this ratio is not significantly different from that of 1970.

In 1971, median family income where the head worked year round full time was $12,440.

The median income for men working year round full time was $9,630. The corresponding figure for women working year round full time was $5,700, or about 59 percent of the income of men. The increase in the median income between 1970 and 1971 was about the same for men and women who worked year round full time--4.9 percent for men and 4.8 percent for women. Statistically, these rates of increase are not significantly different. For all workers in 1971, that is, full and part time, the median income for men was about $6,900 compared to $2,410 for women. The increase in the median for men during the year was 3.5 percent, but for women, 7.6 percent.

Table A.--NUMBER OF FAMILIES AND UNRELATED INDIVIDUALS BY TOTAL MONEY INCOME IN 1971

(Families and unrelated individuals as of March 1972)

Total money income	Number of--	
	Families	Unrelated individuals
Total.....	53,296,000	16,311,000
Under $1,000.....	784,000	1,749,000
$1,000 to $1,999.....	1,339,000	3,365,000
$2,000 to $2,999.....	2,242,000	2,457,000
$3,000 to $3,999.....	2,574,000	1,657,000
$4,000 to $4,999.....	2,888,000	1,324,000
$5,000 to $5,999.....	3,027,000	1,062,000
$6,000 to $6,999.....	2,955,000	945,000
$7,000 to $7,999.....	3,327,000	850,000
$8,000 to $9,999.....	6,560,000	1,168,000
$10,000 to $11,999.....	6,686,000	702,000
$12,000 to $14,999.....	7,674,000	526,000
$15,000 to $24,999.....	10,399,000	386,000
$25,000 and over.....	2,841,000	120,000
Median income.....	$10,285	$3,316

The 1971 income statistics presented in this report were obtained from the Census Bureau's Current Population Survey of March 1972. The

information was collected from the civilian noninstitutional population and members of the Armed Forces living off post or with their families on post in the United States. More detailed income data for families and persons will appear in a report in this series to be issued later this year. Furthermore, another report in this series will be issued which will show detailed income data for households.

This report covers money income only, prior to deductions for taxes. For more detailed definitions of the terms and concepts used in this report in connection with families and persons, see Current Population Reports, Series P-60, No. 80. For additional information on households, see Current Population Reports, Series P-60, No. 79.

The estimates for 1971 are based on data obtained in the March 1972 Current Population Survey (CPS) of the Bureau of the Census. Approximately 47,000 households were eligible for interview. Of this number 1,700 occupied units, on the average, were visited, but interviews were not obtained because the occupants were not found at home after repeated calls or were unavailable for some other reason. Since the estimates in this report are based on a sample, they are subject to sampling variability. Moreover, as in all field surveys of income, the figures are subject to errors of response and nonreporting. All statements of comparison made in the text of this report, however, are statistically significant, unless otherwise noted. This means that the chances are at least 19 in 20 that a difference identified in the text indicates a true difference in the population rather than the chance variations arising from the use of samples.

Comparability of Estimates from the March 1972 CPS with Estimates for Previous Years

The data for 1971 collected in the March 1972 Current Population Survey (CPS) are, in some instances, not entirely comparable to figures for earlier years because of revisions in the Current Population Survey. Starting in January 1972, 1970 census-based population controls, metropolitan residence definition, and other materials were introduced into the sample and estimation procedures. The major item affecting comparability at the overall national level is the introduction of population controls based on the 1970 census. Figures for previous years are tied in with 1960 census-based population controls. Basically, these changes should have no substantial impact on summary measures, such as medians and means, and on proportional measures, such as percent distributions and poverty rates. However, the changes may have more impact on the population levels in different subgroupings such as the total number of persons or families either overall, within some particular income interval, or below the low-income level.

The figures shown in this report for metropolitan areas (SMSA's) are based on the SMSA's as defined on the basis of the 1970 census; those published in earlier years referred to SMSA's as defined on the basis of the 1960 census. There are significant differences in the population classified as metropolitan from each of these definitions. For the 1970 definitions of SMSA's, see U.S. Census of Population: 1970, Number of Inhabitants, PC(1)-A1, United States Summary.

Another change in the Current Population Survey which affects occupational data only, is the inclusion of a supplemental question, "What were your most important activities or duties?", which provided additional information for classifying persons by occupation. In general, the major impact of this supplemental question was to reclassify some persons from the "managers" classification into other types of occupations (primarily into the major occupation group of "craftsmen").

A detailed description of the changes appears in the Bureau of Labor Statistics report, Employment and Earnings, Vol. 18, No. 8, February 1972.

Table 1. FAMILY INCOME, 1947, 1950, AND 1959 TO 1971--FAMILIES BY TOTAL MONEY INCOME

(Families as of March of the following year. This report excludes inmates of institutions. It includes members of the Armed Forces in the United States living off post or with their families on post but excludes all other members of the Armed Forces; the 1972 survey included about 1,191,000 members)
