ACKNOWLEDGMENTS

This report was prepared by **Angela M. Feldman,** under the general direction of **John F. Coder** Chief, Current Income Statistics Staff. Staff members contributing to the collection and compilation of the data and the preparation, analysis, and statistical review of the text were **Charles T. Nelson, Edward J. Welniak,** and **Robert W. Cleveland.** Statistical assistance was provided by **Helen Olge** and **Rose Mary Schade. Shirley L Smith** typed the report. Publication review assistance was provided by **Rosa B. Taylor.** Overall direction was provided by **Gordon W. Green, Jr.,** Assistant Division Chief (Socioeconomic Statistics Programs), Population Division. Sampling review was conducted by **Glenn White** and **John Bushery** of the Statistical Methods Division. The cover was illustrated by **Beverly Jo Jaquish,** Publications Services Division.

SUGGESTED CITATION

U.S. Bureau of the Census, Current Population Reports, Series P-60, No. 136, *Characteristics of Households and Persons Receiving Selected Noncash Benefits: 1981,* U.S. Government Printing Office, Washington, D.C., 1983.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Current Population Reports are sold in two subscription packages: Series P-20, P-23, P-27, and P-60 are available for $90 per year ($22.50 additional for foreign mailing); Series P-25, P-26, and P-28 are available for $22 per year ($5.50 additional for foreign mailing). The single-copy price of this report is $6.

Characteristics of Households and Persons Receiving Selected Noncash Benefits: 1981

HIGHLIGHTS

For the second consecutive year, a decrease in household money income after adjusting for inflation and an increase in the number of households with income below the poverty level[1] (measured solely in money terms) were accompanied by an increase in the number of households receiving noncash benefits.[2]

In 1981, 9 out of every 10 households in the United States received at least one of the types of noncash benefits covered by the survey. The 74.8 million households receiving at least one of these benefits in 1981 represented an increase of 900,000 over 1980. There was some evidence that the number of households receiving at least one means-tested noncash benefit (food stamps, free or reduced-price school lunches, publicly owned or subsidized housing, and Medicaid) increased from 14.3 million in 1980 to 14.6 million in 1981. In addition, the number of households receiving nonmeans-tested benefits from one or more of four sources (Medicare, regular-price school lunches, employer- or union-provided pension plans, and employer- or union-provided group health insurance plans) increased from 69.0 million to 69.8 million.

Means-Tested Noncash Benefits

Means-tested benefits are those that require that the household's income or assets (resources) fall below specified guidelines in order to qualify for benefits. The market value of these benefits, which are intended for the low-income population, now exceeds cash public assistance by more than 2 to 1. In 1980, the market value of these benefits was estimated to be about $72.5 billion.[3]

Between 1980 and 1981, the number of households receiving food stamps increased by 5 percent to 7.1 million. There was some evidence that the number of households containing one or more children receiving free or reduced-price school lunches declined by 3 percent to 5.4 million. There was no significant change in the number of households residing in public or other subsidized housing (2.9 million) or in the number of households with members covered by Medicaid (8.5 million).

Approximately 47 percent of the households receiving these means-tested noncash benefits had incomes below the poverty level in 1981 (table A), higher than the 1980 figure of 45 percent. Of the households receiving at least one means-tested noncash benefit, those receiving food stamps had the highest poverty rate (67 percent).

The 7.1 million households receiving food stamps during 1981 accounted for 9 percent of all households. (See table B.) The median total money income for these households was $5,940, or 31 percent of the median income for all households. About two-thirds of all food stamp households had total money incomes below the poverty level in 1981, and 79 percent had incomes below 125 percent of the poverty level. Although only 9 percent of all households received food stamps, there were several subgroups with much higher rates of food stamp recipiency. These include households with Black householders (28 per-

---

[1]See appendix A for an explanation of the poverty concept. Data on the money income and poverty status of families and persons in 1981 were published in Current Population Reports, Series P-60, No. 134. For this report poverty status is shown for households rather than families and unrelated individuals.

[2]Some of these data were released previously in an advance report (Current Population Reports, Series P-60, No. 135).

[3]For further details concerning the valuation of noncash benefits, see Technical Paper No. 50, Alternative Methods for Valuing Selected In-Kind Transfer Benefits and Measuring Their Effect on Poverty.

Table A. Households Receiving Means-Tested Noncash Benefits--Number, Percent Below the Poverty Level, and Percent of Poor Receiving Benefits: 1981 and 1980

(Households as of March of the following year. Households are classified according to poverty status of the family or nonfamily householder)

Type of means-tested benefit	All households			Percent of households below the poverty level			Percent of all poor households receiving noncash benefits

[1]Detail does not add because some households have noncash benefits from more than one source.

[2]Based on poor households with school children 5 to 18 years old.

[3]Based on poor households in renter-occupied housing.

percent), those with householders of Spanish origin (18 percent), and family households maintained by women, no husband present (31 percent).

Free or reduced-price school lunches were received by children in 20 percent of all households with school children aged 5 to 18 years. About 46 percent of households maintained by women (no husband present) with children in school received free or reduced-price school lunches. The South, which contains about 35 percent of all households with school children 5 to 18 years old, accounted for about 44 percent of the total 5.4 million households receiving free or reduced-price school lunches. Of the 4.2 million poverty households with school children, about 63 percent received school lunches at a reduced price or for free.

About 11 percent of the 27.2 million renter-occupied households were residing in publicly owned or other subsidized housing in March 1982. Of the 6.4 million renter-occupied households below the poverty level, 24 percent resided in public or subsidized housing. One of every three households residing in public or subsidized housing had a householder 65 years old or over. About three-fourths of all public or subsidized

Table B. Percent of Households Receiving Means-Tested Noncash Benefits, by Selected Characteristics: 1981

(Households as of March 1982. Households are classified according to the race of the family or nonfamily householder)

Selected characteristics	Number (thousands)	Percent				
		Total[1]	Food stamps	Free or reduced-price school lunches[2]	Public or other subsidized housing[3]	Medicaid
Total	83,527	100.0	8.5	20.4	10.6	10.2
White	72,845	100.0	6.1	14.9	7.9	7.9
Black	8,961	100.0	28.1	50.4	22.6	28.3
Spanish origin[4]	3,980	100.0	18.3	43.4	10.8	20.5
Households with--						
Children under 19 years old	34,209	100.0	13.5	20.4	13.8	13.0
Female family householder, no husband present	9,403	100.0	30.6	46.0	22.5	33.4

Residence in central cities	24,668	100.0	11.5	29.1	12.7	14.0

[1]Includes households not receiving means-tested noncash benefits, not shown separately.

[2]Based on households with school children 5 to 18 years old.

[3]Based on households in renter-occupied housing.

[4]Persons of Spanish origin may be of any race.

housing units were in metropolitan areas; 51 percent were in central cities.

Of the 8.5 million households with members covered by Medicaid, 4.6 million (about 54 percent) had incomes below the poverty level. The median income for households with Medicaid coverage was $6,760, or 35 percent of the median income for all households. Medicaid covered 39 percent of all poor households, 51 percent of all poor households with children under 19 years old, and 36 percent of all poor households with a householder 65 years and over. Of all households with Medicaid coverage, 67 percent had a White householder, 30 percent had a Black householder, and 10 percent had a householder of Spanish origin. (See table C.)

Public Nonmeans-Tested Noncash Benefits

Households receiving public nonmeans-tested benefits are not required to meet income or asset guidelines. Two major public programs are covered in this report: Medicare and regular-price school lunches. (All school lunches served at schools participating in the National School Lunch Program are subsidized.) During 1981, the number of households with one or more members covered by Medicare rose by 4 percent to 20.6 million, and the number of households with school children receiving regular-price school lunches declined by 6 percent to 11.4 million. (See table D.)

About 25 percent of all households in the United States contained one or more persons covered by Medicare during 1981. Of these, about 82 percent had a householder 65 years old or over. The median income of Medicare households was $10,640 in 1981. The poverty rate for households in which one or more members were covered by Medicare was 19 percent, higher than the 14 percent poverty rate for all households. About 97 percent of all households with an elderly householder (65 years old or over) reported one or more

Table C. Percent Distribution of Means-Tested Noncash Benefit Households, by Selected Characteristics: 1981

(Households as of March 1982. Households are classified according to the race of the family or nonfamily householder)

Selected characteristics	Food stamps	Free or reduced-price school lunches	Public or other subsidized housing	Medicaid
Total.....thousands.....	7,115	5,356	2,873	8,487
Percent distribution.....	100.0	100.0	100.0	100.0
White.....	62.2	60.5	59.5	67.5
Black.....	35.4	35.4	37.2	29.9

Householder 65 years old and over...	16.1	3.7	33.0	29.5
Residence in the South.....	41.4	43.7	34.0	31.6
Residence in metropolitan areas.....	63.1	61.6	75.1	68.1
Residence in central cities.....	39.8	36.4	51.3	40.7

[1]Persons of Spanish origin may be of any race.

members covered by Medicare; the percentage of poor households with an aged householder reporting Medicare coverage was about the same (98 percent).

The 11.4 million households containing one or more children receiving regular-price school lunches in 1981 represented 43 percent of all households with school children 5 to 18 years old. The median income for households with children receiving regular-price school lunches was $27,600 in 1981, about 17 percent higher than the median income for all households with school children and about 45 percent higher than the median income for all households.

Employer- or Union-Provided Noncash Benefits

Two of the most important employer-provided noncash benefits are pension plans and group health insurance plans. While there was some evidence that the number of households with one or more members having a group health insurance plan paid for, at least in part, by their employer increased from 48.8 million in 1980 to 49.3 million in 1981, the number of households with one or more workers covered by an employer or union-provided pension plan (38.1 million) was not significantly different in 1981.

Households in which one or more persons were covered by a pension plan at work during 1981 represented about 46 percent of all households. After excluding households in which the householder was 65 years old or over, this figure rises to 55 percent. The median income for households with one or more members covered by a pension plan at work was $27,920, or $8,850 higher than the median for all households.

During 1981, households in which one or more members were covered by a group health plan at work which was paid for, in full or in part, by an employer or union represented 59 percent of all households. Of all households with a householder less than age 65, 71 percent had at least one member covered by an employer- or union-provided group health plan. The median income for households in which one or more members were covered by an employer-or union-provided group health plan was $26,040, or $6,970 above the median for all households.

NOTE ON LIMITATIONS AND DATA QUALITY

Although these data on noncash benefits provide information on the characteristics of households and persons receiving benefits, the data have some important limitations

Table D. Households Receiving Nonmeans-Tested Noncash Benefits—Number, Median Income, and Percent Below the Poverty Level: 1981 and 1980

(Households as of March of the following year. Households are classified according to the poverty status of the family or nonfamily householder)

*Significant at the .05 level.
**Significant between the .05 and .10 levels.

[1]For standard errors on median incomes see table 1.

[2]Detail does not add because some households have noncash benefits from more than one source.

[3]Includes only workers with group health insurance plans which were paid for in part (or all) by an employer or union.

which must be noted before the results shown in this report are examined in detail.

1. The first limitation is the use of gross annual household income and poverty status based on gross annual income to classify households. It should be kept in mind that, of the public noncash transfer programs covered in this report, only the School Lunch Program uses annual income to

determine eligibility for participation. Almost all "means-tested" noncash transfer benefits are based, instead, on monthly or quarterly income "accounting" periods. Households with periodically low monthly or quarterly income but relatively high annual income may legally qualify for benefits. In addition, eligibility for benefits for most types of in-kind programs are based on "countable" income (i.e., gross income less certain types of excluded income and other allowable deductions). For example, the Food Stamp Program, which uses a monthly or quarterly accounting period, provides a standard deduction for all applicants and additional allowances for those with large housing (shelter) or medical care costs relative to income.

It should also be noted that most means-tested noncash transfer programs require an "asset" or "resource" eligibility test in addition to the income test. Therefore, low income alone does not guarantee eligibility. Finally, rules for eligibility may vary from State to State, as in the Medicaid program, and even from locality to locality, as in several public housing programs. The combined effect of these factors--the monthly or quarterly income accounting period, the income exclusions and deductions, the asset tests, and the variation in some programs by State and locality--may result in patterns of noncash benefit recipiency which are not fully explained by the annual gross income data presented in this report. Caution should be used, therefore, when examining the annual money income levels and their relationship to program eligibility.

2. A second limitation concerns household membership recorded in the survey. Household membership is defined as of the interview date in March 1982. However, most questions on noncash benefits referred to respective calendar years. In some cases, therefore, household members present during part or all of 1981 may have moved out or died by the time the survey was conducted. In other households, some persons may have been members of that household for only a short time. Current membership, therefore, may not always reflect the true economic status of the household during the year. Household members who contributed significantly to the total household income may have entered or left the household during the year prior to the interview in March 1982. Other individuals with little or no income and, hence, eligible for many noncash benefits, may have moved into households with relatively high incomes.

3. A third limitation which should be kept in mind, especially when examining the Medicare and Medicaid data, is that the CPS sample universe is limited to the civilian noninstitutional population. Persons residing in institutions (such as nursing homes, mental health facilities, and prisons), at the time of the interview in March were excluded from all estimates. The estimation procedure used in this survey involved the inflation of weighted sample results to independent estimates of the total civilian noninstitutional population of the United States by age, race, and sex. These independent estimates are based on the 1980 Census of Population.

4. A final limitation involves data quality. A summary evaluation of data quality for the noncash benefit data is presented in appendix A of this report.

VALUATION OF NONCASH BENEFITS

In March of this year, the Census Bureau released Technical Paper No. 50, Alternative Methods for Valuing Selected In-Kind Transfer Benefits and Measuring Their Effect on Poverty. This technical paper presented estimates of poverty based on both money income and the value of selected noncash benefits. By including the value of noncash benefits, the report indicates that the number of poor would be reduced by between 12 and 42 percent from the current money income poverty definition.

CHANGES IN THE POVERTY DEFINITION

The poverty definition used to produce estimates in this report differs slightly from the one used in previous Current Population Surveys as a result of recommendations made in 1980 by a Federal Interagency Committee. The poverty estimates shown for both 1980 and 1981 were computed using the revised definition. These revisions resulted in a slight increase in the estimated number of poor. This increase for 1980 was from 29.3 million using the old definition to 29.6 million for the new definition. For more discussion of these revisions, see Current Population Reports, Series P-60, Nos. 133 and 134.

Appendix A. Definitions and Explanations

Population universe of the CPS. The CPS sample covers the civilian noninstitutional population of the United States and Armed Forces members living off post or with their families on post, but excludes all other members of the Armed Forces. The sample includes the 50 States and the District of Columbia but excludes Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Trust Territory of the Pacific Islands. Estimates shown in this report are, therefore, restricted to this universe.

Noncash benefits. Noncash benefits can be defined as benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. The data collection in March 1982 concentrated on two major categories of noncash benefits: those which could be defined as public transfers and those which could be categorized as employer- or union-provided benefits to employees. In the category of public noncash transfers, the survey covered the following programs: the Food Stamp Program, the National School Lunch Program, public and other subsidized housing, Medicare health insurance, Medicaid health insurance, and CHAMPUS, VA, or other military health care. Data were collected for two types of employer- or union-provided noncash benefits: pension plans and group health insurance plans.

MEANS TESTED

Means-tested transfer programs require that the household income and/or assets (resources) fall below specified guidelines in order to qualify for benefits. A description of each of the means-tested noncash transfers covered in this report is included in this section.

Food stamps. The Food Stamp Act of 1977 defines this Federally funded program as one intended to "permit low-income households to obtain a more nutritious diet."[1] Food purchasing power is increased by providing eligible households with coupons which can be used to purchase food. The Food and Nutrition Service of the U.S. Department of Agriculture (USDA) administers the Food Stamp Program through State and local welfare offices. The Food Stamp Program is the major national income support program which provides benefits to all low-income and low-resource households regardless of household characteristics (e.g., sex, age, and disability). The questions on participation in the Food Stamp Program in the March CPS were designed to identify households in which one or more of the current members received food stamps during 1981. Once a food stamp household was identified, a question was asked to determine the number of current household members covered by food stamps during the year. Questions were also asked about the number of months food stamps were received during the year and the total face value of all food stamps received during that period.

Free or reduced-price school lunches. The National School Lunch Program is designed "to help safeguard the health and well-being of the Nation's children by assisting the States in providing an adequate supply of foods"[2] for all children at moderate cost. Additional assistance is provided for children determined by local school officials to be unable to pay the "full established" price for lunches. The program is administered by the Food and Nutrition Service of the U.S. Department of Agriculture (USDA) through

---

[1]For title XIII of P.L. 95-113, The Food Stamp Act of 1977, declaration of policy.

[2]From P.L. 79-396, The National School Lunch Act of 1946, declaration of policy. P.L. 91-248 further amended the P.L. 79-396 to provide free and reduced-price school lunches for children of needy families in 1970.

State educational agencies or through regional USDA nutrition services for nonprofit private schools. The program is funded by a combination of Federal funds and matching State funds.

All students eating lunches prepared at participating schools pay less than the total cost of the lunches. Some students pay the "full established" price for lunch (which itself is subsidized), while others pay a "reduced" price for lunch, and still others receive a "free" lunch. Program regulations require students receiving free lunches to live in households with incomes below 125 percent of the official poverty level. Those students receiving a reduced-price school lunch live in households with incomes between 125 percent and 195 percent of the official poverty level. The data in this report, however, do not distinguish between recipiency of free and reduced-price school lunches.

The questions on the March 1982 CPS provided a very limited amount of data for the school lunch program. Questions concerning the school lunch program were designed to identify the number of members 5 to 18 years old in households who "usually" ate a hot lunch; this defined the universe of household members usually receiving this noncash benefit. This was followed by a question to identify the number of members receiving free or reduced-price lunches.

Public or other subsidized housing. There are several programs designed to "remedy the unsafe and unsanitary housing conditions and the acute shortage of decent, safe, and sanitary dwellings for families of low income."[3] Among these, the most important are Low Rent Public Housing and Sections 8, 236, and 101 (rent supplements) of the U.S. Housing Act. Low rent public housing projects are owned, managed, and administered by a local housing authority. Partial financing may be provided by the State or the Department of Housing and Urban Development. Participation in public housing is determined by two factors: program eligibility and the availability of housing. Income standards for initial and continuing occupancy vary by local housing authority, although the limits are constrained by Federal guidelines. Rental charges, which, in turn, define net benefits, are set by a Federal statute not to exceed 25 percent of net monthly money income. A recipient unit can either be a family of two or more related persons or an individual who is handicapped, elderly, or displaced by urban renewal or natural disaster.

There are some programs through which housing assistance is provided to low-income families and individuals living in publicly or privately owned dwellings. Two of the more common types of programs in which Federal, State, and local funds are used to subsidize private sector housing are Sections 8 and 101, rent supplement plans. The difference between the "fair market" rent and the rent charged to the tenant is paid to the owner by a government agency. Under an interest reduction program (e.g., Section 236), the amount of interest paid on the mortgage by the owner is reduced so that subsequent savings can be passed along to low-income tenants in the form of lower rent charges.

There were two questions dealing with public and low-cost housing on the March CPS supplement questionnaire. The first question identified residence in a housing unit owned by a public agency. The second question identified beneficiaries who were not living in public housing projects, but who were paying lower rent due to a government subsidy. These questions differed from other questions covering noncash benefits in that they established current recipiency status (as of the third week in March 1982) rather than recipiency status during reference year. No information on Federally subsidized homeownership (e.g., Section 235) or subsidized mortgage interest guarantees (e.g., FHA and VA) was collected.

Medicaid. The Medicaid Program is designed "to furnish medical assistance on behalf of needy families with dependent children, and of aged, blind, or permanently and totally disabled indivduals whose incomes and resources are insufficient to meet the costs of necessary medical services."[4] The program is administered by State agencies through grants from the Health Care Financing Administration of the Department of Health and Human Services. Funding for medical assistance payments consists of a combination of Federal, State, and in some cases, local funds.

Medicaid is for the most part a categorical program with complex eligibility rules which vary from State to State. There are two basic groups of eligible individuals: the categorically eligible and the medically needy. The major categorically eligible groups are all Aid to Families with Dependent Children (AFDC) recipients and most Supplemental Security Income (SSI) recipients. Other categorically eligible groups are

[3]From P.L. 75-412, The United States Housing Act of 1937, declaration of policy.

[4]From title XIX of the 1965 Amendments to P.L. 89-97, The Social Security Act, "Grants to States for Medical Assistance Programs," declaration of policy.

(1) those who meet basic State cash assistance eligibility rules (the aged, blind, or disabled; needy single parents with children; and, in some States, needy unemployed parents with children who are not currently receiving money payments), and (2) needy persons who meet categorical eligibility standards but are institutionalized for medical reasons (e.g., low-income elderly persons in nursing homes). However, such institutionalized persons are not included in the CPS universe and, therefore, are not reflected in these statistics.

In roughly one-half of the States, coverage is extended to the medically needy: persons meeting categorical age, sex, or disability criteria whose money incomes and assets exceed eligibility levels for cash assistance but are not sufficient to meet the cost of medical care. In such States, qualifying income and asset levels are usually above those set for cash assistance. Families with large medical expenses relative to their incomes and assets may also meet medically needy eligibility standards in these States.

The Medicaid question on the March CPS attempted to identify all adults who were covered by Medicaid at any time during 1981. The term "covered" means enrolled in the Medicaid program, i.e., had a Medicaid medical assistance card or incurred medical bills which were paid for by Medicaid. In order to be counted, the person did not have to receive medical care paid for by Medicaid.

After data collection and creation of an initial microdata file, further refinements were made to assign Medicaid coverage to children. In this procedure, all children under 21 years old in families were assumed to be covered by Medicaid if either the householder or spouse reported being covered by Medicaid. (This procedure was required mainly because the Medicaid coverage question was asked only for persons 15 years old and over.) All adult AFDC recipients, and their children, and SSI recipients living in States which legally require Medicaid coverage of all SSI recipients were also assigned coverage. The data shown in this report exclude children covered by Medicaid in households in which no adult member was covered by Medicaid.

NONMEANS TESTED

Households receiving nonmeans-tested benefits are not required to meet income or asset guidelines. Following is a description of the nonmeans-tested programs covered in this report.

Medicare. The Medicare Program consists of two separate but complementary health plans designed to provide adequate medical care for the aged and disabled. The Basic Hospital Insurance Plan (Part A) "is designed to provide basic protection against the costs of hospital and related post-hospital services."[5] This plan also covers many persons under 65 years old who receive Social Security or Railroad Retirement benefits based on longterm disability. Part A is financed jointly by employers and employees through Social Security payroll deductions. Qualified persons 65 years old and over who are not otherwise eligible for Part A benefits may pay premiums directly to obtain this coverage. The Medical Insurance Plan (Part B) is a voluntary plan which builds upon the hospital insurance protection provided by the basic plan. It provides insurance protection covering physicians' and surgeons' services and a variety of medical and other health services received either in hospitals or on an ambulatory basis. It is financed through monthly premium payments (about $10.00 per month in 1981) by each enrollee and subsidized by Federal general revenue funds.

The Medicare question on the March CPS attempted to identify all persons 15 years old and over who were covered by Medicare at any time during 1981. The term "covered" means enrolled in the Medicare Program. In order to be counted, the person did not necessarily have to receive medical care paid for by Medicare.

Regular price school lunches. All school lunches served at schools participating in the National School Lunch Program are subsidized. Unless qualified for free or reduced-price lunches, students eating lunches prepared at participating schools pay the "full established" price which is less than the total cost of the lunches.

Employer- or union-provided group health insurance plans. The March CPS collected a limited amount of information on employer- and union-provided group health insurance for civilian persons 15 years old and over who worked during 1981. Workers who participated in group health insurance plans of any kind were asked whether or not their employer or union helped pay for all, part, or none of the health insurance premium for 1981.

Employer- or union-provided pension plans. Civilian persons 15 years old and over who worked during 1981 were asked about their participation in pension plans provided by employers or unions. This report assumes pension plans receive contributions from the employer or union or at least some benefit is

[5]As specified in Section 1811 of title XVIII of the 1965 Amendments to P.L. 89-97; The Social Security Act, "Health Insurance for the Aged."

derived by obtaining the pension plan from the employer or union.

CHAMPUS, VA, or other military health care. All active and retired military personnel and their dependents are eligible for medical treatment at any Department of Defense (DOD) installation medical facility. (Currently, DOD operates 180 hospitals.) Additionally, DOD operates the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) to provide reimbursement (after payment of a deductible) for covered medical care rendered in civilian facilities to wives and children of active military personnel, to retired military personnel and their dependents, and to dependents of deceased personnel (unless eligible for Part A of Medicare). The program is designed for those unable to use government medical facilities for reasons of distance, overcrowding of such facilities or the unavailability of appropriate treatment at a military medical center.

The Veterans Administration (VA) operates 172 hospitals, 107 long-term facilities and 229 outpatient clinics for the care of individuals with active service in the Armed Forces who were discharged from duty other than dishonorably. Priority is given to patients with service-related ailments.

MONEY INCOME

The income data shown in this report are restricted to money income received during the calendar year 1981, the year preceding the March survey. The amounts shown are "gross" money income figures, that is, before deductions for any taxes, union dues, Medicare premiums, etc. The money income amounts shown exclude the value of noncash or in-kind benefits such as 1) food, in the form of food stamps and school lunches from the National School Lunch Program; 2) medical benefits, such as Medicare, Medicaid, and employer-provided group health insurance; 3) subsidized housing; and 4) employer-provided pension plans. These elements should be considered when comparing income levels. It should also be noted that household surveys tend to underestimate income received because of nonsampling errors such as underreporting, misreporting, nonreporting, and nonresponse. A discussion of these nonsampling errors is contained later in this appendix.

Total money income. Total money income is the sum of the amounts of income received from all sources covered by the March CPS. These sources are described in detail below. The CPS definition of money income excludes several sources of income. Excluded are (1) proceeds from the sale of property such as stocks, bonds, houses, land, or any other personal property; (2) withdrawals from savings accounts or other types of savings funds; (3) refunds or rebates of any type; (4) loans; (5) gifts; and (6) any one-time or lump-sum amounts such as insurance settlements or inheritances.

Earnings. The CPS collects individual amounts from three sources of earnings: (1) wages or salaries received by employees working for pay; (2) net nonfarm self-employment income received by persons operating their own nonfarm business, partnership, or professional practice; and (3) net farm self-employment income received by persons operating farms. Total money earnings is the sum of amounts received from these three sources. This amount may have a negative value (a loss) since losses can be reported for self-employment income.

Types of earnings. As mentioned above the CPS collects information on three earnings types. Each of these types (1) wages and salary, (2) nonfarm self-employment, and (3) farm self-employment are described below.

Wages and salary are money received before deductions by persons working as employees. Included are the amounts earned from all jobs. In addition to "normal" wages and salary, the amount includes overtime pay, bonuses, tips, and severance pay. Wages and salary includes pay received by Armed Forces members in the CPS universe. It excludes money received for expense accounts or any food or lodging received as part of pay.

Nonfarm self-employment is the net income (gross receipts minus expenses) from a person's own business, professional practice, or the person's share of the net income from a partnership. The amount includes net income from all businesses, professional practices, and partnerships that the person owned and operated. The amount does not include earnings from incorporated businesses.

Farm self-employment is the net income (gross receipts minus expenses) a person receives from their own farm operation. It includes both owners and renters of farm land and sharecroppers. The amount covers net income from all farming operations. Income received from renting land on shares is included as farm income. Income received from renting land for cash is included as rental income, not as farm income. The farm income amounts do include amounts from incorporated farm operations because CPS editing procedures prevent the classification of farms as incorporated.

Cash public assistance or welfare includes payments under the Aid to Families with Dependent Children (AFDC or ADC) program, Supplemental Security Income (SSI), and payments often categorized as General Assistance. Other public assistance which may have also been included are payments from the Emergency Assistance Program, Cuban Refugee Assistance, and assistance for paying home heating and cooling expenses. One amount was recorded representing the total amount of public assistance or welfare received from the sources mentioned above.

Private pensions. Pensions received by retired or disabled workers or by the survivors of deceased workers which are paid by a previous private employer or union or from a retirement or disability plan purchased by the recipient. These pensions exclude those received from the Federal government, military, or from State or local governments.

Median income. The median income is the amount which divides the distribution into two equal groups, one having incomes above the median, and the other having incomes below the median. The medians for households are based on all households. The medians for persons are based on the distributions of persons with income.

Mean income. The mean income is the amount obtained by dividing the total income of a group by the number of units in that group (households, families, unrelated individuals, or persons). The means for households, families and unrelated individuals are based on the total. The means for persons are based only on the number of persons with income.

Poverty definition. In this report households are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980. The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits, the most important of which are covered in this report. For estimates of the value of noncash benefits and their effect on the measurement of poverty see Technical Paper No. 50, Alternative Methods for Valuing Selected Noncash In-Kind Transfer Benefits and Measuring Their Effect on Poverty. The index is based on the Department of Agriculture's 1961 economy food plan and reflects the different consumption requirements of families based on their size and composition. It was determined from the Department of Agriculture's 1955 survey of food consumption that families of three or more persons spent approximately one-third of their income on food; the poverty level for these families was, therefore, set at three times the cost of the economy food plan. For smaller families and persons living alone, the cost of the economy food plan was multiplied by factors that were slightly higher in order to compensate for the relatively larger fixed expenses of these smaller households. Households are classified according to the poverty status of the family or nonfamily householder. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index (CPI). Analyses of the CPI have shown that, in recent years, the treatment of home prices and mortgage interest costs in the calculation of the index tended to overstate the

Table A-1. Annual Average Consumer Price Index (CPI): 1947 to 1981

(1977 = 100)

Year	CPI	Year	CPI	Year	CPI	Year	CPI
1947	36.9	1956	44.8	1965	52.1	1974	81.4
1948	39.7	1957	46.4	1966	53.6	1975	88.8
1949	39.3	1958	47.7	1967	55.1	1976	93.9
1950	39.7	1959	48.1	1968	57.4	1977	100.0
1951	42.9	1960	48.9	1969	60.5	1978	107.6
1952	44.6	1961	49.4	1970	64.1	1979	119.8
1953	44.1	1962	49.9	1971	66.8	1980	136.0
1954	44.4	1963	50.2	1972	69.0	1981	150.1
1955	44.2	1964	51.2	1973	73.3		

Source: Department of Labor, Bureau of Labor Statistics

increase in prices experienced by the average consumer. The average poverty threshold for a family of four was $9,287 in 1981, about 10.4 percent higher than the comparable 1980 cutoff of $8,414. For further details, see Current Population Reports, Series P-60, Nos. 133 and 134.

Table A-2. Weighted Average Poverty Thresholds in 1981

Size of family unit	Threshold
1 person (unrelated individual)	$ 4,620
15 to 64 years	4,729
65 years and over	4,359
2 persons	5,917
Householder 15 to 64 years	6,111
Householder 65 years and over	5,498
3 persons	7,250
4 persons	9,287
5 persons	11,007
6 persons	12,449
7 persons	14,110
8 persons	15,655
9 persons or more	18,572

DEFINITIONS OF SOCIAL AND DEMOGRAPHIC CHARACTERISTICS

Household. A household consists of all persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters; that is, when the occupants do not live and eat with any other persons in the structure and there is either (1) direct access from the outside or through a common hall or (2) a kitchen or cooking equipment for the exclusive use of the occupants.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit or a group of unrelated persons sharing a housing unit as partners is also counted as a household. The count of households excludes group quarters, however, persons in group quarters are included in the estimates for persons. Group quarters are living arrangements for groups containing five or more persons unrelated to the person in charge, such as residents of lodging and boarding houses.

Householder. The householder is the person (or one of the persons) in whose name the home is owned or rented. If the home is owned or rented jointly by two persons, such as a husband and wife, either one, but only one, may be designated as the householder.

Family. The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together; all such persons are considered members of the same family. Thus, if the son of the householder and the son's wife are in the household, they are treated as part of the householder's family. The householder's family is designated as the "primary" family. Other family units may also exist within the household. These are unrelated subfamilies which consist of two or more persons related to each other by blood, marriage, or adoption, but none of which are related to the householder or the spouse of the householder.

Unrelated individuals. The term "unrelated individuals" refers to persons 15 years old and over who are not living with any relatives. An unrelated individual may (1) constitute a one-person household, (2) be part of a household including one or more other families or unrelated individuals, or (3) reside in group quarters (such as a rooming house). Thus, a widow living by herself or with one or more other persons not related to her, a lodger not related to the householder or to anyone else in the household, and a servant living in an employer's household with no relatives are examples of unrelated individuals.

Unrelated individuals may be designated as "primary" or "secondary". Primary individuals are unrelated individuals who are also householders. Secondary individuals are household members other than a householder who are not related to any other person in the household.

Age. The age classification is based on the age of the person at the last birthday prior to the day of the interview in March.

Race. The population is divided into three groups on the basis of race: White, Black, and "other races." The last category includes Indians, Japanese, Chinese, and any other race except White and Black. "Other races" are sometimes shown in combination with the Black population.

Persons of Spanish origin. Persons of Spanish origin were determined on the basis of a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (or the origin of some other household member) from a "flash card" listing ethnic origins. Persons of Spanish origin, in paricular, were those who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or some other Spanish origin. It should be noted that persons of Spanish origin may be of any race.

Own children and related children under 18 years of age. "Own" children in a family are sons and daughters, including stepchildren and adopted children of the householder. "Related" children in a family include own children and all other children in the household who are related to the householder by blood, marriage, or adoption.

School children. Data in table 2 and in those tables covering school lunch participation are restricted to households with school children 5 to 18 years old. School children were defined to be all persons between the ages of 5 and 18 and all never married, nonhouseholders attending school at or below the high school level during the reference year (1981). This procedure should provide a slight overestimate of households with school children.

DEFINITIONS OF WORK EXPERIENCE AND OCCUPATION CHARACTERISTICS

The work experience characteristics shown in this report refer to work during the calendar year preceding the March survey. The definitions relate to the population 15 years old and over.

Work experience. A person with work experience is one who, during the preceding calendar year, did any civilian work for pay or profit or worked without pay on a family-operated farm or business at any time during the year.

Weeks worked. Persons are classified according to the number of different weeks in which they did any civilian work for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

Part-time or full-time jobs. Persons are classified as having worked at part-time jobs during the preceding calendar year, if they worked at civilian jobs which provided less than 35 hours of work per week in a majority of the weeks in which they worked during the year. They are classified as having worked at full-time jobs if they worked 35 hours or more per week during a majority of the weeks in which they worked.

Did not work. Refers to a person who did not do any civilian work during the preceding calendar year.

Occupation and industry. The occupation and industry data in this report refer to the worker's longest job during the preceding calendar year. The occupation and industry groupings shown in this report are based on the classification system used in the 1970 Census of Population. For details concerning the system for classifying industries and occupations, see the Bureau of Census publication, "Classified Index of Industries and Occupations," September 1971.

In some tables the occupation groups are combined into four divisions, as follows:

White-collar workers. Professional, technical, and kindred workers; managers and administrators, except farm; sales workers; and clerical and kindred workers.

Blue-collar workers. Craft and kindred workers; operatives, except transport;

transport equipment operatives; and laborers, except farm.

Service workers. Service workers, including private household workers.

Farm workers. Farmers and farm managers; and farm laborers and supervisors.

The sequence in which these four divisions appear is not intended to imply that any division has a higher social or skill level than another.

Weeks unemployed. For persons working less than 52 weeks, weeks unemployed represent the number of weeks looking for work or on layoff from a job.

DEFINITIONS OF GEOGRAPHICAL DETAIL

Geographic regions. The four major regions and nine Census divisions of the United States represent groups of States as follows:

Northeast:

New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Middle Atlantic: New Jersey, New York, and Pennsylvania.

North Central:

East North Central: Illinois, Indiana, Michigan, Ohio, and Wisconsin.

West North Central: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

South:

South Atlantic: Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia and West Virginia.

East South Central: Alabama, Kentucky, Mississippi, and Tennessee.

West South Central: Arkansas, Louisiana, Oklahoma, and Texas.

West:

Mountain: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.

Pacific: Alaska, California, Hawaii, Oregon, and Washington.

North and West:

Northeast, North Central, and West combined.

Metropolitan-nonmetropolitan residence. The population residing in standard metropolitan statistical areas (SMSA's) constitutes the metropolitan population. Except in New England, an SMSA is a county or group of contiguous counties which contain at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, SMSA's consist of towns and cities, rather than counties.

Central cities. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. If only one central city is designated, then it must have 50,000 inhabitants or more. The area title may include, in addition to the largest city, up to two city names on the basis and in the order of the following criteria: (1) the additional city has at least 250,000 inhabitants or (2) the additional city has a population of one-third or more of that of the largest city and a minimum population of 25,000. An exception occurs where two cities have contiguous boundaries and constitute, for economic and social purposes, a single community of at least 50,000, the smaller of which must have a population of at least 15,000.

UNDERREPORTING OF NONCASH BENEFITS

The estimates of noncash benefit recipients, and in the case of food stamps the estimates of value derived from the March CPS, are somewhat less than estimates derived from independent sources such as the Departments of Agriculture, Health and Human Services, and Housing and Urban Development. The difference between the survey estimate and the independent estimate is generally termed "underreporting."

Underreporting in household surveys can be attributed to four major factors: 1) respondents failure to report coverage or receipt of benefits, 2) respondents misclassifying the source of the benefit, 3) respondents underreporting of amounts, and 4) survey weighting procedures which do not account for the population undercount associated with the latest census of population.

In order to estimate the magnitude of underreporting for the noncash benefit data

from the March CPS, the CPS estimates are periodically compared with independent estimates adjusted to CPS population coverage and annual recipiency concepts. Because of the difficulty in obtaining comparable data, independent estimates for some of the noncash benefits shown in this report have not been made. In addition, these problems in obtaining comparable data, adjusting to CPS concepts, and errors in the independent estimates themselves dictate that these estimates of underreporting should be used with caution. The latest independent estimates available are for 1979.

Food stamps. The Department of Agriculture (USDA) makes available monthly estimates of persons receiving food stamps and the total face value of the food stamps received. These data can be used to derive independent estimates comparable to the March 1980 CPS data. These comparisons are shown in table A-3. USDA does not publish estimates of households receiving food stamps.

The CPS estimate of annual 17,549,000 persons receiving food stamps and $4.9 billion annual value received are 77.0 percent and 78.6 percent of the independent estimates, respectively. The independent estimate of the number of persons receiving food stamps was made by 1) first excluding from program counts persons living in Puerto Rico, Guam, the Virgin Islands, and other outlying areas; 2) computing the number of person months in which food stamps were received; and 3) computing the annual recipient estimate by dividing the number of person months by the average number of months in which food stamps were received as reported on the March 1980 CPS. The derivation of the independent estimates did not include adjustments for decedents or for persons residing in institutions in March 1980 but receiving food stamps in calendar year 1979.

Table A-3. Comparison of CPS and Independent Estimates of Food Stamp Recipients and Aggregate Face Value of Food Stamps: 1979

(Numbers in thousands. Dollars in millions)

Recipient or value	Source		CPS as a percent of independent estimate
	CPS estimate	Independent estimate	
Persons receiving food stamps.....	17,549	22,800	77.0
Face value of food stamps.....	$4,922	$6,260	78.6

School lunch participation. The USDA publishes monthly estimates of average daily participation in the free, reduced-price, and regular-price segments of the school lunch program. The data are shown in table A-4 for the month of highest participation for 1979 (February). The data exclude Puerto Rico, Guam, and the Virgin Islands.

The CPS estimate of free or reduced-price school lunch recipients was 10,339,000, about 89 percent of the peak monthly figure. Comparison of estimates of regular-price participation shows the CPS estimate of 21,701,000 was 39.6 percent above the USDA peak monthly estimate of 15,541,000.

The apparent overestimate of participants paying regular-price school lunch may be the result of several factors. First, the CPS estimate for regular-price school lunches includes both public and private schools, some of which serve lunches but are not involved in the National School Lunch Program.

Table A-4. Comparison of CPS and Independent Estimates of School Lunch Recipients: 1979

(Numbers in thousands)

Type of school lunch	Source		CPS as a percent of independent estimate
	CPS estimate	Independent estimate	
Total.....	32,040	27,148	118.0
Free or reduced-price school lunch..	10,339	11,607	89.1
Regular price school lunch.....	21,701	15,541	139.6

Second, the estimated participants from CPS were identified as "usually" eating school lunch. For this group, it is likely that the average daily number of lunches is lower than the number of students "usually" eating lunch. There does not appear to be sufficient data to adequately adjust the USDA figures to the CPS concept, therefore, the comparisons must be viewed with caution.

Public or other subsidized housing. The March 1980 CPS identified 2,573,000 households in public or other subsidized housing. A comparison of the CPS estimates with comparable estimates obtained from the Department of Housing and Urban Development (HUD) indicate that the CPS estimate is about 96 percent of the independent HUD figure overall and 92 percent of the estimate for the elderly. (See table A-5.) This indicates a much less serious underreporting problem than for food stamps and public cash transfer programs, however, it is likely that the CPS estimate contains households which reside in subsidized units which were not counted in the independent estimate. These might include military personnel, student housing, or other smaller HUD or USDA programs, etc. Without more detailed questions on the CPS and more detailed administrative data it is difficult to refine this comparison.

Table A-5. Comparison of CPS and Independent Estimates of Households Residing in Public or Other Subsidized Housing: March 1980

(Numbers in thousands)

Type of housing	Source		CPS as a percent of independent estimate
	CPS estimate	Independent estimate	
Total.....	2,573	2,688	95.7
Low income public housing.....	(NA)	1,131	(X)
Section 8 (including Section 202)...	(NA)	898	(X)
Rent supplements (Section 101).....	(NA)	169	(X)
Section 236.....	(NA)	470	(X)

NA - Not available
X - Not applicable

Medicaid. Development of independent estimates for Medicaid coverage required data from several sources within the Department of Health and Human Services (HHS) and some important assumptions. Comparisons of the CPS estimates with the independent figures are shown in table A-6. The comparison indicates that the CPS estimate was about 13 percent lower than the independently derived estimate of 20,794,000. The estimate derived from the HHS data is adjusted for the institutionalized population and for deaths. The independent estimate does not include persons covered under "state only" medical assistance programs primarily in New York and California. At this time we have no reasonably accurate estimate of this group, however, assuming some were counted as Medicaid in the CPS, the underreporting estimate of 13 percent is probably conservative.

The CPS was edited extensively for Medicaid coverage. All recipients of AFDC and most SSI recipients were assigned Medicaid coverage. This added a substantial number of recipients. In addition, own children of AFDC recipients and spouses (in States with unemployed father allowances) were assigned coverage.

Table A-6. Comparison of CPS and Independent Estimates of Persons Covered by Medicaid: 1979

(Numbers in thousands)

Type of recipient	Source		CPS as a percent of independent estimate
	CPS estimate	Independent estimate	
Total.....	18,136	20,794	87.2
Cash public assistance recipients..	13,219	17,184	76.9
Other recipients.....	4,917	3,610	136.2

Medicare. The independent estimates of persons covered by Medicare which have been adjusted for decedents and the institutionalized are probably the most reliable of all independent estimates. The CPS estimate of 26,197,000 Medicare beneficiaries is 97 percent of the independent estimate of 27,081,000 for 1979. As in the case of Medicaid, edits significantly affected the CPS estimate. The edit which was most significant involved the assignment of Medicare coverage to all Social Security income recipients age 65 years old and over.

Appendix B. Source and Reliability of the Estimates

SOURCE OF DATA

The estimates are based on data obtained in March 1982 from the Current Population Survey (CPS) conducted by the Bureau of the Census and from supplementary questions to the CPS. The monthly CPS deals mainly with labor force data for the civilian noninstitutional population. Questions relating to labor force participation are asked about each member 14 years old and over in every sample household. In addition, in March 1982, supplementary questions were asked about money income, noncash benefits, and work experience for the previous year. In order to obtain more reliable data for the Spanish-origin population, the March CPS samples were enlarged to include all households from the previous November sample which contained at least one sample person of Spanish origin. For this report, persons in the Armed Forces living off post or with their families on post are also included.

The present CPS sample was initially selected from the 1970 census files with coverage in all 50 States and the District of Columbia. The sample is continually updated to reflect new construction. The current CPS sample is located in 629 areas comprising 1,148 counties, independent cities, and minor civil divisions in the Nation. In the March 1982 sample, approximately 63,000 occupied households were eligible for interview. Of this number, about 3,000 occupied units were visited but interviews were not obtained because the occupants were not found at home after repeated calls or were unavailable for some other reason.

For a description of the previous CPS sample designs see the detailed reports in the series, Current Population Reports, Series P-60.

The estimation procedure used in this survey involved the inflation of the weighted sample results to independent estimates of the total civilian noninstitutional population of the United States by age, race, and sex. These independent estimates are based on civilian noninstitutional population controls from decennial censuses; statistics on births, deaths, immigration and emigration; and statistics on the strength of the Armed Forces. The estimation procedure for data in this report also included an additional adjustment so that the husband and wife of a household received equal weights.

RELIABILITY OF THE ESTIMATES

Since the CPS estimates are based on a sample, they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey--sampling and nonsampling. The standard errors primarily indicate the magnitude of the sampling error. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. The full extent of nonsampling error is unknown. Consequently, particular care shoud be exercised in the interpretation of figures based on a relatively small number of cases or on small differences between estimates.

Nonsampling variability. Nonsampling errors can be attributed to many sources; e.g., inability to obtain information about all cases in the sample, definitional difficulties, differences in the interpretation of questions, inability or unwillingness on the part of the respondents to provide correct information, inability to recall information, errors made in collection such as in recording or coding the data, errors made in processing the data, errors made in estimating values for missing data, and failure to represent all units with the sample (undercoverage).

Undercoverage in the CPS results from missed housing units and missed persons within sample households. Overall CPS undercoverage as compared with the level of the 1980 decennial census is about 7 percent. It is known that CPS undercoverage varies with age,

sex, and race. Generally, undercoverage is larger for males than for females and larger for Blacks and other races combined than for Whites. Ratio estimation to independent age-sex-race population controls, as described previously, partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that missed persons in missed households or missed persons in interviewed households have different characteristics than interviewed persons in the same age-sex-race group. Further, the independent population controls used have not been adjusted for undercoverage in the decennial census.

The estimates of noncash benefits and the estimates of the value of food stamps received (as derived from the March CPS) are subject to underreporting. Underreporting in household surveys can be attributed to several factors. These factors include failure to report or underreporting benefits received and misclassification of the source of benefits. See also the section of this report entitled "Underreporting of Noncash Benefits".

Estimation of median incomes. Median incomes have been estimated using either Pareto interpolation or linear interpolation. Pareto interpolation assumes a decreasing density of population within an income interval, whereas linear interpolation assumes a constant density of population within an income interval. Estimates of median income and their associated standard errors have been calculated using Pareto interpolation if the width of the income interval containing the estimate is greater than $2,500. Otherwise, the computations have been done using linear interpolation.

Sampling variability. The standard errors given in tables B-1 and B-2 are primarily measures of sampling variability; that is, of the variation that occurred by chance because a sample rather than the entire population was surveyed. The sample estimate and its standard error enable one to construct confidence intervals--ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.

2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate woud include the average result of all possible samples.

3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Standard errors may also be used to perform hypothesis testing--a procedure for distinguishing between population parameters using sample estimates. The most common types of hypotheses appearing in this report are 1) the population parameters are identical or 2) they are different. An example of this would be comparing the number of households receiving noncash benefits in 1981 versus the number of households receiving noncash benefits in 1980. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the parameters are different when, in fact, they are identical.

All statements of comparison in the text have passed a hypothesis test at the 0.10 level of significance or better, and most have passed a hypothesis test at the 0.05 level of significance or better. This means that, for most differences cited in the text, the estimated difference between parameters is greater than twice the standard error of the difference. For the other differences mentioned, the estimated difference between parameters is between 1.6 and 2.0 times the standard error of the difference. When this is the case, the statement of comparison will be qualified in some way, e.g., by use of the phrase "some evidence".

Note when using small estimates. Summary measures (such as means, medians, and percent distributions) are shown only when the base is 75,000 or greater. Because of the large standard errors involved, there is little chance that summary measures would reveal useful information when computed on a smaller base. Estimated numbers are shown, however, even though the relative standard errors of these numbers are larger than those for corresponding percentages. These smaller estimates are provided primarily to permit such combinations of the categories as serve each user's needs.

Table B-1. Standard Errors of Estimated Numbers of Households and Persons: 1981

(Numbers in thousands)

Size of estimate	Standard error[1]	Size of estimate	Standard error[1]
75.....	11	7,500.....	111
100.....	13	10,000....	127
250.....	21	15,000....	154
500.....	29	25,000....	192
1,000.....	41	50,000....	247
2,000.....	58	100,000...	269
3,000.....	71	125,000...	243
5,000.....	91	160,000...	139

[1]These values must be multiplied by the appropriate "f" factor in table B-3 to obtain the correct standard error.

Standard error tables and their use. In order to derive standard errors that would be applicable to a large number of estimates and that could be prepared at a moderate cost, a number of approximations were required. Therefore, instead of providing an individual standard error for each estimate, generalized sets of standard errors are provided for various types of characteristics. As a result, the sets of standard errors provided give an indication of the order of magnitude of the standard error of an estimate rather than the precise standard error.

The figures presented in table B-1 and B-2 are approximations to standard errors of various estimates for households and persons in the United States. Estimated standard errors for specific characteristics cannot be obtained from tables B-1 and B-2 without the use of the "f" factors in table B-3. These factors must be applied to the generalized standard errors in order to adjust for the combined effect of the sample design and the estimating procedure on the value of the characteristic.

Standard errors for intermediate values not shown in the generalized tables of standard errors may be approximated by linear interpolation. Standard errors of estimated means and medians are provided in the detailed tables.

Table B-2. Standard Errors of Estimated Percentages of Households and Persons: 1981

Base of estimated percentage (thousands)	Estimated percentage[1]				
	2 or 98	5 or 95	10 or 90	25 or 75	50
75.....	2.1	3.3	4.5	6.6	7.6
100.....	1.8	2.9	3.9	5.7	6.6
250.....	1.2	1.8	2.5	3.6	4.1
500.....	0.8	1.3	1.8	2.5	2.9
1,000.....	0.6	0.9	1.2	1.8	2.1
2,000.....	0.4	0.6	0.9	1.3	1.5
3,000.....	0.3	0.5	0.7	1.0	1.2
5,000.....	0.3	0.4	0.6	0.8	0.9
7,500.....	0.2	0.3	0.5	0.7	0.8
10,000.....	0.2	0.3	0.4	0.6	0.7
15,000.....	0.15	0.2	0.3	0.5	0.5
25,000.....	0.12	0.2	0.2	0.4	0.4
50,000.....	0.08	0.13	0.2	0.3	0.3
100,000.....	0.06	0.09	0.12	0.2	0.2
125,000.....	0.05	0.08	0.11	0.2	0.2
160,000.....	0.05	0.07	0.10	0.14	0.2

[1]These values must be multiplied by the appropriate "f" factor in table B-3 to obtain the correct standard error.

Two parameters (denoted "a" and "b") are used to calculate standard errors for each type of characteristic; they are presented in table B-3. These parameters were used to calculate the standard errors in tables B-1 and B-2 and to calculate the "f" factors in table B-3. They also may be used to directly calculate the standard errors for estimated numbers and percentages. Methods for computation are given in the following sections.

Standard errors of estimated numbers. The approximate standard error, σ_x, of an estimated number can be obtained in two ways. It may be obtained by use of the formula

$$\sigma_x = f\sigma \qquad (1)$$

where f is the appropriate "f" factor from table B-3, and σ is the standard error on the estimate obtained by interpolation from table B-1. Alternatively, it may be approximated by using formula (2), from which the standard errors in table B-1 were calculated. Use of this formula will provide more accurate results than the use of formula (1).

$$\sigma_x = \sqrt{ax^2 + bx} \qquad (2)$$

Here x is the size of the estimate and a and b are the parameters in table B-3 associated with the particular type of characteristic.

Standard errors of estimated percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which this percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the "f" factor or parameters from table B-3 indicated by the numerator. The approximate standard error, $\sigma_{(x,p)}$, of an estimated percentage can be obtained by use of the formula

$$\sigma_{(x,\,p)} = f\sigma \qquad (3)$$

In this formula, f is the appropriate factor from table B-3 and σ is the standard error on the estimate from table B-2. Alternatively, it may be approximated by using formula (4), from which the standard errors in table B-2 were calculated. Use of this formula will give more accurate results than use of formula (3).

$$\sigma_{(x,\,p)} = \sqrt{\frac{b}{x} \cdot p\,(100 - p)} \qquad (4)$$

Here x is the size of the subclass of persons or households which is the base of the percentage, p is the percentage ($0<p<100$), and b is the parameter in table B-3 associated with the particular type of characteristic in the numerator of the percentage.

Illustration of the use of standard error tables. Table C of this report shows that in 1981 there were 7,115,000 households receiving food stamps. Table B-1 shows the standard error of an estimate of this size to be approximately 108,000. In this situation, no "f" factor has to be applied to the standard error; i.e., f is equal to 1.0. Alternatively, using the parameters in table B-3 in formula (2) gives a standard error of

$$108{,}000 = \sqrt{(-0.000010)\,(7{,}115{,}000)^2 + (1721)(7{,}115{,}000)}$$

The 68-percent confidence interval as shown by the data is from 7,007,000 to 7,223,000. Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude with 95 percent confidence that the average estimate derived from all possible samples lies within the interval from 6,899,000 to 7,331,000 (using twice the standard error).

Of the 7,115,000 households receiving food stamps in 1981, 35.4 percent were Black. Table B-2 shows the standard error of 35.4 percent on a base of 7,115,000 to be approximately 0.8 percent. (An "f" factor of 1.04 was applied here.)

Alternatively, this standard error could have been derived by using the "b" parameter for Blacks from table B-3 in formula (4).

$$0.8 = \sqrt{\frac{1876}{7{,}115{,}000}\,(35.4)\,(64.6)}$$

Consequently, the 68-percent confidence interval as shown by these data is from 34.6 to 36.2 percent, and the 95-percent confidence interval is from 33.8 to 37.0 percent.

Absolutes only	(X)	2607	1.23
Levels only	0.000481	1096	[1](X)

[1]For standard errors of Spanish origin levels, formula (2) must be used with the "a" and "b" parameters. No appropriate "f" factor exists for use with table B-1.

Standard error of a difference. For a difference between two sample estimates the standard error is approximately equal to

$$\sigma_{(x-y)} = \sqrt{\sigma_x^2 + \sigma_y^2 - 2\rho\,\sigma_x\,\sigma_y} \qquad (5)$$

where σ_x and σ_y are the standard errors for the estimates x and y (from tables B-1 through B-3). The estimates can be numbers, percents, ratios, etc. The correlation coefficient ρ can be determined from table B-4 for year-to-year comparisons for income and poverty estimates and proportions; for other comparisons assume that ρ equals zero. Making this assumption will result in accurate estimates of standard errors for the difference between two estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive (negative) correlation between the two characteristics, the formula will overstate (understate) the true standard error.

Table B-4. Year-to-Year Correlation Coefficients for Income and Poverty Estimates of Households and Persons: 1981 and 1980

Characteristic	Households		Persons	
	Income	Poverty	Income	Poverty
Total.....	0.35	0.35	0.30	0.45
White.....	0.35	0.30	0.30	0.35
Black and/or other races.	0.35	0.35	0.30	0.45
Spanish origin.....	0.55	0.55	0.45	0.65

Note: These coefficients are based on CPS data obtained in March 1978 and March 1979.

Illustration of the computation of the standard error of a difference in estimates. Table A shows that the number of households receiving food stamps in 1981 was 7,115,000 and in 1980 the figure was 6,769,000. The apparent difference is 346,000. The standard error on the estimate 7,115,000 is 108,000. The standard error on the 6,769,000 households receiving food stamps computed from formula (2) is 106,000. From table B-4 we obtain the correlation coefficient, ρ = .35. The standard error associated with the estimated difference of 346,000 is

$$122{,}000 \doteq \sqrt{(108{,}000)^2 + (106{,}000)^2 - 2(.35)\,(108{,}000)(106{,}000)}$$

This means that the 68-percent confidence interval around the 346,000 difference is from 224,000 to 468,000, i.e., 346,000 $\pm$ 122,000. A conclusion that the average estimate of the difference derived from all possible samples lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Thus we can conclude with 68 percent confidence that the number of households receiving food stamps in 1981 is higher than the figure for 1980.

Standard error of a ratio. Certain mean values for persons in households shown in the tables of this report were calculated as the ratio of two numbers. For example, the mean number of persons per household is calculated as

$$\frac{x}{y} = \frac{\text{total number of persons in households}}{\text{total number of households}}$$

Standard errors for these means may be approximated as shown in the following cases. There are two cases to consider. In either case, the denominator y represents a count of households of a certain class, and the numerator x represents a count of persons with the characteristic under consideration who are members of these households.

Case 1: There is at least one person having the characteristic in every household of the class; for example, the mean number of persons per household, or the mean number of persons per household with a male householder. For ratios of this kind, the standard error is approximated by the following formula:

$$\sigma_{\frac{x}{y}} = \sqrt{\left(\frac{x}{y}\right)^2 \left[\left(\frac{\sigma_y}{y}\right)^2 + \left(\frac{\sigma_x}{x}\right)^2 - 2\rho \left(\frac{\sigma_x}{x}\right)\left(\frac{\sigma_y}{y}\right)\right]} \quad (6)$$

The standard error of the estimated number of households, σ_y, and the standard error of the estimated number of persons with the characteristic in those households, σ_x, may be obtained from formula (1). Alternatively, formula (2) and table B-3 may be used. In formula (6), ρ represents the correlation coefficient between the numerator and the denominator of the estimate. In the above example, and for other ratios of this kind, use 0.7 as an estimate of ρ.

Case 2: The number of persons having the characteristic in a given household may be 0, 1, 2, 3, or more; for example, the mean number of persons under 18 years of age per household. For ratios of this kind the standard error is approximated by formula (6) but ρ is assumed to be zero. If ρ is actually positive (negative), then this procedure will provide an overestimate (underestimate) of the standard error of the ratio.

Note: When computing the approximate standard error of a ratio and the numerator of the ratio is income, formula (7) for the standard error of an arithmetic mean should be used. If the ratio has persons in the numerator and households in the denominator then formula (6) with the appropriate value of will give a result preferable to that of formula (7).

STANDARD ERRORS OF ESTIMATED MEANS AND MEDIANS

Estimated standard errors are provided for the means and medians of the published income distributions and do not need to be calculated by the user. However, because of the approximations used in developing the formula used to estimate the standard error of the mean, the standard error reported for this statistic will generally be an underestimate. Since some users may wish to combine two or more income distributions and compute means and medians for the combined distribution, the following sections have been provided to enable the user to calculate standard errors for these statistics.

Standard error of an arithmetic mean. To get a rough estimate of the standard error of a mean, the following formula can be used:

$$\sigma_{\bar{x}} = \sqrt{\frac{b}{y} \cdot S^2} \quad (7)$$

In this formula, y is the size of the base of the distribution and b is a parameter which depends on the sample size, the sample design, the estimation procedure, and the type of characteristics. Values of b are given in table B-3. The variance, s^2, is given by the following formula:

$$S^2 = \sum_{i=1}^{c} p_i \bar{x}_i^{\,2} - \bar{x}^2 \quad (8)$$

where $\bar{x}$ is the mean of the distribution, defined by $\sum_{i=1}^{c} p_i x_i$; c is the number of groups in the distribution; i indicates a specific group, taking on values of 1 through c; p_i is the proportion of total cases in the ith group; and $\bar{x}_i$ is the midpoint of the ith group (or discrete value of the ith group). $\bar{x}_i = (z_{i-1} + z_i)/2$, where z_{i-1} and z_i are the lower and upper interval boundaries, respectively, for group i. Group c is open-ended; i.e., no upper interval boundary exists. For this group an approximate average value is

$$\bar{x}_c = \frac{3}{2} z_{c-1}$$

When two or more distributions are combined, the mean of the combined distribution is:

$$\bar{x} = \frac{1}{y} \sum_j \bar{x}_j y_j$$

where $\bar{x}_j$ is the mean of the jth distribution, y_j is the base of the jth distribution, and $y = \sum_j y_j$. This mean must be computed by the user.

Standard error of a median. The sampling variability of an estimated median depends

upon the form of the distribution as well as the size of its base. An approximate method for measuring the reliability of an estimated median is to determine a confidence interval about it. (See the section on sampling variability for a general discussion of confidence intervals.) The following procedure may be used to estimate the 68-percent confidence limits of a median based on sample data.

1. Determine, using the standard error tables and factors or formula (4), the standard error of the estimate of 50 percent from the distribution;

2. Add to and subtract from 50 percent the standard error determined in step (1);

3. Using the distribution of the characteristic, calculate the values from the distribution corresponding to the two points established in step (2). These values will be the limits for the confidence interval.

For calculation of the confidence interval use Pareto interpolation for any point in an income interval greater than $2,500 width; use linear interpolation otherwise.

A 95-percent confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step (1).

The formulas used to implement step (3) for Pareto or linear interpolation are

Pareto:

$$X_{pN} = A_1 \exp\left[\ln\left(\frac{pN}{N_1}\right) \ln\left(\frac{A_2}{A_1}\right) \Big/ \ln\left(\frac{N_2}{N_1}\right)\right] \qquad (9)$$

Linear:

$$X_pN = \frac{N_1 - pN}{N_1 - N_2}\left(A_2 - A_1\right) + A_1 \qquad (10)$$

where N = total number of households or persons in the distribution.

x_{pN} = estimated upper and lower bounds for the confidence interval ($0<p<1$). For the purposes of calculating the confidence interval, p takes on the two values in step (2). Note that x_{pN} estimates the median when p = .50 is used in the formulas.

A_1 and A_2 = the lower and upper bounds, respectively, on the interval in which x_{pN} falls.

N_1 and N_2 = the estimated number of households or persons with incomes greater than A_1 and A_2, respectively.

exp = is the exponential function.

ln = is the natural logarithm function.

It should be noted that a mathematically equivalent result is obtained by using common logarithms (base 10) and antilogarithms.

For illustrations of the computation of a confidence interval for a median, see the source and reliability section of previous reports in the P-60 series.

18. LINE NUMBER

19. What was . . . doing most of LAST WEEK –
Working
Keeping house
Going to school
or something else?

- Working *(Skip to 20A)* . . . . WK ○
- With a job but not at work . . J ○
- Looking for work . . . . . LK ○
- Keeping house . . . . . H ○
- Going to school . . . . . S ○
- Unable to work *(Skip to 24)* . . U ○
- Retired . . . . . R ○
- Other *(Specify)* . . . . . OT ○

20C. Does . . . USUALLY work 35 hours or more a week at this job?
Yes ○ What is the reason . . . worked less than 35 hours LAST WEEK?
No ○ What is the reason . . . USUALLY works less than 35 hours a week?
(Mark the appropriate reason)

- Slack work . . . . . ○
- Material shortage . . . . . ○
- Plant or machine repair . . . . . ○
- New job started during week . . . ○
- Job terminated during week . . . ○
- Could find only part-time work . ○
- Holiday *(Legal or religious)* . . . . . ○
- Labor dispute . . . . . ○
- Bad weather . . . . . ○
- Own illness . . . . . ○
- On vacation . . . . . ○
- Too busy with housework, school, personal bus., etc. . . . ○
- Did not want full-time work . . . ○
- Full-time work week under 35 hours . . ○
- Other reason *(Specify)* . . . . . ○

(Skip to 23 and enter job worked at last week)

20. Did . . . do any work at all LAST WEEK, not counting work around the house? *(Note: If farm or business operator in hh., ask about unpaid work)*
Yes ○ No ○ *(Go to 21)*

20A. How many hours did . . . work LAST WEEK at all jobs?
⊘ ⊘ 1 1 2 2 3 3 4 4 5 5 6 6 7 7 8 8 9 9

20B. INTERVIEWER CHECK ITEM
49+ ○ *(Skip to Item 23)*
1–34 ○ *(Go to 20C)*
35–48 ○ *(Go to 20D)*

20D. Did . . . lose any time or take any time off LAST WEEK for any reason such as illness, holiday or slack work?
Yes ○ How many hours did . . . take off?
(Correct 20A if last time not already deducted; if 20A reduced below 35, correct 20B and fill 20C; otherwise, skip to 23.)
No ○

20E. Did . . . work any overtime or at more than one job LAST WEEK?
Yes ○ How many extra hours did . . . work?
(Correct 20A and 20B as necessary if extra hours not already included and skip to 23.)
No ○
(Skip to 23)

21. *(If J in 19, skip to 21A.)* Did . . . have a job or business from which he/she was temporarily absent or on layoff LAST WEEK?
Yes ○ No ○ *(Go to 22)*

21A. Why was . . . absent from work LAST WEEK?

- Own illness . . . . . ○
- On vacation . . . . ○
- Bad weather . . . . ○
- Labor dispute . . . ○
- New job to begin within 30 days ○ *(Skip to 22B and 22C2)*
- Temporary layoff *(Under 30 days)* ○
- Indefinite layoff *(30 days or more or no def. recall date)* ○ *(Skip to 22C3)*
- Other *(Specify)* . . ○

21B. Is . . . getting wages or salary for any of the time off LAST WEEK?
Yes . . . . . ○
No . . . . . ○
Self-employed ○

21C. Does . . . usually work 35 hours or more a week at this job?
Yes ○
No ○
(Skip to 23 and enter job held last week)

22. *(If LK in 19, Skip to 22A.)* Has . . . been looking for work during the past 4 weeks?
Yes ○ No ○ *(Go to 24)*

22A. What has . . . been doing in the last 4 weeks to find work? *(Mark all methods used; do not read list.)*
Checked with –

- pub. employ. agency ○
- pvt. employ. agency ○
- employer directly . . ○
- friends or relatives . . ○
- Placed or answered ads . . . . . ○
- Nothing *(Skip to 24)* . . . . . ○
- Other *(Specify in notes, e.g., CETA, union or prof. register, etc.)* . . . . . ○

22B. Why did . . . start looking for work? Was it because . . . lost or quit a job at that time *(pause)* **or was there some other reason?**

- Lost job . . . . . ○
- Quit job . . . . . ○
- Left school . . . . . ○
- Wanted temporary work ○
- Other *(Specify in notes)* ○

22C.
1) How many weeks has . . . been looking for work?
2) How many weeks ago did . . . start looking for work?
3) How many weeks ago was . . . off?
⊘ ⊘ 1 1 2 2 3 3 4 4 5 5 6 6 7 7 8 8 9 9

22D. Has . . . been looking for work part-time?
Full ○ Part ○

22E. Is there any reason why . . . could not take a job last WEEK?
Yes, already has a job . . . . ○
Temporary illness . . . . ○
Going to school . . . . . ○
Other *(Specify in notes)* ○

22F. When did . . . last work at a full-time job or business lasting 2 consecutive weeks or more?
Within last 12 months *(Specify)* . . . . . ○
(Month)
One to five years ago . . . . . ○
More than 5 years ago . . . . . ○
Nev. worked full-time 2 wks. or more ○
Never worked at all . . . . . ○
(SKIP to 23. If layoff entered in 21A, enter job, either full or part time, from which laid off. Else enter last full time civilian job lasting 2 weeks or more, or "never worked.")

24. INTERVIEWER CHECK ITEM
(Rotation number)
First digit of SEGMENT number is:
○ 2, 3, 4, 6, 7, or 8 *(End questions)*
○ 1 or 5 *(Go to 24A)*

24A. When did . . . last work for pay at a regular job or business, either full- or part-time?
(Go to 24B)

- Within past 12 months ○
- 1 up to 2 years ago . . . ○
- 2 up to 3 years ago . . . ○
- 3 up to 4 years ago . . . ○
- 4 up to 5 years ago . . . ○
- 5 or more years ago . . ○

(Skip to 24C)

- Never worked . . . . . ○

24B. Why did . . . leave that job?

- Personal, family *(Incl. pregnancy)* or school . . . . ○
- Health . . . . . ○
- Retirement or old age . . . . . ○
- Seasonal job completed . . . . . ○
- Slack work or business conditions ○
- Temporary nonseasonal job completed . . . ○
- Unsatisfactory work arrangements (pay, etc.) ○
- Other . . . . . ○

24C. Does . . . want a regular job either full- or part-time?
(Go to 24D)

- Yes . . . . . ○
- Maybe – depends *(Specify)* . . . . . ○
- Don't know . . . . . ○

(Skip to 24E)

What are the reasons . . . is not looking for work?
(Mark each reason mentioned)

- Believes no work available in line of work or area ○
- Couldn't find any work . . . . . ○
- Lacks nec. schooling, training, skills or experience . . . ○
- Employers think too young or too old . . . . . ○
- Other pers. handicap in finding job ○
- Can't arrange child care . . . . . ○
- Family responsibilities . . . . . ○
- In school or other training . . . . . ○
- Ill health, physical disability . . . . . ○
- Other *(Specify in notes)* . . . . . ○
- Don't know . . . . . ○

24E. Does . . . intend to look for work of any kind in the next 12 months?
Yes . . . . . ○
It depends *(Specify in notes)* ○
No . . . . . ○
Don't know . . . . . ○
(If entry in 24B, describe job in 23 otherwise, end questions)

25. INTERVIEWER CHECK ITEM
(Rotation number)
First digit of SEGMENT number is:

INTRODUCTION
(Optional)

We have just completed the questions about employment and unemployment. Each March, the Census Bureau also collects information about the economic situation of Americans and their families for the previous year. I am going to ask these questions now. We don't expect all answers to be perfect, but please think about each question and answer it the best you can.

IF CIVILIAN 14+, BEGIN WITH ITEM 29A. IF CURRENT ARMED FORCES MEMBER, BEGIN WITH ITEM 48A.

18A. LINE NUMBER | POP. STATUS: CIV 14+ O; A.F. O | 18C. AGE | 18E. Sex: Male O, Female O | OFFICE USE ONLY

29A. Did . . . work at a job or business at any time during 1981?
Yes O (Skip to 33) No O

29B. Did . . . do any temporary, part-time, or seasonal work even for a few days during 1981?
Yes O (Skip to 33) No O

30. Even though . . . did not work in 1981, did he/she spend any time trying to find a job or on layoff?
Yes O No O (Skip to 32)

31. How many different weeks was . . . looking for work or on layoff from a job?
(Mark weeks)

32. What was the main reason . . . did not work in 1981?
Ill or disabled and unable to work O
Taking care of home or family . . . O
Going to school . . . . . O
Could not find work . . . . . O
Retired . . . . . O
Doing something else . . . . . O
In Armed Forces . . . . . O
(Skip to 53A) (Skip to 48A)

33. During 1981 in how many weeks did . . . work even for a few hours? Include paid vacation and sick leave as work.
(Mark weeks and Go to 34)

34. INTERVIEWER CHECK ITEM
Number of weeks in item 33 is: 1–49 O (Skip to 36); 50–51 O (Ask 35); 52 O (Skip to 39)

35. Did . . . lose any full weeks of work in 1981 because he/she was on layoff from a job or lost a job?
Yes O No O (Skip to 39)

36. You said . . . worked about (entry in Item 33) weeks in 1981. How many of the remaining (52 minus entry in Item 33) weeks was . . . looking for work or on layoff from a job?
(Mark weeks and ask 37)
None O (Skip to 38)

37. Were the (entry in Item 36) weeks . . . was looking for work (or on layoff) all in one stretch?
Yes – 1 stretch O
No – 2 stretches O
No – 3+ stretches O
(Go to 38)

(If the entries in Items 33 and 36, add to 52 weeks, skip to Item 39. If not, ask 38)

38. What was the main reason . . . was not working or looking for work in the remaining weeks of 1981?
Ill or disabled and unable to work O
Taking care of home or family . . . . O
Going to school . . . . O
In Armed Forces . . . . O
Retired . . . . . O
Other (Specify) . . . . O

39. For how many employers did . . . work in 1981? If more than one at same time, only count it as one employer.
1 O (Skip to 41)
2 O
3+ O
(Ask 40)

40. Did . . . look for work between jobs in 1981?
Yes O No O

41. In the weeks that . . . worked, how many hours did . . . usually work per week?
(Mark hours)

42. INTERVIEWER CHECK ITEM
Number of hours in item 41 is:
1–34 O (Skip to 44)
35 O (Ask 43)

43. Did . . . work less than 35 hours for at least one week in 1981? Include time off with pay because of holidays, vacation, days off, or sickness.
Yes O (Ask 44)
No O (Skip to 46)

44. How many weeks did . . . work less than 35 hours in 1981?
(Mark weeks)

45. What was the main reason . . . worked less than 35 hours per week?
Could not find a full time job . . O
Wanted to work part time or only able to work part time . . O
Slack work or material shortage O
Other . . . . . O
(Ask 46)

46. What was . . . 's longest job during 1981? (Compare with entry in CPS-1 Item 23)
Same as item 23 O (Skip to 48A or 48B)
Different from item 23 or item 23 blank . . . . . O (Specify in 47A–47E)

47A. For whom did . . . work?

47B. What kind of business or industry is this?

47C. What kind of work was . . . doing?

47D. What were . . . 's most important activities or duties?

47E. CLASS OF WORKER
Private . . . . . P O
Federal Gov't. . F O
State Gov't. . . . S O
Local Gov't. . . . L O
(Ask 48A)
Self-employment Inc.: Yes . . . . . (Ask 48A); No (or far[illegible]) O (Ask 48B)
Without pay [illegible] O (Skip to [illegible]A)

48A. How much did . . . earn from this employer before deductions during 1981?

48B. What was . . . net earnings from the business/farm after expenses during 1981?
Lost money

48C. Did . . . include all tips, bonuses, overtime pay and commissions they may have received?
Yes O No O (Probe and make corrections to 48A)

49A. Did . . . earn money from any other work he/she did during 1981?
Yes O No O (Skip to 50A)

49B. How much did . . . earn from:
All other employers? Yes O No O
His/her own business after expenses? Yes O No O
His/her farm after expenses? Yes O No O
Lost money

50A. INTERVIEWER CHECK ITEM Longest job (Item 46) is farmer?
Yes O No O (Skip to 51A)

50B. Other than the farm income we have already talked about, did . . . receive any income from agricultural work done for others, recreational services, or government farm programs other than loans?
Yes O (Probe and make corrections to 48A or 49B) No O (Ask 51A)

51A. During 1981 did . . . receive any unemployment compensation from the State or local government?
Yes O No O (Skip to 52A)
Any Supplemental Unemployment Benefits (SUB)? Yes O No O
Any Union unemployment or strike benefits? Yes O No O

OFFICE USE ONLY — INDUSTRY: A O, B O, C O, D O, E O, F O, G O, H O, J O, K O, L O, M O, Ref. O — OCCUPATION: N O, P O, Q O, R O, S O, T O, U O, V O, W O, X O, Y O, Z O, Ref. O

51B. How much did . . . receive in unemployment benefits during 1981?

52A. During 1981 did . . . receive any Worker's Compensation payments or other payments as a result of a job related injury or illness? (Exclude sick pay and disability retirement)
Yes O No O (Skip to 53)

52B. What was the source of these payments?
State Workers Compensation . . . . O
Employer or employer's insurance O
Own insurance . . . . . O
Other . . . . . O

52C. How much compensation did . . . receive during 1981?

53A. Was . . . living in this house (Apt.) 1 year ago; that is, on March 1, 1981?
Yes O No O (Skip to 54)

53B. Was . . . living here 5 years ago on March 1, 1977?
Yes O (next person) No O (Skip to 55A)

54. Where did . . . live on March 1, 1981?
A. Name of State, foreign country, U.S. possession, etc.
B. Name of county
C. Name of city, town, etc.
D. Did . . . live inside the limits of that city, town, village, etc.
Yes O No O
E. Did . . . live at that address 5 years ago, on March 1, 1977?
Yes O (next person) No O

55A. Five years ago, on March 1, 1977 was . . . living in this county?
Yes O (next person) No O
B. This state?
Yes O (next person) No O
C. In which state was . . . living?
(If another country, enter "outside U.S.")
