Money Income of Households, Families, and Persons in the United States: 1987

INTRODUCTION

This report presents data on the income of households, families, and persons in the United States for the calendar year 1987. These data were compiled from information collected in the March 1988 Current Population Survey (CPS) conducted by the Bureau of the Census. The survey consisted of about 60,000 households nationwide and was designed to produce reliable national estimates, although some data by region and metropolitan residence were also compiled and appear in this report. The income estimates in this report are based solely on money income before taxes and do not include the value of noncash benefits such as food stamps, Medicare, Medicaid, public housing, and employer-provided fringe benefits such as health and life insurance, use of company automobiles, or stock options.

HIGHLIGHTS

(The figures in parentheses denote the 90-percent confidence interval of the estimate.)

- Median household income in 1987 was $25,990, unchanged from 1986 after adjusting for inflation.[1]
- In 1987, median family income was $30,850 (±$232), 1.0 (±0.9) percent higher than in 1986 after adjusting for inflation. This represents the fifth consecutive year real median family income has increased, putting it at a level comparable to that of 1973, an earlier all-time high.
- Median income of families with a female householder, no husband present increased 3.4 percent (±0.3) in real terms from 1986. This represents the second significant annual increase since 1979.
- Real per capita income in 1987, $12,290 (±$102), was at an all time high, increasing 1.6 (±1.0) percent over its 1986 level.

INCOME OF HOUSEHOLDS

Median household income in 1987 was $25,990, an increase of 4.4 percent over the 1986 median of $24,900, according to the results of the March 1988 CPS. After adjusting for the 3.7-percent increase in consumer prices between 1986 and 1987, real median household income showed no significant change.

Regionally, median household income was $28,090 in the Northeast, $27,910 in the West, $25,720 in the Midwest, and $23,720 in the South.[2] Only the Northeast showed a real increase in income from 1986, rising 2.2 percent. The other three regions showed no significant change.

FAMILY INCOME

In 1987, median family income was $30,850, 1.0 percent higher than the 1986 median after adjusting for the 3.7-percent increase in consumer prices. The change in overall real median family income between 1986 and 1987 represents the fifth consecutive annual real increase. Since 1982, real median family income has increased by 11.8 percent. These recent increases have brought real median family income to a level comparable to that of 1973, a year when median family income reached an all time high before a series of recessions resulted in substantial declines in real family income. (See figure 1).

Family Composition, Race, and Hispanic Origin

The median income of White families increased by 1.1 percent between 1986 and 1987, to $32,270. The median family incomes of Black families ($18,100) and Hispanic families ($20,310) did not change significantly between 1986 and 1987 in real terms. The ratios of Black-to-White and Hispanic-to-White family incomes in 1987 were .56 and .63, respectively, also unchanged from their 1986 levels.

In March of 1988, nearly 80 percent of all families were married couples and their 1987 median family income was $34,700, up 2.0 percent from 1986 in real terms. This is the fifth consecutive year real income for married couples has increased. In 1987, the median income of White married couples was $35,300, for Black married couples $27,180, and for Hispanic married couples $24,680. The ratios of Black-to-White and Hispanic-to-White married couple median family incomes

[1]Changes in real income refer to comparisons after adjusting for inflation. The percentage change in prices between 1986 and 1987 was computed by dividing the annual average Consumer Price Index for all urban consumers (CPI-U) for 1987 by the annual average for 1986. See table A-2 in appendix A for the CPI's from 1947 to 1987.

[2]The difference between median household incomes in the Northeast and West was not statistically significant.

Table A. Trends in Income: 1960 to 1987

(Income and earnings in 1987 dollars)

Year	Median household income	Median family income	Per capita income	Earnings of year-round, full-time workers	
				Male	Female
1987	$25,986	$30,853	$12,287	$26,008	$16,909

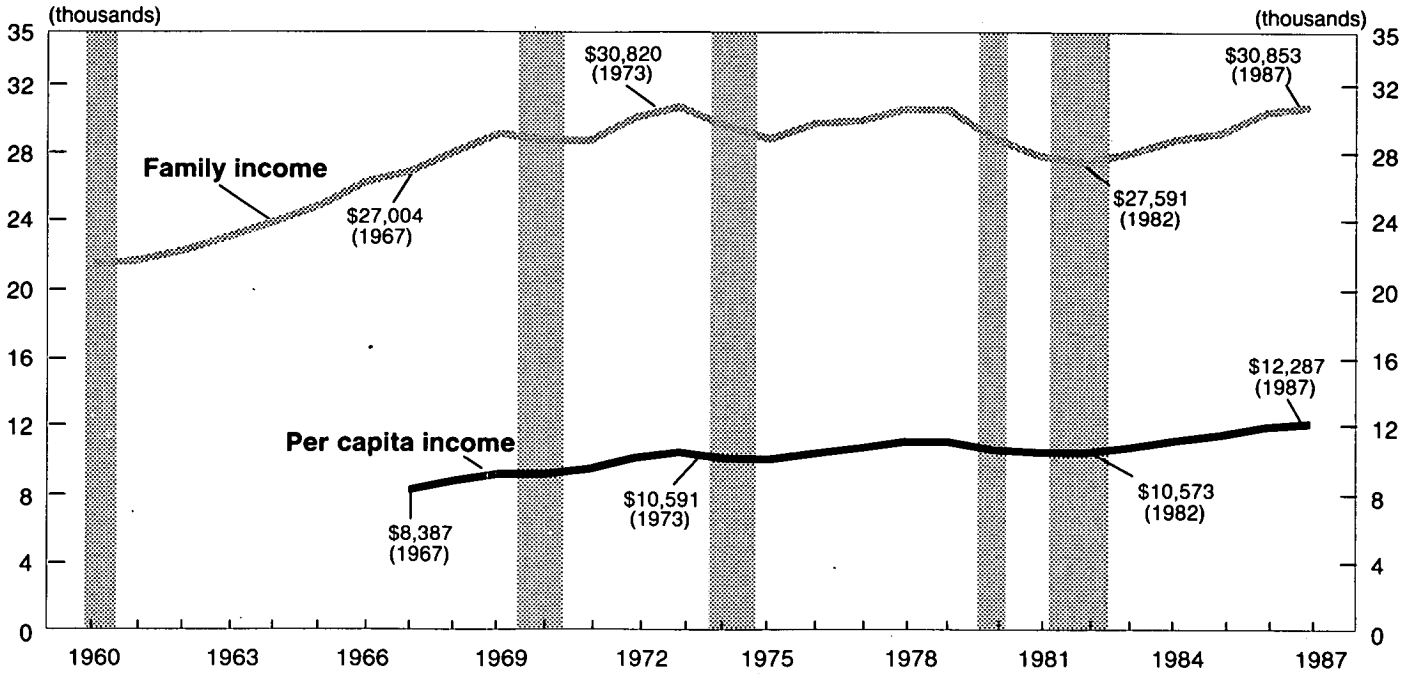
Figure 1.
Median Family and Per Capita Income: 1960–87
(In 1987 dollars)



Shade = Recessionary period

were .77 and .70, respectively. Married couples accounted for 83 percent of all White families, 70 percent of all Hispanic families, and 51 percent of all Black families.

The median income in 1987 of families with a female householder, no husband present was $14,620, up 3.4 percent in real terms from 1986. The 1987 increase for these families is the first significant annual increase since 1984 and only the second significant annual increase since 1979.[3] In 1987, the median income of White families with a female householder, no husband present was $17,020, and the ratios of Black-to-White and Hispanic-to-White incomes were .57 and .58, respectively.[4] Families with a female householder, no husband present accounted for 16 percent of all families. By race, the percentages were 13 percent for White families, 23 percent for Hispanic families, and 43 percent for Black families.

Educational Attainment of Householder

Considerable differences can be noted in median family income by level of education of the householder. Median income in 1987 ranged from $14,550 for families in which the householder had less than 8 years education to $54,490 for families in which the householder had 5 or more years of college education (see table B). Between 1986 and 1987, families showing a significant change in income were those where the householder had 8 years of education (5.7 percent decline) and families where the householder had 1 to 3 years of college education (2.6 percent increase).

Number of Earners

In 1987, real increases occurred for families with two or more earners. The 1987 income for families with two earners was $36,990, 1.6 percent higher than in 1986; for families with three earners median income was $46,960, 2.3 percent higher; for families with four or more earners it was $59,450, 3.0 percent higher.[5] The median incomes for families with no earners ($12,850) and one earner ($23,190) were not statistically different from their 1986 levels in real terms.

Region

For the second year, the South made gains on the rest of the country in real median family income. In 1987, the median family income for the South was $28,250, 2.0 percent higher than 1986 in real terms and the only region to show a significant change. Median family income in 1987 for the other three regions of the country were $33,940 for the Northeast, $32,030 for the West, and $30,990 for the Midwest.

Regional changes in real family income by race were somewhat different from the data for all races combined. White families posted significant gains in the Northeast and Midwest, 2.0 percent and 1.7 percent, respectively.[6] No significant changes in real family income between 1986 and 1987 were noted in any region of the country for Black or Hispanic families.

Type of Residence

In 1987, median family income was considerably higher in the suburban areas than in central cities, especially in the suburbs of metropolitan areas with 1 million or more in population.[7] Median family income in the suburbs of large metropolitan areas (one million or more in population) was $40,270 in 1987. This compares to a median income of $33,190 for families in the suburbs of smaller (under 1 million population) metropolitan areas. The median incomes of families residing in central cities of large and small metro areas were $27,460 and $27,290, respectively.[8] Between 1986 and 1987, a real increase in median income occurred only for families outside central cities in smaller metropolitan areas.

EARNINGS OF YEAR-ROUND, FULL-TIME WORKERS

Both men and women working year round, full time showed no statistically significant change in their real earnings in 1987. The percentage of civilian workers working year round, full time increased, however, from 66.8 percent to 67.8 percent for men and from 49.2 percent to 50.4 percent for women. The ratio of women's to men's earnings in 1987 was .65.[9] While this ratio has remained statistically unchanged for the past 3 years, it is higher than what it was at the end of our last recession in 1982, when the ratio was .62. The 1987 median earnings of men, $26,010, was at a level comparable to that of 1970 in real terms, and below the

[3]The real increases in 1987, 1984, and 1979 were not statistically different from one another.

[4]The ratios of Black-to-White and Hispanic-to-White median incomes for families with a female householder, no husband present, were not significantly different from one another.

[5]The increases in real median family incomes for two, three, and four or more earner families were not statistically different from one another.

[6]The difference between the percent increases in real median family income for the Northeast and Midwest was not statistically significant.

[7]The term "suburban areas" as used here refers to that portion of metropolitan areas outside central cities.

[8]The difference between median incomes of families residing in central cities of large and small metropolitan areas was not statistically significant.

[9]This ratio is based on annual median earnings of year-round, full-time workers and differs from ratios of weekly or hourly earnings derived from the CPS or other surveys.

Table B. Comparison of Income Summary Measures Between 1987 and 1986, by Selected Characteristics

(Numbers as of March 1988)

Characteristic	1987		1986 median income (1987 dollars)	Percent change in real income
	Number (thous.)	Median income (dollars)

[1]Persons of Hispanic origin may be of any race.
[2]Restricted to families with householder 25 years old and over.
[3]Excludes families with Armed Forces members.

peak earnings figure of $28,610 in 1973. The 1987 median earnings for women was at a level of $16,910 (see figure 3). Since 1982, the increase in real earnings of females has outpaced that of their male counterparts (see figure 4).

PER CAPITA INCOME

In 1987, per capita income was $12,290, up 1.6 percent from 1986 in real terms. Per capita incomes for Whites and Hispanics were $13,030 and $7,610, respectively, both higher than their 1986 levels in real terms. The 1987 per capita for Blacks was $7,500, unchanged from 1986 in real terms.[10]

Per capita income in 1987 was also at an all time high in real terms (see figure 1). Real per capita income has risen steadily since 1982, the end of our last recessionary period. Over the 1982-87 period, real per capita income grew by a total of 16.2 percent, while real median family income grew by 11.8 percent (see figure 2).

Per capita income is computed by dividing the total aggregate money income by the total population. Basically, it is the amount of income per person, for every man, woman, and child in the CPS noninstitutional population. Per capita income differs from family income in that it includes the income of all persons, whereas family income is restricted to the income of related persons living in households. Changes in family income do not, therefore, reflect the changes in income for other segments of the population, such as unrelated individuals. Changes in living arrangements, such as declines in average family size or decreases in the proportion of families maintained by married couples, can affect the measurement of family income. Use of per capita income provides a measure that includes all population segments and that is less affected by changes in living arrangements.

The income estimates were obtained from the Census Bureau's Current Population Survey (CPS) of March 1988. The survey includes both the civilian noninstitutional population and an estimated 783,000 members of the Armed Forces living off post or with their families on post in the United States. The March 1988 CPS population was 241,155,000 persons, comprising 65,133,000 family householders, 141,534,000 other family members (including 51,853,000 children under 15 years old), 1,363,000 persons in unrelated subfamilies, and 33,125,000 unrelated individuals (including 265,000 children under 15 years old); unrelated individuals are persons living

[10]The difference between 1987 per capita incomes of Blacks and Hispanics was not statistically significant.

alone or not related to others in the household. The collection of income data in the survey, however, is restricted to persons 15 years old and over. (See table C.)

Household income differs from family income in that household income includes not only the income of all related persons in the household but also the income of any unrelated persons in the household. Household income also includes the income of one-person households. Family income is limited to the income of persons in a family household which, by definition, must contain two or more related persons.

Since the estimates in this report are based on a sample, they are subject to sampling variability. Particular care should be exercised in the interpretation of figures based on relatively small numbers of cases. Moreover, as in all field surveys of income, the figures are subject to errors of response and nonreporting. For further details, see the section, "Reliability of Estimates," in appendix B.

Data on consumer income collected in the CPS are limited to money income received before payments of Federal, State, local, or Social Security (FICA) taxes and before any other types of deductions such as union dues or Medicare premiums. Money income is the sum of amounts received from earnings; Social Security and public assistance payments; dividends, interest, and rent; unemployment and workers' compensations; government and private employees pensions; and other periodic income. (Certain money receipts such as capital gains are not included.) Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that noncash benefits are also received by some nonfarm residents, such as the use of business transportation and facilities, full or partial payments by business for retirement programs, and medical and educational expenses. These elements should be considered when comparing income levels.

Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to underreport their income.[11] Underreporting tends to be more pronounced for income sources that are not derived from earnings, such as Social Security, unemployment compensation, public assistance, and net income from interest, dividends, and rentals. Overall, income earned from wages or salary is much better reported than other sources of income, and when dollar imputations are assigned for nonreporting, total wage and salary income approximates independently derived estimates.

Table C. Derivation of the CPS Universe and Population Characteristics of the March 1988 CPS

Population groups	Number (thous.)	Percent distribution
Total resident population	244,871	100.0
Minus:		
Civilian institutional population	2,933	1.2
Armed Forces living without families on post in the United States	783	0.3
Equals:		
Population total for the CPS universe	241,155	98.5
Total CPS population	241,155	100.0
Civilian noninstitutional population	240,203	99.6
Armed Forces living off post or with families on post in the United States	952	0.4
Total CPS population	241,155	100.0
In families	206,667	85.7
Family householders	65,133	27.0
Married-couple families	51,809	21.5
Male householder, no wife present	2,715	1.1
Female householder, no husband present	10,608	4.4
Other family members	141,534	58.7
Spouse of householder	51,809	21.5
Other related members 15 and over	37,872	15.7
Male	20,296	8.4
Female	17,576	7.3
Other related members under 15	51,853	21.5
Male	26,542	11.0
Female	25,310	10.5
In unrelated subfamilies	1,363	0.6
Unrelated individuals	33,125	13.7
15 years and over	32,860	13.6
Male	15,254	6.3
Female	17,607	7.3
Under 15 years	265	0.1
Male	137	-
Female	127	-

- Represents zero or rounds to zero.

In recent years the Bureau of the Census has conducted research concerning alternative measures for valuing noncash or in-kind benefits. This research has focused on the valuation of in-kind food, housing, and medical care transfers received by the low-income population. Initial results of this research were published in 1982 in Technical Paper 50, *Alternative Methods for Valuing Selected In-Kind Transfer Benefits and Measuring Their Effect on Poverty.* The Bureau has continued to update estimates yearly, with the most recent data being published in Technical Paper No. 58, *Estimates of Poverty Including the Value of Noncash Benefits: 1987.*

RELATED REPORTS

Current Population Survey. Other data based on the Current Population Survey showing the distributions of households, families, unrelated individuals, and persons

[11]The accuracy of reported and imputed CPS earnings and property income is discussed in a paper, "Measuring the Impact on Income Statistics of Reporting Differences Between the Current Population Survey and Administrative Sources," by Roger A. Herriot and Emmett F. Spiers, published in the American Statistical Association, Proceedings of the Social Statistics Section, 1975.

by income levels have been published in Series P-60 reports, Nos. 1 to 107, 109, and 114 to 159. Frequently, tables showing the cross-classification of income and other characteristics have been published in the Series P-20 and P-23 reports of the Bureau of the Census and in the Special Labor Force Reports of the Bureau of Labor Statistics. An advance report showing 1987 income data cross-classified by selected characteristics of families, persons, and households, and the poverty population was issued as Series P-60, No. 161.

Data on educational attainment and expected lifetime earnings have been assembled from information collected in the Current Population Survey. These data appear in Series P-60, No. 139, *Lifetime Earnings Estimates for Men and Women in the United States: 1979.* Included in the report are estimates of expected lifetime earnings in 1981 constant dollars (based upon 1979-centered data) by years of school completed, age, and sex, for all persons and for year-round, full-time workers.

A historical and analytical summary of the income data collected in the Current Population Survey appears in Technical Paper 17, *Trends in the Income of Families and Persons in the United States: 1947 to 1964,* published in 1967. This report contains detailed tables showing income distributions in constant (1964) dollars, mean incomes, fifths, and Gini ratios for families and unrelated individuals cross-classified by various characteristics, for the United States, nonfarm, and farm populations. Similar data are shown for males and females classified by the amount of their own income and various personal characteristics. An update to Technical Paper 17 can be obtained at cost by writing to the Bureau of the Census. The reproduced copy contains income summary measures such as means, medians, shares of aggregate income, and Gini ratios for families and persons by various demographic characteristics for the years 1947 through 1979 in constant 1977 dollars.

Data on the receipt of noncash benefits in 1985 appear in Current Population Reports, Series P-60, No. 155, *Receipt of Selected Noncash Benefits: 1985.* Unpublished data for 1986 can be obtained by writing to the Bureau of the Census.

Decennial census. Summary income statistics for households, families, and persons are presented in PHC80-2, Parts 2 to 53, Census Tracts; PHC80-3, Parts 2 to 53, Summary Characteristics for Governmental Units and Standard Metropolitan Statistical Areas; PHC80-4, Parts 2 to 53, Congressional Districts of the 98th Congress; PHC80-S2, Parts 2 to 53, Advance Estimates of Social, Economic, and Housing Characteristics; PC80-1-C, Parts 2 to 53, General Social and Economic Characteristics; and PC80-1-D, Parts 2 to 53, Detailed Population Characteristics.

Statistics on income in 1979 collected in the March 1980 CPS differ from data from the 1980 decennial census despite the fact that the same basic concept was used in both instances. First, the CPS data excluded the institutional population and most members of the Armed Forces living on post; these two groups were included in the census. Second, college students were generally enumerated at their own homes in the CPS and classified as family members, but were enumerated at their college residence in the census, usually as secondary individuals.

Third, the small group of CPS interviewers was more experienced and had more intensive training and supervision than the large number of temporary census enumerators and may have more often obtained more accurate answers from respondents. Furthermore, approximately 95 percent of the households were self-enumerated in the 1980 census.

In general, the census provides higher estimates of income than the CPS. Median family income reported in the 1980 census was about $19,917, 1.7 percent higher than the comparable figure of $19,587 derived from the March 1980 CPS.[12]

USER COMMENTS

We are interested in your reaction to the usefulness of this information and to the content of the questions used to provide these results. Appendix D contains a facsimile of the questionnaire. We welcome your recommendations for improving our survey work. If you have suggestions or comments, please send them to:

[r]BASED ON REVISED METHODOLOGY.

NOTE: FOR THE YEARS 1967 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES HOUSEHOLDS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 2. Households, by Total Money Income in 1967-87 (in Current Dollars), Race, and Hispanic Origin of Householder—Continued

(HOUSEHOLDS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

RACE AND SPANISH ORIGIN OF HOUSEHOLDER AND YEAR	NUMBER (THOUS)	PERCENT DISTRIBUTION												MEDIAN INCOME		MEAN INCOME

rBASED ON REVISED METHODOLOGY.

NOTE: FOR THE YEARS 1967 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES HOUSEHOLDS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS: THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

[r]BASED ON REVISED METHODOLOGY.
[1]PERSONS OF SPANISH ORIGIN MAY BE OF ANY RACE.

NOTE: FOR THE YEARS 1967 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES HOUSEHOLDS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

[r]BASED ON REVISED METHODOLOGY.
[1]ALL RACES, WHITE, BLACK AND OTHER RACES (1947=100); BLACK (1967=100); AND SPANISH ORIGIN OF HOUSEHOLDER (1972=100).

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

[r]BASED ON REVISED METHODOLOGY.
[1]ALL RACES, WHITE, BLACK AND OTHER RACES (1947=100); BLACK (1967=100); AND SPANISH ORIGIN OF HOUSEHOLDER (1972=100).
[2]PERSONS OF SPANISH ORIGIN MAY BE OF ANY RACE.

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 10. Families and Unrelated Individuals, by Total Money Income in 1947-87 (in Current Dollars), Race, and Hispanic Origin of Householder—Continued

(FAMILIES AND UNRELATED INDIVIDUALS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

RACE AND SPANISH ORIGIN OF HOUSEHOLDER AND YEAR	NUMBER (THOUS.)	PERCENT DISTRIBUTION: TOTAL	UNDER $2,000	$2,000 TO $2,999	$3,000 TO $3,999	$4,000 TO $4,999	$5,000 TO $5,999	$6,000 TO $7,999	$8,000 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $24,999	$25,000 AND OVER	MEDIAN INCOME: VALUE (DOL.) [r] BASED ON REVISED METHODOLOGY.
[1] ALL RACES, WHITE, BLACK AND OTHER RACES (1947=100); BLACK (1967=100); AND SPANISH ORIGIN OF HOUSEHOLDER (1972=100).

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 10. Families and Unrelated Individuals, by Total Money Income in 1947-87 (in Current Dollars), Race, and Hispanic Origin of Householder—Continued

(FAMILIES AND UNRELATED INDIVIDUALS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

RACE AND SPANISH ORIGIN OF HOUSEHOLDER AND YEAR	NUMBER (THOUS.)	PERCENT DISTRIBUTION: TOTAL	UNDER $2,000	$2,000 TO $2,999	$3,000 TO $3,999	$4,000 TO $4,999	$5,000 TO $5,999	$6,000 TO $7,999	$8,000 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $24,999	$25,000 AND OVER	MEDIAN INCOME: VALUE (DOL.)	INDEX[1]

[r]BASED ON REVISED METHODOLOGY.
[1]ALL RACES, WHITE, BLACK AND OTHER RACES (1947=100); BLACK (1967=100); AND SPANISH ORIGIN OF HOUSEHOLDER (1972=100).
[2]PERSONS OF SPANISH ORIGIN MAY BE OF ANY RACE.

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 11. Families and Unrelated Individuals, by Total Money Income in 1947-87 (in Constant 1987 Dollars), Race, and Hispanic Origin of Householder

(FAMILIES AND UNRELATED INDIVIDUALS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

RACE AND SPANISH ORIGIN OF HOUSEHOLDER AND YEAR	NUMBER (THOUS.)	PERCENT DISTRIBUTION: TOTAL	UNDER $2,500	$2,500 TO $4,999	$5,000 TO $7,499	$7,500 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $19,999	$20,000 TO $24,999	$25,000 TO $34,999	$35,000 TO $49,999	$50,000 AND OVER	MEDIAN INCOME: VALUE (DOL.)	INDEX[1]

RBASED ON REVISED METHODOLOGY.

[1]ALL RACES, WHITE, BLACK AND OTHER RACES (1947=100); BLACK (1967=100); AND SPANISH ORIGIN OF HOUSEHOLDER (1972=100).

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 11. Families and Unrelated Individuals, by Total Money Income in 1947-87 (in Constant 1987 Dollars), Race, and Hispanic Origin of Householder —Continued

(FAMILIES AND UNRELATED INDIVIDUALS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

RACE AND SPANISH ORIGIN OF HOUSEHOLDER AND YEAR	NUMBER (THOUS.)	PERCENT DISTRIBUTION: TOTAL	UNDER $2,000	$2,000 TO $2,999	$3,000 TO $3,999	$4,000 TO $4,999	$5,000 TO $5,999	$6,000 TO $7,999	$8,000 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $24,999	$25,000 AND OVER	MEDIAN INCOME: VALUE (DOL.) RBASED ON REVISED METHODOLOGY.
[1]ALL RACES, WHITE, BLACK AND OTHER RACES (1947=100); BLACK (1967=100); AND SPANISH ORIGIN OF HOUSEHOLDER (1972=100).
[2]PERSONS OF SPANISH ORIGIN MAY BE OF ANY RACE.

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 12. Income at Selected Positions and Percentage Share of Aggregate Income in 1947-87 Received by Each Fifth and Top 5 Percent of Families and Unrelated Individuals, by Race of Householder

(IN CURRENT DOLLARS. FAMILIES AND UNRELATED INDIVIDUALS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

RACE OF HOUSEHOLDER AND YEAR	NUMBER (THOUS.)	INCOME AT SELECTED POSITIONS (DOLLARS)					PERCENT DISTRIBUTION OF AGGREGATE INCOME						MEAN INCOME (DOLS.)	INDEX OF INCOME CONCENTRATION
		UPPER LIMIT OF EACH FIFTH				TOP 5 PERCENT	LOWEST FIFTH	SECOND FIFTH	MIDDLE FIFTH	FOURTH FIFTH	HIGHEST FIFTH	TOP 5 PERCENT		
		LOWEST	SECOND	MIDDLE	FOURTH

rBASED ON REVISED METHODOLOGY.

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 12. Income at Selected Positions and Percentage Share of Aggregate Income in 1947-87 Received by Each Fifth and Top 5 Percent of Families and Unrelated Individuals, by Race of Householder—Continued

(IN CURRENT DOLLARS. FAMILIES AND UNRELATED INDIVIDUALS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

RACE OF HOUSEHOLDER AND YEAR	NUMBER (THOUS.)	INCOME AT SELECTED POSITIONS (DOLLARS)					PERCENT DISTRIBUTION OF AGGREGATE INCOME						MEAN INCOME (DOLS.)	INDEX OF INCOME CONCENTRATION
		UPPER LIMIT OF EACH FIFTH				TOP 5 PERCENT	LOWEST FIFTH	SECOND FIFTH	MIDDLE FIFTH	FOURTH FIFTH	HIGHEST FIFTH	TOP 5 PERCENT		
		LOWEST	SECOND	MIDDLE	FOURTH

rBASED ON REVISED METHODOLOGY.

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 12. Income at Selected Positions and Percentage Share of Aggregate Income in 1947-87 Received by Each Fifth and Top 5 Percent of Families and Unrelated Individuals, by Race of Householder—Continued

(IN CURRENT DOLLARS. FAMILIES AND UNRELATED INDIVIDUALS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

RACE OF HOUSEHOLDER AND YEAR	NUMBER (THOUS.)	INCOME AT SELECTED POSITIONS (DOLLARS)					PERCENT DISTRIBUTION OF AGGREGATE INCOME						MEAN INCOME (DOLS.)	INDEX OF INCOME CONCENTRATION
		UPPER LIMIT OF EACH FIFTH				TOP 5 PERCENT	LOWEST FIFTH	SECOND FIFTH	MIDDLE FIFTH	FOURTH FIFTH	HIGHEST FIFTH	TOP 5 PERCENT		
		LOWEST	SECOND	MIDDLE	FOURTH									
UNRELATED INDIVIDUALS--CON.

rBASED ON REVISED METHODOLOGY.

NOTE: BEGINNING WITH THE YEAR 1979, DATA ARE BASED ON HOUSEHOLDER CONCEPT AND RESTRICTED TO PRIMARY FAMILIES. FOR THE YEARS 1960 TO 1970, THE NUMBER OF WHITE AND BLACK-AND-OTHER-RACES FAMILIES AND UNRELATED INDIVIDUALS WILL NOT ADD TO ALL RACES BECAUSE THE NUMBERS FOR ALL RACES WERE ADJUSTED TO POPULATION CONTROLS BASED ON THE 1970 CENSUS; THESE CONTROLS ARE NOT AVAILABLE BY RACE. FOR THE YEARS 1979 TO 1987, DATA ARE BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 13. Summary Measures—Selected Family Characteristics, by Total Money Income in 1987, Race, and Hispanic Origin Of Householder

(FAMILIES AS OF MARCH 1988. FOR MEANING OF SYMBOLS, SEE TEXT)

TOTAL MONEY INCOME	NUMBER (THOUSANDS)	MEAN FAMILY INCOME (DOLLARS)	INCOME PER FAMILY MEMBER (DOLLARS)	AVERAGE NUMBER OF-- PERSONS PER FAMILY	RELATED CHILDREN PER FAMILY	RELATED CHILDREN PER FAMILY WITH CHILDREN	EARNERS PER FAMILY	RATIO OF NON-EARNERS TO EARNERS[1]	MEAN AGE OF HOUSEHOLDER	MEAN SCHOOL YEARS COMPLETED BY HOUSEHOLDER[2]

[r]BASED ON REVISED METHODOLOGY.

NOTE: FOR THE YEARS 1979 TO 1987, BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 29. Persons 14 Years and Over, by Total Money Income in 1947-87 (in Current Dollars), Work Experience, Race, and Sex—Continued

(PERSONS 15 YEARS OLD AND OVER BEGINNING WITH MARCH 1980, AND PERSONS 14 YEARS OLD AND OVER AS OF MARCH OF THE FOLLOWING YEAR FOR PREVIOUS YEARS. FOR MEANING OF SYMBOLS, SEE TEXT)

YEAR, RACE, AND SEX	ALL PERSONS															YEAR-ROUND, FULL-TIME WORKERS		
	NUMBER (THOUS.)	NUMBER WITH INCOME (THOUS.)	PERCENT DISTRIBUTION: TOTAL WITH INCOME	$1 TO $1,999 OR LOSS	$2,000 TO $3,999	$4,000 TO $5,999	$6,000 TO $7,999	$8,000 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $19,999	$20,000 TO $24,999	$25,000 AND OVER	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)	PER-CENT	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)
MALE--CON.

[r]BASED ON REVISED METHODOLOGY.

NOTE: FOR THE YEARS 1979 TO 1987, BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 29. Persons 14 Years and Over, by Total Money Income in 1947-87 (in Current Dollars), Work Experience, Race, and Sex—Continued

(PERSONS 15 YEARS OLD AND OVER BEGINNING WITH MARCH 1980, AND PERSONS 14 YEARS OLD AND OVER AS OF MARCH OF THE FOLLOWING YEAR FOR PREVIOUS YEARS. FOR MEANING OF SYMBOLS, SEE TEXT)

YEAR, RACE, AND SEX	ALL PERSONS															YEAR-ROUND, FULL-TIME WORKERS		
	NUMBER (THOUS.)	NUMBER WITH INCOME (THOUS.)	PERCENT DISTRIBUTION: TOTAL WITH INCOME	$1 TO $1,999 OR LOSS	$2,000 TO $3,999	$4,000 TO $5,999	$6,000 TO $7,999	$8,000 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $19,999	$20,000 TO $24,999	$25,000 AND OVER	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)	PER-CENT	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)

[F]BASED ON REVISED METHODOLOGY.

NOTE: FOR THE YEARS 1979 TO 1987, BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 30. Persons 14 Years and Over, by Total Money Income in 1947-87 (in Constant 1987 Dollars), Work Experience, Race, and Sex

(PERSONS 15 YEARS OLD AND OVER BEGINNING WITH MARCH 1980, AND PERSONS 14 YEARS OLD AND OVER AS OF MARCH OF THE FOLLOWING YEAR FOR PREVIOUS YEARS. FOR MEANING OF SYMBOLS, SEE TEXT)

YEAR, RACE, AND SEX	ALL PERSONS															YEAR-ROUND, FULL-TIME WORKERS		
	NUMBER (THOUS.)	NUMBER WITH INCOME (THOUS.)	PERCENT DISTRIBUTION: TOTAL WITH INCOME	$1 TO $1,999 OR LOSS	$2,000 TO $3,999	$4,000 TO $5,999	$6,000 TO $7,999	$8,000 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $19,999	$20,000 TO $24,999	$25,000 AND OVER	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)	PER-CENT	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)

[r] BASED ON REVISED METHODOLOGY.

NOTE: FOR THE YEARS 1979 TO 1987, BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 30. Persons 14 Years and Over, by Total Money Income in 1947-87 (in Constant 1987 Dollars), Work Experience, Race, and Sex—Continued

(PERSONS 15 YEARS OLD AND OVER BEGINNING WITH MARCH 1980, AND PERSONS 14 YEARS OLD AND OVER AS OF MARCH OF THE FOLLOWING YEAR FOR PREVIOUS YEARS. FOR MEANING OF SYMBOLS, SEE TEXT)

YEAR, RACE, AND SEX	ALL PERSONS																YEAR-ROUND, FULL-TIME WORKERS		
	NUMBER (THOUS.)	NUMBER WITH INCOME (THOUS.)	PERCENT DISTRIBUTION: TOTAL WITH INCOME	$1 TO $1,999 OR LOSS	$2,000 TO $3,999	$4,000 TO $5,999	$6,000 TO $7,999	$8,000 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $19,999	$20,000 TO $24,999	$25,000 AND OVER	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)	PER-CENT	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)
MALE--CON.

[r]BASED ON REVISED METHODOLOGY.
NOTE: FOR THE YEARS 1979 TO 1987, BASED ON 1980 CENSUS POPULATION CONTROLS.

Table 30. Persons 14 Years and Over, by Total Money Income in 1947-87 (in Constant 1987 Dollars), Work Experience, Race, and Sex—Continued

(PERSONS 15 YEARS OLD AND OVER BEGINNING WITH MARCH 1980, AND PERSONS 14 YEARS OLD AND OVER AS OF MARCH OF THE FOLLOWING YEAR FOR PREVIOUS YEARS. FOR MEANING OF SYMBOLS, SEE TEXT)

YEAR, RACE, AND SEX	ALL PERSONS															YEAR-ROUND, FULL-TIME WORKERS		
	NUMBER (THOUS.)	NUMBER WITH INCOME (THOUS.)	PERCENT DISTRIBUTION: TOTAL WITH INCOME	$1 TO $1,999 OR LOSS	$2,000 TO $3,999	$4,000 TO $5,999	$6,000 TO $7,999	$8,000 TO $9,999	$10,000 TO $12,499	$12,500 TO $14,999	$15,000 TO $19,999	$20,000 TO $24,999	$25,000 AND OVER	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)	PER-CENT	MEDIAN INCOME (DOL.)	MEAN INCOME (DOL.)

[1] PERSONS OF HISPANIC ORIGIN MAY BE OF ANY RACE.

Appendix A. Definitions, Explanations, and Comparability of Data

DEFINITIONS AND EXPLANATIONS

Population coverage. This report includes the civilian noninstitutional population of the United States and approximately 952,000 members of the Armed Forces in the United States living off post or with their families on post, but excludes all other members of the Armed Forces.

Farm-nonfarm residence. The farm population refers to rural residents living on farms. The March 1980 CPS to March 1988 CPS employed a different definition of a farm than used in past Current Population Surveys or decennial censuses before 1980. Under the new definition, as used in the 1974 Census of Agriculture, a farm is any place in rural territory from which $1,000 or more of agricultural products were sold in the reporting year. All other households were classified as nonfarm, which comprises persons living in urban areas and persons not on farms living in rural areas. Rural persons in institutions, motels, and tourist camps, and those living on rented places where no land is used for farming are classified as nonfarm population. According to the old definition, farm residence was determined by responses to two questions: (1) "Does this place you (own/rent) have 10 acres or more?" and (2) "During the past 12 months, how much did sales of crops, livestock and other farm products from this place amount to (under $50, $50 to $249, $250 to $999, or $1,000 or more)?" The household was classified as being in the farm population if either (a) the acreage response was "yes" and sales amounted to $50 or more or (b) the acreage response was "no" and sales amounted to $250 or more.

The method of determining farm residence in Current Population Surveys prior to 1960 was to ask the question, "Is this house on a farm (or ranch)?" All persons living on farms as determined by the answer to the question constituted the farm population. However, persons on "farms" who paid cash rent for a house and yard only were classified as nonfarm, and, as in the present definition, all rural persons in institutions, motels, and tourist camps were classified as nonfarm.

Metropolitan-nonmetropolitan residence. The population residing in metropolitan statistical areas (MSA's) constitutes the metropolitan population. MSA's are defined by the Office of Management and Budget for use in the presentation of statistics by agencies of the Federal Government. An MSA is a geographic area consisting of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. The definitions specify a boundary around each large city so as to include most or all its suburbs. Entire counties form the MSA building blocks, except in New England where cities and towns are used. The former term SMSA was changed to MSA in 1983.

An area qualifies for recognition as an MSA if (1) it includes a city of at least 50,000 population, or (2) it includes a Census Bureau-defined urbanized area of at least 50,000 with a total metropolitan population of at least 100,000 (75,000 in New England). In addition to the county containing the main city or urbanized area, an MSA may include other counties having strong commuting ties to the central county. If specified conditions are met, certain large MSA's are designated as consolidated MSA's (CMSA's) and divided into component primary MSA's (PMSA's).

Central cities. The largest city in each MSA is always designated a central city. There may be additional central cities if specified requirements, designed to identify places of central character within the MSA, are met. Although the largest central cities are generally included in the title of the MSA, there may be central cities that are not part of the title. The balance of the MSA outside the central city or cities often is regarded as equivalent to "suburbs."

Geographic regions. The four major regions and nine Census divisions of the United States for which data are presented in this report represent groups of States as follows:

Northeast:
- *New England:* Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.
- *Middle Atlantic:* New Jersey, New York, and Pennsylvania.

Midwest (formerly North Central):
- *East North Central:* Illinois, Indiana, Michigan, Ohio, and Wisconsin.
- *West North Central:* Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

South:

South Atlantic: Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia.

East South Central: Alabama, Kentucky, Mississippi, and Tennessee.

West South Central: Arkansas, Louisiana, Oklahoma, and Texas.

West:

Mountain: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.

Pacific: Alaska, California, Hawaii, Oregon, and Washington.

North and West:

Northeast, Midwest, and West combined.

Tenure. A housing unit is "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. A cooperative or condominium unit is "owner occupied" only if the owner or co-owner lives in it. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent. For renter-occupied units, information was also obtained as to whether the unit was publicly owned or subsidized by the Federal, State, or local government.

Mobility status. The population of the United States 1 year old and over has been classified according to mobility status on the basis of a comparison of the place of residence of each individual at the time of the March 1988 CPS and place of residence 1 year earlier. Nonmovers are all persons who were living in the same house at the beginning and end of the period. Movers are all persons who were living in a different house at the end of the period than at the beginning of the period. Movers from abroad include all persons, either citizens or aliens, whose place of residence was outside the United States at the beginning of the period, that is, in an outlying area under the jurisdiction of the United States or in a foreign country.

Income. For each person in the sample 15 years old and over, questions were asked on the amount of money income received in the preceding calendar year from each of the following sources: (1) money wages or salary; (2) net income from nonfarm self-employment; (3) net income from farm self-employment; (4) Social Security or railroad retirement; (5) Supplemental Security income; (6) public assistance or welfare payments; (7) interest (on savings or other investments which pay interest); (8) dividends, income from estates or trusts, or net rental income; (9) veterans' payments or unemployment and worker's compensation; (10) private pensions or government employee pensions; (11) alimony or child support, regular contributions from persons not living in the household, and other periodic income.

It should be noted that although the income statistics refer to receipts during the preceding year the characteristics of the person, such as age, and labor force status, and the composition of families refer to the time of the survey. The income of the family does not include amounts received by persons who were members of the family during all or part of the income year if these persons no longer resided with the family at the time of enumeration. However, family income includes amounts reported by related persons who did not reside with the family during the income year but who were members of the family at the time of enumeration.

Data on consumer income collected in the CPS by the Bureau of the Census cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, Social Security, union dues, Medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that non-cash benefits are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to underreport their income. From an analysis of independently derived income estimates, it has been determined that income earned from wages or salaries is much better reported than other sources of income, and is nearly equal to independent estimates of aggregate income.

The various sources for which income is reported are defined as follows:

Money wages or salary is total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions were made for taxes, bonds, pensions, union dues, etc.

Net income from nonfarm self-employment is net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal

income taxes), etc. In general, inventory changes were considered in determining net income; replies based on income tax returns or other official records do reflect inventory changes. However, when values of inventory changes were not reported, net income figures exclusive of inventory changes were accepted. The value of saleable merchandise consumed by the proprietors of retail stores is not included as part of net income.

Net income from farm self-employment is net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his own account, as an owner, renter, or sharecropper. Gross receipts include the value of all products sold, government farm programs, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc. Operating expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farmhands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not State and Federal personal income taxes), etc. The value of fuel, food, or other farm products used for family living is not included as part of net income. In general, inventory changes were considered in determining net income only when they were accounted for in replies based on income tax returns or other official records which reflect inventory changes; otherwise inventory changes were not taken into account.

Social Security includes Social Security pensions and survivors' benefits, and permanent disability insurance payments made by the Social Security Administration prior to deductions for medical insurance and railroad retirement insurance checks from the U.S. Government. Medicare reimbursements are not included.

Supplemental Security income includes payments made by Federal, State, and local welfare agencies to low income persons who are (1) aged (65 years old or over), (2) blind, or (3) disabled.

Public assistance or welfare payments include public assistance payments, such as aid to families with dependent children and general assistance.

Dividends, interest (on savings or other investments which pay interest), income from estates or trusts, net rental income, or royalties include dividends from stockholdings or membership in associations, interest on savings or any type of investment which pays interest, periodic receipts from estates or trust funds, net income from rental of a house, store, or other property to others, receipts from boarders or lodgers, and net royalties.

Unemployment compensation, veterans' payments, or worker's compensation include (1) unemployment compensation received from government unemployment insurance agencies or private companies during periods of unemployment and any strike benefits received from union funds; (2) money paid periodically by the Veterans Administration to disabled members of the Armed Forces or to survivors of deceased veterans, subsistence allowances paid to veterans for education and on-the-job training, as well as so-called "refunds" paid to ex-servicemen as GI insurance premiums; and (3) worker's compensation received periodically from public or private insurance companies for injuries incurred at work. The cost of this insurance must have been paid by the employer and not by the person.

Private and government employee pensions include (1) private pensions or retirement benefits paid to a retired person or his survivors by a former employer or by a union, either directly or through an insurance company and (2) government employee pensions received from retirement pensions paid by Federal, State, county, or other governmental agencies to former employees (including members of the Armed Forces) or their survivors.

Annuities, alimony, regular contributions from persons not living in the household, and other periodic income include (1) periodic receipts from annuities or insurance; (2) alimony and child support; (3) contributions received periodically from persons not living in the household; (4) other periodic income such as military family allotments, net gambling winnings, and other kinds of periodic income other than earnings.

Government transfer payments include Social Security or railroad retirement, public assistance or welfare payments, Supplemental Security income, retirement and annuities, veterans' payments, and unemployment and worker's compensations.

Receipts not counted as income. Receipts from the following sources were not included as income: (1) money received from the sale of property, such as stocks, bonds, a house, or a car (unless the person was engaged in the business of selling such property, in which case the net proceeds would be counted as income from self-employment); (2) withdrawals of bank deposits; (3) money borrowed; (4) tax refunds; (5) gifts; and (6) lump-sum inheritances or insurance payments.

All sources of income may be combined into two major types:

Total money earnings. The algebraic sum of money wages or salary and net income from farm and nonfarm self-employment.

Income other than earnings. The algebraic sum of all sources of money income except wages and salaries and income from self-employment.

Total money income. This is defined as the algebraic sum of money wages and salaries, net income from self-employment, and income other than earnings. The total income of a family is the algebraic sum of the amounts received by all income recipients in the family.

The income tables for families and unrelated individuals include in the lowest income group (under $2,500) those who were classified as having no income in the income year and those reporting a loss in net income from farm and nonfarm self-employment or in rental income. Some of these were living on income "in-kind," savings, or gifts, or were newly constituted families, unrelated individuals who had recently left families, or families in which the sole earner had recently died or had left the household. However, other families or unrelated individuals who reported no income probably had some money income which was not recorded in the survey.

Median income. The median income is the amount which divides the distribution into two equal groups, one having incomes above the median, and the other having incomes below the median. The medians for households, families, and unrelated individuals are based on all households, families, and unrelated individuals. The medians for persons are based on persons with income.

Mean income. The mean income is the amount obtained by dividing the total income of a group by the number of units in that group. The means for households, families, and unrelated individuals are based on all households, families, and unrelated individuals. The means for persons are based on persons with income.

Per capita income. Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population (excluding patients or inmates in institutional quarters) in that group.

Index of income concentration. The index of income concentration (or Gini index) is a statistical measure of income equality ranging from 0 to 1. A measure of 1 indicates perfect inequality, i.e., one person having all the income and the rest having none. A measure of 0 indicates perfect equality, i.e., all persons having equal shares of the income. For a more detailed discussion see Current Population Reports, Series P-60, No. 123.

Household. A household consists of all the persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters; that is, when the occupants do not live and eat with any other persons in the structure and there is direct access from the outside or through a common hall.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated persons sharing a housing unit as partners, is also counted as a household. The count of households excludes group quarters.

Group quarters. All persons who are not members of households are regarded as living in group quarters. Group quarters contain five or more persons unrelated to the person in charge, such as residents of lodging and boarding houses. Persons living in military barracks and inmates of institutions were excluded from the survey.

Head versus householder. Beginning with the 1980 CPS, the Bureau of the Census discontinued the use of the terms "head of household" and "head of family." Instead, the terms "householder" and "family householder" are used. Recent social changes have resulted in greater sharing of household responsibilities among the adult members and, therefore, have made the term "head" increasingly inappropriate in the analysis of household and family data. Specifically, the Bureau has discontinued its longtime practice of always classifying the husband as the reference person (head) when he and his wife are living together.

Householder. The instructions call for listing first the person (or one of the persons) in whose name the home is owned or rented. If the house is owned jointly by a married couple, either the husband or the wife may be listed first, thereby becoming the reference person, or householder, to whom the relationship of the other household members is recorded. One person in each household is designated as the "householder." The number of householders, therefore, is equal to the number of households.

Family. A family is a group of two persons or more (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such persons (including related subfamily members) are considered as members of one family. Beginning with the 1980 CPS, unrelated subfamilies (referred to in the past as secondary families) are no longer included in the count of families, nor are the members of unrelated subfamilies included in the count of family members.

Family household. A family household is a household maintained by a family (as defined above), and any unrelated persons (unrelated subfamily members and/or secondary individuals) who may be residing there are included. The number of family households is equal to the number of families. The count of family household members differs from the count of family members,

however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives. (See the definition of family.)

Unrelated subfamily. An unrelated subfamily (formerly called a secondary family) is a group of two persons or more who are related to each other by birth, marriage, or adoption, but who are not related to the householder. The unrelated subfamily may include persons such as guests, roomers, boarders, or resident employees and their relatives living in a household. The number of unrelated subfamily members is included in the number of household members but is not included in the count of family members.

Persons living with relatives in group quarters were formerly considered as members of unrelated subfamilies. However, the number of such unrelated subfamilies became so small (37,000 in 1967) that beginning with data for 1968 (and beginning with census data for 1960) the Bureau of the Census includes persons in these unrelated subfamilies in the count of secondary individuals.

Married couple. A married couple, as defined for census purposes, is a husband and wife enumerated as members of the same household. The married couple may or may not have children living with them. The expression "husband-wife" or "married-couple" before the term "household," or "family," indicates that the household, or family, is maintained by a husband and wife.

Unrelated individuals. The term "unrelated individuals" refers to persons 15 years old and over (other than inmates of institutions) who are not living with any relatives. An unrelated individual may (1) constitute a one-person household, (2) be part of a household including one or more other families or unrelated individuals, or (3) reside in group quarters such as a rooming house. Thus, a widow living by herself or with one or more other persons not related to her, a lodger not related to the householder or to anyone else in the household, and a servant living in an employer's household with no relatives are examples of unrelated individuals.

Nonfamily householder. A nonfamily householder (formerly called a primary individual) is a person maintaining a household while living alone or with nonrelatives only.

Secondary individual. A secondary individual is a person in a household or group quarters such as a guest, roomer, boarder, or resident employee (excluding nonfamily householders and inmates of institutions) who is not related to any other person in the household or group quarters. (See section on unrelated subfamily for slight change in coverage of secondary individuals in 1968.)

Size of household, family, or subfamily. The term "size of household" includes all persons occupying a housing unit. "Size of family" includes the family householder and all other persons in the living quarters who are related to the householder by birth, marriage, or adoption.

Own children and related children under 18 years of age. "Own" children in a family are sons and daughters, including stepchildren and adopted children of the householder. "Related" children in a family include own children and all other children in the household who are related to the householder by blood, marriage, or adoption.

Related persons and family members. In the classification of households by number of related persons, the person or couple who maintains the household (or housing unit) and all persons in the household related to them are included. In the classification of families by number of family members, all persons in the family are included. The number of family members is the same as the size of the family.

Marital status. The marital status classification identifies four major categories: single, married, widowed, and divorced. These terms refer to the marital status at the time of the enumeration.

The category "married" is further divided into "married, spouse present," "separated," and "other married, spouse absent." A householder was classified as "married, spouse present" if their spouse was reported as a member of the household, even though he or she may have been temporarily absent on business or on vacation, visiting, in a hospital, etc., at the time of the enumeration. Persons reported as separated included those with legal separations, those living apart with intentions of obtaining a divorce, and other persons permanently or temporarily separated because of marital discord. The group "other married, spouse absent" included married persons living apart because either the wife or the husband was employed and living at a considerable distance from home, was residing in an institution, had moved to another area, or had a different place of residence for any other reason except separation as defined above.

Number of earners. This number includes all persons in the household with $1 or more in wage and salaries or $1 or more or a loss in net income from farm or nonfarm self-employment.

Age. The age classification is based on the age of the person at his last birthday.

Race. The population is divided into three groups on the basis of race: White, Black, and "other races." The

last category includes Indians, Japanese, Chinese, and any other race except White and Black. "Other races" are sometimes shown in combination with the Black population.

Persons of Hispanic origin. Persons of Hispanic origin were identified by a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (and the origin of other household members) from a "flash card" listing ethnic origins. Persons of Hispanic origin, in particular, were those who indicated that their origin was Mexican, Puerto Rican, Central or South American, or some other Hispanic origin. It should be noted that persons of Hispanic origin may be of any race.

Years of school completed. Data on years of school completed were derived from the combination of answers to questions concerning the highest grade of school attended by the person and whether or not that grade was finished. The questions of educational attainment apply only to progress in "regular" schools. Such schools included public, private, and parochial elementary and high schools (both junior and senior), colleges, universities, and professional schools (whether day schools or night schools). Thus, regular schooling is that which may advance a person toward an elementary school certificate, a high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools was counted only if the credits obtained were regarded as transferable to school in the regular school system.

The median years of school completed is defined as the value which divides the distribution into two equal groups, one having completed more schooling and one having completed less schooling than the median. These medians are expressed in terms of a continuous series of numbers representing years of school completed. For example, a median of 9.0 represents the completion of the first year of high school and a median of 13.0 means completion of the first year of college.

Labor force and employment status. The definitions of labor force and employment status relate to the population 15 years old and over.

Employed. Employed persons comprise (1) all civilians who, during the survey week containing March 12, 1987 did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a farm or in a business operated by a member of the family and (2) all those who were not working but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, or labor-management dispute, or because they were taking time off for personal reasons, whether or not they were paid by their employers for time off, and whether or not they were seeking other jobs. Excluded from the employed group are persons whose only activity consisted of work around the house (such as own home housework, and painting or repairing own home) or volunteer work for religious, charitable, and similar organizations.

Unemployed. Unemployed persons are those civilians who, during the survey week containing March 12, 1987, had no employment but were available for work and (1) had engaged in any specific job seeking activity within the past 4 weeks, such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) were waiting to be called back to a job from which they had been laid off, or (3) were waiting to report to a new wage or salary job within 30 days.

Labor force. Persons are classified as in the labor force if they were employed as civilians, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" comprises all civilians classified as employed or unemployed.

Not in the labor force. All civilians who are not classified as employed or unemployed are defined as "not in the labor force." This group who are neither employed nor seeking work includes persons engaged only in own home housework, who were attending school or were unable to work because of longterm physical or mental illness; persons who are retired or too old to work, seasonal workers for whom the survey week fell in an off season, and the voluntarily idle. Persons doing only unpaid family work (less than 15 hours during the specified week) are also classified as not in the labor force.

Paid labor force. Persons are classified in the paid labor force if they were employed as wage and salary workers or self-employed workers during the survey week containing March 12, 1987, or were looking for work at the time and had last worked as wage and salary or self-employed worker.

Occupation. The data on occupation in tables 9, 14, 27, 39, and 40 refer to the job held longest during the income year.

The occupation groupings were derived from occupation subgroups delineated on the basis of the classification system used in the 1980 census. For more detailed information, see the February 1983 issue of Employment and Earnings by the Bureau of Labor Statistics.

Work experience. A person with work experience is one who, during the preceding calendar year, did any

civilian work for pay or profit or worked without pay on a family-operated farm or business at any time during the year, on a part time or full time basis.

Weeks worked in the income year. Persons are classified according to the number of different weeks, during the preceding calendar year, in which they did any work for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

Part-time or full-time jobs. A person is classified as having worked at part-time jobs during the preceding calendar year if he worked at jobs which provided less than 35 hours of work per week in a majority of the weeks in which he worked during the year. He is classified as having worked at full-time jobs if he worked 35 hours or more per week during a majority of the weeks in which he worked.

Year-round, full-time worker. A year-round, full-time worker is one who worked primarily at full-time jobs for 50 weeks or more during the preceding calendar year.

Nonworker. A nonworker is one who did not do any work in the calendar year preceding the survey.

Symbols. A dash (—) represents zero or rounds to zero, the symbol "B" means that the base for the derived figure is less than 75,000, the symbol "X" means not applicable, the symbol "NA" means not available, and the symbol "r" means revised.

Rounding. Percentages are rounded to the nearest tenth of a percent; therefore, the percentages in a distribution do not always add to exactly 100.0 percent. The totals, however, are always shown as 100.0. Moreover, individual figures are rounded to the nearest thousand without being adjusted to group totals, which are independently rounded; percentages are based on the unrounded numbers.

Base figures. The base figures shown for 1979 to 1986 are based on civilian noninstitutional population controls for age, race, and sex established by the 1980 census. The base figures shown for 1971 to 1978 were prepared by inflating weighted sample results to agree with independent estimates of the population based on statistics updated from the 1970 census, whereas the base figures for the years from 1961 to 1970 were inflated to estimates derived from the 1960 census. The data for the years prior to 1961 were based on the 1950 census.

Computation of aggregate income by fifths. The data shown on aggregate income and dollar cutoffs for fifths (and top 5 percent) of families, ranked by size of their total money income, were calculated using sorted microdata for 1958 to present. Prior to 1958, estimates were derived from grouped data as described here:

1. In calculating the aggregate income by fifths (and top 5 percent) of families using grouped data prior to 1958, the underlying aggregate income distribution by size of income was estimated initially. The aggregate income distributions were obtained by multiplying the number of units in each income interval by an estimated mean income for the corresponding income interval. For the top open-end interval ($25,000 and over), a Pareto distribution was fitted to the data in the interval just below the open-end interval ($15,000 to $24,999). This fitted distribution was then extrapolated to estimate the number of families with incomes greater than $100,000. The mean income of families with greater than $100,000 was assumed to be $100,000 exactly.[1] The mean income for the $25,000 to $100,000 interval was estimated from the same fitted Pareto distribution. Below the "$25,000 and over" interval, a Pareto distribution was fitted to each separate income interval. If the absolute value of the slope parameter of the fitted Pareto distribution was greater than 1, the mean income of the interval was estimated from the fitted Pareto distribution. If the absolute value of the slope parameter was less than or equal to 1, the midpoint of the interval was used as the estimated mean of the interval.

2. The upper income levels (quantiles) of each fifth and the top 5 percent of families were estimated using either linear or Pareto interpolation depending upon the methods used to estimate the mean income in the interval in which the quantile was located (reference interval). After determining a particular quantile, the aggregate income above this quantile was calculated by estimating the aggregate income of the subinterval between the quantile and the next higher actual income interval and adding the result to the aggregate income above the reference interval. The aggregate income of the subinterval was determined using the method (either Pareto or linear interpolation) consistent with that used for estimating the quantile and the mean income of the reference interval. The aggregate incomes between the quantiles were determined by disaccumulating the aggregate income distribution.

For more information on the use of Pareto techniques, see "Estimation of Summary Measures of Income Size Distribution from Grouped Data," by Emmett F. Spiers, published in the American Statistical Association *Proceedings of the Social Statistics Section,* 1977.

Computation of constant dollar distributions. For the years 1968 to 1986, adjustment for price change was made by converting the incomes of households,

[1]Individual income amounts greater than or equal to $100,000 are recorded as $99,999 in the Current Population Survey.

families, or persons on the microdata file into 1987 dollars on the basis of the Consumer Price Index (CPI). The microdata was then tallied into the appropriate income interval. Data prior to 1968 was converted using existing grouped data. In choosing a procedure to make this conversion, two fundamental assumptions concerning income data were made: (1) price changes have the same proportional effect on various income levels and (2) the distribution within each income interval follows a Pareto distribution. The following procedure satisfies these two assumptions.

The first step required the accumulation of the income distribution starting with the highest income interval and cumulating to the lowest income interval. Next, the limits of each income interval were converted into 1987 dollars by adjusting them by a factor representing the change on the basis of that year's price index (1982=100). Finally, the number of families in each of the detailed class intervals were computed by logarithmic interpolation and then combined into broad income intervals.

The indices used to make the constant dollar conversions are shown in table A-1. The Consumer Price Index (CPI-U) is an index designed to measure changes in family purchasing power. While the CPI is a good measure of the changes in prices paid by the average family represented in the index (urban consumers), it is not necessarily a good measure of the changes in prices faced by consumers of different characteristics and income levels. These limitations should be noted when comparing income figures adjusted to constant dollars using the CPI since the same index was used for all families and all income levels.

Table A-1. Annual Average Consumer Price Index (CPI-U): 1947 to 1987

Year	CPI	Year	CPI
1947	23.1	1968	36.0
1948	24.9	1969	38.0
1949	24.7	1970	40.2
1950	24.9	1971	42.0
1951	26.9	1972	43.3
1952	27.5	1973	46.0
1953	27.7	1974	51.1
1954	27.8	1975	55.8
1955	27.7	1976	59.0
1956	28.2	1977	62.8
1957	29.2	1978	67.6
1958	30.0	1979	75.2
1959	30.0	1980	85.4
1960	30.7	1981	94.2
1961	31.0	1982	100.0
1962	31.3	1983	103.2
1963	31.7	1984	107.6
1964	32.1	1985	111.4
1965	32.7	1986	113.6
1966	33.6	1987	117.7
1967	34.6

COMPARABILITY OF CURRENT POPULATION SURVEY INCOME DATA WITH OTHER DATA

Bureau of Economic Analysis (BEA) personal income series. The income data presented in this report are not directly comparable with estimates of aggregate personal income prepared by the Bureau of Economic Analysis (formerly the Office of Business Economics), Department of Commerce, nor with the distributions of families and unrelated individuals by family personal income brackets published by that Bureau between the years 1929 to 1963. The lack of correspondence stems from the following differences in definition and coverage:

1. *Income definition.* The personal income series include, among other items, the following types of nonmoney income which are not included in the census definition: wages received in kind, the value of food and fuel produced and consumed on farms, the net rental value of owner-occupied homes, the property income received by mutual life insurance companies, and the value of the services of banks and other financial intermediaries rendered to persons without the assessment of specific charges. These items of income in kind account for about 4 percent of total personal income. The Census Bureau definition of income, however, includes such items as regular contributions for support received from persons who do not reside in the same living quarters, income received from roomers and boarders residing in households, and employee contributions for social insurance, which are not included in the personal income series. These items, however, represent a much smaller income total than the nonmoney items included in personal income.

2. *Source of data.* The personal income series is estimated largely on the basis of data derived from business and governmental sources. These sources include the industrial and population censuses, employer's wage reports under the Social Security programs, and records of disbursements to individuals by governmental agencies. The income data presented in the census reports, on the other hand, are based directly on field surveys of households.

   As discussed in the section, "Source and Reliability of Estimates," income data obtained in household interviews are subject to various types of reporting errors which tend to produce an understatement of income. It is estimated that the income surveys conducted by the Bureau of the Census during the past few years have obtained about 90 percent of the comparable total money income aggregates and about 98 percent of the comparable money wage or salary aggregates derived from the personal income series prepared by BEA.

For a more detailed discussion of the differences between distributions using Census money income and BEA personal income, see "Size Distribution of of Family Personal Income: Methodology and Estimates for 1964," by Edward C. Budd, Daniel B. Radner, and John C. Hinrichs, Bureau of Economic Analysis, BEA-SP 73-21, June 1973.

3. *Population coverage.* The Bureau of the Census excluded from its sample inmates of institutions and military personnel overseas or living on post in the United States (except for a few families living on post). In addition the income of persons who died or emigrated prior to the date of interview was not reported in the census inquiry. The income of these groups is included in the aggregate personal income series released by the BEA.

4. *Average income.* The average income figures (e.g., for geographical regions) represent income per capita, i.e., they were derived by dividing total income by the total population including men, women, and children. Most of the census averages, in contrast, are for households, families, unrelated individuals, or income recipients 15 years old and over.

Department of Agriculture farm income series. The farm income data are not directly comparable to that published by the U.S. Department of Agriculture (USDA) for several reasons. The USDA publishes two major series on income of farms: (1) net farm income and (2) net cash farm income.

For reasons listed below, the estimates of farm self-employment income per person or per family as published by the Bureau of the Census differ from estimates of operators' net farm income or net cash farm income per farm as published by the Department of Agriculture:

1. The unit of analysis in the USDA estimates is an establishment (farm) rather than a household as in the Bureau of the Census estimate.

2. The estimates of farm self-employment income as published by the Bureau of the Census and USDA's net cash income series exclude the nonmoney income items of crops grown for home consumption and an imputed rental value for farm dwellings. However, these are included in the estimates of operators' net farm income per farm.

3. The USDA estimate of net farm income includes the value of the change in inventories of commodities from the beginning to the end of the year. The USDA net cash farm income and the Bureau of the Census farm self-employment income do not.

4. The USDA series include the net income of farm operators from the rental of farms to other farmers but the census definition classifies these receipts as income other than earnings, not income from farm self-employment.

5. The USDA series is based on income from farms which are organized as proprietorships, partnerships, and corporations. The Bureau of the Census excludes corporate farm income. (The Bureau of Economic Analysis does estimate the proportions of the USDA estimate which are earned by corporate and noncorporate farms for inclusion in the National Income and Product Account.)

   The estimates of the USDA differ from the estimates of the Bureau of the Census methodologically as well as conceptually. The USDA estimates are based on data derived from the Census of Agriculture, farm surveys, business, and governmental sources, and are not available at a farm or household level, while the Bureau of the Census estimates are compiled from data collected in sample surveys. As noted later, the latter estimates are subject not only to sampling variation but also to errors of response and nonreporting.

   For a more detailed discussion of the concepts and methodology used in the USDA estimates, see U.S. Department of Agriculture Handbook No. 365, Major Statistical Series of the U.S. Department of Agriculture, Vol. 3, "Gross and Net Farm Income," September 1969.

Federal income tax data. For several reasons, the income data shown in this report are not directly comparable with those which may be obtained from statistical summaries of income tax returns. Income, as defined for tax purposes, differ somewhat from the concept used by the Bureau of the Census. For example, certain types of receipts, such as veterans' payments, Social Security benefits, and relief payments, which constitute the main income source for some families, are excluded from income tax coverage. Moreover, the coverage of income tax statistics is less inclusive because single persons receiving less than $3,560 (less than $4,640 if 65 years old or over) and married couples receiving less than $5,830 ($6,910 if one spouse is 65 years old or over; $7,990 if both are 65 or over) are not required to file returns. Furthermore, some income tax returns are filed as separate returns and others as joint returns; consequently, the income reporting unit is not consistently either a family or a person.

Old-Age, Survivors', Disability, and Health Insurance earnings record data. Census data shown in this report and the distributions made upon the basis of Old-Age, Survivors', Disability, and Health Insurance earnings record data differ for the reasons listed below.

1. The earnings of the following groups are not covered by the earnings record data: many Federal,

State, and local government employees, some employees of nonprofit organizations, workers covered by the Railroad Retirement Act, and persons who are not covered by the program because of insufficient earnings, including some farm and nonfarm self-employed persons, some farm workers, and domestic servants.

2. Employees' earnings in excess of $43,800 per employer are not covered by the earnings record data.
3. Income other than earnings is not covered by the earnings record data.
4. The earnings record data are based upon employers' Social Security tax reports and the Federal income tax returns of self-employed persons, while the data presented in this report are obtained by household interviews.

COMPARABILITY OF ESTIMATES FROM MARCH 1988 CPS WITH ESTIMATES FOR PREVIOUS YEARS

Estimates from the March 1980 CPS to the March 1988 CPS are in some instances not strictly comparable with estimates for previous years due to several factors. Among these factors are changes in (1) population controls and metropolitan residence definitions; (2) collection of income and work experience data; (3) noninterviews, nonresponses, and allocations; (4) questionnaire wording and procedures; (5) sample size and interpolation procedures; and (6) definition of the income universe. Each of these factors is discussed in the following sections, and readers should consider these differences when comparing current with previous years' estimates.

Population Controls and Metropolitan Residence Definitions

In July 1985, the CPS began carrying the metropolitan statistical area definitions announced by the Office of Management and Budget on June 30, 1984. Figures published from the CPS in the early 1980's and throughout most of the 1970's referred to metropolitan areas as defined on the basis of the 1970 census. Since there are important differences in the population classified as metropolitan using the 1970 and 1984 definitions, comparisons should be avoided.

The new CPS metropolitan estimates have consistently been higher than independent estimates of the metropolitan population prepared by the Census Bureau; the new CPS nonmetropolitan estimates have been lower than the independent estimates. The magnitude of the monthly differences has varied from 900,000 to 2.5 million persons over the past year, so that the proportion of the population living in metropolitan areas according to the CPS has ranged from 0.4 to 1.0 percentage points higher than the independent estimate. The difference in level between the two sets of estimates is partially attributable to the basic CPS sample design, which, because of sampling variability, includes an oversample of metropolitan households and an undersample of nonmetropolitan households. The monthly variations result from the exit and entrance of rotation groups, each with slightly different metropolitan-nonmetropolitan proportions, into the sample. The apparent overestimation of metropolitan and underestimation of nonmetropolitan population in CPS relative to the Bureau's independent estimates should be taken into account when using the data.

The data for 1971 through 1987 are in some instances not entirely comparable to figures for earlier years because of revisions in the Current Population Survey. The estimates for 1979 to 1987 are based on civilian noninstitutional population established by the 1980 census. Starting in January 1972, 1970 census-based population controls, metropolitan residence definitions, and other materials were introduced into the sample and estimation procedures. The major item affecting comparability at the overall national level is the introduction of population controls based on the 1970 census. The data for 1971 through 1978 are based on civilian noninstitutional population established by the 1970 census. Figures for previous years are tied in with 1960 census-based population controls. In a number of instances, data from the March 1970 and 1971 CPS's were revised to take account of 1970 census-based population controls, thus providing some measure of the impact of the changes. (See table 3, Current Population Reports, Series P-60, No. 91.) Basically, these changes should have no substantial impact on summary measures, such as medians and means, and on proportional measures, such as percent distributions and low-income or poverty rates. However, the changes may have more impact on the population levels in different subgroupings, such as the total number of persons or families either overall, within some particular income interval, or below the low-income level. A detailed description of these changes appears in the Bureau of Labor Statistics report, *Employment and Earnings,* Vol. 18, No. 8, February 1972.

Comparability of metropolitan and nonmetropolitan data from the March 1980 CPS with data for previous years. Changes in the CPS design and procedures over the last several years have made the annual series of sample population data for metropolitan and nonmetropolitan areas inconsistent. Analytic comparisons of year-to-year changes in these figures should be avoided. Trends in metropolitan and nonmetropolitan population

growth over the 1970-83 period should not be appreciably affected by the procedural changes. The major revisions to earlier CPS sample design and estimation methods have involved the varying of the number of sample units. Incorporation of approximately 10,000 supplemental housing units into the March CPS sample in 1977 was accompanied by new procedures for inflating the sample results to reflect national estimates. It was determined subsequent to the introduction of the additional sample that the new inflating (weighting) procedures used for processing both the March 1977 and March 1978 CPS supplement data had resulted in an apparent overestimate of the nonmetropolitan population and corresponding underestimate of the metropolitan population for those years. For the March 1979 CPS, another revision of the weighting process was introduced to correct the problem discovered in the earlier procedures. The result of this change was a large spurious increase in the metropolitan population and decrease in the nonmetropolitan population relative to March 1978 CPS levels.

Collection of Income and Work Experience Data

This report presents data showing income of persons and family householders with varying amounts of work experience. In the surveys from March 1966 to March 1969, civilian work experience data collected in the February and April surveys were matched with income data collected in the March survey for all households. In the surveys prior to March 1966 only persons included in the February and March surveys were matched.

Nonmatched persons included in the February and March interviews or the March and April interviews were almost always assigned work experience information from actual respondents with similar economic and demographic characteristics. Work experience values were estimated only when there was a nonmatched person with a given classification, but no respondent with similar economic and demographic characteristics.

No April or February 1969 survey record could be found for about 6 percent of the people included in the March 1969 survey. The major reasons for these nonmatches were migration, noninterviews, and coding errors. In order to eliminate the nonmatches and to improve the consistency between income and work experience data, both the income and work experience data were collected together beginning with the March 1970 survey.

The remaining persons, whose work experience data were assigned, resulted from inconsistencies between their work experience and income data and from persons who did not answer the work experience questions. It should be noted that the proportions of year-round, full-time workers shown in the Series P-60 reports differ slightly from those shown for the same subgroups in the Bureau of Labor Statistics, *Special Labor Force Reports,* "Work Experience of the Population." The difference exists because the proportions are not based on exactly the same groups. The proportions presented in the Special Labor Force Reports relate to civilians who worked at some time during the year. In contrast, the proportions shown in the persons tables in the P-60 reports relate to civilians who received income, including not only workers but also many persons who did not work but received income from pensions, interest, dividends, or other sources aside from earnings.

Noninterviews, Nonresponses, and Allocations

In the March 1988 CPS, no interview was obtained for approximately 4 percent of the 60,000 households in the sample. No interview was obtained at these households during the enumeration week for reasons such as "no one home," "temporarily absent," or "refusals." In order to account for these households, the weights assigned to households in which interviews were obtained have been increased slightly. This "noninterview" adjustment procedure adjusts the weights of sample households by race of householder and within a specified set of geographical restrictions.

The nonresponse problem, which is sometimes referred to as "item nonresponse," is a serious problem in most household surveys and is especially troublesome for income. Even though an interview is obtained in many cases, complete information for all of the income questions is not available, unknown or refused. In March 1988, the income data were incomplete for about 27 percent of the persons 15 years old and over. About 32 percent of the families had one or more members with incomplete income information. In order that the maximum amount of information can be utilized, missing income items are imputed or allocated by values which are obtained from active respondents with similar economic and demographic characteristics.

Questionnaire Wording and Procedures

Modifications in collecting income data in the March 1979 Current Population Survey. As part of the March 1979 CPS, the Bureau conducted an experiment in an effort to improve the reporting of income data. An alternative questionnaire was used on three of the eight rotation groups. The experimental questionnaire used more probing questions and inquired about more detailed sources of income. The results of the experiment and its subsequent impact on the estimates are discussed in the Current Population Reports, Series P-60, No.123, page 12.

Modifications in collecting income data in the March 1980 Current Population Survey. A modified version of the experimental questionnaire which was tested on three-eighths of the March 1979 sample was used for the full sample in March 1980. The experimental questionnaire contained a number of modifications designed to improve income reporting. For further discussion, see the section, "Modifications to the March 1980 CPS" presented earlier.

Definition of the Income Universe

Starting in the March 1980 CPS, a decision was made to restrict the universe for presenting income data to persons 15 years old and over instead of 14 years old and over. This change was made to establish consistency between the results from the March 1980 CPS and the 1980 Census of Population. Although income data were collected for persons 14 years old and over, the income of the 14-year-olds was not used for processing and tabulation purposes.

The March 1980 CPS also incorporated the use of the "householder" concept rather than the traditional "head" concept. Under the new procedure, the householder is the first adult household member listed on the questionnaire. The instructions call for listing first the person (or one of the persons) in whose name the home is owned or rented.

Another change made in the March 1980 CPS was the exclusion of secondary families (now called unrelated subfamilies) from the count of all families. This modification was required because of the introduction of the householder concept, since unrelated subfamilies do not have a householder. For more discussion on all of these changes, see the section, "Modifications to the March 1980 CPS," Current Population Reports, Series P-60, No. 129.

UNDERREPORTING OF INCOME

As in most household surveys, the estimated total amount of income received by persons derived from the March CPS is somewhat less than estimated amounts derived from independent sources, such as the Bureau of Economic Analysis, the Social Security Administration, and the Veterans Administration. The difference between the survey estimate and the independent estimate is termed "underreporting."

In order to estimate the magnitude of underreporting on the CPS, estimates of aggregate money income are made from independent sources (for each income source) by adjusting aggregate income figures from these sources to CPS money income concepts. One of the more important adjustments is the exclusion of "nonmoney" income amounts such as pay to employees in the form of food or lodging or imputed rent of owner-occupied housing from aggregate personal income figures obtained from BEA. A publication covering the general topic of income underreporting is *The Distribution of Personal Income, A Study of Statistics on the Size Distribution of Personal Income in the United States,* prepared by T. Paul Schultz for use by the Subcommittee on Economic Statistics of the Joint Economic Committee, Congress of the United States, 1964. For more details regarding the procedures for developing independent estimates of aggregate income, see "Appraisal of Basic Data Available for Constructing Income Size Distributions" by Selma F. Goldsmith, published in *Studies in Income and Wealth,* Volume 13, National Bureau of Economic Research, 1951; and "Size Distribution of Family Personal Income: Methodology and Estimates for 1964," by Edward C. Budd, Daniel B. Radner, and John C. Hinrichs, Bureau of Economic Analysis, BEA-SP 73-021, June 1973.

Because of the difficulty in obtaining reliable independent estimates of aggregate income for some individual sources of income collected in the CPS, the independent estimates shown in table A-2 do not include figures for (1) estates or trusts, (2) alimony and child support, (3) contributions from persons not living in the household, (4) general assistance, and (5) the "anything else" category. Independent estimates of aggregate nonfarm and farm self-employment income are based on the BEA personal income series even though they pose some troublesome conceptual problems. It should also be kept in mind that the independent estimates are, themselves, subject to errors and conceptual differences for which no adequate adjustment is possible.

The data in table A-2 show comparisons of CPS aggregate money income in 1983 with independent estimates. Comparisons of the 1984 CPS estimates with the independent totals reveal that overall income in the survey after allocation is underreported by about 10 percent. However, wide variations are found in the amount of underreporting by source of income. Underreporting varied from about 45 percent for interest income to only about 1 percent for wage and salary income. Both reported and allocated proportions of CPS aggregate incomes are shown in table A-2.

In 1983, $442.2 billion, or about 20 percent of the total aggregate income was allocated as a result of nonresponses to the income questions. About 13 percent of the $10.5 billion of the CPS public assistance or welfare income in 1983 was allocated, while about 33 percent of the $119.8 billion of nonfarm self-employment income was allocated. Other sources of income with allocated proportions of 30 percent or above include interest and dividends.

The reasons for underreporting of income in the 1987 CPS and in other household surveys are many and varied. Some of the more important of these reasons include (1) respondent's overlooking income received (especially small amounts not regularly received), (2) reluctance to reveal the receipt of certain income types,

(3) reporting rounded amounts, (4) misunderstanding the questions, (5) lack of information especially covering family members not present during the interview, (6) interviewer's errors in recording information on the questionnaire, (7) biases in the allocation of nonresponses, and (8) errors resulting from the aggregation of the information collected from individual questionnaires.

For more details on income underreporting in censuses and surveys, see (1) *Income Distribution in the United States* (a 1960 Census Monograph), by Herman P. Miller, Bureau of the Census, 1966; (2) *The Structure of Income,* by Irving B. Kravis, University of Pennsylvania, 1962; and (3) "Size Distribution of Family Personal Income: Methodology and Estimates for 1964," cited earlier in this section.

Table A-2. Comparison of CPS Aggregate Money Income Concepts in 1983 With Independent Estimates of Aggregate Money Income Adjusted to CPS Money Income Concepts, by Type of Income and Reported and Allocated CPS Amounts: 1983

Source of Income	Independent source		CPS					
			Total		Reported		Allocated	
	Millions of dollars	Percent distribution	Millions of dollars	Percent distribution	Millions of dollars	Percent distribution	Millions of dollars	Percent distribution
Total income	(NA)	(X)	2,201.2	(X)	1,759.0	(X)	442.2	(X)

Appendix B. Source and Reliability of Estimates

SOURCE OF DATA

Most estimates in this report came from data obtained in March of years 1960 through 1988 in the Current Population Survey (CPS). The Bureau of the Census conducts the survey every month, although this report uses mostly March data for its estimates. Also, some estimates came from 1960 decennial census data. The March survey uses two sets of questions, the basic CPS and the supplements.

Basic CPS. The basic CPS collects primarily labor force data about the civilian noninstitutional population. Interviewers ask questions concerning labor force participation about each member 14 years old and over in every sample household.

The present CPS sample was selected from the 1980 decennial census files with coverage in all 50 States and the District of Columbia. The sample is continually updated to account for new residential construction. It is located in 729 areas comprising 1,973 counties, independent cities, and minor civil divisions in the Nation. About 59,500 occupied households are eligible for interview every month. Interviewers are unable to obtain interviews at about 2,500 of these units because the occupants were not home after repeated calls or were unavailable for some other reason.

Since the introduction of the CPS, the Bureau of the Census has redesigned the CPS sample several times to improve the quality and reliability of the data and to satisfy changing data needs. The most recent changes were completely implemented in July 1985.

The following table summarizes changes in the CPS designs for the years for which data appear in this report.

March supplement. In addition to the basic CPS questions, interviewers asked supplementary questions in March about money income received the previous calendar year. Also, in order to obtain more reliable data for the Hispanic origin population, the March CPS sample was increased by about 2,500 eligible housing units, interviewed the previous November, that contained at least one sample person of Hispanic origin. In addition, the sample included persons in the Armed Forces living off post or with their families on post.

Description of the Current Population Survey

Time period	Number of sample areas[1]	Housing units eligible[2]	
		Inter viewed	Not inter-viewed
1986 to 1988	[1]729	57,000	2,500
1985	[3]629/729	57,000	2,500
1982 to 1984	629	59,000	2,500
1980 to 1981	629	65,500	3,000
1977 to 1979	614	55,000	3,000
1973 to 1976	461	46,500	2,500
1972	449	45,000	2,000
1967 to 1971	449	48,000	2,000
1963 to 1966[4]	357	33,500	1,500
1960 to 1962	[5]333	33,500	1,500
1957 to 1959	330	33,500	1,500
1954 to 1956	230	21,000	500–1,000
1948 to 1953	68	21,000	500–1,000

[1]Beginning in May 1956, these areas were chosen to provide coverage in each State and the District of Columbia.

[2]Does not include the about 2,500 Hispanic households added from the previous November sample (See "March Supplement.")

[3]The CPS was redesigned following the 1980 decennial census of Population and Housing. During phase-in of the new design, housing units from the new and old designs were in the sample.

[4]Before 1966, income data were collected from about 75 percent of occupied households in CPS.

[5]Three sample areas were added in 1960 to represent Alaska and Hawaii after statehood.

Estimation procedure. This survey's estimation procedure employs the inflation of weighted sample results to independent estimates of the civilian noninstitutional population of the United States by age, sex, race, and Hispanic/non-Hispanic categories. The independent estimates were based on statistics from decennial censuses of population; statistics on births, deaths, immigration and emigration; and statistics on strength of the Armed Forces. The independent population estimates used for 1980 (March 1981 CPS) to present were based on updates to controls established by the 1980 decennial census. Data previous to 1980 were based on independent population estimates from the most recent decennial census. For more details on the change in independent estimates, see the section entitled "Introduction of 1980 Census Population Controls" in an earlier report (Series P-60, No. 133). Also, one should note that the estimation procedure for data from the March supplement involved a further adjustment so husband and wife of a household received the same weight.

The estimates in this report for 1983 through 1987 also employ a revised survey weighting procedure for persons of Hispanic origin. In previous years, estimation

involved the inflation of weighted sample results to independent estimates of the noninstitutional population by age, sex, and race. There was no specific control of the survey estimates for the Hispanic population. Since then, the Bureau of the Census developed independent population controls for the Hispanic population by sex and detailed age groups. Revised weighting procedures incorporate these new controls. The independent population estimates include some, but not all, illegal immigrants.

RELIABILITY OF ESTIMATES

Since the CPS estimates come from a sample, they may differ from figures from a complete census using the same questionnaires, instructions, and enumerators. A sample survey estimate has two possible types of error: nonsampling and sampling. The accuracy of an estimate depends on both types of error, but the full extent of the nonsampling error is unknown. Consequently, one should be particularly careful when interpreting results based on a relatively small number of cases or on small differences between estimates. The standard errors for CPS estimates primarily indicate the magnitude of sampling error. They also partially measure the effect of some nonsampling errors in responses and enumeration, but do not measure systematic biases in the data. (Bias is the average over all possible samples of the differences between the sample estimates and the desired value.)

Nonsampling variability. Nonsampling errors can be attributed to many sources. These sources include the inability to obtain information about all cases in the sample, definitional difficulties, differences in the interpretation of questions, inability or unwillingness on the part of respondents to provide correct information, inability to recall information, errors made in data collection such as in recording or coding the data, errors made in processing the data, errors made in estimating values for missing data, and failure to represent all units with the sample (undercoverage).

CPS undercoverage results from missed housing units and missed persons within sample households. Compared to the level of the 1980 decennial census, overall CPS undercoverage is about 7 percent. CPS undercoverage varies with age, sex, and race. Generally, undercoverage is larger for males than for females and larger for Blacks and other races combined than for Whites. As described previously, ratio estimation to independent age-sex-race-Hispanic population controls partially corrects for the bias due to undercoverage. However, biases exist in the estimates to the extent that missed persons in missed households or missed persons in interviewed households have different characteristics from those of interviewed persons in the same age-sex-race-Hispanic group. Furthermore, the independent population controls have not been adjusted for undercoverage in the 1980 census.

In most cases, the questionnaire entries for income depend on the memory or knowledge of one person, usually the wife. The memory factor in data derived from field surveys of income probably produces underestimates because the tendency is to forget minor or irregular sources of income. Other errors of reporting are due to misrepresentation or to misunderstanding of the scope of the income concept. See the section entitled "Underreporting of Income."

For additional information on nonsampling error including the possible impact on CPS data when known, refer to Statistical Policy Working Paper 3, *An Error Profile: Employment as Measured by the Current Population Survey,* Office of Federal Statistical Policy and Standards, U.S. Department of Commerce, 1978 and Technical Paper 40, *The Current Population Survey: Design and Methodology,* Bureau of the Census, U.S. Department of Commerce.

Sampling variability. Sampling variability is variation that occurred by chance because a sample was surveyed rather than the entire population. Standard errors, as calculated by methods described in the section, "Standard errors and their use," are primarily measures of sampling variability, although they may include some nonsampling error. The sample estimate and its standard error enable one to construct a confidence interval, a range that would include the average result of all possible samples with a known probability. For example, if all possible samples were surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.

A particular confidence may or may not contain the average estimate derived from all possible samples. However, one can say with specified confidence that the interval includes the average estimate calculated from all possible samples.

Some statements in the report may contain estimates followed by a number in parentheses. This number can be added to and subtracted from the estimate to calculate upper and lower bounds of the 90-percent confidence interval. For example, if a statement contains the phrase "grew by 1.7 percent ($\pm$1.0)," the 90-percent confidence interval for the estimate, 1.7 percent, is 0.7 percent to 2.7 percent.

Standard errors may also be used to perform hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common type of hypothesis appearing in this

report is that the population parameters are different. An example of this would be comparing the median annual income of Black families to the median annual income of White families.

Tests may be performed at various levels of significance, where a significance level is the probability of concluding that the characteristics are different when, in fact, they are the same. All statements of comparison in the text have passed a hypothesis test at the 0.10 level of significance or better. This means that the absolute value of the estimated difference between characteristics is greater than or equal to 1.6 times the standard error of the difference.

Comparability of data. Data obtained from the CPS and other sources are not entirely comparable. This results from differences in interviewer training and experience and in differing survey processes. This is an example of nonsampling variability not reflected in the standard errors. Therefore, one should use caution when comparing results from different sources.

Caution should also be used when comparing estimates in this report, which reflect 1980 census-based population controls, with estimates for 1979 (from March 1980 CPS) and earlier years, which reflect 1970 census-based population controls. This change in population controls had relatively little impact on summary measures such as means, medians, and percent distributions, but did have a significant impact on levels. For example, use of 1980 based population controls results in about a 2-percent increase in the civilian noninstitutional population and in the number of families and households. Thus, estimates of levels for data collected in 1981 and later years will differ from those for earlier years by more than what could be attributed to actual changes in the population. These differences could be disproportionately greater for certain subpopulation groups than for the total population.

Since no independent population control totals for persons of Hispanic origin were used before 1983, take care comparing Hispanic estimates over time.

A number of changes were made in data collection and estimation procedures beginning with the March 1980 CPS. The major changes were the use of a more detailed income questionnaire, the use of the householder concept instead of the traditional household head, the introduction of the new farm definition, and use of more detailed income intervals in the upper range of the income distribution. Due to these and other changes, one should use caution when comparing estimates for 1979 through 1987 with estimates for earlier years. The section "Modifications to the March 1980 CPS" of an earlier report (Series P-60, No. 129) contains a description of these changes and their effect on the data.

Another major change is that income estimates for 1985 are the first based entirely on households selected from the 1980 census-based sample design. Estimates by type of residence category such as metropolitan, nonmetropolitan, farm and nonfarm, which were omitted from the 1984 report because of the mixed 1970 and 1980 census sampling frame used for the March 1985 CPS, have been resumed. The residence categories reflect metropolitan areas defined as of June 1984. In addition, the Bureau of the Census revised the March 1986 supplement questionnaire to enable the coding of higher amounts of earnings. A description of the effect of coding higher earnings amounts can be found in an earlier report (Series P-60, No. 156).

Note when using small estimates. Summary measures (such as medians and percent distributions) are shown only when the base is 75,000 or greater. Because of the large standard errors involved, summary measures would probably not reveal useful information when computed on a smaller base. However, estimated numbers are shown even though the relative standard errors of these numbers are larger than those for corresponding percentages. These smaller estimates permit combinations of the categories to suit data users' needs. Take care in the interpretation of small differences. For instance, even a small amount of nonsampling error can cause a borderline difference to appear significant or not, thus distorting a seemingly valid hypothesis test.

Estimation of median incomes. The methodology for computing median income has changed over the past few years. Estimates have been computed using either Pareto interpolation or linear interpolation. Pareto interpolation assumes a decreasing density of population within an income interval, whereas linear interpolation assumes a constant density of population within an income interval. Estimates of median income for 1979 through 1987 and associated standard errors have been calculated using Pareto interpolation if the estimate is larger than $20,000 for persons or $40,000 for families and households, where the width of the income interval containing the estimate is greater than $2,500. Estimates of median income for 1976, 1977, and 1978 and associated standard errors were calculated using Pareto interpolation if the estimate was larger than $12,000 for persons or $18,000 for families and households, where the width of the income interval containing the estimate is greater than $1,000. All other estimates of median income and associated standard errors for 1976 through 1987 and almost all of the estimates of median income and associated standard errors for 1975 and earlier were calculated using linear interpolation. Thus, exercise caution when comparing median incomes above $12,000 for persons or $18,000 for families and households for different years. Median incomes below those levels are more comparable from year to year since they have always been calculated using linear

interpolation. For an indication of the comparability of medians calculated using Pareto interpolation with medians calculated using linear interpolation, see Series P-60, No. 114.

Standard error tables and their use. A number of approximations are required to derive, at a moderate cost, standard errors applicable to many estimates. Therefore, instead of providing an individual standard error for each estimate, generalized sets of standard errors are provided for various types of characteristics. Thus, the tables show levels of magnitude of standard errors rather than the precise standard errors.

The figures presented in table B-1 provide approximations to the standard errors of estimated numbers of persons, households, families, and unrelated individuals by income for total or White, Black, and Hispanic. Tables B-2 and B-3 contain approximations to standard errors of estimated percentages of persons, households, families, and unrelated individuals by income for Total or White, Black, and Hispanic.

Table B-4 presents factors (f_2) to adjust standard errors for estimates from 1984 and earlier. Calculate the standard error by the methods described in the following sections and multiply the result by the factor for the appropriate time period.

To obtain the approximate standard error for a specific characteristic, multiply the appropriate standard error in tables B-1 thru B-3 by the factor (f_1) for that characteristic. This factor is given in table B-5. The factor adjusts the generalized standard error for the combined effect of the sample design and the estimating procedure on the value of the characteristic.

The figures presented in table B-6 are the year-to-year correlation coefficients for income estimates of persons or families, households, and unrelated individuals by race.

Standard errors for intermediate values not shown in the generalized tables of standard errors (B-1 through B-3) may be approximated by linear interpolation.

Two parameters, a and b, can be used to calculate standard errors for the major characteristics in this report. They are presented in table B-5. These parameters were used to calculate the standard errors in tables B-1 thru B-3, and to calculate the f1 factors in table B-5. They also may be used directly to calculate the standard errors for estimated numbers and percentages. The following sections give methods for computation.

Data from the 1960 decennial census 1-in-1,000 sample. Estimate standard errors for data based on the 1960 Census 1-in-1,000 sample by applying the appropriate factor in table B-4 to the standard errors.

Standard errors of estimated numbers. There are two ways to compute the approximate standard error, S_x, of an estimated number shown in this report. The first uses the formula

$$S_x = f_1 s \qquad (1)$$

where f_1 is a factor from table B-5 and s is the standard error of the estimate obtained by interpolation from Table B-1. The second method uses formula (2), from which the standard errors were calculated in table B-1. This formula will provide more accurate results than formula (1) above.

$$S_x = \sqrt{ax^2 + bx} \qquad (2)$$

Here x is the size of the estimate and a and b are the parameters in table B-5 associated with the particular type of characteristic. When calculating standard errors

Table B-1. Standard Errors of Estimated Numbers of Persons, Households, Families, and Unrelated Individuals, by Race: 1987

(Numbers in thousands)

Size of estimate	Persons		Households, families, and unrelated individuals	
	Total or White	Black and/or other races	Total or White	Black and/or other races
75	12	13	12	12
100	14	15	14	14
250	23	24	22	23
500	32	34	31	32
1,000	45	48	43	45
3,000	78	81	75	75
5,000	101	101	96	94
10,000	141	131	135	122
25,000	215	132	202	124
50,000	285	(X)	273	(X)
100,000	343	(X)	331	(X)
150,000	330	(X)	323	(X)

(X) Not applicable.

Note: To estimate the standard errors for a specific characteristic, multiply the above standard errors by the appropriate factor in table B-5.To estimate non-Hispanic standard errors, multiply by the appropriate factor in table B-4. Regional factors to be used to adjust the standard errors are 0.94, 0.95, 0.94, and 0.90 for the Northeast, Midwest, South, and West, respectively.

Table B-1A. Standard Errors of Estimated Numbers of Persons, Households, Families, and Unrelated Individuals, by Hispanic Origin: 1973-87

(Numbers in thousands)

Size of estimate	Persons			Households, families, and unrelated individuals		
	1973-82	1983-84	1985-87	1973-82	1983-84	1985-87
75	15	16	13	13	14	12
100	17	18	15	16	16	14
250	27	29	24	25	26	23
500	39	41	34	35	36	32
1,000	55	56	47	49	50	44
3,000	94	87	77	84	77	71
5,000	120	98	93	108	87	85
10,000	167	66	103	151	59	93
15,000	201	(X)	77	182	(X)	61
25,000	250	(X)	(X)	227	(X)	(X)

(X) Not applicable.

Note: To estimate the standard errors for a specific characteristic, multiply the above standard errors by the appropriate factor in table B-5. To estimate non-Hispanic standard errors, multiply by the appropriate factor in Table B-4.

Regional factors to be used to adjust the standard errors are 0.94, 0.95, 0.94 and 0.90 for the Northeast, Midwest, South, and West, respectively.

for numbers from cross-tabulations involving different characteristics, use the factor or set of parameters for the characteristic which will give the largest standard error.

Illustration of the computation of the standard error of an estimated number. Table 6 shows in 1987 there were 65,133,000 family households in the United States. Using formula (2) with a = -0.000010 and b = 1,778 from table B-5, the approximate standard error is:

$$\sqrt{(-0.000010)(65{,}133{,}000)2 + (1{,}778)(65{,}133{,}000)} = 271{,}000^{1}$$

This means that a 90-percent confidence interval for the number of family households in the United States in 1987 is from 64,699,000 to 65,567,000, i.e., 65,133,000 ± 1.6 (271,000).

Standard errors of estimated percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends on both the size of the percentage and the base of the percentage. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the factor or parameter from table B-5 indicated by the numerator. The approximate standard error, $S_{x,p}$, of an estimated percentage can be obtained by use of the formula

$$S_{(x,p)} = f_1 s \qquad (3)$$

In this formula, f_1 is the appropriate factor from table B-5, and s is the standard error of the estimate obtained by interpolation from table B-2 or B-3.

Alternatively, formula (4) will provide more accurate results than formula (3) above.

$$S_{(x,p)} = \sqrt{\frac{b}{x} p\,(100\text{-}p)} \qquad (4)$$

Here x is the size of the subclass of persons, families, households, or unrelated individuals which is the base of the percentage, p is the percentage ($0 < p < 100$) and b is the parameter in table B-5 associated with the characteristic in the numerator of the percentage.

Illustration of the computation of the standard error of a percentage. Table 1 shows that 10,608,000 or 16.3 percent of all family households were female householders with no husband present. Using formula (4) with b = 1,778 from table B-5, the approximate standard error on an estimate of 16.3 percent is

$$\sqrt{\frac{1{,}778}{65{,}133{,}000}(16.3)(83.7)} = 0.2 \text{ percent}^{2}$$

This means that a 90-percent confidence interval for female householders with no husband present is from 16.0 to 16.6, i.e., 16.3 ± 1.6 (0.2).

Standard error of a difference. The standard error formula of the difference between two sample estimates is approximately equal to

$$S_{(x\text{-}y)} = \sqrt{S_x^2 + S_y^2 - 2r\,S_x S_y} \qquad (5)$$

[1]Using formula (1) and table B-1 with f_1 = 1.0, the approximate standard error is 298,000.

[2]Using formula (3) and table B-2 with f_1 = 1.0, the approximate standard error is 0.2.

Table B-2. Standard errors of Estimated Percentages of Persons, Households, Families, and Unrelated Individuals, by Race: 1987

Base of estimated percentage (thousands)	Estimated percentage									
	2 or 98 percent		5 or 95 percent		10 or 90 percent		25 or 75 percent		50 percent	
	Person	Family	Person	Family	Person	Family	Person	Family	Person	Family

10,000	0.2	0.2	0.3	0.3	0.5	0.4	0.7	0.6	0.8	0.7
25,000	0.14	0.13	0.2	0.2	0.3	0.3	0.4	0.4	0.5	0.5
50,000	0.10	0.09	0.15	0.14	0.2	0.2	0.3	0.3	0.3	0.3
100,000	0.07	0.06	0.11	0.10	0.15	0.14	0.2	0.2	0.2	0.2
150,000	0.06	0.05	0.09	0.08	0.12	0.11	0.17	0.16	0.2	0.2

Note: To estimate the standard errors for a specific characteristic, multiply the above standard errors by the appropriate factor in table B-5. To estimate standard errors for estimates prior to 1985, multiply the above standard errors by the appropriate factor in table B-4.

Regional factors to be used to adjust the standard errors are 0.94, 0.95, 0.94 and 0.90 for the Northeast, Midwest, South, and West, respectively.

where s_x and s_y are the standard errors of the estimates, x and y. The estimates can be numbers, percents, ratios, etc. The correlation coefficient, r, can be determined from table B-6 for year-to-year comparisons of income estimates, numbers, or proportions; for other comparisons assume that r equals zero. Making this assumption will result in accurate estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. However, if there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

Illustration of the computation of the standard error of a difference. From table 27 the median income of all males in 1987 was $17,752 and the median income of all females in 1987 was $8,101. The apparent difference is $9,651. The estimates in dollars of the standard errors of these medians are $123 and $53, respectively.

Therefore, using formula (5) with r = 0.0 (the difference occurs within the same year), the standard error of the estimated difference of $9,651 is about

$$\sqrt{(123)^2 + (53)^2 - 2(0.0)(123)(53)} = 134.$$

This means that the 90-percent confidence interval around the $9,651 difference is from $9,517 to $9,785, i.e., $9,651 ± 1.6 ($134). Therefore a conclusion that the average estimate of the difference derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all possible samples. Since the interval does not contain zero, we can conclude with 90-percent confidence that the median income of all males in 1987 is different from the median income of all females in 1987.

Standard error of a median. The sampling variability of an estimated median depends on the form of the distribution and the size of the base. One can approximate the reliability of an estimated median by determining a confidence interval about it. (See the section on sampling variability for a general discussion of confidence intervals.)

Estimate the 68-percent confidence limits of a median based on sample data using the following procedure.

1. Determine, using formula (4), the standard error of the estimate of 50 percent from the distribution.

2. Add to and subtract from 50 percent the standard error determined in step (1).

Table B-3. Standard Errors of Estimated Percentages of Persons, Households, Families, and Unrelated Individuals, by Hispanic Origin: 1987

15,000	0.18	0.16	0.3	0.3	0.4	0.4	0.5	0.5	0.6	0.6

Note: To estimate the standard errors for a specific characteristic, multiply the above standard errors by the appropriate factor in table B-5. Regional factors to be used to adjust the standard errors are 0.94, 0.95, 0.94 and 0.90 for the Northeast, Midwest, South, and West, respectively.

3. Using the distribution of the characteristic, determine upper and lower limits of the 68-percent confidence interval by calculating values corresponding to the two points established in step (2).

The formulas used to implement step (3) for Pareto or linear interpolation are:

Pareto:

$$X_{pN} = \exp\left[\frac{\text{Ln}\,(pN/N_1)}{\text{Ln}\,(N_2/N_1)}\,\text{Ln}\,(A_2/A_1)\right] A_1 \qquad (6)$$

Linear:

$$X_{pN} = \frac{pN-N_1}{N_2 - N_1}(A_2 - A_1) + A_1 \qquad (7)$$

where

X_{pN} = estimated upper and lower bounds for the confidence interval ($0 < p < 1$). For purposes of calculating the confidence interval, p takes on the values determined in step (2). Note that X_{pN} estimates the median when $p = 0.50$.

N = for *distribution of numbers:* the total number of units (persons, households, etc.) for the characteristic in the distribution.

= *for distribution of percents:* the value 1.0.

p = the values obtained in step (2).

A_1, A_2 = the lower and upper bounds, respectively, on the data interval in which the median falls.

N_1, N_2 = for distribution of numbers: the estimated number of units (persons, households, etc.) with values of the characteristic greater than or equal to A_1 and A_2, respectively.

= for distribution of percents: the estimated

[1]Income data for persons of Hispanic origin were not published before 1973 due to the reliability of the estimates.
[2]For Hispanic prior to 1985, all references to 15-year-olds are treated as 14-year-olds.
[3]The a and b parameters should be multiplied by 1.5 for nonmetropolitan residence categories.
[4]To obtain nonincome standard errors prior to 1973 for total or White and Black and/or other races, see earlier reports.
Note: To estimate non-Hispanic standard errors, multiply by the appropriate factor in table B-4. Regional factors to be used to adjust the a and b parameters are 0.88, 0.91, 0.89, and 0.81 for the Northeast, Midwest, South, and West, respectively.

percent of units (persons, households, etc.) having values of the characteristic greater than or equal to A_1 and A_2, respectively.

exp is the exponential function.

Ln is the natural logarithm function.

A mathematically equivalent result is obtained by using common logarithms (base 10) and antilogarithms.

4. Divide the difference between the two points determined in step (3) by two to obtain the standard error of the median. For calculations of the confidence interval in step (3), use Pareto interpolation for any point in an income interval greater than $2,500 in width, and linear interpolation otherwise.

Since the new, more detailed income intervals used in this report have $2,500 increments up to $40,000 for households and families and up to $20,000 for persons, and since Pareto interpolation will only be used when a median income falls in an interval of width larger than $2,500 (beginning with March 1980 CPS), this type of interpolation will seldom be needed (i.e., only in cases where the estimated median income exceeds $40,000 for households and families and $20,000 for persons). For this reason, illustration of the use of Pareto interpolation in computing a confidence interval for a median has been omitted. An illustration of this procedure can be found in the source and reliability section of Current Population Reports, Series P-60, No. 123.

Use of the above procedure could result in standard errors which differ from those given in the detailed tables. The reasons for this discrepancy are the use of

Table B-6. Year-to-Year Correlation Coefficients for Income Characteristics: 1959-87

Characteristic	Families, households, and unrelated individuals	Persons
Total, White, Black, and/or other races	0.35	0.30
Hispanic Origin	0.55	0.45

Note: These correlations are for comparisons of consecutive years. For comparisons of nonconsecutive years, assume the correlations are zero.

a more detailed distribution than that given in the tables in determining the published standard errors, and the rounding of the numbers to 1,000's in the published tables. Linear interpolation was almost always used to compute the published medians and standard errors. Note that when combining distributions the resulting median may lie in an open-ended interval. To calculate its standard error, call Housing and Household Economic Statistics Division of the Census Bureau to obtain the methodology.

Illustration of the computation of a confidence interval for a median. In table 16 the median income for families was $30,853 in 1987. The size, or base, of the distribution for this median was 65,133,000 families.

1. Using formula (4) with b = 1,896, the standard error of 50 percent on a base of 65,133,000 is about 0.3 percent.

2. To obtain a 68-percent confidence interval on an estimated median, add to and subtract from 50 percent the standard error found in step (1). This yields percent limits of 49.7 and 50.3.

3. The lower and upper limits for the interval in which the median falls are $30,000 and $32,500, respectively (from table 16). Then, by addition, the estimated numbers of families with an income greater than or equal to $30,000 and $32,500 are 33,633,000 and 30,508,000, respectively.

   Using formula (7), the upper limit for the confidence interval of the median is found to be about

$$\frac{(0.497)(65{,}133{,}000) - 33{,}633{,}000}{30{,}508{,}000 - 33{,}633{,}000}(32{,}500 - 30{,}000) + 30{,}000 = 31{,}010$$

   Similarly, the lower limit is found to be about

$$\frac{(0.503)(65{,}133{,}000) - 33{,}633{,}000}{30{,}508{,}000 - 33{,}633{,}000}(32{,}500 - 30{,}000) + 30{,}000 = \$30{,}697$$

   Thus, a 68-percent confidence interval for the median income for families is from $30,697 to $31,010.

4. The standard error of the median is, therefore,

$$\frac{31{,}010 - 30{,}697}{2} = \$157$$

Standard error of a mean for grouped data. The formula used to estimate the standard error of a mean for grouped data is

$$S_x = \sqrt{\frac{b}{y} S^2} \qquad (8)$$

In this formula, y is the size of the base of the distribution and b is a parameter from table B-5. The variance, S^2, is given by the following formula:

$$S^2 = \sum_{i=1}^{c} p_i x_i^2 - x^2 \qquad (9)$$

where x, the mean of the distribution, is estimated by

$$x = \sum_{i=1}^{c} p_i x_i \qquad (10)$$

c = the number of groups; i indicates a specific group, thus taking on values 1 through c.

pi = the estimated proportion of households, families or persons whose values, for the characteristic (x-values) being considered, fall in group i.

x_i = $(Z_{i-1} + Z_i)/2$ where Z_{i-1} and Z_i are the lower and upper interval boundaries, respectively, for group i.

x_i is assumed to be the most representative value for the characteristic for households, families, and unrelated individuals or persons in group i. Group c is open-ended, i.e., no upper interval boundary exists. For this group the approximate average value is

$$x_c = \frac{3}{2} Z_{c-1} \qquad (11)$$

Standard error of a ratio. Certain values for persons in families or households are the ratio of two numbers. For example, the mean number of children per family with children is calculated as

$$\frac{x}{y} = \frac{\text{total number of children in families}}{\text{total number of families with children}}$$

Approximate standard errors for these means are shown below. There are two cases to consider. In either case, the denominator y represents a count of families or households of a certain class, and the numerator x represents a count of persons with the characteristic under consideration who are members of these families or households.

Case 1: There is at least one person having the characteristic in every family or household of the class: as an example, the mean number of persons per family or the mean number of children per family with children. For ratios of this kind, the standard errors are approximated by the following formula:

$$S_{x/y} = \frac{x}{y}\sqrt{\frac{S_x^2}{x} + \frac{S_y^2}{y} - 2r\frac{S_x S_y}{x\,y}} \qquad (12)$$

Obtain the standard error of the estimated number of families, s_y, and the standard error of the estimated number of persons with the characteristic in those

households, s_x, from formula (2). Alternatively, use formula (1) and table B-5. In formula (12), r represents the correlation coefficient between the numerator and the denominator of the estimate. In the above example, and for other ratios of this kind, use 0.7 as an estimate of r.

Case 2: The number of persons having the characteristic in a given family may be 0, 1, 2, 3, or more; for example, the mean number of children per family. For ratios of this kind the standard error is approximated by formula (12) but r is assumed to be zero. If r is actually positive (negative), then this procedure will provide an overestimate (underestimate) of the true standard error of the ratio.

NOTE: For estimates expressed as the ratio of x per 100y or x per 1,000y, formula (12) must be multiplied by 100 or 1,000, respectively, to obtain the standard error for Case 1 and Case 2.

Illustration of the computation of the standard error of a ratio. From table 20, the number of related children in families, x, was 62,305,000. The total number of all families, y, was 65,133,000. This means that the average number of children per family was 0.96. The standard error of this estimate (x/y) is calculated by using the following steps:

1. Compute s_x and s_y using formula (2).
   $S_x = \sqrt{(-0.000010)(62{,}305{,}000)^2 + (1{,}778)(62{,}305{,}000)} = 268{,}000$
   $S_y = \sqrt{(-0.000010)(65{,}133{,}000)^2 + (1{,}778)(65{,}133{,}000)} = 271{,}000$
2. Compute $(s_x/x)^2 = 0.000019$.
3. Compute $(s_y/y)^2 = 0.000017$.
4. Using formula (12) and Case 2 (r = 0), the estimate of the standard error is

$$S_{x/y} = \frac{62{,}305{,}000}{65{,}133{,}000}\sqrt{(0.000019 + 0.000017)} = 0.006$$

This means that the 90-percent confidence interval for the average number of children per family is from 0.95 to 0.97.

NUMBER OF ROOMS IN THIS UNIT

How many rooms are in this unit (count the kitchen but not the bathroom)?

1st	5th	1st	5th
1	0	5	0
2	0	6	0
3	0	7	0
4	0	8 or more	0

How many bedrooms are in this unit?

	1st	5th
None	0	0
1	0	0
2	0	0
3	0	0
4 or more	0	0

PLUMBING FACILITIES FOR THIS UNIT

Is there hot and cold piped water inside structure for this unit?

	1st	5th
Yes	0	0
No, only cold piped water	0	0
No piped water	0	0

Is there a flush toilet inside structure for this unit?

	1st	5th
Yes, for this unit only	0	0
Yes, but also used by a household in another unit	0	0
No flush toilet	0	0

Is there a bathtub or shower inside structure for this unit?

	1st	5th
Yes, for this unit only	0	0
Yes, but also used by a household in another unit	0	0
No bathtub or shower	0	0

FOR VACANT SEASONAL HOUSING UNITS AND FOR VACANT SEASONAL HOUSING UNITS FOR MIGRATORY WORKERS

Transcribe from CPS-1 item 17 first month unit is vacant. Transcribe from Control Card to CPS schedule item 17 in subsequent months unit is vacant during same 4-month period of enumeration. If unit is seasonally vacant in both the first and second 4-month periods of enumeration, repeat above procedure for second 4-month period of enumeration.

This unit is intended for occupancy:

	1st	5th
Summers only	0	0
Winters only	0	0
Other (Describe in notes)	0	0

(Transcribe to back of Control Card first time unit is vacant during a 4-month enumeration period.)

NOTES

INTRODUCTION
(Optional)

We have just completed the questions about employment and unemployment. Each March, the Census Bureau also collects information about the economic situation of Americans and their families for the previous year. I am going to ask these questions now. We don't expect all answers to be perfect, but please think about each question and answer it the best you can.

77. INTERVIEWER CHECK ITEM
TENURE *(from Control Card Item 10)*

Owned or being bought 1

34. INTERVIEWER CHECK ITEM
Number of weeks in item 33 is:
- 1–49 O *(Skip to 36)*
- 50–51 O *(Ask 35)*
- 52 O *(Skip to 39)*

35. Did . . . lose any full weeks of work in 1987 because he/she was on layoff from a job or lost a job?
Yes O No O *(Skip to 39)*

36. You said . . . worked about *(entry in Item 33)* **weeks in 1987. How many of the remaining** *(52 minus entry in Item 33)* **weeks was . . . looking for work or on layoff from a job?**
0 0, 1 1, 2 2, 3 3, 4 4, 5 5, 6, 7, 8, 9
(Mark weeks and ask 37) →
None O *(Skip to 38)*

39. For how many employers did . . . work in 1987? If more than one at same time, only count it as one employer.
1 O, 2 O, 3+ O *(Ask 40)*

40. In the weeks that . . . worked, how many hours did . . . usually work per week?
0 0, 1 1, 2 2, 3 3, 4 4, 5 5, 6 6, 7 7, 8 8, 9 9
(Mark hours) →
(Go to 41)

41. INTERVIEWER CHECK ITEM
Number of hours in item 40 is:
- 1–34 O *(Skip to 43)*
- 35+ O *(Ask 42)*

42. During 1987, were there one or more weeks in which . . . worked less than 35 hours? Exclude time off with pay because of holidays, vacation, days off, or sickness.
Yes O *(Ask 43)*
No O *(Skip to 45)*

43. How many weeks did . . . work less than 35 hours in 1987?
0 0, 1 1, 2 2, 3 3, 4 4, 5 5, 6, 7, 8, 9
(Mark weeks) →

44. What was the main reason . . . worked less than 35 hours per week?
- Could not find a full time job . . O
- Wanted to work part time or only able to work part time . . O
- Slack work or material shortage O
- Other . . . . . O

(Ask 45)

45. What was . . . 's longest job during 1987? *(Compare with entry in CPS-1 Item 23)*
- Same as item 23 . . . . . O *(Skip to 47)*
- Different from item 23 or item 23 blank . . . . O
- Current Armed Forces . . . . . O

(Specify in 46A-46E)

46A. For whom did . . . work?

46B. What kind of business or industry is this?

46C. What kind of work was . . . doing?

46D. What were . . . 's most important activities or duties?

46E. CLASS OF WORKER
- Private . . . . . P O
- Federal Gov't. F O
- State Gov't. . . S O
- Local Gov't. . . L O

(Ask 47)

Self-employment
- Inc. { Yes . . . . I O / No . . . . SE O }
- Without pay WP O

(Ask 47)

47. Counting all locations where this employer operates, what is the total number of persons who work for . . . 's employer? *(Read categories if necessary)*
- Under 25 O
- 25–99 O
- 100–499 O
- 500–999 O
- 1000+ O

(Ask 48A or 48B)

48A. How much did . . . earn from this employer before deductions during 1987?
0 0 0 0 0 0, 1 1 1 1 1 1, 2 2 2 2 2 2, 3 3 3 3 3, 4 4 4 4 4, 5 5 5 5 5, 6 6 6 6 6, 7 7 7 7 7, 8 8 8 8 8, 9 9 9 9 9
O Lost money

48B. What was . . . net earnings from this business/farm after expenses during 1987? $

48C. Does this amount include all tips, bonuses, overtime pay or commissions . . . may have received?
Yes O No O *(Probe and make corrections to 48A)*

49A. Did . . . earn money from any other work he/she did during 1987?
Yes O No O *(Skip to 50)*

49B. How much did . . . earn from:

All other employers?	His/her own business after expenses?	His/her farm after expenses?
