No. 340.—CIVIL SERVICE: Number of Positions, by Status, on July 1, 1913, Additions by Appointments, etc., and Subtractions by Separations, etc., During the Fiscal Year, and Number of Positions on June 30, 1914.

[Source: The Civil Service Commission.]

[This table is based upon the number of positions shown in the Official Register of 1903, and changes in the service since reported by the departments and offices. Some of the reports were not made in such manner as to permit of a definite distinction as to employment in Washington and elsewhere. The figures are therefore to be regarded as approximate only. Omissions to report certain changes, as explained in the detailed tables, and neglect of details necessary only for statistical purposes also contribute to making the figures approximate only.]

[1] These figures are furnished by the Post Office Department. The numbers in the columns headed "Additions by appointments, etc.," indicate net gains of appointments over separations.

[2] Presidential appointments under the heading "Miscellaneous, Interior," consist of the recorder of deeds, register of wills, inspector of gas and meters, and Superintendent of Capitol Building and Grounds. Under "Presidential, Justice," in Washington, are 16 department officers, 30 commissioners of deeds, 800 notaries, and 16 trustees of reform schools.

[3] The Presidential appointments under "Miscellaneous, Treasury," are revenue-cutter officers.

[4] The total number of positions is estimated at 20,000, of which about one-fifth are those of mere unskilled laborers. The number appointed was 8,659, and the figures are based on these data.

[5] These positions are in the Post Office Inspection Service; stamped-envelope agency at Dayton, Ohio; and the official-envelope agency at Cincinnati, Ohio. All figures pertaining to the Post Office Service are furnished by that department.

[6] The 8,650 positions in the Presidential column are those of postmasters.

[2] The civil-service rules prior to April, 1903, defined the Departmental Service as including all classified positions except those in the Post Office, Customhouse, Internal Revenue, and Government Printing Services. The majority of such positions is found in the field, not in the departments at Washington, but all former reports have shown them as "Departmental," following the civil-service rule referred to. In this report for the first time an effort has been made to limit "Departmental" to its original meaning, showing field-service examinations under a separate heading; hence the apparent great discrepancy in the "Departmental" figures as compared with those in previous reports.

[7] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

[8] Total specie in circulation; gold and silver were not separately stated prior to 1876. [9] Estimated.

[10] As the result of special investigation by the Director of the Mint a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of $9,700,000 was made in the estimate of silver coin.

[4] Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

[1] The statistics since 1913 represent the commerce of the districts named in the boxhead, as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914 the statistics given in this table for Massachusetts and Maryland were returned as for the (former) districts of Boston and Baltimore, respectively.

[2] Includes specie.

* Fiscal years. [1] Prior to 1875 the customs district of Texas.

[2] The statistics since 1913 represent the commerce of the districts named in the boxhead as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914, the statistics given in this table for Buffalo and Michigan were returned as for the (former) districts of Buffalo Creek and Detroit, respectively.

[3] Not separately stated.

[4] Includes specie.

†The production statistics are exclusive of linters and relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898.

[1] Cleaned rice; 1899 to 1903, commercial movement, as given by Dan Talmage's Sons Co.; 1904 to date, as reported by the Department of Agriculture.

[2] Commercial value. [3] Of 380 pounds net. [4] Gallons sold. [5] Exports.

[5] Excluding tonnage received from connecting roads and other carriers after 1898.
[6] Exclusive of fast freight line service.
[7] Overvalued by reason of depreciation of Brazilian paper milreis.
[8] Information for 1901 and 1902 relative to commerce between continental United States and noncontiguous customs districts in coffee and tea is somewhat fragmentary.
[9] Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.
[10] Figures for railroads exclude switching and terminal companies not segregated prior to 1908; also, in 1913, mileage of so-called small roads having operating revenues below $100,000 for the year.

[1] "Specie" includes subsidiary coin in banks.
[2] Estimates for the United Kingdom prior to 1910 were for coin only; these figures include $100,000,000 for bullion in banks.
[3] Based on estimate of active rupee circulation by Accountant General of India in 1908.
[4] Includes Straits Settlements, Malay States, and Johore.
[5] United States paper currency is legal tender and constitutes a considerable proportion of the circulation.
[6] Based upon a calculation by Messrs. P. Arminjon and B. Michel in 1908, who then estimated the stock of gold at 33,000,000 to 41,000,000 Egyptian pounds. The mean of these figures was adopted. Since then the net imports of Egypt, by customs records, have been $50,000,000, but the 1908 estimate has been changed only to the extent of the increase in bank holdings. It does not seem probable that Egypt can have absorbed the amount of gold indicated by the customs records.
[7] Estimate of A. De Foville, 1909.
[8] The figures for the stock of gold in Germany are based upon an estimate by Dr. Arnold, a director of the Reichsbank, of 3,000,000,000 marks in German coin in the country at the end of 1910. At the close of 1912 the Reichsbank held $80,284,892 in bullion and foreign coin.
[9] This paper currency has been reduced to a gold basis at 100 pesos to the United States dollar.
[10] Except Costa Rica and British Honduras (gold standard countries).

NOTE.—The blank spaces in this table signify that no satisfactory information is available. In some instances the amount of gold in banks and public treasuries is carried out as the total stock in the country, although an unknown amount is in circulation. The case of Italy is an example of this. The per capita circulation is based upon known amounts only. All estimates for stock of money in circulation must be accepted with reserve. No figures have been compiled for 1913.

Argentina.—Of the sterling debt given as per date Dec. 31, 1913, £61,796,322 represented ordinary issues, £28,136,230 special issues, and £45,327,069 "cedulas" of the National Mortgage Bank. The latter are certificates to bearer issued by the bank, in lieu of cash, to borrowers on real estate. They are guaranteed by the nation.

Australia.—The total revenue of the Commonwealth for the year was £21,740,423, of which £6,282,999 were paid over to the States. The combined State revenues are thus inclusive of the amount received from the Commonwealth treasury. On June 30, 1914, the amount of Commonwealth notes issued and unredeemed was £9,595,551 secured by gold and invested funds. The funded debt of the Commonwealth given as per date June 30, 1914, includes £4,100,000 of inscribed stock and South Australian debts transferred to the Commonwealth, viz., £3,359,891 on account of the Northern Territory and £1,935,431 on account of the Port Augusta-Oodnadatta Railway. The net debt of the States aggregated £271,422,328, there being various sinking funds on hand totaling £5,701,767.

New Zealand.—The revenues and expenditures stated were on account of the consolidated fund only. The expenditure from the public-works fund amounted to £2,760,798. The net amount of public debt on Mar. 31, 1914, was £91,689,835, there being various sinking funds on hand totaling £8,063,992.

Brazil.—The items under funded debt represent the consolidated debt, external and internal. The three items under unfunded debt represent, respectively: The external floating debt (treasury bonds amortizable in August); the interior floating debt; and paper money in circulation. The above debt is exclusive of "accounts payable by the Treasury," estimated at between 60,000 and 70,000 contos. At the end of 1913, the debts of the several States totaled 1,120,900 contos of reis, or $363,-657,323, while municipal debts amounted to 346,571 contos, or $112,439,170.

Bulgaria.—Against the total debt outstanding the Government holds assets amounting to 86,378,616 francs. The net debt therefore amounts to 828,407,367 francs.

The expenditures for railways, canals, and public works amounted to $37,180,175, railway subsidies to $19,036,236, and other charges to $143,652, making the total expenditures for the year equal to $183,744,535. The total gross debt of the Dominion on Mar. 31, 1914, stood at $544,391,000, against which the Government held assets amounting to $208,-394,000, including sinking funds to the amount of $9,144,-994. The net debt amounted to $335,996,850.

The unfunded debt includes permanent noninterest-bearing debt, temporary bills, savings banks and miscellaneous obligations, special loans, service funds, and departmental and judicial deposits.

Italy.—The funded debt, given as per date June 30, 1913, represents the consolidated and perpetual debt. On the above date the Treasury was reported to hold 1,337,166,543 lire of the public-debt securities, thus reducing the net debt outstanding to 13,798,338,651 lire.

Paraguay.—The figures of the debt, given as per date of Mar. 31, 1914, do not include the loan for £1,250,000, authorized by the law of Nov. 28, 1912, the contract for which was signed Jan. 30, 1914, though the service of this loan is included in the budget (£75,600). The unfunded debt includes 65,000,000 pesos of paper and nickel money in circulation. The paper peso is worth about 5.4 cents.

The unfunded debt includes £T14,723,198 of treasury bills outstanding and £T10,000,000 of short advances (estimated).
