STATISTICAL CLASSIFICATION OF DOMESTIC COMMODITIES AND FOREIGN COMMODITIES (REEXPORTS) EXPORTED FROM THE UNITED STATES
AND
REGULATIONS GOVERNING THE STATISTICAL RETURNS OF EXPORTS

(Abbreviations used in the following regulations are: Sec.—Section; T. D.—Treasury Decision; F.C.S.R.—Foreign Commerce Statistical Regulation: and F.C.S.D.—Foreign Commerce Statistical Decision)

DEPARTMENT OF COMMERCE
OFFICE OF THE SECRETARY
WASHINGTON, January 1, 1945.

To Exporters, Collectors of Customs, Postmasters, and Others Concerned:

Beginning with the 1st day of January, 1945, the annexed schedule will govern in the classification of domestic and foreign commodities exported from the United States to foreign countries and United States Territories and Possessions. (Shipments from the United States to the Territory of Alaska are classified according to a mimeographed schedule published separately (Schedule H).) Before shipments may leave this country, whether by rail, air, water, highway, or other method of transportation, the United States Government requires that specific information for statistical purposes be shown on a Shipper's Export Declaration, Commerce Form 7525-V or Commerce Form 7513[1], and that such declaration be filed by the shipper or his agent with a United States Collector of Customs at a port or border point of exit in the United States; or if shipped by parcel post, such declaration must be filed with the postmaster at the post office from which the merchandise is shipped.

Shipper's Export Declarations covering exportations to foreign ports must be filed prior to clearance. (Sections 30.30, 30.31, 30.33, 30.38, 30.39, F.C.S.R.)

1. *Penalty.*—The agent or employee of any railway or transportation company who shall transport any commodities into a foreign country by rail before delivering to the Collector of Customs the Shipper's Export Declarations covering the commodities transported as required by law shall be liable to a penalty of $50 for each offense. (Section 30.40, F.C.S.R., F.C.S.D.47.)

2. *Source of statistical information.*—The kinds, quantities and values of articles exported from the United States to foreign countries or shipped between the United States and its Territories and Possessions are compiled from the Shipper's Export Declarations, Commerce Form 7525, and all data required therein must be furnished in accordance with the instructions on the face of the form and its reverse side. (Section 30.7(a), F.C.S.R.) (F.C.S.D.33).

The contents of all copies of the Shipper's Export Declarations must be treated as confidential and may not be disclosed to others than the parties in interest by employees of the Customs Service, the Department of Commerce, and other United States Government Agencies without the written consent of the Secretary of Commerce. (Section 30.5(b), F.C.S.R.)

Collectors should impress upon exporters that the data in the Shipper's Export Declarations are the major source of information for compiling the statistics of exports published by the Bureau of the Census of this Department.

The Shipper's Export Declaration must be prepared by the shipper, owner, or his authorized agent, in triplicate for shipments by vessel or air, in duplicate for shipments by rail, car, ferry, or other vehicle, and in single copy for shipments by parcel post. If the Shipper's Export Declaration is prepared by an agent of the shipper, his authority to sign such declaration must be in the form of a properly executed power of attorney, signed by the owner, shipper or consignor, or in a less formal written authorization such as that printed on the Shipper's Export Declaration. The production of a power of attorney or authorization may be waived if the collector has personal knowledge that the person signing the declaration is authorized or is held out to the public by the shipper as his agent. In every event the data required in the Shipper's Export Declaration must be correct and be based on personal knowledge of the facts stated, or on invoices or information furnished by the principal. (Section 30.7(b), F.C.S.R.) (F.C.S.D.33.)

[1]Unless otherwise specified, regulations relating to Commerce Form 7525-V or 7513, also apply to the Defense Aid (Lend-Lease) Shipper's Export Declaration (Commerce Form 7525-DA-V and the Defense Aid (Lend-Lease) Shipper's Export Declaration for In-Transit Goods, Commerce Form 7513-DA, respectively).

3. *Types of Declarations.*

I. Shipper's Export Declaration, Commerce Form 7525-V[1], should be used for all shipments to foreign countries and to United States Territories and Possessions except those shipments for which Commerce Form 7513[1] is required. (See II, below) Form 7525-V[1] is to be used for both:

a. Domestic merchandise (merchandise which is the growth, produce, or manufacture of the United States, or imported merchandise which has been changed in condition in the United States, including merchandise withdrawn from bonded manufacturing warehouses for exportation and merchandise exported with benefit of drawback) and

b. Foreign merchandise (imported merchandise which has not been changed in condition in the United States, including merchandise withdrawn from bonded storage warehouses for exportation).

Commerce Form 7525-DA-V is to be used for shipments under the Defense Aid (Lend-Lease) program or under the auspices of the United Nations Relief and Rehabilitation Administration. Commerce Form 7525-V is to be used for shipments other than Lend-Lease or U.N.R.R.A. shipments.

II. Commerce Form 7513[1], Shipper's Export Declaration for In-Transit Goods should be used for all merchandise:

a. Shipped in transit through the United States.
b. Transshipped in ports of the United States for foreign countries.
c. Exported from General Order Warehouse.
d. Rejected and exported.
e. Exported from Foreign Trade Zones.

(Sections 30.29(a), 30.37(a) F.C.S.R.)

Commerce Form 7513-DA is to be used for shipments under the Defense Aid (Lend-Lease) program, or under the auspices of the United Nations Relief and Rehabilitation Administration. Commerce Form 7513 is to be used for shipments other than Lend-Lease or U.N.R.R.A. shipments.

Any Shipper's Export Declarations on Commerce Form 7525-V[1] filed by shippers for in-transit goods in addition to Commerce Form 7513[1] under a misunderstanding of the regulation, should not be forwarded to the Customs Statistics Section, Foreign Trade Division, Bureau of the Census, at New York. Collectors should make a careful check of the outward foreign vessel manifest and railroad car manifest for the purpose of detecting such duplication of declarations.

4. *Export License Regulations.*—At the present time, the exportation of many commodities from the United States are subject to export license requirements. For more detailed information exporters are referred to the Comprehensive Export Schedule, issued by the Foreign Economic Administration, Washington, D. C. Copies of this publication may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. The individual or general export license number must be shown on all copies of the Shipper's Export Declaration in accordance with the instructions shown on the face of the form.

5. *Preparation and accuracy of statistical information.*—Shipper's Export Declarations must be legible and must be prepared on typewriter or in ink. Collectors will require that the data therein be complete and be inserted in the spaces provided therefor on the declaration form. If upon examination, any export declarations are found to be inaccurate or incomplete, either in the description of articles, or in omitting to state proper quantities, and values, or insertion of the intermediate country instead of the country of final destination, or containing any error apparent on the face of the declaration, the correction thereof will be required before the declaration is accepted. (Section 30.15, F.C.S.R.)

[1]Unless otherwise specified, regulations relating to Commerce Form 7525-V or 7513, also apply to the Defense Aid (Lend-Lease) Shipper's Export Declaration (Commerce Form 7525-DA-V and the Defense Aid (Lend-Lease) Shipper's Export Declaration for In-Transit Goods, Commerce Form 7513-DA, respectively).

6. *Country of destination of exports.*—The place (city) and country of ultimate destination must be shown on the Shipper's Export Declaration. If the country of ultimate destination of the commodities exported is different from that for which the vessel, car or other vehicle clears or departs, collectors will require exporters and shippers or their agents to state in the Shipper's Export Declaration as the country of ultimate destination, the country to which the commodities are sold or destined for market. Special care should be taken to state the final destination of goods shipped through Canada to Europe and of goods shipped through Chile or Peru destined to Bolivia. (Section 30.11(a), F.C.S.R.)

For shipments by vessel, the foreign port and country of unlading must be shown on the Shipper's Export Declaration in addition to the country of ultimate destination. (Section 30.11(b) F.C.S.R.) (F.C.S.D.32.)

7. *Description of articles exported.*—The description of merchandise in export declarations must be stated in specific and not in general terms. Such designations as "fruits," "provisions," "groceries," "canned goods," "hardware," "machinery," or any other general term must not be used. The articles should be described in sufficient detail to permit of their classification under the proper classes of export Schedule B giving total quantity and value of each article, but omitting invoice details for different marks, sizes, and kinds of the same article. (Section 30.14(a), F.C.S.R.)

8. *Net quantities and gross shipping weights.*—The number of packages, boxes, barrels, bales, etc., must be specified, with quantities in the unit stated in this schedule, in net weight, exclusive of the weight of barrels, boxes, bottles, cans, cartons, jars, tubes and other immediate containers or other coverings, and of salt or pickle in the case of salted or pickled fish and meats. Tons, where required, should be given in long tons of 2,240 pounds, unless short tons of 2,000 pounds are specified. (Section 30.14(b), F.C.S.R.)

In addition to specifying the quantity in the units required by Schedule B, the gross shipping weight (in pounds) including the weight of all containers, must be stated on the Shipper's Export Declarations. (Section 30.14(c), F.C.S.R.)

In stating quantities, fractions of less than one-half will be ignored and fractions of one-half or over should be stated as a whole number. (Section 30.12, F.C.S.R.)

9. *Value of exports.*—Articles exported to foreign countries or shipped to United States Territories and Possessions shall be valued at their actual cost or the value which they may truly bear at the time of exportation of shipment in the ports of the United States from which they are exported or shipped, including the value of cartons, cases, crates, boxes, sacks, and coverings of any kind. (Section 30.9(a), F.C.S.R.)

The value stated should be the actual cost, or selling price if the goods are sold, including actual or estimated inland freight charges from the interior place of shipment to the seaport or border point of exportation. If shipped on consignment without a sale having been made, the market value at the time of exportation in the ports of the United States from which exported should be stated. (Section 30.9(b), F.C.S.R.)

Freight and other charges from the port of departure in the United States to the place of destination in the foreign country or noncontiguous territory to which shipped must *not* be included in the export value. (Section 30.9(c), F.C.S.R.)

When oils, other liquids, and compressed gases are shipped in steel drums, acids in carboys, and other goods in containers of high value as compared with the value of the contents, and the inclusion of the value of the containers with the value of the contents would raise the unit price of the commodity above the usual average price (when the value of these metal drums and containers represent a value of 20 percent or more of the total value of the container, plus contents), the exporter should show in the declaration the quantity and value of the containers separately from the quantity and value of the contents, showing in another item the total value of the commodity including containers.

Values should be stated in whole dollars, only, ignoring fractions of a dollar less than 50 cents and counting 50 cents and upward as $1. (Section 30.12, F.C.S.R.)

10. *Separation of domestic exports and exports of foreign merchandise.*—The export declaration must show foreign goods separately from goods of domestic production. Only those goods will be reported as foreign which have undergone no change in form or condition or enhancement in value by the application of labor in the United States. Articles made from foreign materials or changed from the condition in which imported by repacking, grinding, refining, or smelting will be classed as of domestic production or manufacture. (Section 30.8(a), F.C.S.R.)

The designation "D" for "domestic" and "F" for "foreign" must be shown in the appropriate column of the Shipper's Export Declaration.

Articles exported which are the growth, produce, or manufacture of the United States and articles of foreign origin which have been changed in form and enhanced in value by labor or manufacture in the United States are to be classed as domestic production or manufacture. (Section 30.8(b), F.C.S.R.)

Articles exported which had been previously imported, and which are the growth, produce, or manufacture of foreign countries, and are exported in the same condition in which imported, will be classified as foreign merchandise. (Section 30.8(c), F.C.S.R.).

11. *Mail exportations.*—Shipper's Export Declarations on Commerce Form 7525 are required for exports by mail valued at $25 and over, shipped by business concerns in the United States to business concerns outside continental United States. (F.C.S.D. 26.)

12. *In-transit shipments.*—Commodities which, on arriving in the United States, from a foreign country are shown by the manifest, bill of lading, or invoice to be destined to a foreign country and are entered for shipment in-transit through or for transshipment in the port of the United States will not be included in the statistics of exports from the United States, but will be returned in a special in-transit report. (See paragraph No. 3)

13. *Baggage.*—Shipper's Export Declarations are not required for personal effects or baggage of travelers, except for shipments requiring individual export control licenses. (Section 30.47, F.C.S.R.)

14. *Temporary exportations.*—Articles sent out of the country temporarily, such as automobiles for touring purposes, commercial samples, circuses, race horses, and other articles intended to be returned to the United States, which are not sold and do not enter the trade of the country to which sent, should not be included in the statistics as exports when shipped abroad. (Section 30.2(b), F.C.S.R.)

15. *Documentations.*—For shipments to Canada or Mexico by rail consisting of two or more cars, a separate Shipper's Export Declaration must be furnished for each car in order to avoid any possible delay at the border. (Section 30.42(d), F.C.S.R.)

If a shipment is divided at the port of exit by accident or intention, part being exported in one vessel or car and part in another, the agent of the carrier will note the amount shipped on the declaration attached to the vessel or car manifest. Declarations in triplicate covering subsequent shipments must be prepared by the carrier's agent from records of the previous shipment and be presented to the collector when the remainder is shipped. The number of the original declaration must be noted on each of the copies and duplicates. (Section 30.43. F.C.S.R.)

On shipments from interior points, the declaration should, wherever possible, be delivered to the rail carrier at point of origin or be mailed to the consignee, broker, steamship line, or agent designated to attend to the exportation at the port or border point of exit.

When declarations are delivered to rail carrier at point of origin, they must be attached to the waybill or be mailed to the agent of the delivering carrier at the port or border point of exit so as to reach there prior to arrival of the shipment covered thereby.

Upon arrival of the goods at the port or border point of exit the declarations will be delivered to the Collector of Customs, who will retain the original and the triplicate copy, certify and deliver the duplicate to the party designated to attend to the exportation, as a permit to export and as evidence that the original declaration has been filed with the Collector of Customs.

If the shipment originates at, or the declaration is prepared at the port or border point of exit, the shipper, owner, or his authorized agent must deliver the declaration in triplicate to the Collector of Customs.

16. *Shipments to United States Government Agencies or Establishments.*—No export declarations are required for shipments of office furniture, equipment and supplies, household goods and personal property shipped by United States Government offices or employees to United States offices or employees in foreign countries or noncontiguous territories for their exclusive use, or for shipments of books, maps, charts, and pamphlets made by United States Government offices to foreign libraries or Government establishments, or for shipment of military and naval supplies and equipment for the use of United States military and naval forces abroad, or for supplies, equipment, and other merchandise shipped to United States Government agencies or establishments. (Section 30.46, F.C.S.R.)

17. *Oaths.*—The original Shipper's Export Declarations for shipments by vessel to foreign ports must be verified by oath before a notary public, customs officer, or other person authorized to administer oaths. The oath is not required on Shipper's Export Declarations covering shipments made between the United States and its Territories and Possessions. The oath is also not required on Shipper's Export Declarations covering shipments made by rail, vehicle, ferry or aircraft. (Section 30.7(c), F.C.S.R.) (F.C.S.D. 33 and 46)

18. *Disposition of documents.*—The export declarations are to be transmitted by Collectors of Customs to the Customs Statistics Section, Foreign Trade Division, Bureau of the Census, at New York immediately after clearance of vessels and aircraft or departure of trains, in accordance with the provisions of F.C.S.D. 33 and instructions issued by the Bureau of the Census, Department of Commerce. (Section 30.28, F.C.S.R.) (F.C.S.D. 33)

19. *Classification decisions.*—Collectors and shippers are invited when the proper class under which a given article should be returned is in doubt, to submit such cases to the Customs Statistics Section, Foreign Trade Division, Bureau of the Census, Customs House, New York City, or the Foreign Trade Division, Bureau of the Census, Washington, D. C. (Section 30.1, F.C.S.R.)

20. *Classification Schedules:*

(a) *Schedule B, Statistical Classification of Domestic Commodities and Foreign Commodities (Reexports) Exported from the United States.*—Exporters should purchase a copy of Commerce Department Schedule B Part I as the information contained therein is necessary for the accurate preparation of these declarations. Schedule B may be purchased for a nominal charge from the Superintendent of Documents, Government Printing Office, Washington 25, D. C., or from the New York Field Office of the Department of Commerce, or from Collectors of Customs.

(b) *Schedule H, Statistical Classification and Code Numbers of Shipments of Merchandise to Alaska.*—This schedule may be obtained from Collectors of Customs, the Field Offices of the Department of Commerce, located in the principal cities of the United States, and from the Bureau of the Census, Washington 25, D. C. There is no charge for this publication.

21. *Purchases of forms used in reporting exports.*—Copies of the Commerce Form 7525-V and 7513 may be purchased from the Superintendent of Documents, Government Printing Office, Washington 25, D. C., and Collectors of Customs, located in principal cities, for the price of thirty cents per block of 100. Copies of the Defense Aid (Lend-Lease) Export Declarations (Commerce Forms 7525-DA, 7525-DA-V and 7513-DA) may be purchased from the Superintendent of Documents, Government Printing Office, for the price of thirty cents per block of 100. These forms may be printed by private parties, provided they conform strictly to the official form, in size, wording, color, and arrangement, including the instructions on the back of the documents.

22. On the last day of each month each customs port will notify the Customs Statistics Section, Foreign Trade Division, Bureau of the Census, Customhouse, New York 4, New York, of the date and number of the last declaration passed at the port during the month. Where no declarations have been filed during the month a No Transactions report (Commerce Form 550) should be transmitted. (Section 30.21, F.C.S.R.)

23. More detailed information relating to the preparation of the Shipper's Export Declaration may be obtained from the October 1944 issue of the Foreign Commerce Statistical Regulations (Title 15, Chapter I, Part 30, Code of Federal Regulations), copies of which may be obtained free of charge from Department of Commerce Field Office, located in principal cities; the Customs Statistics Section, Foreign Trade Division, Bureau of the Census, Customhouse, New York 4, New York; and the Foreign Trade Division, Bureau of the Census, Washington 25, D. C.

How to use Schedule

FINDING THE COMMODITY

Look for the specific name of the commodity, not a general name. If the shipment consists of automobile storage batteries, look for the specific name "Batteries" not the general name "Automobile parts." Look for "Menthol" not for "Pharmaceuticals" or "Drugs." Look for "Carborundum wheels," not for "Abrasives."

If the commodity can be described in more than one way, look for more than one of the descriptions if the commodity is not located the first time.

Look for a trade name if a commodity is commonly known by its trade name. Trade names have been listed when it seems that the exporter will be more likely to know the commodity by that name.

If the description of the commodity has more than one word in it, look under more than one of the words if the commodity is not located on first try. Look, first, under the noun or under the principal adjective in the description. If the shipment consists of auto radiator hose made of rubber, look under the noun, "Hose," to find "Hose, radiator, auto, rubber"; or, look under the principal adjective, "Radiator," to find "Radiator hose, auto, rubber." The commodity will not always be listed under every adjective in the description, but it will be listed under the noun, and at least one principal adjective. The Schedule B number for shipment of brewers' yeast in compressed form will be found under the noun - "Yeast, brewers', compressed" and under the principal adjective—"Brewers' yeast, compressed" but not under the less important adjective—"Compressed brewers' yeast."

It is usually best to look under the noun first, since under the noun will be listed all types of the commodity. Under "Handkerchiefs," will be listed all types of handkerchiefs.

It is sometimes easier to look under an adjective. If the shipments consist of several different kinds of commodities made of cotton, look under the adjective "Cotton" where most types of cotton articles, including cotton handkerchiefs, are shown. However, if the article does not appear under an adjective, be sure to look under the noun.

NET QUANTITY

The net quantity of the commodity in the export shipment must be reported on the Shipper's Export Declaration in terms of the unit of quantity shown in the index for the commodity. This unit of quantity is usually different for different commodities. The unit of quantity for exports of hogs is "number" of hogs, the unit of quantity for exports of canned pork is "pounds." If the unit of quantity is pounds, or tons, or hundredweight, it is always the "net" quantity, that is, exclusive of the weight of the container.

A few commodities require the net quantity to be shown in two different units of quantity, under two different Schedule B commodity numbers. "Cotton linters" must be reported both in "pounds" and "bales," with Schedule B commodity number 300400 for the pounds, and 300401 for the bales. For all commodities requiring two units of quantity under two commodity numbers, an asterisk (*) has been inserted in front of both commodity numbers to call attention to the requirement. Page XV shows the definitions of all the units of quantity called for in Schedule B.

IF YOU CANNOT FIND THE COMMODITY

If a commodity is not located in the index after having followed the instructions above in "Finding the Commodity," show Schedule B number 999990 on the Shipper's Export Declaration. Do not hesitate to use this Schedule B commodity number under these circumstances. When 999990 is so used, report the net quantity of the shipment in the units in which the shipment is being made.

EXPORT SHIPMENTS VALUED AT $10 OR LESS

Schedule B commodity number 999910 should be used for all shipments under one Schedule B commodity number valued at $10 or less (except shipments under individual export license or on defense aid declarations). A shipment of $11 worth of aspirin in bulk would show Schedule B commodity number 813530 on the Shipper's Export Declaration. If the Shipment of aspirin is valued at $10 or less, Schedule B number 999910 should be shown.

If several items are shown on one Shipper's Export Declaration, each valued at $10 or less and each carrying a different Schedule B commodity number, 999910 should be used for each item. For example: medicated soap worth $8 (Schedule B number 871000), toilet soap worth $9 (Schedule B number 871200), and mechanics' soap worth $6 (Schedule B number 872400) should each be coded 999910, if listed on the same declaration, although they have a total value of $23.

If, however, several soaps are shown on one Shipper's Export Declaration each of which is properly included under the same Schedule B commodity number, the specific Schedule B commodity number is used for the total value. For example; castile soap worth $10, Cuticura soap worth $8, and cold cream soap worth $5 are all coded under 871200 when listed on the same declaration, although each of the items is worth $10 or less.

EXPORT SHIPMENTS FOR RELIEF OR CHARITY

Exports for relief or charity by individuals and private agencies (such as the Red Cross) should be reported in the following classifications:

Food.....	(no unit of quantity)	999810
Clothing.....	" " " "	999820
Blankets and bedding..	" " " "	999830
Drugs and biological supplies.....	" " " "	999840
Surgical, sanitary, and hospital supplies and equipment.....	" " " "	999850
Ambulances and other motor equipment.....	" " " "	999860
Other.....	" " " "	999890

These classifications cannot be used for exports for relief or charity by United States Government agencies or by U.N.R.R.A., except for exports of used clothing and exports of used blankets and bedding by such agencies, which should be reported under 999820 and 999830 above, respectively. All other exports by United States Government agencies or by U.N.R.R.A., including new clothing, blankets, and bedding, should be reported under the Schedule B commodity number shown in Part I for the particular commodities.
