STATISTICAL CLASSIFICATION OF DOMESTIC COMMODITIES AND FOREIGN COMMODITIES EXPORTED FROM THE UNITED STATES

DEPARTMENT OF COMMERCE
OFFICE OF THE SECRETARY

Washington, January 1, 1949

To Exporters, Collectors of Customs, Postmasters, and Others Concerned:

Beginning with the 1st day of January, 1949, the annexed schedule will govern in the classification of domestic and foreign commodities exported from the United States to foreign countries and United States Territories and Possessions, except Alaska and Hawaii. The Shipper's Export Declaration is the standard official document required in the exportation of commodities from the United States. Before shipments may leave this country, whether by vessel, rail, air, car, vehicle, or other method of transportation, the United States Government requires that specific information for statistical purposes be shown on a Shipper's Export Declaration, Commerce Form 7525-V or Commerce Form 7513 and that such declaration be filed by the shipper or his agent with a United States Collector of Customs at a port or border point of exit in the United States; or if shipped by parcel post, such declaration must be filed with the postmaster at the post office from which the merchandise is shipped.

I. Shipper's Export Declaration, Commerce Form 7525-V, should be used for all shipments to foreign countries and between the United States and its Territories and Possessions (except Alaska and Hawaii) except those shipments for which Commerce Form 7513 is required. (See II, below)
Form 7525-V is to be used for both:

   a. Domestic merchandise (merchandise which is the growth, produce, or manufacture of the United States, or imported merchandise which has been changed in condition in the United States, including merchandise withdrawn from bonded manufacturing warehouses for exportation and merchandise exported with benefit of drawback) and
   b. Foreign merchandise (imported merchandise which has <u>not</u> been changed in condition in the United States, including merchandise withdrawn from bonded storage warehouses for exportation).

II. Commerce Form 7513, Shipper's Export Declaration for In-Transit Goods should be used for all merchandise:

   a. Shipped in transit through the United States.
   b. Transshipped in ports of the United States for foreign countries.
   c. Exported from General Order Warehouse.
   d. Rejected and exported.
   e. Exported from Foreign Trade Zones.

Reproductions of the front and the reverse sides of the Shipper's Export Declaration, Commerce Form 7525-V, are presented on the following pages.

CORRECT WAY TO FILL OUT THE SHIPPER'S EXPORT DECLARATION

1. WHAT IS THE SHIPPER'S EXPORT DECLARATION?

The Shipper's Export Declaration (Commerce Form 7525-V) is illustrated on pp. IV-V. This document, containing the information called for, must be filed by exporters with Collectors of Customs prior to the clearance of their shipments from the United States to foreign countries or to territories or possessions of the United States except Alaska and Hawaii.

2. WHO PREPARES THE DECLARATION?

It may be prepared by the shipper or owner or his authorized agent. If it is prepared by an agent, his authority to sign the declaration should be in the form of a power of attorney or less formal authorization such as that written on the declaration. Sec. 2 (c) of Instructions reproduced on Page V.

3. HOW MANY COPIES OF THE SHIPPER'S EXPORT DECLARATION SHOULD BE PREPARED?

Three copies should be prepared for shipments by vessel, air, rail, car, ferry, or other vehicle for all merchandise shipped to foreign countries except Canada; two copies for shipments by parcel post. The third copy, or second parcel post copy, of the declaration is required for purposes of export control. For shipments to Canada and between the United States and its Territories and Possessions, except Alaska and Hawaii, two copies of the declaration should be prepared. Additional copies may be required of shippers to comply with export control regulations of the Office of International Trade, or with the requirements of transportation companies, or foreign countries.

4. WHEN AND WHERE IS THE DECLARATION FILED?

The declaration must be filed with the Collector of Customs at the port of exportation prior to the clearance of shipments from the United States to foreign countries or to territories and possessions of the United States, except Alaska and Hawaii.

5. WHERE CAN SHIPPER'S EXPORT DECLARATIONS BE OBTAINED?

They may be purchased from your local Collector of Customs or from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for 50 cents per block of 100. They may also be printed privately provided they conform to the official form in size, wording, color, quality (weight) of paper stock and arrangement, both as to the face of the form and to the instructions on the reverse side.

6. WHAT MARKS AND NUMBERS SHOULD BE SHOWN IN COLUMN (9) OF THE DECLARATION?

Insert any marks and numbers that will help Collectors of Customs to identify crates, boxes, packages, etc.

7. HOW SHOULD SHIPPING WEIGHT BE SHOWN IN COLUMN (11)?

The shipping weight including the weight of all containers must be stated on the Shipper's Export Declaration, except for exportation by rail, truck, or mail. Do not show merely the shipping weight of the package, box, crate, etc. It is necessary to show the gross weight of <u>each item</u> (or each combination of items) bearing the same Schedule B commodity number. If necessary, the gross weight of each item may be estimated, provided the total weight for all the items shown is correct. Check column (13) of the declaration and note how many different Schedule B commodity numbers appear; then make sure that a separate gross weight is given for each individual commodity number.

8. IN HOW MUCH DETAIL SHOULD MERCHANDISE BE DESCRIBED IN COLUMN (10)?

Do not use general terms such as "dry goods," "groceries," "meats," etc. Description by trade mark is insufficient. Consult Part I of Schedule B (see question 10), and then describe the merchandise in such detail as to leave no doubt of its proper classification according to Schedule B. Use trade names only if they appear in Schedule B. If they do not appear, use them only in addition to the description of the product.

9. WHAT IS MEANT BY 'D' OR 'F' IN COLUMN (12)?

The symbol "D" stands for "domestic" and is to be used for items produced in the United States. If the item is of foreign origin but has been changed by alteration or manufacture, it should be classified as "domestic." The symbol "F" stands for "foreign" and should be used only for those items of foreign origin which are re-exported in the same form and condition as originally imported.

10. HOW CAN THE SCHEDULE B COMMODITY NUMBER BE OBTAINED FOR INSERTION IN COLUMN (13)?

Consult the latest edition of Schedule B, "Statistical Classification of Domestic and Foreign Commodities Exported from the United States," Part I. Schedule B, Part I, may be purchased from the Superintendent of Documents, Government Printing Office, Washington 25, D. C., from your local Collector of Customs, or from Department of Commerce Field Offices.

11. WHEN IS SCHEDULE B COMMODITY NUMBER 999910 USED?

This number should be used by shippers only for items valued under $25. For example, if watch fobs valued at $15 and advertising folders valued at $12 are described on the same export declaration, both should be classified under commodity number 999910. However, if the combined value of several items ordinarily classified under the same specific Schedule B commodity number is $25 or more, the specific Schedule B commodity number should be used. For example, if ash trays valued at $20 and cigar holders valued at $11 are described on the export declaration, both should be classified under commodity number 982900, since they can both be classified under this same commodity number and their combined value is $25 or more.

12. HOW SHOULD NET QUANTITY BE SHOWN IN COLUMN (14)?

Consult the 1949 edition of Schedule B (see question 10). In the case of those commodities for which Schedule B requires net quantities to be stated, separate net quantities should be given for <u>each item</u> (or each combination of items) bearing the same commodity number. Net quantities should be stated in units prescribed by Schedule B, in net weight exclusive of the weight of barrels, boxes, bottles, cans, cartons, jars, tubes and other immediate containers or other covering, and of salt or pickle in the case of salted or pickled fish and meats. In stating quantities, fractions of less than one-half will be ignored and fractions of one-half or over should be stated as a whole number. Where Schedule B prescribes no unit of quantity, the net quantity need not be shown.

13. HOW SHOULD VALUE BE SHOWN IN COLUMN (15)?

As with shipping weight and net quantity, a separate value must be given for <u>each item</u> (or each combination of items) bearing the same commodity number. Dollar value at time and place of export should be given. The value stated should be the selling price or cost if not sold, including inland freight, insurance, and other charges to border point or seaport. It should <u>not</u> include ocean freight or other charges incurred after the shipment leaves the place of export.

14. MUST THE DECLARATION BE NOTARIZED?

The oath is required on the original copy of the Shipper's Export Declaration for shipments by vessel to a foreign port. The oath is not required on declarations covering shipments made between the United States and its territories and possessions; nor is it required for shipments to foreign countries by carriers other than vessel.

15. HOW CAN I FIND THE ANSWERS TO ANY FURTHER QUESTIONS I MAY HAVE ON SHIPPER'S EXPORT DECLARATIONS?

Consult your local Collector of Customs or Department of Commerce Field Office. The reverse side of the Shipper's Export Declaration reproduced on Page V contains additional instructions. The Foreign Trade Division, Bureau of the Census, Washington 25, D. C. and the Customs Statistics Section, Foreign Trade Division, Bureau of the Census, Room 434 Customhouse, New York 4, N. Y. will also be able to answer any inquiries.

FINDING THE COMMODITY

Look for the specific name of the commodity, not a general name. If the shipment consists of automobile storage batteries, look for the specific name "Batteries" not the general name "Automobile parts." Look for "Menthol" not for "Pharmaceuticals" or "Drugs." Look for "Carborundum wheels," not for "Abrasives."

If the commodity can be described in more than one way, look for more than one of the descriptions if the commodity is not located the first time.

Look for a trade name if a commodity is commonly known by its trade name. Trade names have been listed when it seems that the exporter will be more likely to know the commodity by that name.

If the description of the commodity has more than one word in it, look under more than one of the words if the commodity is not located on first try. Look, first, under the noun or under the principal adjective in the description. If the shipment consists of auto radiator hose made of rubber, look under the noun, "Hose," to find "Hose, radiator, auto, rubber;" or, look under the principal adjective, "Radiator," to find "Radiator hose, auto, rubber." The commodity will not always be listed under every adjective in the description, but it will be listed under the noun, and at least one principal adjective. The Schedule B number for shipment of brewers' yeast in compressed form will be found under the noun - "Yeast, brewers', compressed" and under the principal adjective—"Brewers' yeast, compressed" but not under the less important adjective—"Compressed brewers' yeast."

It is usually best to look under the noun first, since under the noun will be listed all types of the commodity. Under "Handkerchiefs," will be listed all types of handkerchiefs.

It is sometimes easier to look under an adjective. If the shipments consist of several different kinds of commodities made of cotton, look under the adjective "Cotton" where most types of cotton articles, including cotton handkerchiefs, are shown. However, if the article does not appear under an adjective, be sure to look under the noun.

NET QUANTITY

The net quantity of the commodity in the export shipment must be reported on the Shipper's Export Declaration in terms of the unit of quantity shown in the index for the commodity. This unit of quantity is usually different for different commodities. The unit of quantity for exports of hogs is "number" of hogs, the unit of quantity for exports of canned pork is "pounds." If the unit of quantity is pounds, or tons, or hundredweight, it is always the "net" quantity, that is, exclusive of the weight of the container.

A few commodities require the net quantity to be shown in two different units of quantity, under two different Schedule B commodity numbers. "Cotton linters" must be reported both in "pounds" and "bales," with Schedule B numbers 300402 and 300405 for pounds, and 300403 and 300406 for bales. For all commodities requiring two units of quantity under two commodity numbers, an asterisk (*) has been inserted in front of both commodity numbers to call attention to the requirement. Page XXIII shows the definitions of all the units of quantity called for in Schedule B.

IF YOU CANNOT FIND THE COMMODITY

If a commodity is not located in the index after having followed the instructions above in "Finding the Commodity," show Schedule B number 999990 on the Shipper's Export Declaration. Do not hesitate to use this Schedule B commodity number under these circumstances. When 999990 is so used, report the net quantity of the shipment in the units in which the shipment is being made.

EXPORT SHIPMENTS VALUED AT LESS THAN $25

Schedule B commodity number 999910 should be used for all shipments under one Schedule B commodity number valued at less than $25 (except shipments under individual export license). A shipment of aspirin in bulk worth $25, or more, would show Schedule B commodity number 813530 on the Shipper's Export Declaration. If the shipment of aspirin is valued at less than $25, Schedule B number 999910 should be shown.

If several items are shown on one Shipper's Export Declaration, each valued at less than $25 and each carrying a different Schedule B commodity number, 999910 should be used to cover all of them. For example: medicated soap worth $12 (Schedule B number 871000), toilet soap worth $14 (Schedule B number 871200), and mechanics' soap worth $23 (Schedule B number 872400), should all be coded 999910, if reported on the same declaration, even though they have a total value of $49. Commodity number 999910 should be inserted only once in column 13 of the Shipper's Export Declaration to cover these items and only the total value of all of them should be reported in column 15.

If, however, several soaps are shown on one Shipper's Export Declaration each of which is properly included under the same Schedule B commodity number, the specific Schedule B number is used for the total value if it is over $25. For example: castile soap worth $23, Cuticura soap worth $9, and cold cream soap worth $12 are all coded under 871200 when listed on the same declaration. Although each of the items is worth less than $25 the total value is more than $25 for all the items within the one Schedule B number. Schedule B number 871200 should be inserted only once in column 13 to cover these items and only one value should be reported in column 15 covering them all.

When the commodities listed on a single Shipper's Export Declaration are not all under $25 in value those valued at less than $25 should be listed adjacent to each other so that one commodity number and one total value may be readily used to cover them.

EXPORT SHIPMENTS FOR RELIEF OR CHARITY

Exports for relief or charity by individuals and private agencies (such as the Red Cross) should be reported in the following classifications:

Food	(no unit of quantity)	999810
Clothing	" " " "	999820
Blankets and bedding	" " " "	999830
Drugs & biological supplies	" " " "	999840
Surgical, sanitary, & hospital supplies & equipment	" " " "	999850
Ambulances & other motor equip.	" " " "	999860
Other	" " " "	999890

These classifications cannot be used for exports for relief or charity by United States Government agencies, except for exports of used clothing by such agencies, which should be reported under 999820 above. All other exports by United States Government agencies, including new clothing, should be reported under the Schedule B commodity number shown in Part I for the particular commodities.

Air coolers		
Self-contained commercial refrigerating units (all types, including their condensing units)	No.	765610
Beer coolers		
Beverage coolers		
Compressors, in cabinets, for refrigerators		
Deepfreeze storage cabinets		
Ice-cream cabinets, electric		
Utility refrigerators		
Water coolers, enameled, iron and steel (permanently installed and portable)		
Air conditioning and refrigerating equipment and parts—Con.		
Liquid coolers for water, brine, or other liquids (excluding cabinet types specifically designed for drinking water, and self-contained types)	No.	765630
Factory water cooling systems		
Heat exchangers		
Hospital water cooling systems		
Milk coolers		
Office building water cooling systems		
Self-contained room air conditioners, under 2 ton capacity	No.	765710
Portable units		
Self-contained commercial-type air conditioners, 2 ton capacity or over	No.	765750
Mechanical commercial refrigerators (assembled or knockdown, but when knockdown, not including compressor units, condensing units and heat transfer equipment)	No.	765910
Beer coolers, except electric		
Cabinets		
Cases		
Walk-in coolers		
Auxiliary and accessory equipment, peculiar to the air conditioning and refrigeration industry, n.e.s. (specify by name)	—	766010
Air blowers		
Air cleaners		
Air cooler parts		
Air fans		
Air filter machinery, and parts		
Air humidifiers, and parts		
Air purifiers, and parts		
Brine tanks		
Cage assemblies		
Chiller trays, glass		
Control valves		
Cooler parts		
Copper fittings		
Defrosting clocks		
Dehydrators		
Doorjam strips (except rubber)		
Expansion valves		
Flexair double deflectors		
Friez humidistats, and parts		
Ice cube trays (except rubber)		
Interior equalizers		
Interior panels, and parts		
Milk cooler parts		
Motor starting switches		
Oil separators		
Ozo air purifiers, and parts		

Before using the index consult the instructions on page XXIV.

Pipe fittings		
Pipe headers, steel		
Power assemblies		
Pressure gauges		
Pressure blowers		
Relays		
Starting mechanisms		
Starting switches		
Steel pulleys		
Ventilating machinery		
Volume blowers		
Vitalaire, and parts		
Parts peculiar to the air conditioning and refrigeration industry, for foreign assembly or manufacture (except household) and not including compressor units, condensing units, and heat transfer equipment	—	766030
Cold storage doors		
Replacement parts, peculiar to the air conditioning and refrigerating industry, for maintenance of existing installations (except household and not including compressor units, condensing units, and heat transfer equipment	—	766050
Brass bellows		
Compressor blocks		
Filters, and parts		
Gaskets		
Grease cups		
Mechanical shaft seals		
Seal assemblies		
Steel pins

Air receivers, for air compressors	—	775098
Air rifle darts, toy	—	941800
Air rifles, and parts, toy	—	940900
Air scales, and parts, for automobile tire service	—	793160
Air tire pumps, and parts (foot or power-operated) for automobile tire service	—	793160
Air valve seats, sequence for welding sets	—	745805
Air vent valves	—	713900
Air-brake cylinders, and parts, for steam locomotives	—	796800
Air-brake equipment, and parts	—	796800
Air-brake hose, for aircraft	—	794810
Air-brake hose, rubber	Lb.	208900
Airbrushes, artists	—	999990
Air-cleaner hose, rubber	Lb.	208900
Air-conditioning plants and accessories, for aircraft	—	794810
Aircraft armament	No.	947500
Aircraft assemblies and components, except airframe and propeller	—	794810
Aircraft balloons, rubber	—	204500
Aircraft bulbs, large filament	No.	706455
Aircraft cameras (aircraft insturments)	No.	900232
Aircraft clock parts	—	957900
Aircraft clocks	No.	957000
Aircraft, complete: (Model and name of manufacturer are to be indicated by shipper) (Armament when shipped with aircraft is included, but armament as replacements or supplies is indexed in respective classifications)		
Bombers, land-type, including attack-bombers	No.	793210
Bombers, carrier-type, including attack, dive, torpedo	No.	793240
Fighters, land-type, including bomber-fighters (airplanes designed primarily as fighters, but modified to permit use as bombers)	No.	793250
Fighters, carrier-type	No.	793270
Trainers of military design	No.	793280
Cargo transports (airplanes 3000 lbs. and over airframe weight, designed for exclusive cargo use) - New (all sizes), including amphibians	No.	793301
Passenger transports (airplanes 3000 lbs. and over airframe weight) (including amphibians) - New:		
3000 to 14,999 lbs. airframe weight	No.	793305
15,000 to 29,999 lbs. airframe weight	No.	793307
30,000 lbs. and over airframe weight	No.	793309
Passenger and cargo transports (airplanes 3000 lbs. and over airframe weight)- Used and surplus (all sizes) including amphibians and demilitarized bombers	No.	793317
Utility, personal, and liaison (under 3000 lbs. airframe weight) - New (including civilian trainers and communication):		
3 places and under	No.	793321
4 places and over	No.	793325
Utility, personal, and liaison (under 3000 lbs. airframe weight) - Used and surplus (all sizes and types)	No.	793329
Rotary-wing aircraft	No.	793331
Gliders	No.	793335
Airships and balloons (including barrage ballons)	No.	793337
Other aircraft including hydroplanes and seaplanes	No.	793348

Cabinets, surgeons'	—	915710
Cabinets, television, wood	—	424500
Cabinets, wood (see also Millwork)	—	423990
Cable anchors, and parts	—	709890
Cable and conduit assemblies	—	709200
Cable armored, sisalkraft (chief value copper)	—	643998
Cable assemblies, aircraft maintenance equipment	—	794960
Cable assemblies, hoisting sling, for aircraft (special fittings attached)	—	794810
Cable assemblies, propeller pitch control, for aircraft	—	793365
Cable blasting, insulated copper	Lb.	709850
Cable boots, rubber	—	209990
Cable bushed, armoured	Lb.	709810
Cable chains, and parts, iron and steel	Lb.	619200
Cable clamps, aluminum alloy, except aircraft	—	630998
Cable clamps, aluminum alloy, for aircraft	—	794810
Cable clamps, bronze wire	—	647998
Cable clamps, electric, except aircraft	—	709890
Cable clamps, steel for aircraft	—	794810
Cable clips, zinc	—	658998
Cable, co-axial, insulated copper	Lb.	709850
Cable, communication, insulated copper	Lb.	709850
Cable compounds, finishing and mineral	—	829990
Cable compounds, lead	—	829990
Cable conductors, cadmium copper	Lb.	645700
Cable, conductor metalic armoured	Lb.	709810
Cable connectors, and parts, telephone	—	708700
Cable, control, copper, rubber insulated, leaded, armored with metallic armor and asphalted jute	Lb.	709850
Cable, copper, annunciator	Lb.	709850
Cable, copper, armored, submarine	Lb.	709850
Cable, copper, chain, non-insulated	Lb.	642500
Cable, copper, degaussing	Lb.	709850
Cable, copper, electric, lead-covered	Lb.	709850
Cable, copper, ignition	Lb.	709850
Cable, copper, insulated, battery including auto	Lb.	709850
Cable, copper, insulated gas tube sign	Lb.	709850
Cable, copper, insulated, generator	Lb.	709850
Cable, copper, insulated, high-tension	Lb.	709850
Cable, copper, insulated motion-picture	Lb.	709850
Cable, copper, insulated preformed	Lb.	709850
Cable, copper, insulated, shockproof	Lb.	709850
Cable, copper, insulated, signal wire	Lb.	709850
Cable, copper, lead-covered	Lb.	709850
Cable, copper, microphone	Lb.	709850
Cable, copper, ship-board, navy type, armored	Lb.	709850
Cable, copper, telephone	Lb.	709850
Cable, copper, tellurium, lead-covered	Lb.	709850
Cable, copper, uncovered	Lb.	642500
Cable cores, wire	Lb.	630600
Cable cutters, and parts, hand-operated	—	617000
Cable electrical filling paper	Lb.	842700
Cable fittings, for aircraft	—	794810
Cable, geophone, oil and gas exploration equipment & parts	—	734210
Cable, gold	—	699700
Cable hangers, and parts	—	709890
Cable, hemp (tarred or untarred)	Lb.	341998
Cable, henequen (tarred or untarred)	Lb.	341909
