Table Finding Guide—Subjects by Type of Area and Table Number

The guide lists all subjects covered in the report but does not indicate all cross-classifications (i.e., by race, Spanish origin, age, and sex) or the historical data shown in some tables. Separate statistics for the White and Black racial groups and for persons of Spanish origin are not listed separately, but they can be found under the specific subject listing (e.g., age, group quarters relationship, etc.). Data on allocation rates appear in tables B-1 through B-4. For meanings of abbreviations, see the Introduction. For a description of area classifications, see appendix A. For definitions and explanations of subject characteristics, see appendix B.

Comparable data on towns and townships are shown by size following the tables for places. Table numbers correspond to those for places and have an "a" suffix; e.g., towns and townships of 1,000 to 2,500 are shown in tables 14a, 15a, 16a, 42a, and 43a. [2] In Alaska State report, areas are "American Indian Reservations and Alaska Native Villages." [3] Presents data for number of own children. [4] American Indian, Eskimo, Aleut, Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, and Samoan populations. Historical data in table 17 are shown for the White, Black, and Other categories; data are not shown for all selected racial groups; see appendix B. [5] Tables 31, 38, 41, and 51 show only population not of Spanish origin by race. [6] Presents data for county subdivisions.

SUPPRESSION OF DATA FOR CONFIDENTIALITY. VI

GENERAL

This report presents 100-percent data from the 1980 Census of Population on basic demographic characteristics of the inhabitants of the State, its counties or comparable areas, county subdivisions, places of 1,000 or more inhabitants, standard consolidated statistical areas, standard metropolitan statistical areas, urbanized areas, American Indian reservations, Alaska Native villages, and certain other geographic areas of the State (e.g., urban and rural portions of the State). The abbreviated identification for this report is PC80-1-B (i.e., Population Census, 1980-Volume 1-Chapter B) followed by a number representing the State. Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

A large portion of the information compiled from the 1980 Census of Population will appear in Volume 1, *Characteristics of the Population,* of which this report is part.

The 1980 census figures presented here may differ from those shown in the *Advance Reports,* PHC80-V, and in the Public Law 94-171 redistricting data products. The changes reflect corrections of errors found after the PHC80-V reports and P.L. 94-171 materials were prepared. The changes may affect any geographic area shown in this report.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to any appreciable extent the comparability between the 1980 data and the 1970 data shown in this report. Further information on comparability appears in Appendix B, "Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and five appendixes), a table of contents, 42 detailed tables, (65 detailed tables in reports showing data on towns and townships) and maps. A map of the State appears after the table of contents and shows county names and boundaries, the names and boundaries of standard consolidated statistical areas (SCSA's) and standard metropolitan statistical areas (SMSA's), the names and locations of all places with a population of 25,000 or more, and SMSA central cities with fewer than 25,000 inhabitants. Then follow 42 detailed tables and 4 tables covering substitutions and allocations (see Appendix D. "Accuracy of the Data"). Each table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

The first table in this report is table 14; tables 1 to 13 appear in the *Number of Inhabitants,* PC80-1-A report for this State. Data are presented in this report on age, sex, race, Spanish origin, relationship to householder, and marital status. A table finding guide on the inside front cover shows the tables in which the various types of statistics appear.

In general, the amount of detail presented in this report is greater for areas with more population than for smaller population areas. Data from earlier censuses are generally included for larger areas only. The greatest amount of detail is shown for the State and its urban and rural parts and for SCSA's, SMSA's, urbanized areas, places with a population of 10,000 or more, and counties. Less detail is shown for places of 2,500 to 10,000 and for rural portions of counties. The least amount of detail is shown for places of 1,000 to 2,500, county subdivisions, American Indian reservations, and in Alaska for Alaska Native villages.

The tables are followed by a map section which includes:

- A "County Location Index" which presents the reference coordinates and map section numbers for each county on the county subdivision map, the legend to the county subdivision map, and a State map outlining the geographic area covered by each county subdivision map section.
- A county subdivision map, often covering several pages, shows the names and boundaries of counties (or equivalent areas), their subdivisions, and places, as recognized by the Census Bureau in the published tables. In addition, this map shows the names and boundaries of American Indian reservations; the subdivision map in the report for Alaska also shows the names and locations of Alaska Native villages. Boundaries of places of fewer than 1,000 persons are shown on this map,

although they are not shown in the tables of this report.

Appearing last in the report are the appendixes. Appendix A describes the various area classifications (e.g., urban and rural residence, census designated places, and urbanized areas). Appendix B provides definitions and explanations for the subjects covered in this report. Appendix C explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix D presents information on the sources of error in the data, editing procedures, and a description of allocation and substitution tables B-1 to B-4. Appendix E contains facsimiles of the respondent instructions and 1980 census questionnaire pages showing the 100-percent population questions.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

- A dash "—" represents zero or a percent which rounds to less than 0.1.
- Three dots "..." mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals. (For further information on disclosure, see the section below on "Suppression of Data for Confidentiality.")
- (NA) means not available.
- A minus sign preceding a figure denotes decrease.
- CDP is census designated place.
- SCSA is standard consolidated statistical area.
- SMSA is standard metropolitan statistical area.
- (unorg.) is unorganized territory.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions to make sure that its published data do not disclose information about particular individuals and housing units. To accomplish this, the Bureau suppresses data for some characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression may take place.

The general rules of primary suppression are as follows: counts of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 15 or more persons in the geographic area; counts of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are five or more year-round housing units in the geographic area; characteristics of families, households or occupied housing units are shown only if there are at least five occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least five and the number of renters is also at least five. These primary suppression criteria are applied independently of one another.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) require the 15-person or 5-housing unit criteria stated above be applied individually to each race or Spanish origin category.

In some cases, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction.
