CURRENT POPULATION REPORTS

Population Estimates

Series P-25, No. 317
August 27, 1965

ESTIMATES OF THE POPULATION OF STATES JULY 1, 1964 AND 1965

(Advance report)

This report presents revised estimates of the population of States for July 1, 1964, and provisional estimates for July 1, 1965. These estimates supersede the numbers published in Current Population Reports, Series P-25, No. 289.

The table below shows estimates for the total resident population (comparable to the 1960 Census counts) and for the civilian resident population for these two dates, together with 1960 data. It also shows numerical and percentage change in population between 1960 and 1965.

The estimates for 1964 were developed by averaging the results of two methods. The methods used were: (a) the Census Bureau's Component Method II, which employs vital statistics to measure natural increase and uses school enrollment (or school census data) as a basis for estimating net migration; and (b) a regression method, in which a multiple regression equation is used to relate changes in a number of different data series to changes in population distribution.

The provisional population estimates for July 1, 1965 were derived by adding components of population change for the year July 1, 1964 to 1965, to the 1964 population estimate. Since direct or indirect measures of net civilian migration for the period after July 1, 1964, were not yet available, the net civilian migration component for this one-year period represents an extrapolation of recent migration trends for each State.

A detailed description of the methodology used by the Bureau of the Census in preparing population estimates for States is contained in Series P-25, No. 289.

These estimates will be published in a later report in Series P-25, together with a comparable time series for the period 1960 to 1963, and a description of methodology.

Comparable estimates for Puerto Rico and other outlying areas for 1964 and 1965 will be published separately in Series P-25.

Estimates presented in the table have been rounded to the nearest thousand without being adjusted to group totals, which are independently rounded. Percentages are based on unrounded numbers.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, 15 cents.
Annual subscription (Series P-20, P-23, P-25, P-27, P-28 summaries, P-60, and P-65, combined), $4.00; foreign mailing, $5.25.
