a Decrease.

In the above table the number and per cent of increase of native and foreign born for the decade ending with 1850 is not shown, as the foreign born population was not separately returned for the census of 1840.

During the decade since 1880 the number of foreign born has increased 44.34 per cent in Illinois, 39.99 per cent in Michigan, 28.06 per cent in Wisconsin, and 74.60 per cent in Minnesota. In Ohio there has been an increase in foreign born during the past 10 years of 16.29 per cent, and in Indiana of 1.41 per cent.

For the 6 states as a whole the foreign born population has increased from 2,184,306 in 1880 to 2,978,280 in 1890, the total increase during the decade being 793,974, or 36.35 per cent. The native born element during the same period has increased from 9,803,135 in 1880 to 11,795,386 in 1890, being an increase of 1,992,251, or 20.32 per cent. In 1850 these 6 states contained 3,976,523 native born and 552,814 foreign born, the increase during the period of 40 years in native born being 7,818,863, or 196.63 per cent, and in foreign born 2,425,466, or 438.75 per cent.

Taking the total population for each of the states considered as returned at each census since and including 1850 as 100 per cent, and distributing it according to males and females, native and foreign born, and white and colored, the following results, expressed in percentages, are obtained:

Minnesota	41.15	58.85

In Minnesota 58.85 per cent of the males of voting age are foreign born, in Wisconsin 52.93 per cent, while in Indiana but 12.33 per cent are foreign born. For the 6 states as a whole 33.74 per cent of the males of voting age are foreign born.

The following table gives for each of the 6 states named the whole number of foreign born males 21 years of age and over, classified as regards the number who are aliens, which number is further subdivided as to those who can speak the English language or not, the number who have been naturalized, the number who have taken out first naturalization papers, together with the number for whom no information was obtained. This information regarding citizenship has been obtained in 1890 for the first time as a part of the decennial census.

CENSUS BULLETIN.

No. 206. WASHINGTON, D. C. September 17, 1892.

ANNUAL INTEREST CHARGE ON BONDED INDEBTEDNESS.

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE,
WASHINGTON, D. C., September 1, 1892.

The accompanying summary, prepared by Mr. J. K. UPTON, special agent in charge of the statistics of wealth, debt, and taxation, exhibits, by states and geographical divisions, the annual interest charge, average rate of interest, and the per capita interest charge of the combined state and local bonded indebtedness of the country for 1890, recapitulated in connection with the national bonded debt for same date, and all compared with like information for 1880.

The purposes of issue, dates of maturity, and rates of interest on the bonded debt of the country, national, state, and local, are shown in full in the final report of this office now in the hands of the printer, but as the details are voluminous and some time must necessarily elapse before the volume will be issued, it was deemed advisable to publish in advance a summary of results showing the amounts of interest charge.

No account has been taken of the floating debt in either period, there being a sinking fund held of almost precisely the same amount, and the interest received thereon would offset any amount paid on this kind of indebtedness. On all classes of bonded debt the rates are calculated upon actual official data for 1890, except for the comparatively small amount of school district indebtedness, which was necessarily approximated.

On account of the lack of information upon which to base a separation of the bonded and floating school district debt in 1890, the total debt of this character, amounting to $36,701,948, and the interest charge thereon, are herein included, while in 1880 of the total debt of this character, amounting to $17,535,411, only $9,869,117, or that portion reported as bonded, is included, thus relatively increasing the charge of 1890 to that extent.

Excepting the national bonded debt, the average interest rate has decreased during the decade 0.88 per cent.

The average interest charge on the aggregate bonded debt has decreased but 0.39 per cent. The decrease would have been much greater, but the government had no option on its 4.5 and 4 per cent bonds, which were worth a high premium in the market, or the interest rate could have easily been reduced by refunding its entire debt to 3 per cent, probably less, as it has since secured the extension,

C. O. P.—6,500

at the pleasure of the government, of $25,364,500 of 4.5 per cents at 2 per cent. Yet it necessarily continues to pay 4 per cent interest on $602,297,360 of bonds on which it has no option until 1907. From lack of such option a high rate of interest is also maintained in many of the states and municipalities.

The city of New York sold in 1889 $12,931,638 long time bonds at par, or above, though bearing only 2.5 per cent interest. There is no reason to suppose that the entire indebtedness of the city, of which $25,980,600 bears 7 per cent, $36,279,040 bears 6 per cent, $17,385,846 bears 5 per cent, and a large amount 4 per cent, could not have been refunded into bonds bearing a like low rate of interest had the city reserved an option of paying at its pleasure these high rate bonds, and numerous other like cases could be cited. While to a limited extent like conditions may have existed in 1880, it is believed that could all the bonded indebtedness of the country have been refunded in 1890, at the best rates obtainable, in bonds worth par in the market, the average rates on the resulting indebtedness would have been little, if any, in excess of 3.75 per cent, or a reduction of at least 1.5 per cent in the decade, an annual saving in interest on the debt as it stood in 1880 of $42,406,480, through the reduction of the interest rate alone.

Owing to the reduction of principal as well as rates, the annual burden of the interest charge has been decreased during the decade $53,610,409, or a decrease per capita from $2.95 in 1880 to $1.51 in 1890, or nearly 50 per cent.

The interest charge on every $1,000 of assessed valuation in 1880 was $8.76; in 1890 but $3.84, or over 56 per cent less.

Whatever increased expenditures may have become necessary through the extraordinary growth of the country, it is gratifying to know that through the reduction of principal, the lessening of the interest rate, and the increase of population and wealth, the burden of debt has been rapidly growing less, much more rapidly than the reduction of principal alone would indicate.

Robert P. Porter.

CENSUS BULLETIN.

No. 207. WASHINGTON, D. C. September 26, 1892.

AGRICULTURE.—COTTON PRODUCTION.

TEXAS, MISSOURI, VIRGINIA, KENTUCKY, KANSAS, OKLAHOMA.

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE,
WASHINGTON, D. C., September 2, 1892.

This bulletin, containing the preliminary statistics of cotton production in the states of Texas, Missouri, Virginia, Kentucky, and Kansas, and in the territory of Oklahoma, for the year ending May 31, 1890, and also, for convenience of comparison, statistics of cotton production in the 5 states as they appear in the reports of the Tenth, Ninth, and Eighth Censuses, has been prepared under the supervision of Mr. JOHN HYDE, special agent in charge of the statistics of agriculture.

In Texas the total area devoted to the cultivation of cotton in 1889–1890 was 3,932,755 acres, and the production of cotton 1,470,353 bales, as compared with a cultivated area of 2,178,435 acres and a production of 805,284 bales in 1879–1880. There was, therefore, an increase of 1,754,320 acres, or 80.53 per cent, in the area cultivated, and of 665,069 bales, or 82.59 per cent, in the number of bales produced, the yield in 1879–1880 being at the rate of 0.370 of a bale to the acre, or 2.705 acres to the bale, and in 1889–1890 at the rate 0.374 of a bale to the acre, or 2.675 acres to the bale. Of the 225 counties of which the state consisted on June 1, 1880, 142 were reported as having produced cotton to a greater or less extent the preceding season, while of the 244 counties into which it is now divided, 177 contributed in a greater or less degree to the cotton production of the year 1889–1890. Of the 19 counties created since 1880, 3 only, Irion, Mills, and Valverde, are reported as having produced cotton in 1889–1890. In 1879–1880 Robertson county had the largest acreage in cotton, and Lamar county the largest production. In 1889–1890 Ellis county had both the largest acreage and the largest production.

In Missouri the total area devoted to the cultivation of cotton in 1889–1890 was 54,886 acres, and the production of cotton 14,461 bales, as compared with a cultivated area of 32,116 acres and a production of 20,318 bales in 1879–1880. While, therefore, there was an increase of 22,770 acres, or 70.90 per cent, in the area cultivated, there was a decrease of 5,857 bales, or 28.83 per cent, in the number of bales produced, the yield in 1879–1880 being at the rate of 0.63 of a bale to the acre, or 1.58 acres to the bale, and in 1889–1890 at the rate of 0.26 of a bale to the acre, or 3.80 acres to the bale. Of the counties that produced cotton in 1879–1880, 7 of minor importance fail to appear among

C. O. P.—7m

the cotton producing counties of 1889–1890, while, on the other hand, 5 counties with a small acreage in cotton appear in the census report for the first time, 4 others for the first time since the census of 1870, and 2 others for the first time since that of 1860. The county having the largest area devoted to cotton culture in 1889–1890 was Dunklin, which also had the largest production.

In Virginia the total area devoted to the cultivation of cotton in 1889–1890 was 39,213 acres, and the production of cotton 5,375 bales, as compared with a cultivated area of 45,040 acres and a production of 19,595 bales in 1879–1880. There was, therefore, a decrease of 5,827 acres, or 12.94 per cent, in the area cultivated, and of 14,220 bales, or 72.57 per cent, in the number of bales produced, the yield in 1879–1880 being at the rate of 0.44 of a bale to the acre, or 2.30 acres to the bale, and in 1889–1890 at the rate of 0.14 of a bale to the acre, or 7.30 acres to the bale. The county having the largest acreage in cotton in 1889–1890 was Brunswick, which also had the largest production.

In Kentucky there were 16 counties from which cotton was reported in the year 1889–1890, against 37 counties in 1879–1880. The total area devoted to the cultivation of cotton in this state in 1889–1890 was 2,629 acres, and the production of cotton 873 bales, as compared with a cultivated area of 2,667 acres and a production of 1,367 bales in 1879–1880. There was, therefore, a decrease of 38 acres, or 1.42 per cent, in the area cultivated, and of 494 bales, or 36.14 per cent, in the number of bales produced, the yield in 1879–1880 being at the rate of 0.51 of a bale to the acre, or 1.95 acres to the bale, and in 1889–1890 at the rate of 0.33 of a bale to the acre, or 3.01 acres to the bale. The county having the largest acreage and production in 1889–1890 was Fulton.

The 6 counties in Kansas from which a small production of cotton is reported for 1889–1890 form part of the extreme southern tier bordering on Indian territory. The total area devoted to the cultivation of cotton in these counties in 1889–1890 was 731 acres, and the production of cotton 212 bales, being at the rate of 0.29 of a bale to the acre, or 3.45 acres to the bale. The county having the largest acreage and production was Chautauqua. No cotton was reported from Kansas in the year 1879–1880, but in 1869–1870 2 bales were reported from Cherokee county and 5 bales from Cloud county, and in 1859–1860 60 bales were reported from Doniphan county and 1 bale from Linn county.

In Oklahoma the total area devoted to the cultivation of cotton in 1889–1890 was 1,109 acres, and the production of cotton 425 bales, being at the rate of 0.38 of a bale to the acre, or 2.61 acres to the bale. With the exception of Greer county, which is in dispute, being claimed by Texas, and which produced 381 of the 425 bales, this territory was not created, nor were its lands thrown open to settlement, until 1889.

The only preliminary statistics of cotton production in the United States that now remain to be published are those for Indian territory.

The statistics for 1889–1890 given in this bulletin are subject to slight modification in the final report.

a Decrease. b North and South Dakota combined. c Dakota territory.

In the above table the number and per cent of increase of native and foreign born for the decade ending with 1850 is not shown, as the foreign born population was not separately returned for the census of 1840.

The foreign born in these 6 states have increased 47.69 per cent since 1880, while the native born have increased 40.11 per cent. The whole number of foreign born returned in 1880 was 732,523, while in 1890 they number 1,081,834. The native born in 1890 number 6,506,779, while in 1880 they numbered 4,644,147. From 1850 to 1890 the foreign born have increased 1,008.88 per cent, while the native born have increased during the same period 737.75 per cent. In 1850 the native born numbered 776,697 and the foreign born 97,561.

In both tables just presented the results in 1890 for the states of North Dakota and South Dakota have been combined so as to make comparisons with the population as returned for Dakota territory at the censuses of 1860 to 1880, inclusive. Comparing the population as returned in 1880 for Dakota territory according to the present limits of the states of North Dakota and South Dakota in 1890 the table on the following page is obtained.

a North and South Dakota combined. b Dakota territor

In all the states named the males have uniformly predominated at each census. The percentage of females in 1890, as compared with previous censuses, has increased relatively. In the 6 states, considered as a whole, the males represent 52.53 per cent and the females 47.47 per cent of the entire population, the excess of males being in the aggregate 384,321.

Considering the distribution of population according to native and foreign born, it is seen in 1890 that 33.73 per cent of the population of North Dakota and South Dakota combined are foreign born and 38.32 per cent as returned for Dakota territory in 1880. The foreign born in 1890 represents 16.95 per cent of the total population of Iowa, 8.77 per cent of the total population of Missouri, 19.13 per cent of the total population of Nebraska, and 10.36 per cent of the total population of Kansas.

In all the states considered the colored element forms only a very small percentage of the total population, the highest percentages being 5.63 for Missouri, and 3.54 for Kansas.

The following table gives the percentage of native and foreign white, and total colored in 1880 and 1890; also for 1890 the percentage which the native white of native parents and the native white of foreign parents is of the total population of each of the 6 states named:

Males of voting age are classified according to native and foreign born, the results being expressed in percentages, as follows:

STATES.	MALES OF VOTING AGE.	
	Native born.	Foreign born.
	Per cent.	*Per cent.*
Total for 6 states	74.58	25.42
Iowa	70.08	29.92
Missouri	82.89	17.11
North Dakota	35.11	64.89
South Dakota	55.65	44.35
Nebraska	68.20	31.80
Kansas	80.93	19.07

Of the whole number of males of voting age in the 6 states considered, 25.42 per cent are foreign born and 74.58 per cent native born. In North Dakota 64.89 per cent of the males of voting age are foreign born, and in South Dakota, 44.35 per cent are foreign born.

The following table gives the number of foreign born males 21 years of age and over, classified as to those who have been naturalized, who have taken out first naturalization papers, or who are aliens. The aliens, however, are further classified as to whether they can speak the English language or not. For about 10 per cent of the foreign born adult males no information regarding citizenship was obtained:

The following table gives the results regarding citizenship of foreign born adult males, expressed in percentages:

STATES.	Total aliens.	Naturalized.	First papers.	Unknown.
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*
Total for 6 states	16.60	66.15	7.11	10.14

In North Dakota 26.53 per cent of the foreign born adult males are aliens, 48.87 per cent have been naturalized, and 20.31 per cent have taken out first naturalization papers.

The following table shows for the 6 states considered a classification of the aliens according to whether they speak the English language or not, the results being expressed in percentages:

In Wisconsin the total area devoted to the cultivation of cereals in 1889 was 4,319,002 acres, as compared with 4,327,294 acres in 1879. There was an increase of 270,579 acres in the area in barley, of 43,341 acres in that in buckwheat, of 104,948 acres in corn, of 671,554 acres in oats, and of 105,366 acres in rye. This total increase of 1,195,788 acres was, however, more than offset by a decrease of 1,204,080 acres, or 61.81 per cent, in the area in wheat. Of the 68 counties of the state, 16 produced 77.04, 55.87, 46.35, and 47.26 per cent of the total barley, corn, oats, and wheat production of the state. On the other hand, there are in the Wisconsin forest belt 9 counties, with a combined area of 7,418,880 acres, that had an aggregate of only 1,300 acres in cereals, and a total cereal production of only 29,118 bushels.

In Minnesota the total area in cereals in 1889 was 6,297,044 acres, as compared with 4,234,187 acres in 1879. There was an increase of 242,490 acres in the area in barley, of 18,413 acres in that in buckwheat, of 462,953 acres in corn, of 961,789 acres in oats, of 49,255 acres in rye, and of 327,957 acres in wheat. In 28 counties, principally in the southeastern part of the state, there was a total decrease of 1,365,399 acres in the area in wheat. In the remaining counties, however, there was an increase of 1,693,356 acres in that product. In 6 counties in the Red River valley the area in wheat showed an increase of 584,256 acres, 314,783 acres of which represented the increase in Polk and Norman counties.

In North Dakota the total area in cereals in 1889 was 3,233,993 acres, as compared with 106,505 acres in the corresponding portion of Dakota territory in 1879. There was an increase of 107,001 acres in the area in barley, of 114 acres in that in buckwheat, of 11,051 acres in corn, of 384,409 acres in oats, of 1,568 acres in rye, and of 2,623,345 acres in wheat. Of the increase in the area in wheat, 1,455,761 acres represented the increase in the 6 counties bordering on the Red River of the North. The production of cereals in this state in 1889 was considerably reduced by drought.

In South Dakota the total area in cereals in 1889 was 3,701,604 acres, as compared with 346,733 acres in the corresponding portion of Dakota territory in 1879. There was an increase of 83,552 acres in the area in barley, of 1,273 acres in that in buckwheat, of 663,386 acres in corn, of 520,414 acres in oats, of 6,844 acres in rye, and of 2,079,402 acres in wheat. As in the case of North Dakota, the production of cereals in this state in 1889 was considerably reduced by drought.

Taking one tier of counties on each side of the Red River valley, from the international line to the southern boundaries of Richland county, North Dakota, and Wilkin county, Minnesota, it is found that there was a total increase of 2,463,450 acres, or 1,424.54 per cent, in the area devoted to cereals in that well-known region between 1879 and 1889.

In Michigan the total area devoted to the cultivation of cereals in 1889 was 3,891,686 acres, as compared with 3,389,861 acres in 1879. There was an increase of 44,799 acres in the area in barley, of 36,098 acres in that in buckwheat, of 74,941 acres in corn, of 549,572 acres in oats, and of 117,939 acres in rye. On the other hand, there was a decrease of 321,524 acres in the area in wheat. Of the 84 counties of the state, 25 produced 76.47, 71.13, and 74.82 per cent of the total corn, oats, and wheat production of the state.

In Ohio the total area in cereals in 1889 was 6,785,280 acres, as compared with 6,857,556 acres in 1879. There was a decrease of 20,390 acres in the area in barley, of 8,078 acres in that in buckwheat, of 92,370 acres in corn, and of 286,549 acres in wheat, partially offset by an increase of 304,967 acres in the area in oats, and of 30,144 acres in that in rye. Except that no rye is reported from Jackson county and no barley from Vinton and Washington counties, all the different cereals are reported in larger or smaller quantities from each of the 88 counties of the state.

In Kentucky the total area in cereals in 1889 was 4,556,098 acres, as compared with 4,695,230 acres in 1879. There was a decrease of 14,313 acres in the area in barley, of 640 acres in that in buckwheat, of 60,794 acres in corn, of 43,871 acres in rye, and of 261,414 acres in wheat. On the other hand, there was an increase of 241,900 acres in the area in oats. Corn and oats were reported from every county in the state, rye, generally in small quantities, from all but Lyon county, and wheat from all but Bell county.
