NOTE

The totals for the United States for 1925 and earlier years as given in Table I differ from those published in the report for 1925 because of the exclusion of the figures for the "Poultry killing and dressing" industry and because of the inclusion, except for 1925, of those for the "Coffee and spice, roasting and grinding" industry, which had not been included in the report for 1925. No data were collected in regard to the "Poultry killing and dressing" industry at the census for 1927, and no data were tabulated at the census for 1925 for the "Coffee and spice, roasting and grinding" industry. The statistics for geographic divisions and States for 1925, 1923, and 1921 have been adjusted in the same manner as those for the United States, but the division and State statistics for 1919 have not been adjusted. Data for establishments reporting products valued at less than $5,000 are included in the statistics for 1919 but not in those for later years. See "General explanations," pages 3–12.

TOTALS FOR ALL MANUFACTURING INDUSTRIES

Number of establishments	191,866	Horsepower	38,825,681	Cost of materials, supplies, containers for products, fuel, and power	$35,133,136,889
Persons engaged	9,783,438	Salaries and wages	$14,078,327,150	Cost of materials, supplies, and containers for sale with products	33,235,799,366
Proprietors and firm members	132,681	Salaries [1]	3,229,524,618	Cost of fuel and power	1,897,337,523
Salaried officers and employees [1]	1,301,002	Wages	10,848,802,532	Value of products	62,718,347,289
Wage earners (average for the year)	8,349,755			Value added by manufacture [3]	27,585,210,400

[1] Not including data for number and salaries of officers and employees of central administrative offices, no such data having been collected for 1927. At the census for 1925, 84,646 officers and employees of central administrative offices, with salaries aggregating $225,512,798, were reported. These figures were not included in the totals for that year, as given in the report entitled Statistics for Industries, States, and Cities, but were given in footnote 5 to Table II.

[2] The amounts in this column represent the total values of products reported by establishments engaged primarily in the manufacture of the specified classes of products. Thus, although the figures given are in most cases fairly close approximations of the actual values of the classes of products covered by the designations of the industries and their branches, they do not show these values exactly, for the reason that many establishments manufacture minor products not normally belonging to the industries in which such establishments are classified. (See "Assignment of establishments to industries," p. 17.)

[3] Value of products less cost of materials, supplies, containers for products, fuel, and power.

[4] Cost of fuel and power not reported separately; included with cost of materials, supplies, and containers.

TABLE III.—SUMMARY FOR STATES, BY INDUSTRIES, 1927, WITH COMBINED STATISTICS FOR ALL INDUSTRIES, 1927 AND 1925

[This table presents, for each State, statistics for all industries for which separate figures can be given without disclosing the data for individual establishments. The statistics for the "Poultry killing and dressing" industry have been deducted from the totals for 1925, as no data for this industry were collected at the census for 1927. Data for the "Coffee and spice, roasting and grinding" industry are included in the figures for 1927, but no statistics for this industry were compiled at the census for 1925. For this reason the 1925 and 1927 figures for some of the States are not strictly comparable, but in most cases the comparability is affected to only a slight extent. (See "General explanations," pp. 3–12; in particular, secs. 21 and 23]

TABLE IV.—SUMMARY FOR CITIES HAVING 100,000 INHABITANTS OR MORE, BY INDUSTRIES, 1927, WITH COMBINED STATISTICS FOR ALL INDUSTRIES, 1927 AND 1925

[This table presents, for each city having 100,000 inhabitants or more (as estimated for July 1, 1928), statistics for all industries for which separate figures can be given without disclosing data for individual establishments. Except as explained by footnotes, these statistics refer only to establishments actually located within the boundaries of the respective cities as they were constituted at the close of the census year. Data for the "Coffee and spice, roasting and grinding" industry are included in the figures for 1927, but no statistics for this industry were compiled at the census for 1925 except in the case of San Francisco. For this reason the 1925 and 1927 figures for some of the cities are not strictly comparable, but in most cases the comparability is affected to only a slight extent. (See "General explanations, pp. 3–12; in particular, secs. 21 and 23]
