NATIVITY AND PARENTAGE OF THE FOREIGN WHITE STOCK

(This is one of a series of reports presenting summary statistics on selected characteristics of the population. The table presented here is preprinted from the forthcoming special report, Series P-E, No. 3A, "Nativity and Parentage")

One out of every four white persons in the United States on April 1, 1950, was of foreign white stock (i.e., foreign born or of foreign parentage), according to figures from the 1950 Census of Population released today by Robert W. Burgess, Director, Bureau of the Census, Department of Commerce. The foreign white stock in 1950 numbered about 33.8 million, or 6.1 million below the all-time high of 39.9 million in 1930. Foreign-born whites declined 3.8 million, or 27.3 percent, over the 20-year period to 10.2 million, and native whites of foreign or mixed parentage were down 2.3 million, or 8.9 percent, to 23.6 million.

The leading countries of origin of the foreign white stock were Germany and Italy. The number of persons of German descent--4.7 million--was only slightly larger than the 4.6 million persons born in Italy or of Italian parents, whereas 20 years earlier the figures were 6.9 million and 4.5 million, respectively. Other leading countries of origin were as follows: Canada, 3.0 million; Poland, 2.8 million; U.S.S.R. (Russia), 2.5 million; Ireland, 2.4 million; and England and Wales, 2.0 million.

The foreign white stock was concentrated largely in the highly urbanized, populous States. New York led with 6.8 million, or one-fifth of the total, followed by California with 3.0 million. Other States with 1.5 million or more were Pennsylvania, Illinois, Massachusetts, New Jersey, Michigan, and Ohio. These eight States accounted for about three-fourths of the foreign-born whites and two-thirds of the native whites of foreign or mixed parentage.

The figures on the foreign-born whites are from a complete count; those on the native whites of foreign or mixed parentage are from a 20-percent sample. The forthcoming report, Series P-E, No. 3A, will provide a statement on the reliability of the sample data, as well as a fuller discussion of the terms.

DEFINITIONS AND EXPLANATIONS

Country of origin.--The classification of the foreign white stock by country of origin is based on international boundaries as formally recognized by the United States in April 1950. In view of the many boundary changes in Europe, some difficulty has been encountered in making a consistent classification by country of origin from one census to another. In the case of countries which have maintained the same boundaries over a long period of time, the classification appears to be reasonably adequate. Where country boundaries have changed, the classification is apparently less accurate. Thus, for example, the figures for the individual countries of Central and Eastern Europe are open to question. Likewise, in the 1950 Census the figures for Northern Ireland and Ireland appear to be at fault. In previous censuses the population schedule carried an instruction to the enumerator to distinguish between Ireland (Eire) and Northern Ireland.

Nativity and parentage.--A person born in the United States or any of its Territories, possessions, etc., is counted as native. Also included as native are the small group of persons who, although born in a foreign country or at sea, were American citizens at birth because their parents were American citizens. The small number of persons for whom place of birth was not reported was assumed to be native.

The native white population is classified by parentage into four groups: (1) Native parentage (both parents born in the United States or in the outlying possessions, etc.); (2) foreign parentage (both parents foreign born); (3) father foreign (father foreign born and mother native); (4) mother foreign (mother foreign born and father native). The last two of these groups are frequently combined under the heading "Mixed parentage," and the last three, under the heading "Foreign or mixed parentage."

Foreign white stock.--The term "foreign white stock" is used to indicate the combined total of two classes, namely, the foreign-born white and the native white of foreign or mixed parentage. The "foreign white stock," therefore, comprises those persons who were born abroad or who had at least one parent foreign born.
