CORRECTION NOTE

As stated on page III, chapter C corresponds to the PC(1)-C individual State reports. After completion of the computer tabulation on which the PC(1)-C reports were based, a misclassification was discovered between the farm and nonfarm components of the rural population. This misclassification did not affect the data for the rural area as a whole, or for urban areas or the State as a whole. Certain portions of the tabulations were reprocessed for presentation in chapter C and corrected farm-nonfarm figures are presented here. As a result of this reprocessing, however, the distributions by certain characteristics for the total rural population implicit in the farm-nonfarm data presented in tables 48 to 58, 70 to 80, and 134 to 137 may not always be consistent with the area-wide totals shown in chapter C; these differences, which are relatively minor, may occur in the data on school enrollment, residence in 1965, occupation, income, and poverty.

Because of apparent processing errors, "mean income" is not shown in table 89 for the 59 families with female head in the urban balance of the Lincoln SMSA. Similarly, for Crete city in table 118, "mean income" is not shown for the 1,004 families and the 2,059 families and unrelated individuals, and "mean other income" is not shown for the 575 families reporting such income. The effect of these errors on the income data shown in this report is minor.
