7200–7300–7400	Texas	92
7500–7600	Virginia	101

EXPLANATION OF CODE NUMBERS

In the following code the four figures in the first column under the caption "County" represent the State and county, the first two figures representing the State and the last two the county. The figures used for the several States, 1 to 49 (including the District of Columbia), in every case follow the alphabetical order of the State names. (See p. 2.) There are 8 States, however, which have more than 99 counties each. For these, except Texas, which has more than 199 counties, each State has two consecutive State numbers, the first State beginning with 60 and the others running subsequent thereto. In this way, Georgia, with 161 counties, is represented by 60 and 61, the county numbers running consecutively from 6001 to 6161. Texas, with 254 counties, has 3 consecutive numbers, 72, 73, and 74, the county numbers running consecutively from 7201 to 7454.

The two figures in the second column under the caption "City" represent the designated city, and are given for all cities in the State having 10,000 population and over, according to estimates of the 1930 enumeration. Some of these listed cities, when the results of the enumeration become known, may prove to have less than this minimum population, while a few others, enjoying unusual and unanticipated growth, and which will show more than 10,000 population when the results of the 1930 enumeration are known, may have been omitted from the list. The number representing each city corresponds with the alphabetical order of the various cities listed for the given State. In accordance with bureau practice, towns, boroughs, and villages of 10,000 population and over are classed as cities in the cases of certain States.

The cities in the State of Virginia, and also Baltimore and St. Louis, are separate from and independent of the counties; for this reason they bear county numbers. In a few other cases, such as Philadelphia, Denver, and San Francisco, the city is coextensive with the county, and references thereto have been made in footnotes. The city of New York is exceptional in that it comprises five counties, each county being a borough within New York City. In this case each borough bears the same city number.

GEOGRAPHICAL GROUPS OF STATES, GIVING THE NUMBER OF COUNTIES AND THE NUMBER OF LISTED CITIES IN EACH STATE

CODE NUMBER AND STATE	Number of counties	Number of listed cities	Page
NEW ENGLAND DIVISION	67	126	
1800 Maine	16	11	42
