FTSR LETTER NO. 68

TO: Regional Commissioners and Other Principal Customs Field Officers, Department of Commerce Field Offices, Exporters and Others Concerned

FROM: Bureau of the Census

SUBJECT: Correction of Certain Errors in Public Bulletin B-7

Certain errors have been found in recently issued Public Bulletin B-7 announcing changes effective January 1, 1970 in the 1965 Edition of Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. The commodity descriptions on reprint page 0-015 of the bulletin were inadvertently switched for Schedule B Numbers 052.0910 and 052.0950. Neither classification was changed effective January 1, 1970 and both still should read exactly as they did prior to the issuance of Public Bulletin B-7:

Schedule B number	Commodity Description	Unit of Quantity
052.0910	Prunes, dried	Lb.
052.0950	Peaches, dried	Lb.

In addition, the unit of quantity was omitted on reprint page 5-056 for Schedule B Number 581.3230, "Cellulose Ester Molding and Extrusion Compositions". The unit of quantity "LB" should have been shown for this classification.

The above changes should be made on all copies of the affected reprint pages.

SPECIAL ANNOUNCEMENT

New Export (Schedule B) Commodity Classifications Effective January 1, 1971.

Following is a list of Schedule B numbers that become obsolete December 31, 1970 and the new Schedule B numbers that replace them effective January 1, 1971. It is imperative that steps be taken by all shippers to insure that the new Schedule B numbers in this list are used on Shipper's Export Declarations for all shipments to be made on or after January 1, 1971.

Obsolete numbers	New numbers effective Jan. 1, 1971	Commodity descriptions	Units of quantity
	514.7018	Ammonium paratungstate[1]	Lb.
671.3200		Iron or steel powders.....	Lb.
671.3300		Sponge iron or steel.....	Lb.
	671.3400	Iron or steel powder, and sponge iron or steel.....	Lb.
671.5090		Ferroalloys, n.e.c.....	Lb.
	671.5060	Ferrotungsten.....	Lb.
	671.5080	Ferroalloys, n.e.c.....	Lb.

[1]Previously included in Schedule B number 514.7050. Number 514.7050 is still a good number, but it now excludes ammonium paratungstate.

In addition, the following Schedule B numbers will have changes in units of quantity effective January 1971:

Schedule B numbers	Schedule B commodity descriptions	Obsolete units of quantity	New units of quantity effective 1-1-71
680.2000	Gold bullion, refined	Cnt. T. oz.	T. oz.
718.2910	Printing presses, letterpress type	-	No.
718.2920	Printing presses, offset type	-	No.
718.2930	Printing presses, gravure type	-	No.
718.2940	Printing presses, n.e.c.	-	No.
718.2950	Printing machines, n.e.c.	-	No.

The above revisions will be included in the 1971 edition of Schedule B.

A UNITED STATES DEPARTMENT OF COMMERCE PUBLICATION

Changes in

SCHEDULE B–STATISTICAL CLASSIFICATION OF DOMESTIC AND FOREIGN COMMODITIES EXPORTED FROM THE UNITED STATES

JANUARY 1, 1965, EDITION

CHANGES ARE EFFECTIVE JANUARY 1, 1970

PUBLIC BULLETIN B-7

Public Bulletin B-7 incorporates further revisions in the 1965 Edition of Schedule B to become effective January 1, 1970. This is in accord with the Bureau's policy of updating this classification Schedule annually to reflect the changing needs of industry and government.

Please note, in particular, the pages immediately following this cover sheet summarizing those Schedule B numbers which become obsolete as of January 1, 1970 and those which replace them. Since reprint pages necessitate the reproduction of all material on a page whether or not changed, these summary pages are included to provide you with a compact listing of all changes.

EXPORTERS ARE ADVISED THAT IN ADDITION TO SUBSTITUTING THESE REPRINT PAGES FOR THOSE THEY SPECIFICALLY REPLACE, THE FOLLOWING PAGES SHOULD BE DESTROYED:

0-021A	5-045A	6-015A	6-061A	6-103A	7-052A

	724.9958	Closed circuit television systems and equipment, n.e.c., (specially designed cameras, monitors, receivers, scan converters, and control consoles)	-
	724.9961	Parts and accessories, n.e.c., for tuners and chassis, radio and television receivers	-
	724.9963	Parts and accessories, n.e.c., for radio and television broadcast equipment, n.e.c.	-
729.3030		Electron tubes, n.e.c., transmitting, industrial and special purpose	NO.
	729.3032	Electron triode, tetrode and modulator tubes, transmitting and industrial types	NO.
	729.3034	Klystron electron tubes	NO.
	729.3036	Magnetron electron tubes	NO.
	729.3038	Traveling wave electron tubes	NO.
	729.3039	Electron tubes, n.e.c., transmitting, industrial and special purpose	NO.
729.3045		Silicon controlled rectifiers	NO.
729.3052		Semiconductor diodes, n.e.c., and rectifiers, n.e.c.	NO.
	729.3042	Thyristors	NO.
	729.3057	Semiconductor diodes and diode assemblies, n.e.c.	NO.
	729.3058	Semiconductor rectifiers and rectifier assemblies	NO.
729.3055		Transistors	NO.
	729.3051	Transistors, silicon	NO.
	729.3053	Transistors, n.e.c.	NO.

[1]These are still good numbers. They now exclude any closed circuit television equipment which may have previously been included.

SUMMARY OF 1969 SCHEDULE B NUMBERS WHICH WILL BECOME OBSOLETE EFFECTIVE JANUARY 1970 AND THE SCHEDULE B NUMBERS WHICH WILL REPLACE THEM-Continued

Part 1: Schedule B Numbers Which Will Become Obsolete as a Result of Having Been Broken Out or Combined—Continued

DO NOT USE OBSOLETE NUMBERS AFTER DECEMBER 31. 1969

Obsolete Schedule B number	New Schedule B number effective 1-1-70	Schedule B commodity description	Unit of quantity
729.3060		Solar cells	NO.
729.3067		Solid state semiconductor devices, n.e.c.	NO.
	729.3069	Solid state semiconductor devices, n.e.c.	NO.
729.3062		Semiconductor integrated circuits	NO.
	729.3059	Semiconductor monolithic digital integrated circuits	NO.
	729.3061	Semiconductor monolithic analog integrated circuits	NO.
	729.3063	Semiconductor hybrid integrated circuits, thin film	NO.
	729.3064	Semiconductor hybrid integrated circuits, thick film	NO.
	729.3068	Semiconductor integrated circuits, n.e.c.	NO.
729.4140		Ignition coils, distributors, magnetos and ignition equipment, n.e.c., complete, for internal combustion engines	-
	729.4135	Generators, alternators and regulators, for internal combustion engines	NO.
	729.4145	Ignition coils, distributors, magnetos and ignition equipment, n.e.c., for internal combustion engines.	-
729.5250		Automatic temperature controls, electric or electronic	NO.
729.5272		Industrial process type indicating, measuring, recording, or controlling instruments, n.e.c., electric or electronic	NO.
	729.5252	Automatic temperature controls, electric or electronic, excluding industrial process type	NO.
	729.5274	Industrial process panel board instruments, electric or electronic, display and control, which operate from standard transmission signals (AC or DC milliampere or millivolt, or telemetering signals)	NO.
	729.5276	Industrial process temperature instruments, direct-deflection, electric or electronic, controlling, indicating, measuring, recording and transmitting	NO.
	729.5278	Industrial process temperature instruments, self-balancing, electric or electronic, controlling, indicating, measuring, recording and transmitting	NO.
	729.5280	Industrial process pressure, draft and vacuum instruments, electric or electronic, controlling, indicating, measuring, recording and transmitting	NO.
	729.5282	Industrial process flow and liquid level instruments, electric or electronic, controlling, indicating, measuring, recording and transmitting	NO.
	729.5284	Industrial process humidity instruments, electric or electronic, controlling, indicating, measuring, recording	NO.
	729.5288	Industrial process instruments for variables, n.e.c., electric or electronic, direct-deflection, controlling, indicating, measuring, recording and transmitting	NO.
	729.5290	Industrial process instruments for variables, n.e.c., electric or electronic, self-balancing, controlling, indicating, measuring, recording and transmitting	NO.
	729.5292	Industrial process type instruments, electric or electronic, n.e.c.	NO.
729.5260		Meteorological and navigation instruments, electric or electronic	NO.
729.5266[1]		Physical properties testing and inspecting instruments, electric or electronic	NO.
729.5275		Instruments for measuring, indicating, recording, testing, or controlling nonelectrical quantities, electric or electronic type, n.e.c.	NO.
	729.5257	Meteorological instruments, electric or electronic	NO.
	729.5258	Sonar instruments, electric or electronic	NO.
	729.5259	Aircraft instruments, amplifying, computing, controlling, indicating and transmitting, electric or electronic, n.e.c.	NO.
	729.5261	Navigational instruments, electric or electronic (excluding aircraft instruments, n.e.c., electric or electronic)	NO.
	729.5295	Instruments, n.e.c., electric or electronic, for controlling, indicating, measuring, recording, testing and transmitting nonelectric quantities	NO.
729.9120		Electro-magnets, and electro-magnetic appliances	NO.
	729.9115	Electromagnetic brakes and clutches, and parts, n.e.c.	-
	729.9125	Electromagnets and electromagnetic appliances, n.e.c.	-
729.9220		Industrial electric induction and dielectric heating equipment, n.e.c.	-
	729.9218	Soldering irons, electric	-
	729.9222	Industrial electric induction and dielectric heating equipment, n.e.c.	NO.
729.9530		Capacitors (condensers), fixed, n.e.c., electronic components	-
	729.9525	Capacitors (condensers), fixed, ceramic, dielectric, electronic components	NO.
	729.9535	Capacitors (condensers), fixed, n.e.c., electronic components	NO.
729.9810		Electronic parts, n.e.c., of machinery and appliances, n.e.c.	NO.
	729.3080	Piezoelectric crystals, including filters, mounted, and parts, n.e.c.	-
	729.9815	Electronic parts, n.e.c., of machinery and appliances, n.e.c.	-
729.9920		Electrical apparatus, n.e.c., and parts, n.e.c.	-
	722.1065	Rotating equipment, n.e.c.	-
	729.9930	Electrical apparatus, n.e.c., and parts, n.e.c.	-
732.0500		Truck and bus bodies	-
732.8038		Parts and accessories, n.e.c., new, for assembly, for nonmilitary motor vehicles, n.e.c.	NO.
732.8048		Parts and accessories, n.e.c., new, for replacement, for nonmilitary motor vehicles, n.e.c.	-
	732.8100	Truck, bus and passenger car bodies, new	-
	732.8938	Parts and accessories, n.e.c., new, for assembly, for nonmilitary motor vehicles, n.e.c.	NO.
	732.8948	Parts and accessories, n.e.c., new, for replacement, for nonmilitary motor vehicles, n.e.c.	-

[1]This is still a good number. It now excludes those instruments which are exclusively aircraft instruments.

When reporting exports of parts of machinery or other commodities, all possible classifications should be considered and the major headings and directives as well as the descriptions for such classifications should be carefully reviewed before a decision is made regarding the 7-digit code to be used.

Classification of Equipment, Parts, and Accessories Exported as Scrap

Machines, equipment, vehicles or apparatus, or parts or accessories therefore, should be described and classified as scrap on the Shipper's Export Declaration when they are being sold or shipped as scrap metal or when the known direct end use abroad is for scrapping (remelting for use in new production). This rule applies whether the physical characteristics or method of packaging identifies the items as scrap, or whether the items being shipped are in their original form or substantially their original form. The nature of the transaction as it is understood by the exporter and as reflected in the commercial documents covering the transaction is the basic criterion in classifying such shipments as scrap.

The description on the Shipper's Export Declaration, in addition to identifying the shipment as scrap, should specify the metal of which the item or items are made, and the Schedule B number for the appropriate classification for scrap of that metal should be shown in Column 13.

Classification of Shipping Containers in Which Commodities are Exported

Attention is called to the classifications which are provided for specified types of containers for storage and transport. In this new edition of Schedule B, separate commodity numbers, codes 632.2099 and 692.9999 are provided for filled or unfilled shipping containers which are moving in and out of the United States as instruments of international trade. These numbers are to be used for containers of domestic or foreign manufacture, exported empty and returned filled or exported filled and returned empty or filled, when moving as instruments of international trade. Shippers are cautioned to carefully read the directives for the commodity numbers covering containers for storage and transport. (Reworded)

Classification of Military-Type Equipment

In the case of some commodities (notably, clothing) items of a military type are classified separately from similar items which are other than military. However, in many cases military-type items are not classified separately but are included in the same classifications with shipments of the same commodity for other uses. Shippers of military-type items may find some of them covered by listings in the index which indicate "military." For military-type items not so listed, locate the Schedule B number which covers the item by name. If there is no directive on the page where that Schedule B number appears giving information as to the Schedule B number for military-type items, the military shipment is to be included under the Schedule B number which covers the commodity by name. (For purposes of Schedule B classification, "military" means manufactured to military specifications.)

Commodities Donated for Relief or Charity by Individuals or Private Agencies

Separate classifications are provided in the schedule for exports of certain commodities donated for relief or charity by individuals or private agencies. In general, such classifications are provided for those commodities which are known to be, or are likely to be, exported for relief or charity in fairly sizeable amounts. The classes which are provided for shipments of this type are as follows:

022.2030 - Nonfat dry milk
023.0010 - Butter
023.0030 - Anhydrous milk fat
024.0010 - Cheese and curd
041.0010 - Unmilled wheat, including spelt or meslin
042.2010 - Milled rice
044.0010 - Unmilled corn
046.0110 - Wheat flour, except meal and groats (New commodity number)
046.0210 - Wheat meal and groats (New commodity number)
047.0210 - Corn meal
048.1110 - Bulgar wheat
048.1120 - Rolled wheat
048.1130 - Breakfast cerals prepared for cooking, not elsewhere classified
048.8240 - Corn-soya-milk blended food product (New commodity number)
048.8243 - Wheat-flour-soya blended food product (New commodity number)
054.2005 - Dried beans, except for seed
091.4020 - Shortening (Commodity number changed)
099.9900 - Food, donated for relief or charity by individuals or private agencies, not elsewhere classified
421.2030 - Soybean salad oil
421.3030 - Cottonseed salad oil
421.8030 - Other salad oils
431.5000 - Oils and fats, not elsewhere classified
541.8000 - Medicinal and pharmaceutical products
841.8000 - Clothing (new clothing exported for relief or charity by individuals and private agencies and all used clothing for relief or charity whether exported by individuals, private agencies or government agencies)
931.0020 - Commodities donated for relief or charity by individuals or private agencies, not elsewhere classified

In all cases, exports of commodities donated for relief or charity by individuals or private agencies should be reported under one of the classes listed above and not under other commodity classifications in the schedule. Commodity number 931.0020 should be used only in those cases where a more specific number has not been provided. The classes listed above should not be used for shipments by government agencies (United States, foreign or international) even though the shipments may be described as exported "for relief or charity", except for shipments of used clothing by government agencies which are included

under commodity number 841.8000. All other shipments for relief or charity by government agencies are to be reported along with regular commercial shipments under the applicable classification for the commodity being exported.

Classification for Reporting the Value of Repairs and Alterations

In the 1965 edition of Schedule B, a classification has been established for the value of repairs and alterations. Under this classification (commodity number 931.0010), shippers should report the value of repairs and alterations made on articles exported from the United States after having been imported for such purposes. The value to be reported should represent the total value of processing in the United States, including the value of parts and labor. The value of the article which was imported to be repaired or altered should not be included in the value reported for commodity number 931.0010.

Classification of Toys

When classifying exports of toys, reference should be made to the commodity classifications under group code 894. In general, toys are not intended to be reported under classifications for items which have the same name but are not toys. For example, toy trucks are not to be reported as trucks (codes 732.0204 through 732.0292).

Classifications With Double Units of Quantity

For some commodities (principally textiles), shippers are required to report net quantity information in two units, such as pound and square yard. For such commodities, two consecutive reporting numbers are provided in the schedule. Net quantity information for each reporting number is required to be shown on the Shipper's Export Declaration in the specified unit. Value is required to be reported only with the number which has a superior "v" shown following the unit of quantity.

Items Valued $250 or Under

In accordance with the Foreign Trade Statistics Regulations, Shipper's Export Declarations are not required to be filed for shipments (except those requiring a validated export license) to any Free World country except Southern Rhodesia, where the value of the commodities classified under a single Schedule B number and shipped on the same exporting carrier from one exporter to one importer is $250 or under. (For mail shipments not requiring a validated export license, declarations are not required to be filed for commercial shipments valued $250 or under to any destination or for noncommercial shipments regardless of value shipped to any destination.) In any instance where a Shipper's Export Declaration is required to be filed for a shipment valued $250 or under, the shipment (except those requiring a validated export license) may be reported under Schedule B number 931.0030 if the conditions outlined in the directives given in the schedule for this classification are met. (REVISED)

Trademarks and Brand Names in Schedule B

The lists of export commodities, under the numbered classifications herein, include some trademarks and brand names, either alone or coupled with the common commercial identification or description of the commodity. The inclusion of trademarks and brand names in Schedule B results from the practice of sometimes referring to commodities being exported in terms of such marks rather than in terms of more complicated and technical specifications which otherwise might be necessary for proper classification in the Schedule B categories. A substantial proportion of Shipper's Export Declarations are prepared by clerks or other nontechnical employees of export houses, freight forwarders, etc., who must rely on the designation of the commodity appearing on commercial papers such as invoices and who cannot be expected to know in all cases the detailed technical specifications of products solely designated by trademarks or brand names in such commercial papers. Commercial invoices and the Shipper's Export Declarations which are prepared from them, therefore, frequently refer to export shipments solely in terms of trademarks or brand names such as Cosmoline, Satina, Renuzit, etc. Without the inclusion of such trademarks in Schedule B it would be difficult to classify shipments of such products in their proper Schedule B classifications.

The Bureau of the Census is cognizant that such trademarks and brand names identify the products of specific manufacturers and that trademark owners may be genuinely concerned that their trademarks and brand names may, through indiscriminate use, become common names or "generic designations" for the products in connection with which they are used. The United States Patent Office has compared the lists of export commodities in Schedule B with the trade mark registrations which are in full force and effect in that Office, and a real effort was made to identify by a symbol and footnote all marks presently registered in that Office which appear in the numbered classifications in Schedule B. If, through inadvertence, a trademark registered in the United States Patent Office appears in Schedule B without such identification, the owner of such mark should notify the United States Patent Office, Trademark Operation, so that correction may be made in future printings.

The inclusion of trademarks and brand names (registered or unregistered in the U.S. Patent Office) in the lists of export commodities herein is necessitated by practical considerations of administration as stated above and in no case should such inclusion be considered as prejudicing, or having, or intending to have, any adverse effect upon the rights of the trademark owner.

V This commodity number and the one preceding it are provided for the same classification and both are required to be shown on the Shipper's Export Declaration, each on a separate line. On the line with the preceding commodity number, shipping weight and value columns should be left blank, and net quantity reported in terms of the unit specified for the commodity number. On the line with this commodity number, which carries the superior "v," shipping weight (when required) and value should be shown, and net quantity report in terms of the unit specified.
● New item or item which has been transferred from one commodity number to another.
