Chapter V.—ESTABLISHMENTS CLASSIFIED ACCORDING TO SIZE

The statistics in the tables in this chapter are presented for the purpose of showing the concentration of manufactures in large establishments and the extent to which this concentration has increased from census to census.

In making comparisons between different census years, and particularly between 1914 and 1919, the effect of advancing prices must be taken into account. If every manufacturing establishment in the United States had produced exactly the same quantity of commodities in 1919 as in 1914, there nevertheless would have been a great increase in the size and relative importance of the "$1,000,000 and over" class, together with more or less pronounced changes in the other classes. (See Quantity of products and number of wage earners as standards of measurement, sec. 23, p. 9.)

[2] No data for establishments with products under $5,000 in value have been tabulated for 1925 or 1923. (See sec. 10, p. 5.)

[3] The data for the 53,931 establishments in the "Less than $5,000" class are not included in other tables.

[4] Includes data for "$500,000 to $1,000,000" class.

[5] Included with data for "$100,000 to $500,000" class.

[6] Based, for all years, on number of establishments reporting products valued at $5,000 or more
