TABLES.

UNITED STATES.

1. Number and proportion of children of each sex 10 to 17 years of age engaged in gainful occupations, by years of age, for the United States: 1920 476
2. Number and proportion of children of each sex 10 to 15 years of age engaged in gainful occupations, for the United States: 1880-1920 476
3. Number and per cent distribution, by general divisions of occupations, of gainfully occupied children of each sex 10 to 17 years of age, for the United States: 1920 476
4. Number and per cent distribution, by general divisions of occupations, of gainfully occupied children of each sex 10 to 15 years of age, for the United States: 1920 and 1910. 477
5. Number and proportion of children 10 to 15 years of age engaged in gainful occupations, by sex, age, and population classes, for the United States: 1920 and 1910 478
6. Number and per cent distribution, by general divisions of occupations, of the gainfully occupied children of each sex 10 to 15 years of age, in each principal class of the population, for the United States: 1920 and 1910 479
7. Children 10 to 15 years of age engaged in each specified occupation in 1920 and in 1910, with per cent of increase or decrease, classified by sex, for the United States 480
8. Children 10 to 17 years of age engaged in each specified occupation, classified for each sex by years of age, for the United States: 1920 482
9. Native white children of native parentage 10 to 17 years of age engaged in each specified occupation, classified for each sex by years of age, for the United States: 1920 488
10. Native white children of foreign or mixed parentage 10 to 17 years of age engaged in each specified occupation, classified for each sex by years of age, for the United States: 1920 494
11. Foreign-born white children 10 to 17 years of age engaged in each specified occupation, classified for each sex by years of age, for the United States: 1920 500
12. Negro children 10 to 17 years of age engaged in each specified occupation, classified for each sex by years of age, for the United States: 1920 506
13. Indian children 10 to 17 years of age engaged in each specified occupation, classified for each sex by years of age, for the United States: 1920 512
14. Chinese, Japanese, and all other nonwhite children 10 to 17 years of age engaged in each specified occupation, classified for each sex by years of age, for the United States: 1920 513

DIVISIONS AND STATES.

15. Number and proportion of children of each sex 10 to 15 years of age engaged in gainful occupations, by divisions and states: 1920 and 1910 514
16. Gainfully occupied children 10 to 17 years of age in each principal class of the population, classified for each sex by years of age, by states: 1920 515
17. Children of each sex 10 to 17 years of age engaged in each selected occupation, classified by years of age, by states: 1920 519

PRINCIPAL CITIES.

18. Number and proportion of children of each sex 10 to 15 years of age engaged in gainful occupations, for cities having, in 1920, 100,000 inhabitants or more: 1920 and 1910 597
19. Gainfully occupied children 10 to 17 years of age in each principal class of the population, classified for each sex by years of age, for cities of 100,000 inhabitants or more: 1920 598
20. Children of each sex 10 to 17 years of age engaged in each selected occupation, classified by years of age, for cities of 100,000 inhabitants or more: 1920 603
21. Number of children 10 to 15 years of age in each specified occupation group, classified by sex, for cities having from 25,000 to 100,000 inhabitants: 1920 673

CHAPTER V.—CHILDREN IN GAINFUL OCCUPATIONS.

INTRODUCTION.

Statistics relating to the occupations of children in continental United States, as returned at the Fourteenth Census, are presented in this chapter, with comparative statistics for preceding censuses. The statistics are given for the United States (Tables 1 to 14), for divisions and states (Tables 15 to 17), and for principal cities (Tables 18 to 21).[1]

In the Fourteenth Census tabulation of occupations, all children 10 to 17 years of age engaged in gainful occupations were distributed into the following five age periods: 10 to 13, 14, 15, 16, and 17 years. At the Thirteenth Census, however, gainfully occupied children 16 and 17 years of age were tabulated in the age period 16 to 20 years. For this reason, in the tables of this chapter which present comparative statistics for preceding censuses the ages are limited to 10 to 15 years. Also, in Table 21, where but one age period is shown, it was thought best to limit the ages to 10 to 15 years.

Table 17 shows for each state and the District of Columbia, and Table 20 shows for each city of 100,000 inhabitants or more, the children 10 to 17 years of age engaged in each selected occupation, classified for each sex by years of age. In general, in each state and city, each specific occupation which gave employment to 25 or more children, and each general occupation—such as the laborers or the semiskilled operatives in a given industry—which gave employment to 50 or more children were selected for presentation. Frequently, however, two or more closely allied occupations are combined; and, frequently, a main occupation group is shown rather than the specific occupations which comprise it.

The statistics presented in this chapter show that from 1910 to 1920 there was a striking and general decrease in the proportion of children engaged in gainful occupations. Statistics not here included show that during this period there was also somewhat of a decrease in the proportion of adults gainfully occupied. To the extent that this decrease relates to children it is believed to have resulted primarily from the change of the census date, from a difference in the basis of enumeration, and from increased legal restrictions against child labor.

The change of the census date from a very busy farming season in 1910 (April 15) to a very dull farming season in 1920 (January 1) undoubtedly resulted in a smaller number of children being returned by the census enumerators in 1920 as engaged in agricultural pursuits than would have been returned had the census been taken as of April 15, as it was in 1910. It is believed that when the enumeration was made in 1920 (as of January 1) many children usually employed as farm laborers were not then at work and were not returned by the census enumerators as gainfully occupied. The enumerators' schedules show that a considerable proportion of the children living on farms—especially on the home farm—were returned neither as attending school nor as gainfully occupied.

To a considerable extent, the great decrease from 1910 to 1920 in the number of children engaged in gainful occupations—especially in the number engaged in agricultural pursuits—is believed to be apparent only and due to an overenumeration in 1910. A comparison of Twelfth Census with Thirteenth Census occupation statistics (see Thirteenth Census Report on Occupation Statistics, pp. 28 and 29) indicates strongly that the great increase from 1900 to 1910 in the number of children returned as engaged in agricultural pursuits was largely the result of a difference in the basis of enumeration at the two censuses (due to a difference in instructions to enumerators) rather than of any actual increase in the number at work. It is believed, also, that the Thirteenth Census enumerators, working under more liberal instructions and construing these instructions more loosely, returned as gainfully occupied children—especially farm children—who would not have been so returned by the Fourteenth Census enumerators.

The decrease between 1910 and 1920 in the number of children engaged in gainful occupations doubtless resulted to some extent from increased legal restrictions against child labor, better compulsory school attendance laws, and more efficient enforcement of these two classes of law. For example, the marked decrease from 1910 to 1920 in the number of children employed as mine and quarry operatives (see Table 7) probably was in large measure the result of increased legal restrictions against such employment. It is probable, also, that the greater popular disapproval of child labor decreased the tendency to employ children.[2]

[1] Occupation statistics for Alaska, Hawaii, and Porto Rico, first published as separate bulletins, are reprinted as Ch. VIII of this report.

[2] For discussion in greater detail of the decrease from 1910 to 1920 in the number of children gainfully occupied, see Ch. I, pp. 20, 22, and 23.

[1] Includes tinplate mills.
[2] Includes box factories (wood.)
[3] Includes 27 in harness and saddle industries; 28 in liquor and beverage industries; and 33 in trunk factories.
[4] Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; and drivers for bakeries and laundries are classified with deliverymen in trade.
[5] Many of the "Clerks in stores" probably are "Salesmen and saleswomen."
[6] Includes only those resident in continental United States at the date of the enumeration.
