ABSTRACT

Census of Population and Housing, 1980: Congressional District (100th Congress) Equivalency File [machine-readable data file] / prepared by the Bureau of the Census. --Washington: The Bureau, [producer and distributor], 1987.

TYPE OF FILE

Geographic reference.

SUBJECT-MATTER DESCRIPTION:

This file shows the correspondence between congressional districts (CD's) of the 100th U.S. Congress and 1980 census geographic areas. Each record contains a 2-digit congressional district (CD) code. State and county records are always shown. Where counties are split by CD's, lower levels of geography (minor civil division/census county division (MCD/CCD), place, census tract/block numbering area (BNA), block group, block, and enumeration district) are shown as appropriate.

GEOGRAPHIC COVERAGE:

U.S. Congressional Districts.

FILE STRUCTURE: Rectangular.

FILE SORT: Records are sequenced by state as follows: state, counties, MCD's/CCD's, places, census tracts/BNA's, and either block groups and blocks, or enumeration districts.

FILE SIZE: 44,127 logical records; 80-character logical record length.

FILE DESCRIPTION:

This file contains records for the 50 states and the District of Columbia. Of this group, the State of Ohio is the only state that redistricted for the 100th Congress.

As a result of redistricting, the data for Ohio are revised from that contained in the 99th Congress CD Equivalency File. Data for the other 49 states and the District of Columbia remain unchanged from the 99th Congress.

The record layout and data definitions are identical to the 98th and 99th Congress CD Equivalency Files. Also, there are no revisions since the 99th Congress to the listing entitled "Census Blocks Split by Congressional District (CD) Boundaries of the 100th Congress and Allocated to One Congressional District."
