* Fiscal years. † Calendar years.

[f] Figures for the years 1800 to 1855 include the total public debt.

[g] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

[h] Total specie in circulation; gold and silver were not separately stated prior to 1876.

[i] Estimated.

[j] As the result of special investigation by the Director of the Mint a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years.

* Fiscal years.

[a] For census years and for years intermediate between those of the census subsequent to 1904, the figures are those of the Bureau of the Census, and represent "Cotton growing States," "All other States," and "Total United States," respectively. Other figures are those of Mr. Alfred B. Shepperson, New York, N. Y., and cover years ended August 31. Discrepancies in the figures of consumption for census years as compared with those of the table showing production, imports, exports, and consumption of cotton manufactures by specified industries, are caused mainly by difference of method in the making up of the respective tables, for explanation of which see Census reports.

[f] Excluding tonnage received from connecting roads and other carriers after 1898.

[g] Overvalued by reason of depreciation of Brazilian paper milreis.

[h] Information for 1901 and 1902 relative to noncontiguous customs districts is somewhat fragmentary.

[i] Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.
