[6] From 1865 to 1897 the figures are those of A. Bouchereau, New Orleans; for subsequent years they are as stated in the Weekly Sugar Statistical of Messrs. Willett & Gray, New York, N. Y., which, from 1897 to 1905, include, with respect to British India, exports only, and subsequently the product of that country consumed. The product of British India, according to the British Statistical Abstract, averages about 40,000,000 hundredweight of 112 pounds each. [7] Figures of production and those based thereon are somewhat preliminary and are subject to correction.

No. 267.—COTTON: Production, Consumption, Exports, and Imports, 1860 to 1910.

[1] The production statistics relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1860 to 1898. Census figures have, however, been used when available, including those for 1899 to date.

[2] The value of lint per pound shown since 1902 relates to the average grade of upland cotton marketed prior to April 1 of the following year; from 1890 to 1901, the average price of middling cotton on the New Orleans Cotton Exchange; and from 1860 to 1889, as published in reports of the United States Department of Agriculture.

[3] Compiled from publications of the United States Department of Agriculture for 1860 to 1894; from the reports of Latham, Alexander & Co., for 1895 to 1903. Census figures have been taken when available. Discrepancies in the figures for census years as compared with those of the table entitled "Statistical Record of the Progress of the United States" are caused mainly by difference of method in the making up of the respective tables.

[4] Compiled from "Commerce and Navigation of the United States," 1860 to date. The export year begins July 1, 1860 to 1866, and Sept. 1 for 1867 to date. The period for consumption, exports, and imports is designated by the year in which the record begins rather than that in which it ends.

[5] Equivalent bales of 400 pounds.

[6] Excess of foreign exports over total imports.

No. 278.—DISTILLED SPIRITS, WINES, AND MALT LIQUORS: QUANTITIES CONSUMED AND AVERAGE ANNUAL CONSUMPTION PER CAPITA IN THE UNITED STATES, 1840 TO 1910.[1]

NOTES.—The production of domestic wines was estimated by the Department of Agriculture, by Mr. Charles McK. Leoser, president of the Wine and Spirit Traders' Society of New York, and other well-informed persons, except that the production for 1889 (opposite the year 1890) is that officially reported by the Bureau of the Census, Department of Commerce and Labor. The consumption of domestic spirituous and malt liquors derived from reports of the Commissioner of Internal Revenue. The above table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, or since 1906 withdrawals of alcohol for denaturation, free of tax. For 1910, these amounts were 2,003,197 and 10,605,871 tax gallons, respectively.

[1] Gold coin became available for circulation Jan. 1, 1879, as a result of the resumption act of Jan. 14, 1875.
[2] Silver certificates were authorized by acts of Feb. 28, 1878, and Aug. 4, 1886.
[3] Subsidiary silver, which disappeared from circulation in 1862, was reintroduced under operation of the act of Jan. 14, 1875.
[4] As the result of special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years.
[5] The Director of the Mint recently made a revised estimate of the stock of subsidiary silver coin; as a consequence of such revision there has been a reduction of $9,700,000.

NOTE 1.—For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.
NOTE 2.—This table has been revised and shows slight changes from previous figures in some of the items.
