* Fiscal years. † Calendar years.

[6] Figures for the years 1800 to 1855 include the total public debt.

[7] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

[8] Total specie in circulation; gold and silver were not separately stated prior to 1876.

[9] Estimated.

[10] As the result of special investigation by the Director of the Mint a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on September 1, 1910, a reduction of $9,700,000 was made in the estimate of silver coin.

* Fiscal years.

[1] "Ordinary expenses" include disbursements for War, Navy, Indians, pensions, payments for interest, and "Miscellaneous," but do not include payments for premiums, principal of public debt, or disbursements for postal service paid from revenues thereof.

[2] Figures cover the military and naval establishments and differ from those of Table 312, because the latter include the items "Salaries and expenses" and "Public buildings and grounds" from disbursements of the civil establishment.

[1] Based on total exports prior to 1866, after that on domestic exports only.

[2] Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

* Calendar years.

† The production statistics relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898. Census figures have, however, been used when available, including those for 1899 to date.

[1] Cleaned rice 1800 to 1903, commercial movement, as given by Dan Talmage's Sons Co.; 1904 to date, as reported by the Department of Agriculture.

[2] Commercial value. To ascertain coining value multiply number of fine ounces as shown in Tables Nos. 116 and 117 by $1.2929+.

* Fiscal years.

[1] For census years and for years intermediate between those of the census subsequent to 1904, the figures are those of the Bureau of the Census, and represent "Cotton-growing States," "All other States," and "Total United States," respectively. Other figures are those of Mr. Alfred B. Shepperson, New York, N. Y., and cover years ended Aug. 31. Discrepancies in the figures of consumption for census years as compared with those of the table showing production, imports, exports, and consumption of cotton manufactures by specified industries, are caused mainly by difference of method in the making up of the respective tables, for explanation of which see census reports.
