No. 281.—DISTILLED SPIRITS, WINES, AND MALT LIQUORS: Quantities Consumed and Average Annual Consumption per Capita in the United States, 1850 to 1915.[1]

[Source: The production of domestic wines has been estimated by the Department of Agriculture, by Mr. Charles McK. Leoser, president of the Wine & Spirit Traders' Society of New York, and other well-informed persons. The production of domestic spirituous and malt liquors has been derived from reports of the Commissioner of Internal Revenue. The table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, or since 1906 withdrawals for denaturation, free of tax. For 1915 these amounts were 2,324,021 and 25,411,719 tax gallons, respectively.]

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

[1] The law provides for a tax on wine made in imitation of champagne, etc., but no internal revenue was derived from the same during the fiscal years 1884-1898. The amounts thus received in some of the subsequent years are so small as to be negligible in this or the table following, except in 1905, when they amounted to nearly $700, included under distilled spirits as $1,000.

[2] From 1884 to 1890, inclusive, year ended Apr. 30.

[3] Fourteen months ended June 30.
