[1] The figures relate to continental United States.

[2] For other than census years prior to 1890 the figures represent estimates of the Treasury Department; subsequently, for all years, estimates of the Bureau of the Census.

[3] The figures are based upon the land area of continental United States and upon population as given in the preceding column.

[4] True valuation of real and personal property; the figures are those of the Bureau of the Census, Department of Commerce, relate to continental United States, and cover census years.

[5] From 1800 to 1850 figures represent outstanding principal of the public debt Jan. 1; subsequently, principal of debt exclusive of gold, silver, and currency certificates and Treasury notes of 1890.

[6] 1800 to 1855, outstanding principal of the public debt Jan. 1.

[7] The form of circulation statement was revised as of July 1, 1922, so as to exclude from money in circulation all forms of money held by the Federal reserve agents and Federal reserve banks whether as reserve against Federal reserve notes or otherwise. This change did not affect figures for money in circulation prior to the establishment of the Federal reserve system.

* Statistics of national banks are as of reports nearest to June 30 of each year. Those of other banks combine reports of various dates within the year.

[1] Postal savings are not included.

[2] From 1896 to 1908, inclusive, includes Illinois State banks having savings departments. Returns from the banking departments of several States include stock savings banks with commercial banks. It was estimated for a recent year that 300 stock savings banks with 815,000 depositors and $250,000,000 deposits were included with the figures furnished by the State banking departments for State banks. This estimate included the so-called stock savings banks of Michigan.

[3] Includes all private banks from 1875 to 1882; from 1887 to date includes only those voluntarily reporting, estimated at one-fourth of total private banks.

[4] Based on total imports prior to 1866; subsequently on imports for consumption.

[3] Exclusive of bunker or fuel coal laden on vessels in the foreign trade.
[4] Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

[1] The statistics since 1913 represent the commerce of the districts named in the boxhead, as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914 the statistics given in this table for Massachusetts and Maryland were returned as for the (former) districts of Boston and Baltimore, respectively.

[1] Prior to 1875 the customs district of Texas.

[2] The statistics since 1913 represent the commerce of the districts named in the boxhead as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914, the statistics given in this table for Buffalo and Michigan were returned as for the (former) districts of Buffalo Creek and Detroit, respectively.

[1] The figures are those of the Bureau of the Census, cover census years, and relate to continental United States.

[2] The item "live stock," which forms a part of the total value, includes for 1850, 1860, and 1870 only reported value of live stock on farms; for 1880 and 1890, estimates for value of range animals; and for 1900 and 1910, value of live stock on both farms and ranges.

[3] Includes mules.

[4] Included with horses.

[5] Census figures for the previous year.

[6] Gold values being 80 per cent of currency values reported.

*Calendar years.

† The production statistics (those for cotton being exclusive of linters) relate, when possible, to the year of growth, but, when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898.

‡ From 1904 to 1914, inclusive, the figures represent consumption. Those for 1911 and subsequent years do not include imported leaf aluminum and miscellaneous manufactures of aluminum. After 1914 figures represent value of production.

[1] Cleaned rice; 1800 to 1903, commercial movement, as given by Dan Talmage's Sons Co.; 1904 to date, as reported by the Department of Agriculture.

* Fiscal years.

[1] After 1900 includes imports into continental United States and shipments thereto from noncontiguous customs districts.

[2] After 1900 the figures represent prices of all coffee received.

[3] Consumption per capita based on net coffee coming to and remaining in continental United States.

[4] Consumption per capita based on net imports.

[5] Data for years prior to 1890 are from Poor's Manual of Railroads and relate to calendar years; data from 1890 to date are from reports of the Interstate Commerce Commission and relate to fiscal years, except that after 1916 figures again represent calendar years. No mileage included for Alaska.

[6] Including tonnage received from connecting roads and other carriers after 1898. See Table 240, p. 313, and corresponding tables in previous years.

*Fiscal years to and including 1916; subsequently, calendar years.

[7] Exclusive of fast freight line service.

[8] Overvalued by reason of depreciation of Brazilian paper milreis.

[9] Information for 1901 and 1902 relative to commerce between continental United States and noncontiguous customs districts in coffee and tea is somewhat fragmentary.

[10] Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.

[11] Figures for railroads exclude switching and terminal companies not segregated prior to 1908; also, except for "miles in operation," the mileage of so-called small roads having operating revenues below $100,000 for the year, for 1913 to 1916, and below $1,000,000, for 1917 to 1921.

[1] At Philadelphia after 1909, the figures relate to No. 2 foundry, the price thereof being usually 50 cents below that of No. 1. Figures for 1917 and 1918, however, represent Bessemer pig iron at Pittsburgh.

[2] At mills in Pennsylvania; Bessemer to end of 1913. The $2.00 extra per ton on open-hearth rails was annulled Oct. 22, 1921.

*School years.

[1] Figures for the years 1873–1882, inclusive, are for the calendar year preceding fiscal year; prior to 1920 the figures include technological instead of professional schools.

[2] Figures until 1889 include nonresident graduate students; figures for 1889 and later years are exclusive of nonresident graduate students.

[3] Figures are not comparative. They relate to libraries of the following sizes: 1875 and 1885, 300 volumes and over; 1891, 1896, 1900, and 1903, 1,000 volumes and over; 1908 and 1913, 5,000 volumes and over. In 1908, 3,342 libraries with more than 999 and less than 5,000 volumes reported with 7,278,378 volumes, and in 1913 2,188 such libraries with 5,503,500 volumes.

[4] Figures from 1810 to 1860, inclusive, from census of 1880.

[1] The figures are those of the Director of the Mint, but do not represent the footings of the respective columns, as that official, for the period from 1871 to 1885, employs Soetbeer's averages upon a somewhat different basis from that used in this table.

No. 457.—MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY, IN THE AGGREGATE AND PER CAPITA, IN THE PRINCIPAL COUNTRIES OF THE WORLD, DEC. 31, 1920 AND 1921.[1]

[Source: Director of the Mint, Treasury Department. The following compilations have been made from such data as are available, avowedly incomplete. The amount of gold and silver in circulation in many countries is not obtainable, and in some countries that held by private banks can not be given. For the United States the figures given cover all domestic gold and silver coined but only such bullion and foreign coin as owned by the Government and Federal reserve banks. All foreign coin which comes into possession of the Government is converted to bullion.]
