No. 432.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES COLLECTED

[NOTE.—From 1821 to 1865, inclusive, the figures of import values represent total imports less reexports, and for 1870 and later years imports for consumption. The average ad valorem rates prior to 1860 are based upon the values of total imports, since the "duty collected" for those years include the duties afterwards refunded upon reexports. Figures cover fiscal years ended Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter]

No. 442.—EXPORTS AND IMPORTS OF MERCHANDISE, BY PRINCIPAL CUSTOMS DISTRICTS

[NOTE.—Fiscal years to and including 1915; thereafter, calendar years. Figures represent specie values except for exports for years 1865 and 1870–1878. Areas of districts are as rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However in most cases, this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo were returned as for the (former) districts of Buffalo Creek and Niagara; for Michigan, as for Superior, Huron, and Detroit; for Massachusetts, as for Boston; and for Maryland, as for Baltimore. See also headnote, Table 441]

COMMERCE OF NONCONTIGUOUS TERRITORIES

[GENERAL NOTE.—In the general foreign-trade statistics of the United States presented in the preceding section, the Philippines are treated as though a foreign country and their trade with the United States is shown and included in the national total while their trade with other countries is not included. On the other hand, Porto Rico, Hawaii, and Alaska are in those statistics treated as integral parts of the United States, so that trade between them and Continental United States is not shown, nor included in the total, while trade between them and foreign countries is included with the national totals; each of these three possessions appears as a separate customs district, and the aggregate of its trade with countries other than the United States is thus shown in the table by customs districts (Table 440).

In the present section the trade of each of these possessions is shown regardless of the manner in which it is handled in the general statistics of United States trade. The trade of each with the United States (including other noncontiguous possessions except the Philippines) is shown, and separately its trade with foreign countries (including the Philippines).]

[1] The discrepancy between the United States figures of exports to the Philippines prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels
