25. Farm Animals and Animal Products

GENERAL NOTE

The data in this section are, for the most part, from the Bureau of the Census, Department of Commerce, and from various bureaus in the United States Department of Agriculture. In general, statistics for agriculture census years are from the Bureau of the Census. Estimates for intervening years, and adjustments, where necessary, to a January 1 basis are from the Bureau of Agricultural Economics, United States Department of Agriculture. (See general note to sec. 23.)

For each decade from 1840 through 1900, the Census of Agriculture was taken as of June 1. The four decennial censuses since then have been taken as of April 15, 1910; January 1, 1920; April 1, 1930; and April 1, 1940. The 1925 and 1935 quinquennial Censuses of Agriculture were taken as of January 1. From January to April, there may be material changes in livestock inventories due to births, deaths, farm slaughter, purchases, and sales. For most of the country, April 1 is well into the season of the greatest number of livestock births, therefore, recently born animals were excluded from the 1940 enumeration. The inquiries were so worded as to include in the enumeration of April 1, 1940, only horse and mule colts and calves over 3 months old; pigs and kids over 4 months old; lambs over 6 months old; and poultry over 4 months old.

For some species of domestic livestock, there are comparatively short, cyclic fluctuations in numbers, even though the trend over a long period of time may be definitely in one direction. A single census may be taken at a time when such a cycle is at the peak or at the trough of numbers and hence gives no true indication of the long-time trend.

Annual inventory numbers of livestock on farms prepared by the Department of Agriculture together with estimates of livestock, dairy and poultry production are based on information furnished by individual farmers, supplemented by State assessors' data in a number of States, and by such records as brand inspections, rail and truck shipments, and inspected slaughter. The level for these inventories is based in large part on census enumerations for years when census data are available.

No. 716.—Domestic Animals on Farms—Number and Value: 1880 to 1944

Note.—For census years prior to 1910 and for Jan. 1 estimates by the Dept. of Agriculture, animals of all ages are included except in figures for cattle and sheep, 1880 and 1890, which are nominally exclusive of calves and lambs, respectively. The difference in date of enumeration affects the comparability of the census figures for all classes and especially for swine.

Year and date	Number (thousands)							Value of all animals (thousands of dollars)[1]
	Horses[2]	Mules[2]	All cattle[2]	Dairy cows[3]	Other cattle[2]	Sheep[4]	Swine[5]

1943	9,675	3,704	79,114	27,106	52,008	48,796	73,736	8,882,899
1944 (prel.)	9,330	3,559	82,192	27,607	54,585	45,777	83,756	8,761,762

[1] Includes only value of animals specified in preceding columns.
[2] Census figures for 1910 are for animals over 3½ months old; 1920, 1925, and 1935, animals of all ages; 1930 and 1940, animals over 3 months old.
[3] Census returns prior to 1900 represent "milch" cows; 1900, cows 2 years old and over kept for milk; 1910, dairy cows 2 years old and over on Jan. 1, as estimated; 1920 and 1925, dairy cows and heifers 2 years old and over; 1930 and 1940, cows and heifers 2 years old and over on Jan. 1 of census year, kept mainly for milk production.
[4] Census figures for 1910 are for sheep and lambs over 3½ months old; 1920, 1925, and 1935, sheep and lambs of all ages; 1930 and 1940, sheep and lambs over 6 months old. Jan. 1 estimates are for stock sheep.
[5] Census figures for 1910 are for hogs and pigs over 3½ months old; 1920, 1925, and 1935, hogs and pigs of all ages; 1930, hogs and pigs over 3 months old; 1940, hogs and pigs over 4 months old.
[6] Not available.

No. 717.—Domestic Animals and Chickens on Farms—Number and Value, by Kind, and Farms Reporting: 1930, 1935, and 1940

Note.—Data for 1930 and 1940 are as of Apr. 1, and for 1935 as of Jan. 1. Owing to the difference in the date of enumeration, the figures for 1935 are not closely comparable with those for other years. The total value of all livestock for which data were collected at each census is shown in table 653, p. 597. Available data for certain classes not shown in the table below are as follows: Turkeys over 3 months old, 1935, 5,382,000, valued at $11,668,000; turkeys over 4 months old, 1940, 4,362,000, valued at $7,462,000. Hives of bees (on farms and elsewhere), 1930, 3,108,000, valued at $13,632,000; 1940, 2,277,000, valued at $7,326,000.

Item and year	Horses [1]	Mules [1]	All cattle [1]	All cows 2 years old and over [2]	Sheep [3]	Swine [4]	Chickens [5]

[6] Not including 6,979,000 sheep and lambs on feed for market in 1943 and 5,941,000 in 1944.
[7] No estimate. [8] Less than 500.
Source: 1935 and 1940 (except cows and heifers 2 years old and over kept for milk in 1935) Department of Commerce, Bureau of the Census; Sixteenth Census Reports, Agriculture, Vol. III. Other figures are estimates by Department of Agriculture, Bureau of Agricultural Economics, published in Crops and Markets, April 1944.

No. 719.—Domestic Animals on Farms, by Kind, by Age Groups: 1930, 1935, and 1940

Note.—Figures for 1930 and 1940 are as of Apr. 1 and for 1935 as of Jan. 1

Class and year	Number (thousands)
Horses and colts: Over 3 months old	
1930	13,384
All ages 1935	11,858
Over 3 months old	
1940	10,087
Colts 3 to 27 months old 1930	957
Colts under 2 years of age 1935	1,098
Colts 3 to 27 months old 1940	803
Mules and mule colts: Over 3 months old 1930	5,354
All ages 1935	4,818
Over 3 months old 1940	3,845
Mule colts 3 to 27 months old 1930	168
Mule colts under 2 years of age 1935	111
Mule colts 3 to 27 months old 1940	100
Cattle and calves: Over 3 months old	
1930	54,250
All ages 1935	68,284
Over 3 months old	
1940	60,675
All cows and heifers 2 years old and over on Jan. 1 of census year 1930	28,336
1935	36,931
1940	33,523
Kept mainly for milk production [1] 1930	20,499
1940	24,074
Kept mainly for beef production [1] 1930	7,837
1940	9,449
Hogs and pigs: Over 3 months old	
1930	32,794
All ages 1935	37,213
Over 4 months old	
1940	34,037
Sows and gilts farrowing or to farrow	
1930	7,674
1935	6,061
1940	7,988
Sheep and lambs: Over 6 months old	
1930	41,780
All ages 1935	48,358
Over 6 months old	
1940	40,129
Ewes over 6 months old 1930	38,098
Ewes 1 year old and over 1935	34,000
Ewes over 6 months old 1940	35,580
Yearling ewes (6 to 18 months old)	
1930	7,302
1940	7,528
Other ewes (over 18 months old)	
1930	30,795
1940	28,052

[1] Data for 1935 are not available.

No. 720.—Domestic and Other Animals on Farms, by Kind—Summary for Alaska, American Samoa, Guam, Hawaii, Puerto Rico, and Virgin Islands

No. 731.—Meats and Lard—Production, Foreign Trade, and Consumption, by Kind: 1936 to 1943

Note.—**All amounts, except per capita, in millions of pounds.** Pork production represents total hog-carcass weight, less raw fat from carcass which was rendered into lard. Other meat production represents dressed carcass weight only, with edible byproducts excluded. Lard production represents rendered weight of lard. Uninspected production includes farm, retail, and nonfederally inspected wholesale slaughter. Exports and imports of meats comprise the several kinds of meat converted to a dressed-carcass-weight basis. Lard exports represent rendered lard, including neutral lard. Exports include shipments to Alaska, Hawaii, Puerto Rico, and Virgin Islands. Consumption represents production plus imports less exports, with allowance for changes in storage stocks. Figures for recent years are subject to revision.

Year	Production			Exports of U. S. production	Imports for consumption	Consumption	
	Total	Federally inspected	Uninspected (estimated)			Total	Per capita (pounds)

Mink	(2)	2, 027	do	(2)	(2)	291	(2)	(2)	2, 430

[1] For 1929, comprises whole milk and cream sold, butter churned, wool, mohair, chicken eggs, and honey produced, and chickens, turkeys, geese, and ducks raised. For 1939, includes, in addition, guineas, pigeons, quail, pheasants, and unspecified poultry raised, and pelts taken from silver fox and mink.
[2] Not available.
[3] For 1929, represents butterfat; for 1939, butterfat content.
[4] Not including 15,846,000 gallons of cream sold, valued at $26,139,000, reported "not as butterfat."
[5] Taken from fur animals in captivity.

[1] Preliminary. [2] These grades not in use.
[3] Western extra firsts through 1934 and extra firsts, 1935 through 1940. [4] Not available for publication.

Source of tables 740 and 741: Dept. of Agriculture, Bureau of Agricultural Economics and War Food Administration, Office of Marketing Services; annual report, Agricultural Statistics. Local market prices and receipts for 4 markets are published currently in Crops and Markets. Average export value, table 741, from Dept. of Commerce, Bureau of the Census.

No. 742.—Animal Products and Fish—Cold-Storage Holdings, by Kind, by Months: 1940 to 1944

Note.—All figures are in thousands of pounds, except shell eggs and total meats, which are in thousands of 30-dozen cases and millions of pounds, respectively. Quantities are net weights and are as of 1st of each month. Beef and pork figures include frozen, cured, and in process of cure.

No. 743.—Wool—Production, Imports, and Exports: 1839 to 1943

Note.—All figures in thousands of pounds. Production, except census data, is estimated and is for calendar years; figures for 1909 and later years have been revised because of revised estimates for numbers of sheep, based on 1935 census data. Pulled wool is included beginning 1900 and was probably included for 1870 to 1899, though the exact basis of the estimates for these years is not known. Figures for 1839, 1849, and 1859 include only fleece. Exports and imports for 1839 are for the fiscal year ended Sept. 30; for 1849 and 1859, fiscal years ended June 30; subsequently, calendar years. Imports and foreign exports prior to 1914 and domestic exports for all years include hair of the Angora goat, alpaca, and other like animals.

Yearly average or year	Production	Imports	Exports		Year	Production	Imports	Exports	
			U. S. production	Foreign				U. S. production	Foreign

Other years, production, Dept. of Agriculture, Bur. of Agricultural Economics; annual report, Agricultural Statistics. Imports and exports, Dept. of Commerce, Bur. of Foreign and Domestic Commerce through April 1941, Bur. of Census, thereafter. Annual report, Foreign Commerce and Navigation of the U. S.

No. 744.—Wool—Prices and Value of Imports: 1921 to 1943

Item	1921-1925, average	1926-1930, average	1931-1935, average	1936-1940, average	1940	1941	1942	1943 [1]
Prices (cents per pound):								
Average U. S. local market price, unwashed	32	30	17	26	28	36	40	42
Bright fleece, fine clothing, at Boston	45	36	20	30	32	37	40	39
Territory,[2] fine staple scoured, at Boston	26	103	67	89	96	109	119	118
Value of U. S. imports (thous. of dollars):[3]								
Clothing [4]	17,137	6,050	1,059	2,771	4,015	16,616	25,513	([5])
Combing [4]	53,317	36,231	4,384	24,257	42,924	132,086	256,372	([5])
Carpet [6]	29,675	34,300	12,156	28,547	31,361	45,035	16,208	([5])
Not finer than 40s [6]	----------	----------	841	4,377	4,968	9,056	7,289	([5])

[1] Preliminary. [2] Wyo., Mont., Utah, Nev., Colo., N. Mex., eastern Oreg., and parts of Dakotas.
[3] Imports for consumption beginning with 1933; general imports prior to 1933.
[4] Owing to changes in tariff laws in 1922 much wool which was formerly brought in as "clothing" now comes in under "combing" classification.
[5] Not available for publication. [6] Carpet excludes "not finer than 40s" beginning 1930.

[1] "Scoured" wool plus "greasy" wool reduced to a scoured basis, assuming average yields varying with class, origin, grade, and whether shorn or pulled.
[2] Shorn wool reported "greasy" plus pulled wool reported "greasy" raised to a greasy shorn basis, and shorn and pulled wool reported "scoured" raised to a greasy shorn basis, conversion factors varying with class, origin, grade, and whether shorn or pulled.
[3] Wool regarded as more or less suitable for apparel purposes; formerly "Combing and clothing."

All other products					4,974	18,144	17,553

[1] Includes, in addition to production in the dairy products industries, data for similar products made in establishments classified in other industries.

[2] Not including data for cheese blended or processed, amounting to 244,315,000 pounds for 1937 and 296,284,000 pounds for 1939, valued at $45,727,000 and $48,714,000, respectively. See census report on "Special dairy products." [3] Includes data for a small amount of Neufchatel cheese. [4] No data.

[5] Made for sale as such, unfrozen. [6] Production in the meat-packing industry only.

[7] Production in the meat packing industry only. Total production in all industries, as shown in census report on "Sausages, prepared meats, and other meat products—not made in meat-packing establishments," is as follows: Cooked hams—1937, 213,136,000 pounds valued at $69,488,000; 1939, 220,598,000 pounds valued at $63,297,000. Canned meats—1937, 240,767,000 pounds valued at $48,183,000, and canned meats valued at $3,913,000 (for which no quantity was reported) made in the "Food preparations not elsewhere classified" industry; 1939, 341,425,000 pounds valued at $65,770,000. Canned sausage—1937, 28,073,000 pounds valued at $5,999,000; 1939, 28,897,000 pounds valued at $5,664,000. Sausages and sausage products, other than canned—1937, 1,592,493,000 pounds valued at $285,133,000; 1939, 1,673,570,000 pounds valued at $273,806,000.

[8] Total production, as shown in Census report on "Sausage casings—not made in meat-packing establishments," is valued as follows: 1937, $27,215,000; 1939, $24,758,000.

[9] Wool detached from sheep pelts in meat-packing establishments.

1933	87.3	79.8	113.1	98.3	88.8	1944 (prel.)	120.2	207.8	175.6	137.8	123.7

[1] Relative production as indicated by multiplying the production of the crops of each year by the 1927–32 average prices and dividing the aggregate for each year by the average aggregate for the same crops during the 1923–32 (predrought) period.

[2] Corn, oats, barley, sorghums for grain, wheat, rye, buckwheat, rice, flaxseed, cotton, tame and wild hay, sorghums for forage and silage, dry edible beans, soybeans for beans, peanuts, potatoes, sweetpotatoes, tobacco, sorgo sirup, sugarcane, sugar beets, and cowpeas.

[3] Asparagus, snap beans, cabbage, sweet corn, cucumbers, peas, spinach, and tomatoes.

[4] Asparagus, snap beans, cabbage, cantaloupes (including honeydews, honeyballs, and miscellaneous melons), carrots, cauliflower, celery, cucumbers, lettuce, onions, peas, spinach, tomatoes, watermelons, beets, eggplant, and peppers. Production of farm gardens, home gardens, and most of market gardens excluded.

[5] Apples, peaches, pears, grapes, plums, prunes, oranges, grapefruit, lemons, apricots, strawberries, cranberries, and olives.

Source: Department of Agriculture, Bureau of Agricultural Economics; published in Crops and Markets, January 1945.

No. 749.—Acreage Losses—Estimated Acreages of Certain Crops Planted and Not Harvested: 1929 to 1944

[Acreage in thousands. Acreages for winter wheat represent areas sown the preceding fall and not harvested, thus including considerable land subsequently planted to other crops. Acreages for cotton include more than 10 million acres plowed under in 1933. Acreages of grains cut for hay are excluded. Totals do not show total crop losses chiefly because of large acreage of tame and wild hay land which produced only pasturage in some dry seasons.]

Year	Total	Corn	Winter wheat	All spring wheat	Oats	Barley	Sorghums	Flaxseed	Cotton	Beans, dry edible	Other crops [1]

[1] Acreage includes land in fruit orchards, vineyards, and planted nut trees (6,086,176 acres in 1929, 6,220,679 acres in 1934, and 5,044,952 acres in 1939) which was not reported in 1919; horticultural specialties (55,180 acres in 1919 and 157,494 acres in 1939); specified annual legumes (6,037,380 acres in 1939) grown alone. (Acreage shown for individual legumes is only that from which nuts, beans, or peas were harvested in 1939.) Values include horticultural specialties ($106,145,000 for 1919, $145,703,000 for 1929, and $129,575,000 for 1939). Excludes acreage of annual legumes saved for hay (3,067,710 acres in 1929, 9,500,946 acres in 1934, and 7,187,327 acres in 1939.) [2] "Kafir and milo" prior to 1929; sorghum seed included 1919.
[3] Acreage grown alone. Not all harvested for grain or seed as acreage also includes that for hay and that which was grazed. Some grain or seed harvested from acreage grown with other crops. [4] Does not include sorghum for silage. [5] Exclusive of those grown in farm gardens. [6] Values represent farm gardens and vegetables harvested for sale, except for 1934; for that year, value represents farm gardens only. The acreage for all years represents vegetables harvested for sale only.
[7] Prior to 1929, nominally sugarcane either for sugar or sirup or both. Acreage includes sugarcane for seed and other purposes not specified where specific reports were available.
[8] For all purposes. [9] Production for sugar or sale to mills was 2,992,000 tons in 1929 and 5,366,000 tons in 1939; production of sirup was 15,169,000 gallons in 1929 and 16,205,000 gallons in 1939. [10] Running bales. [11] Not comparable with earlier years. [12] Including tangerines in 1919 and tangerines, mandarins, etc., in 1929 and 1939. [13] Less than $500.

[1] Figures for 1800 to 1895 represent commercial movement, as given by Dan Talmage's Sons Co.
[2] Figures for the years 1810 to 1865 include linters; excluded in subsequent years.
[3] Louisiana and Texas, 1909 to 1923; Louisiana only, 1924 to 1927; Louisiana and Florida, beginning 1928.
[4] Beginning 1899, ginnings as reported by Bureau of the Census. Figures for some years include small amounts of Baja California, Mexico, cotton ginned in United States. Round bales counted as half bales.
[5] Gross weight. Figures prior to 1899 compiled by Bureau of the Census from data published by Department of Agriculture. See also note 10, table 752, p. 687.
[6] Exports. [7] Census figures for the previous year.
[8] Figures shown for 1870, 1875, and 1880 represent the estimated average production for 1863–71, 1874–77 and 1880–82, respectively.
[9] Ginnings. [10] Not yet available.

Source: Dept. of Agriculture, Bureau of Agricultural Economics, except as noted; annual report, Agricultural Statistics. Also published currently in Crops and Markets.

No. 752.—Principal Crops—Acreage, Production, and Value: 1866 to 1944

Note.—**Tons are of 2,000 pounds.** For weights of the units of measurement for principal products, see Appendix, p. 954. The approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 55; sorghums for grain, 56; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for the periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for the individual years. Acreage, production, and yield of all crops have been revised to census data.

[1] Values are based on season average or Dec. 1 prices. See notes on "Price" column.

[2] Received by farmers. Beginning 1908, prices are season average prices for the crop-marketing season; prior thereto, Dec. 1 prices. Prices for 1937 through 1944 for corn, 1938 through 1944 for wheat, and 1940 through 1944 for rye, include an allowance for unredeemed loans at average loan value.

No. 752.—Principal Crops—Acreage, Production, and Value: 1866 to 1944—Continued

[1] Values are based on season average or Dec. 1 prices. See notes on "Price" column.
[2] Received by farmers. Prices are season average prices as follows: Barley, buckwheat, and flaxseed, beginning 1908; rice, beginning 1909. Prices for prior years are as of Dec. 1. Prices for 1940 through 1944 for barley include an allowance for unredeemed loans at average loan value.

[1] Values are based on season average or Dec. 1 prices. See notes on "Price" column.

[4] Received by farmers. Beginning with 1908 for potatoes and cotton, 1910 for sweetpotatoes, and 1909 for cottonseed, prices are season average prices. Figures for prior years are Dec. 1 prices. For 1933, 1934, 1937, 1938, and 1940 season average prices for cotton crops include an allowance for unredeemed loans at average loan value.

[5] Average for 8 years. [6] Average for 6 years. [7] Average for 7 years. [8] Average for 4 years.

[9] Includes 7,462,000 bushels in 1928, 66,000 bushels in 1931, and 2,175,000 bushels in 1932 not harvested on account of market conditions. Price and value apply only to the harvested portion of the crop.

[10] State production figures, which conform with census annual ginning enumeration, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Baja California, ginned in California from 1913 to 1924, has been excluded.

[11] Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.

[12] Data for 1909 and 1910.

[13] Area in cultivation July 1 less removal of acreage reported by the Agricultural Adjustment Administration, less abandonment on area not under contract.

[14] Includes an allowance for unredeemed loans at season average price; 1944 price is season average to Dec. 1.

[1] Values are based on season average or Dec. 1 prices. See notes on "Price" column.
[15] Received by farmers. See also notes on prices for each crop.
[16] Based on the reported price of grain sorghums.
[17] Equivalent solid acreage.
[18] Prices are season average prices, prices of beans being for cleaned beans.
[19] Average for 1929 and 1930.
[20] Bags of 100 pounds (uncleaned).
[21] Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than to the total production.
[22] Average for 1924 and 1925.
[23] Average for 1919 and 1920.
[24] Dec. 1 prices, 1916 to 1931; beginning 1932, season average prices.
[25] Includes 5,436,000 pounds in 1935, 4,365,000 pounds in 1937, 3,140,000 pounds in 1938, and 2,813,000 pounds in 1939, not available for marketing because of economic conditions and the marketing agreement allotments. Prices and values are computed on the harvested crop.

[1] Values are based on season average or Dec. 1 prices. See notes on "Price" column.
[26] Received by farmers. Prices are as of Dec. 1 except as noted.
[27] Prices are season average prices beginning 1919; Dec. 1 prices theretofore.
[28] Dec. 1 price. Prior to 1942, price of sweet sorghums for forage and hay.
[29] Average for 1929 and 1930.
[30] Prior to 1939, data are for 7 States. Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped; they exclude fruit which ripened on the trees but was destroyed prior to picking. Figures relate to the crop produced from the bloom of the year shown. In California the picking season usually extends from about Oct. 1 to Dec. 31 of the following year. In other States, the season begins about Oct. 1.
[31] Prices are season average.
[32] Net content of boxes varies. In California and Arizona, the approximate average is 77 lbs.; in other States, 90 lbs.
[33] Season average returns to growers. Price and value apply to entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. (See note 34.) Prices are equivalent packing-house-door returns for all methods of sale and are weighted by production to obtain U. S. averages.
[34] Production includes the following quantities donated to charity, unharvested, and/or eliminated on account of market conditions (1,000 boxes): 1933, 977; 1934, 1,395; 1935, 614; 1936, 1,023; 1937, 1,204; 1938, 2,949; 1939, 1,236; 1940, 1,322; 1941, 762; 1942, 654; 1943, 830. Price and value are computed on the remaining crop.

[1] Preliminary.
[2] For rye, season average prices include an allowance for unredeemed loans at average loan value.
[3] Short-time average.

Source: Department of Agriculture, Bureau of Agricultural Economics; annual summaries, Acreage, Yield, and Production of Principal Crops and Season Average Prices and Value of Production.

No. 762.—Cotton and Cottonseed—Acreage, Production, and Value, by States: 1911 to 1944

[Cotton production excludes linters. Figures for production in some States differ slightly from census figures on ginnings due to ginnings in 1 State of cotton grown in another. Where figures are not shown for the individual States, separate data are not available for the entire period but are included in the United States totals. Values shown are for the marketing season or crop year and should not be confused with calendar year income. Yields and prices for the periods are simple averages of figures for individual years. Tons are of 2,000 pounds]

[1] Preliminary. [2] Dec. 1 price. [3] Tons of 2,000 pounds.

Source: Dept. of Agriculture, Bureau of Agricultural Economics; annual summaries, Acreage, Yield and Production of Principal Crops and Season Average Prices and Value of Production.

No. 765.—Truck Crops, Commercial—Acreage, Production, and Value, by Kind, 1933 to 1944, and for Leading States, 1944

[Only States with a crop of commercial importance are included. Approximate weights of the units of measurements are as follows: Number of pounds to the crate—asparagus, 24; cantaloupes, 60; cauliflower, 37; celery, 65 (½ size crates); honeyball melons, 60; honeydew melons, 35; strawberries, 36 (24-quart crates). Number of pounds to the bushel—carrots, 50; cucumbers, 48; eggplant, 33; kale, 18; peppers, 25; potatoes, 60. Number of pounds to a box of artichokes, 40. Lettuce is in western crates (mostly 4 to 6 dozen heads), 70 pounds; onions, 50-pound sacks; and garlic, 100-pound sacks. Tons are of 2,000 pounds. Values are based on average seasonal farm prices.]

[1] Market and processing production estimated in different units which can not properly be combined. (Processing on shelled basis).
[2] Includes some quantities not marketed and excluded in computing value.
[3] Mainly for canning, but includes also market crop in New Jersey, New York, and Pennsylvania.
[4] Includes peppermint and spearmint. [5] Pounds of oil. [6] Commercial early Irish. [7] Short-time average.

No. 766.—Cherries, Plums, Prunes, and Citrus Fruits—Production and Farm Price: 1933 to 1944

Crop	Unit	Production (thousands)				Season average price (per unit) received by growers [1]			
		1933–42, avg.	1942	1943	1944 [2]	1941	1942	1943	1944 [2]
Cherries (12 States)[3]	Ton	155	196	117	201	106	120	211	209
Plums (2 States)[3]	do	69	77	79	100	61	91	169	130
Prunes, fresh basis (3 States)[3 4]	do	143	113	136	107	42	68	157	105
Oranges and tangerines (5 States)[3 5]	Box	70,557	89,349	106,656	106,848	1.47	2.40	2.57	2.49
Grapefruit (4 States)[3]	do [6]	32,858	50,481	55,979	48,741	.79	1.15	1.46	1.59
Lemons (California)[3]	do [7]	10,970	14,940	11,038	13,321	1.61	2.41	3.27	2.50

[1] Season average prices, except citrus fruit prices, which are equivalent packing-house-door returns for all methods of sale. [2] Preliminary.
[3] In some years, production includes some quantities not harvested on account of market conditions or scarcity of harvest labor or donated to charity.
[4] Prices are for prunes used fresh and for small quantities of canned and dried.
[5] Prior to 1939, data are for 7 States. See also table 752, p. 689.
[6] Net content of box varies. In California and Arizona, approximate average is 65 pounds net; in Florida and other States, 80 pounds net. [7] About 79 pounds net.

[1] Beginning 1934, estimates refer to production of apples in commercial apple areas of each State and include fruit produced for sale to commercial processors, as well as that for sale for fresh consumption.
[2] Average for 1909 and 1910.
[3] Includes some quantities not harvested on account of market conditions or scarcity of harvest labor.
[4] Average for apples is for 1934 and 1935.

No. 769.—Apples, Peaches, Pears, and Grapes—Season Average Prices Received by Farmers, by States: 1941 to 1944

[Prices of apples, peaches, and pears in dollars per bushel, prices of grapes in dollars per ton.]

No. 770.—Specified Tree Fruits, Grapes, and Nuts—Farms Reporting and Number of Trees: 1930 and 1940

Fruit and year	Farms reporting [1]	Number of trees or vines (thousands)		
		Total	Not of bearing age	Of bearing age
Orchard fruits:				
Apples 1930	2,297,099	116,304	27,455	88,849
1940	1,813,907	71,663	13,511	58,152
Cherries 1930	867,944	12,997	4,615	8,381
1940	776,422	12,229	2,664	9,565
Peaches 1930	1,481,242	79,046	20,134	58,912
1940	1,394,566	68,867	21,720	47,147
Apricots 1930	60,062	7,248	1,187	6,061
1940	105,455	6,368	869	5,499
Pears 1930	1,079,368	21,271	5,228	16,043
1940	961,433	14,460	2,046	12,414
Plums and prunes 1930	901,462	33,914	4,514	29,399
1940	697,062	24,759	3,096	21,663
Figs 1930	130,763	4,945	1,203	3,742
1940	156,392	2,746	280	2,466
Olives 1930	4,498	1,546	207	1,339
1940	4,898	1,139	52	1,086
Grapes 1930	953,447	366,845	24,653	342,191
1940	762,084	291,856	18,514	273,342
Nuts:				
Almonds 1930	9,216	4,410	500	3,910
1940	11,551	5,471	1,104	4,366
Filberts and hazelnuts 1930	4,678	579	350	229
1940	11,874	1,416	455	961
Pecans (improved and wild)[2] 1930	195,710	9,147	3,729	5,418
1940	278,146	10,961	2,380	8,581
Tung 1930	144	351	342	9
1940	2,304	12,671	8,557	4,115
Walnuts, English or Persian 1930	31,678	3,521	1,235	2,286
1940	44,231	3,395	526	2,869
Citrus fruits:				
Oranges 1930	46,558	31,958	7,595	24,363
1940	54,686	37,153	4,542	32,611
Grapefruit 1930	20,598	9,237	4,128	5,108
1940	26,768	10,974	867	10,107
Lemons 1930	8,848	3,166	343	2,824
1940	13,717	5,449	1,104	4,345

[1] Farms reporting trees, Apr. 1, 1940, and/or production in 1939 (citrus fruit for the crop year 1938–1939 for Arizona and California and for crop year 1939–1940 for other States).
[2] Cultivated and wild in 1930 and improved and wild in 1940.

No. 771.—Apples, by Trees of Bearing Age—Farms Reporting and Number of Trees, 1940, and Production, 1939; and Farms Reporting Trees of Nonbearing Age, by Number of Trees, 1940

Item	Total	Size group (number of trees of bearing age)					
		1 to 99 trees	100 to 199 trees	200 to 999 trees	1,000 to 4,999 trees	5,000 trees and over	None of bearing age
Trees of bearing age

[1] Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually not ended before February in Louisiana and April in Florida, following season of growth of cane.
[2] Calculated by the Agricultural Adjustment Administration method. (S. R. Series 1, No. 1.)
[3] Based on the ratio of 100 pounds of raw sugar to 93.46 pounds of refined sugar.
[4] Not including sirup production. See table 774. [5] Preliminary.

Source: Dept. of Agriculture, Bureau of Agricultural Economics; annual report, Agricultural Statistics. Also published in The World Sugar Situation and in part, currently, in Crops and Markets.

No. 776.—Sugarcane and Cane Sugar—Production of Hawaii: 1930 to 1943

Note.—Tons are of 2,000 pounds.

Year	Total acres in cane	Cane used for sugar: Acres harvested	Cane used for sugar: Production (1,000 tons)	Cane used for sugar: Yield per acre (tons) [2]	Sugar made (1,000 tons): Converted to 96° raw basis [3]	Sugar made (1,000 tons): Equivalent refined [4]	Raw sugar 96° made per ton of cane (pounds)	Recovery of equivalent refined sugar from cane ground [1] (percent)
Year beginning October:								
1930	251,533	137,037	8,485	62	1,018	951	240	11.21
1931	251,876	139,744	8,865	63	1,057	988	239	11.15
1932	254,563	144,959	8,567	59	1,064	994	248	11.60
Oct. 1, 1933–Dec. 31, 1933					127	119		
Year beginning Jan. 1:								
1934	252,237	134,318	7,992	60	959	897	240	11.22
1935	246,491	126,116	8,555	68	987	922	231	10.78
1936	245,891	130,828	9,170	70	1,042	974	227	10.62
1937	240,833	126,671	8,803	70	944	883	215	10.03
1938	238,302	135,978	8,835	65	941	880	213	10.65
1939	235,227	138,440	8,610	62	994	929	231	10.79
1940	235,110	136,417	8,557	63	977	913	228	10.67
1941	238,111	130,768	8,560	66	947	885	221	10.34
1942	225,199	114,745	7,918	69	870	813	220	10.27
1943	220,928	113,754	8,185	72	886	828	216	10.11

[1] Based on tonnage of cane used. [2] Age of cane equals 18 to 22 months of growth. [3] See note 2, table 775.
[4] One ton of raw sugar 96° test is assumed to be equivalent to .9346 ton of refined.

1943–1944 (prel.)	270,000	21.5	5,800	725	686	250	11.83

[1] For factor used in converting raw sugar to refined, see note 8, table 780. [2] Ton of 2,000 pounds.
[3] Actual quantity of sugarcane harvested, including 6,392,547 tons of sugarcane cut for the production of sugar, and 1,125,914 for the production of high-grade molasses. It is estimated that about 1,935,542 tons of sugarcane were left standing and harvested the following year.

[1] Includes Puerto Rico, Hawaii, Phil. Isls., and beginning 1910, Virgin Islands not shown separately.
[2] Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.
[3] For 1900 to 1906, shipments to the United States.
[4] Statistics for 1874 to 1880 represent exports. Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.
[5] Exports 1871 to 1911, production 1912 and subsequently. Includes production of muscovado and panocha, low grades of sugar mostly for domestic consumption.
[6] Less than 500 tons. [7] One year only. [8] Not available.
[9] Louisiana and Texas 1909 to 1923; Louisiana only 1924 to 1927; Louisiana and Florida beginning 1928.

Source: Dept. of Agriculture, Bur. of Agricultural Economics. Compiled from official sources and International Institute of Agriculture. Published in annual report, Agricultural Statistics, and also in The World Sugar Situation.

[1] Beginning 1910, stocks on hand are taken into account. Figures for 1910–20 are for cane sugar only; 1922–34 includes stocks of raw cane sugar in all ports and beet sugar held by factories, according to trade sources. Beginning 1935, includes stocks of raw and refined sugar held by refiners, by importers and distributors of direct consumption sugar, and by beet sugar factories, as reported by the Sugar Division, U. S. Department of Agriculture.

[2] Beet sugar converted to raw at the rate of 1.075 through 1920.

[3] Includes Hawaii, Puerto Rico, and the Philippines; Virgin Islands included beginning July 1, 1917.

[4] No account taken of sugar imported in other forms. Imports from the Philippine Islands excluded beginning July 1, 1900, and from Virgin Islands beginning July 1, 1917; reexports deducted through 1932; imports for consumption beginning 1933.

[5] Includes shipments to Hawaii and Puerto Rico for all years, to Alaska beginning 1933, and the Virgin Islands beginning Jan. 1, 1935. Excludes direct exports to foreign countries through customs districts of noncontiguous territories.

[6] Sugar used in the manufacture of other commodities for export on which drawback was paid, taken into account beginning 1910.

[7] Not available for publication.

[8] Raw sugar converted to refined by multiplying by the following factors: For years prior to 1922, 0.9369; 1922–30, Cuba and Hawaii, 0.9358; Puerto Rico, 0.9393; Philippine Islands, 0.95; all others, 0.932; beginning 1931, Hawaii, 0.9617; Puerto Rico, Philippine Islands, and Virgin Islands, 0.946; Cuba and all others, 0.9418.

[1] Exports assumed to be wholly from sugar imported from foreign countries.

[2] Hawaii, Puerto Rico, and Philippine Islands and beginning July 1, 1917, Virgin Islands.

[3] Not available.

[4] Later data not available for publication.

Source: 1875 to 1909, computed from production as reported by the Department of Agriculture, and exports, imports, and shipments as reported by the Department of Commerce, Bureau of Foreign and Domestic Commerce; thereafter, based on data in tables 779 and 780.

No. 782.—Cotton—Production, Consumption, Exports, Imports, Prices, and Carry-Over: 1905 to 1944

NOTE.—**All figures, except average net weight and price, in thousands of bales.** Production figures relate to crop of preceding year and are compiled from individual reports of ginners. Beginning 1911, price per pound represents average price received by growers, as computed by Department of Agriculture; for earlier years, it is average price of average grade marketed in New Orleans prior to April 1 of following year. Consumption figures relate to 12 months during which crop of specified year was chiefly marketed, and not to calendar year. Export and import figures (compiled by Bureau of Foreign and Domestic Commerce through April 1941, Bureau of Census thereafter) relate to 12 months beginning Sept. 1 for years prior to 1915, and to 12 months beginning Aug. 1, thereafter. Figures for linters are included in those for consumption prior to 1909, and in export figures prior to 1915. Separate figures for linters prior to those years not available. See 1937 Statistical Abstract, table 659, for figures for years prior to 1905.

Year ended July 31 [1]	Cotton (exclusive of linters)							
	Production		Average net weight of bale (lbs.)	Average price per pound upland cotton (cents)	Consumption (running bales)	Exports of domestic cotton (running bales)	Imports (equivalent 500-pound bales)	Carry-over (running bales)

[1] Linters included prior to 1921.
[2] Years ended June 30 prior to 1926; July 31 thereafter.
[3] In 500-pound bales prior to 1926; running bales thereafter.
[4] Includes Finland, Estonia, Latvia, and Poland prior to 1919.
[5] Average, 1891–95.
[6] Less than 500.
[7] 1 year only, 1920.
[8] In addition, 51,000 bales were exported to Kwantung, destined mainly for North China.

No. 785.—Coffee—Imports and Reexports: 1830 to 1942

Note.—Imports and reexports in thousands of pounds. Years ended Sept. 30, 1830 and 1840, and June 30, 1850 to 1918; thereafter, calendar years. Imports represent imports from foreign countries and from Territories and possessions into continental United States, and reexports represent exports from continental United States to foreign countries and outlying Territories and possessions. Figures represent mostly green coffee.

Yearly average or year	Imports	Reexports	Net imports per capita, pounds	Average import price per pound, cents	Year	Imports	Reexports	Net imports per capita, pounds	Average import price per pound, cents

No. 786.—Tea—Net Imports: 1830 to 1942

NOTE.—Quantity, except per capita, in thousands of pounds; value in thousands of dollars; per capita in pounds. Years ended June 30 through 1918; thereafter, calendar years. Beginning 1919, data relate to trade of continental United States only (see headnote, table 785); prior to that time the small trade between the United States and noncontiguous territories is not included.

[1] Exports include meal in terms of grain (4 bushels of corn to 1 barrel of meal).
[2] Includes flour, meal, etc.
[3] Excluding reexports.
[4] Imports for consumption, beginning 1933; general imports prior thereto.
[5] 1858–61; no data for 1857.
[6] 1857 only; not reported 1858–61.
[7] Less than 500.
[8] 1867 and 1868; not reported 1869–71.
[9] Not reported separately.
[10] 3-year average; not shown separately for other years.

[1] Includes Commodity Credit wheat in transit and stored in steel and wood bins: 1942, 4,409,000 bushels, 1943, 58,990,000 bushels.
[2] Prior to 1937 some new wheat included; thereafter figures represent only old crop wheat.
[3] Bureau of Census figures raised to represent all merchant mills. Stored for others 1926–29, estimated by the Bureau of Agricultural Economics in the absence of actual figures.
[4] Imports include full-duty wheat (that paying a duty of 10 percent ad valorem) and dutiable flour in terms of wheat, and exclude flour free for export.
[5] Not available prior to 1930.
[6] For individual items see Supply, above.

Source: Department of Agriculture, Bureau of Agricultural Economics, except for imports which are from Bureau of Foreign and Domestic Commerce through April 1941 and from Bureau of Census thereafter. Published in annual report, Agricultural Statistics, and in The Wheat Situation.

[1] Flour converted to grain at rate of 5 bushels to a barrel, 1852 to 1879; 4½, 1880 to 1921; 4.7 thereafter.
[2] Imports for consumption beginning 1933; general imports prior thereto. [3] 1862–65; no data for 1866.

Source: Department of Commerce. See source note, table 789, p. 717.

No. 792.—Corn, Wheat, and Oats—Commercial Stocks, by Months: 1934–35 to 1943–44

Note.—**All figures in thousands of bushels.** Number of pounds to a bushel: Wheat, 60; corn, 56; oats, 32. Figures represent domestic grain in store in public and private elevators at terminal markets and afloat in vessels or barges in harbors of lake and seaboard ports; they do not include grain in transit, stocks in mills or elevators attached to mills, or private stocks intended for local use. Stocks are as reported on Saturday nearest the first of each month. Official statistics were not compiled prior to January 1927. Bradstreet's visible supply is given for earlier years in the 1935 and previous issues of the Statistical Abstract.

27. Forest and Forest Products

GENERAL NOTE

The Bureau of the Census, Department of Commerce, and the Forest Service, Department of Agriculture, are the principal Government agencies engaged in the collection and publication of statistics of forest land, forest industries, and forest products. The Forest Service, through its forest survey activities, is making an inventory of the forest resource and is measuring rates of forest growth and drain. A number of reports for surveyed areas have been published. Other publications of the Forest Service include data on stumpage and log prices, lumber consumption and distribution, lumber used in manufacture, and fire statistics. The Statistical Supplement to the Annual Report of the Chief of the Forest Service carries statistics of the administration of the national forests.

The Bureau of the Census, Department of Commerce, publishes information on forest industries and products in reports of the Census of Manufacturers, in addition to annual reports of the Census of Forest Products. The Bureau of the Census also publishes statistics of foreign trade in forest products. Information on the domestic movement of forest products is reported by the Interstate Commerce Commission and the Association of American Railways.

The Bureau of Agricultural and Industrial Chemistry of the Department of Agriculture publishes annual reports of the production of naval stores.

The Bureau of Labor Statistics of the Department of Labor publishes statistics of wholesale lumber prices monthly and annually.

The Timber Products and Pulp and Paper series of the Industry Reports, published by the Bureau of Foreign and Domestic Commerce in cooperation with other government agencies, carry forest products statistics which have been developed to meet current needs for information.

A number of forest products trade associations and trade journals collect and publish statistics of forest products, production, markets, shipments, inventories, etc.

The completeness and reliability of published statistics of forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those areas which have not been covered. Forest fire statistics for federal lands are considered much better than for private lands, though too much reliance should not be placed in any estimates of fire damage or causes of fires.

In the field of forest products, data for lumber production and other manufactured products such as veneer and plywood, pulp and paper, cooperage, naval stores, etc., are much more complete than for the primary forest products such as poles and piling, fuelwood, and fence posts. As explained in the headnote to the following tables, however, the data for lumber production are subject to certain limitations because of incomplete coverage. Information for pulp and paper, and plywood, on the other hand, are believed to be practically complete. Statistics relating to average value of lumber sawed may be subject to some special limitations due to under representation of small mills.

[1] In continental United States; includes National Forests, Interior, Soil Conservation Service, TVA, Public Domain, etc.
[2] In continental United States and Hawaii. Data reported to Forest Service by its field offices, cooperating agencies, other Government bureaus, and similar sources. Statistics on unprotected areas based on State estimates only.
[3] Prior to 1939 forest area included total area needing protection. Beginning with 1939, this area included only forest area needing protection, which accounts for reduction in areas between 1938 and 1939.
[4] Included in State and private forests, protected area.

Slack heading	Set	41	24	120	100	20
Slack hoops	Piece	16	1	5		5
Misc. logs and bolts	Foot l. s.	500	129	550	250	300
Tight staves	Piece	119	31	147	55	92
Tight heading	Set	7	9	43	18	25
Shingles	Square [4]	3.7	67	304	302	2
Poles	Piece	3.8	39	150	140	10
Piling	do	2.2	59	252	198	54
Distillation and tanning wood	Cord	1.14	65	194	4	190
Damage, total [5]			2,060	5,360	4,765	595
Destroyed by fire			860	1,390	1,195	195
Destroyed by disease, insects, drouth, wind, etc			1,200	3,970	3,570	400

[1] Includes both saw timber and cordwood trees. The cubic volumes include the tops and limbs, but not the bark.
[2] Includes only timber of saw timber size. Lumber items include allowances for logging waste which might have been utilized.
[3] Lumber tally measure.
[4] A square is considered equivalent to 800 pieces.
[5] 1936 figures. No later data available.

Source: Department of Agriculture, Forest Service; records (not published elsewhere). Based in part upon forest products statistics of the Department of Commerce, Bureau of the Census.

No. 808.—Lumber—Production, by Kind of Wood, and Average Mill Value

[Data are not strictly comparable because of varying coverage from year to year. Results are based on mail returns supplemented by field enumeration for decennial census years and 1942; for other years (not including 1943) on mail returns only, except as indicated in headnote table 780. Data for 1943 are derived from the complete enumeration in certain Western States and of larger mills in the Eastern States, supplemented by estimates of the operations of smaller mills in the Eastern States based on a sample of mills. For a more detailed discussion, see Census of Forest Products, 1943]

[Quantities in millions of board feet; average mill value per 1,000 board feet]

[1] Data are not available. [2] Includes 298,000,000 board feet of lumber not reported by kind of wood.
[3] Excludes 165,305,000 board feet of softwood lumber and 7,605,000 board feet of hardwood lumber sawed by New England mills from timber salvaged from the hurricane of 1938.
[4] Less than 500,000 board feet were reported. [5] Included in "Other hardwood." [6] Includes magnolia.

No. 809.—Lumber—Production, by Regions and States: 1889 to 1943

[See headnote, table 808, for explanation of lack of comparableness of statistics. Data for Pacific and Rocky Mountain States are comparable, for mail canvass has been supplemented by field enumeration for each year shown. Statistics for following additional States may be considered comparable for 1941 and subsequent years: Conn., Del., Ind., Mass., Md., Mich., Minn., N. H., N. J., Ohio, R. I., W. Va., and Wis.]

[In millions of board feet]

No. 812.—Lath and Shingles—Production, 1899 to 1943, and by States, 1940 to 1943

[Lath in thousands and shingles in squares. Shingles were reported in thousands prior to 1933 and were converted to squares on the basis of 800 shingles to the square. See headnote, table 808 for explanation of lack of comparableness of statistics, because of incomplete coverage. The effect on total production statistics for lath is not known. Data for shingles are reasonably comparable over a period of years, because of complete enumeration of Red Cedar Shingle Industry, this industry's production comprising over 90 percent of total shingle production.]

YEAR (CALENDAR)	Lath	Shingles	YEAR (CALENDAR)	Lath	Shingles
1899	2,523,998	15,127,521	1934	416,308	3,477,063

[1] Beginning 1914 includes screenings.
[2] Includes data for existing mills not classified as producers of pulp before 1940. In that year data for 6 mills not previously classified as producers of wood pulp were included for first time. For the same reason, an additional mill was included in 1941, and 2 more added in 1943.
[3] Includes data for 25 existing mills not previously classified as producers of paper and paperboard.
[4] Includes estimated production of insulating board for 1 mill. Estimates were made on assumption that production of this mill was proportionately the same in 1941 and 1942 as in 1943.

[1] Figures for turpentine and rosin from crude gum, beginning 1929–30, and from wood beginning 1933–34 relate to crop year ended Mar. 31. All other figures relate to calendar years.
[2] Figures compiled from data reported by establishments in Turpentine and Rosin industry.
[3] Figures compiled from data reported by establishments in Wood-Distillation industry.
[4] Not reported.
[5] Includes, for 1909 and 1914, 18,310 gallons and 92,401 gallons, respectively, of turpentine and, for 1914, 4,495 barrels of rosin, reported by establishments engaged in manufacture of lumber and timber products.
[6] Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1932–33, 33,400 barrels; 1933–34, 35,060; 1934–35, 34,000.
[7] Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.
[8] Includes data for rosin produced from reclaimed gum: For 1935–36, 54,187 barrels; 1936–37, 42,694; 1937–38, 26,271; 1938–39, 39,979; 1939–40, 39,268; 1940–41, 25,226; 1941–42, 24,706; 1942–43, 14,121; 1943–44, 12,280.
[9] Figures do not include data for rosin produced from reclaimed gum. See note 8.

28. Fisheries

GENERAL NOTE

The Fish and Wildlife Service, Division of Commercial Fisheries in the Department of the Interior, conducts annual surveys for various statistical information on the fishery industries. These data are published in greater detail in publications of the Service and include data on the volume of the catch of individual species of fish and shellfish and their value, employment in the fisheries, quantity of gear operated, the number of fishing and transporting craft employed in the capture and transporting of fishery products, employment in wholesale and manufacturing establishments, and volume and value of the production of manufactured fishery products. In addition to the basic statistics on employment, yield, and the production of manufactured fishery products for individual States and various geographical sections, there are included in reports data on imports and exports of fishery commodities; landings by fishing vessels at Boston, Gloucester, and New Bedford, Massachusetts; Portland, Maine; and Seattle, Washington; shad fisheries of the Hudson and Potomac Rivers; alewife fishery in the Potomac; seed oyster fisheries; a review of the Pacific Coast halibut fishery; a statement on whaling operations by United States firms; data on the sponge fishery; and lists of firms producing various manufactured fishery products. These data are summarized in the Statistical Abstract. The more detailed information may be obtained from the Fish and Wildlife Service, Washington 25, D. C.

No. 821.—Fishery Products—Quantity and Value, by Sections and States: 1880 to 1942

Note.—Values in this table and tables 822 to 824 represent the value of the fish to the fishermen.
