This report presents data from the Annual Housing Survey, which was sponsored by the U.S. Department of Housing and Urban Development and conducted by the U.S. Bureau of the Census. It was developed under the direction of Arnold H. Diamond, Assistant Counselor for Finance and Economics, Department of Housing and Urban Development, and Arthur F. Young, Chief, Housing Division, Bureau of the Census.

Arnold H. Diamond, Duane McGough, and David Yentis were responsible for overseeing the Annual Housing Survey and the resultant report on behalf of the Department of Housing and Urban Development.

Within the Bureau of the Census, this report was developed in the Housing Division. It was prepared under the supervision of Leonard J. Norry, Assistant Division Chief, by Elmo E. Beach, Chief, Current Surveys Branch, assisted by Aneda E. France, Edward D. Montfort, and George Spraggins. Specific activities related to data collection procedures, statistical presentation, organization of the report, and preparation of text materials were performed by Edward Cary Bean, Jr., Robert W. Bonnette, Mary C. Carroll, Margaret W. Harper, Paul P. Harple, Jr., Mary A. Knoll, Richard G. Kreinsen, Jane S. Maynard, Mary D. Stickell, and Jeanne M. Woodward.

The operational aspects of the Annual Housing Survey were coordinated by the Demographic Surveys Division under the direction of Earle J. Gerson, Chief, by Stanley Greene, Assistant Division Chief, and Edward F. Knowles, assisted by John C. Cannon, Maria A. Mochulski, and Joan F. Garrett. Systems and processing procedures were performed under the direction of Barry M. Cohen, Assistant Division Chief. The computer programming and processing were performed under the supervision of D. Richard Bartlett, assisted by Margaret Goldsworth, Mark Sheddon, Robert St. Laurent, Lee Rian, and James Dallmann. Leonard Goldberg, assisted by David B. Lipscomb, Mary Campbell, and Robert Smith, Jr., was responsible for the clerical and keying procedures.

The planning of sample design, weighting, and computation of sampling variances were developed in the Statistical Methods Division, under the supervision of Morton Boisen, Charles Jones, and Gary Shapiro, by David Bateman, Dennis Schwanz, and Mason Malmuth. The implementation of the sample selection was performed, under the supervision of David Diskin and Leonard Baer, by Jerome Roth and Patricia Clark (Data Preparation Division, Jeffersonville, Indiana). The standard errors were computed, under the supervision of David Diskin, by Robert Aquilino and Robert Jewett. Implementation of field sample control and reinterview procedures was carried out under the supervision of Irene C. Montie, by John J. Paletta and Fay F. Nash. Reinterview design and analysis were conducted, under the supervision of Irwin Schreiner, by Douglas Moye.

Data collection activities were administered by the Field Division under the supervision of Richard C. Burt, Chief; by Stanley D. Matchett, Assistant Division Chief; D. Ross Forbes, and Kenneth A. Frail as well as the directors of the Bureau's regional offices.

Clerical processing of the questionnaires was performed in the Data Preparation Division, under the direction of O. Bryant Benton, Chief, by Don Adams and Kurt Legait.

Within the Publications Services Division, many individuals made significant contributions in the areas of publication planning and design, editorial review, composition, and printing procurement.

For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by draft on a U.S. bank.

GENERAL

This report presents urban and rural housing characteristics from the 1975 Annual Housing Survey for the United States and each of the four geographic regions. The Annual Housing Survey was designed to provide a current series of information on the size and composition of the housing inventory, the characteristics of its occupants, the changes in the inventory resulting from new construction and from losses, the indicators of housing and neighborhood quality, the characteristics of recent movers, and the characteristics of urban and rural housing units. The survey, performed for the Department of Housing and Urban Development, is authorized under sections 501 and 502(d), 502(e), and 502(f) of the Housing and Urban Development Act of 1970, Title 12, United States Code 1701z-1 and 1701z-2. The Bureau of the Census is authorized under Title 31, United States Code 686, to perform special work or services for Federal agencies.

The statistics presented in this report are based on information from a sample of housing units. The information for the survey was collected by personal interview from October to December 1975.

This report series consists of six parts (see list on page III) issued jointly by the Department of Housing and Urban Development and the Bureau of the Census. Part A provides data on general housing characteristics, part B on indicators of housing and neighborhood quality, part C on financial characteristics, part D on recent mover households, part E on urban and rural housing characteristics, and part F on financial characteristics cross-classified by indicators of housing and neighborhood quality.

The content and procedures of the Annual Housing Survey were determined after consultation with a variety of users of housing data and through field pretesting. The data for many of the subjects covered in this report are the same as those collected in the 1970 Census of Housing; in general, these data are comparable to those shown in the 1970 census reports. In addition, a number of new items were introduced in this survey on subjects such as breakdowns or failures in equipment, the physical condition of the structure, and the neighborhood conditions and services. Detailed statistics are also presented for mobile homes and trailers.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

Organization of the text.—The text consists of this introduction and appendixes A and B, which appear after the data tables. Appendix A which is the same for parts A through F, describes the geographic area classifications and provides definitions and explanations of the subjects covered in this report. Appendix B presents information on sample design, estimation, and accuracy of the data.

Content of the tables.—A series of standard tables presents simple distributions of the data for urban and rural housing units for each area shown in this report. The finding guide at the back of this report lists the characteristics covered in this report and shows the tables in which the various types of statistics appear. The numbers presented in these tables are rounded to the nearest thousand. Tables 1 and 2 present selected housing characteristics for 1975 and 1970; tables 3 to 6, characteristics of owner- and renter-occupied housing units; table 19, characteristics of mobile homes and trailers; table 20, characteristics for new construction units; table 21, 1973 characteristics of units removed from the housing inventory; table 22, characteristics of units occupied by recent movers (households that moved into their units during the 12 months prior to enumeration); and table 23, characteristics of year-round vacant units. The same general subject content presented in tables 1 to 6 is also presented for households with Black household head in tables 7 to 12 and households with head of Spanish origin in tables 13 to 18.

The prefix letter "A" has been assigned to the tables for the United States as a whole, "B" to the Northeast region, "C" to the North Central region, "D" to the South region, and "E" to the West region.

1970 data in this report.—The source of the 1970 data shown in this report is unpublished tabulations from the 1970 Census of Population and Housing. For some items, 1970 data are not shown because they are not available. Data for 1970 for all housing units and for units with Black household head are from the 20-, 15-, and 5-percent samples. Data for housing units with household head of Spanish origin are limited to the 1970 census 5-percent sample. The totals for individual items in some tables and in some areas may differ when the characteristics are derived from different samples. Information for the 1970 census was collected as of April 1, 1970.

Sample size.—The statistics presented in this report are based on a sample of housing units and are, therefore, subject to sampling variability. The designated sample consisted of approximately 78,000 housing units located throughout the United States. The sample was selected from units enumerated in the 1970 census and updated to include units constructed since 1970. Detailed information on the sample design, size of sample, estimation procedure, and sampling variability associated with these data is given in appendix B.

Derived figures (medians, etc.).—Shown in this report are medians, ratios, and percents. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half the cases fall below the median and one-half the cases exceed the median. Derived figures are not presented (but indicated by three dots ". . .") if there are less than 25 sample cases in the distribution or the base.

Medians for rooms, persons, and years of school completed by head are rounded to the nearest tenth. Medians for selected monthly housing costs as percentage of income are rounded to the nearest percent. Travel time is rounded to the nearest minute, and distance from home to work is rounded to the nearest tenth of a mile. Medians for value, sales price asked, income, and purchase price of mobile homes and trailers are rounded to the nearest hundred dollars; rent, asking rent, real estate taxes last year, and selected monthly housing costs are rounded to the nearest dollar.

In computing medians for rooms and persons per housing unit, the whole number is used as the midpoint of the interval so that, for example, the category "4 rooms" is treated as the interval from 3.5 up to 4.5 rooms. When computing medians for distance and travel time to work, household heads reporting "no fixed place of work" are excluded; for median purchase price of mobile homes and trailers, the category "not purchased" is excluded. Units reporting "no cash rent" are excluded from the computation of median rent; for selected monthly housing costs as percentage of income, units in the category "not computed" are excluded. "Not reported" categories are excluded from the computation of medians.

The median number of school years completed by the head of the household was computed after the statistics on years of school completed had been converted to a continuous series of numbers (e.g., completion of the first year of high school was treated as completion of the 9th year and completion of the first year of college as completion of the 13th year). Heads completing a given school year were assumed to be distributed evenly within the interval from 0.0 to 0.9 of the year. Because of the inexact assumption as to the distribution within an interval, the median school years completed is more appropriately used for comparing different groups and the same group at different dates than as an absolute measure of educational attainment.

The medians presented for 1975 are generally computed on the basis of the distributions as shown in this report. The medians presented for 1970 are computed on the basis of the distributions as tabulated in 1970, which are sometimes more detailed than the distributions shown in this report.

When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; thus, for example, if the median falls in the cateogory "less than $5,000," it is shown as "$5,000–." When the median falls in the upper terminal category of an open-ended distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; thus, for example, if the median falls in the category "$60,000 or more," it is shown as "$60,000+."

Symbols.—A dash "—" signifies zero. Three dots ". . ." in a data column mean not applicable or that the base for a derived figure is too small for it to be shown. The symbol "NA" means the 1970 data are not available.

Boundaries.—The data shown in this report relate to the areas as defined for the 1970 census. See appendix A for a discussion of these areas. Additional information and definitions of the 1970 boundaries are given in the 1970 Population Census PC(1)-A reports.

Other reports from the Annual Housing Survey.—In addition to the six basic reports in the Annual Housing Survey Series H-150, one or more supplementary reports (Series H-151) may be published for the United States.

A series of reports (H-170) similar to H-150 will also be published for 60 selected standard metropolitan statistical areas. The data for the SMSA's are based on an independent sample of the 60 SMSA's divided into 3 groups of approximately 20 each, with one group interviewed every 3 years on a rotating basis. Enumeration for the first group began on April 1, 1974, and continued through March 1975; enumeration for the second group began on April 1, 1975, and continued through March 1976. The first group of SMSA reports is now available.

*Included with Group II for the first enumeration.

Publication of the second group is scheduled for the spring of 1977. Above is a list of the SMSA's in each group.

DATA COLLECTION PROCEDURES

The 1975 Annual Housing Survey was conducted by enumerators who made personal visits to each sample unit and obtained the information from the occupants or, if the unit was vacant, from informed persons (landlords, rental agents, or knowledgeable neighbors). The information reported by the enumerator reflected the situation at the time of enumeration, which began in October and extended through December 1975.

Data were collected for sample housing units located in the counties and independent cities comprising the 461 sample areas used in current surveys of the Census Bureau. A sample of housing units was selected in these areas from the 1970 census and updated by a sample of addresses from building permits to include housing units added since 1970. Estimates of the counts and characteristics of the 1975 inventory were obtained for these sample units.

A more detailed description of the survey design and sampling procedures can be found in appendix B.

For the estimates of losses from the 1973 housing inventory, the interviewer located the 1973 sample unit. If the 1973 sample unit no longer existed or no longer was a separate housing unit, the disposition of the unit was determined; i.e., lost through means such as demolition, disaster, merger, or changed to nonresidential use.

PROCESSING PROCEDURES

The questionnaires used for the 1975 Annual Housing Survey were of the conventional type on which the enumerator recorded the information by marking a precoded check box or by writing in the entries. Census clerks edited and coded the schedules. The information from the questionnaires was data keyed directly to magnetic tape which was processed on the Census Bureau's computers through a number of editing and tabulating steps. A facsimile of the questionnaire appears in appendix A.

The 1973 characteristics of units lost from the housing inventory were obtained by matching those units to the 1973 Annual Housing Survey records. The 1973 data for losses were then extracted from the 1973 Annual Housing Survey record tapes.

QUALIFICATIONS OF THE DATA

Since the estimates in this report are based on a sample, they may differ somewhat from the figures that would have been obtained from a complete census, using the same schedules, instructions, and enumerators. Particular care should be exercised, therefore, in the interpretation of figures based on relatively small numbers of sample cases as well as small differences between figures. As in any survey work, the results are subject to errors of response and nonreporting and to sampling variability. For a further discussion of accuracy of the data, see appendix B.

The concepts and definitions of most of the items in this report are essentially the same as those used for the 1970 census. The SMSA boundaries are the same as those in the 1970 census. For historical comparisons and boundary changes, refer to the census reports of 1960 and earlier.

In making comparisons between the 1975 survey and 1970 Census of Housing results, differences in the data may reflect such factors as the use of direct interview for 1975 contrasted with the extensive use of self-enumeration in 1970, the sample design, the estimation procedure used, the sampling variability of the estimates, and the processing procedures. See the section on "Comparability with 1970 Census of Housing data" in appendix A for further discussion.

In addition, according to the 1970 Census Evaluation and Research Program, the 1970 count of 68.7 million housing

units is understated by approximately 1.5 million units which were missed in the 1970 census. See Series PHC(E)-5, **The Coverage of Housing in the 1970 Census,** for further discussion. In the detailed tables of this report, the 1970 figures do not reflect the undercount.

Because of the differences between survey and decennial census procedures and the sampling variability of the survey results, the owner-occupancy rate of 62.9 percent as reported in the 1970 census should not be used in measuring the change in homeownership during the 5 1/2-year period. Instead, it is recommended that the 1970 results of the Bureau's Current Population Survey (CPS) be used because the CPS has basically the same sample design and survey procedures as the Annual Housing Survey. The CPS showed that the owner-occupancy rate in 1970 was 64.2 percent; in the 1975 Annual Housing Survey it was 64.6 percent.

Statistics on value, rent, and income for both 1970 and 1974 are measured in current dollars (the value at the time the data were collected). Therefore, a significant part of the increase between 1970 and 1975 reflects the 42.9 percent rise in the cost of living during the 5 1/2-year period, as measured by the Consumer Price Index, as well as changes in the housing inventory.

In this report, statistics on income relate to the income of the family or primary individual. Therefore, no data are provided on household income; i.e., income of persons unrelated to the head of the household is excluded.

As in 1970, statistics for some of the characteristics shown in this report are based on restricted universes and, therefore, care should be exercised in relating the statistics for one characteristic to another. For example, value is restricted to owner-occupied, one-family homes on less than 10 acres and no business on property. Therefore, the totals for owner-occupied units in the "value" universe do not agree with the totals for owner-occupied units for some of the other universes such as "rooms" or "persons."

See appendix A for a more detailed discussion of the definitions and qualifications of all items in this report.

TABLE A-1. GENERAL CHARACTERISTICS OF THE HOUSING INVENTORY: 1975 AND 1970

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1975 ..... App-21

AREA CLASSIFICATIONS

Urban and rural residence.—Urban housing comprises all housing units in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, urban housing consists of all housing units in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those housing units in the rural portions of extended cities; (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. Housing units not classified as urban constitute rural housing. Information on the historical development of the urban-rural definition appears in the 1970 Population Census PC(1)-A reports.

In the Annual Housing Survey, the urban and rural residence classification of the housing units is the same as in the 1970 census.

Farm-nonfarm residence.—In rural areas, occupied housing units are subdivided into rural-farm housing, which comprises all rural units on farms, and rural-nonfarm housing, which comprises the remaining rural units. Occupied housing units are classified as farm units if they are located on places of 10 or more acres from which sales of farm products amounted to $50 or more during the 12-month period prior to enumeration or on places of less than 10 acres from which sales of farm products amounted to $250 or more during the 12-month period prior to enumeration. Occupied units in rural territory which do not meet the definition for farm housing are classified as nonfarm. All vacant units in rural areas also are classified as nonfarm.

Counties

The primary divisions of most of the States are termed counties; in Louisiana the corresponding units are termed parishes. Alaska has no counties; in this State, areas designated as census divisions have been defined for general statistical purposes by the State in cooperation with the Census Bureau and are treated as county equivalents. Four States (Maryland, Missouri, Nevada, and Virginia) contain one or more cities that are independent of any county; for statistical purposes these independent cities are treated as county equivalents.

Standard Metropolitan Statistical Areas

The definitions of standard metropolitan statistical areas used in the Annual Housing Survey correspond to the 243 SMSA's used in the 1970 census. These include the 228 SMSA's as defined and named in the Bureau of the Budget publication, **Standard Metropolitan Statistical Areas: 1967**, U.S. Government Printing Office, Washington, D.C. 20402. After 1967, 15 SMSA's were added, of which 2 were defined in January 1968 and an additional 13 were defined in February 1971 on the basis of the results of the 1970 census. Changes in SMSA definition criteria, boundaries, and titles made after February 1971 are not reflected in this series of reports. SMSA's are defined by the Office of Management and Budget (formerly Bureau of the Budget).

Except in the New England States, a standard metropolitan statistical area is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Bureau of the Budget publication cited above.

In this report, figures for "in central cities" refer to all housing units within the legal city boundaries. For a few central cities, the figures include some housing units in parts of the city classified as rural in the 1970 census.

DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

General

As stated in the introductory text of this report, the 1975 Annual Housing Survey was conducted by direct interview. The survey enumerators were instructed to read the questions directly from the questionnaire. The definitions and explanations given below for each subject are, to a considerable extent, drawn from various technical and procedural materials used in the collection of the data. This material helped the enumerative personnel to understand more fully the intent of each question and thus to resolve problem or unusual cases. Additional explanatory information has been added to this portion of the text to assist the user in the proper utilization of the statistics.

Comparability with 1973 and 1974 Annual Housing Surveys.—Most of the concepts and definitions used in the 1975, 1974, and 1973 reports are essentially the same. However, there are significant differences in the measurement of losses between the 1973 report and the 1974 and 1975 reports and in the source of the 1970 data. In the 1974 and 1975 reports, the data refer to losses of individual housing units, whereas in 1973 a housing unit was counted as a loss only when the whole structure in which the unit was located was lost from the inventory. In addition, the source of the 1970 data in the 1974 and 1975 reports is the 1970 census unpublished tabulations, however, the 1970 data in the 1973 report are from both published and unpublished tabulations.

Additional differences, if any, are discussed under the particular subject later in the section. Because of the relatively small sample size, particular care should be taken in making year to year comparisons, especially where there are small differences between the figures.

Comparability with 1970 Census of Housing data.—The concepts and definitions are essentially the same for items that appear in both the 1970 census and the 1975 survey.

A major difference however, is the time period, classifying "recent movers"

(see parts D and E of this series). In the Annual Housing Survey, "recent movers" are households that moved into their unit during the 12 months prior to enumeration, a time period of 1 year or less. In the 1970 Census of Housing reports, different time periods were used. In Volume II, **Metropolitan Housing Characteristics**, the shortest time period for "year moved into unit," is "1969 to March 1970" (1¼ years); in Volume IV, **Components of Inventory Change**, the period is 1969 to December 1970 (approximately 2 years); and in Volume VII, No. 5, **Mover Households**, the time period is April 1965 to March 1970 (approximately 5 years).

Other definitional differences, if any, are discussed under the particular subject. Additional differences between the 1975 Annual Housing Survey data and the 1970 census data may be attributed to several factors. These include the extensive use of self-enumeration in the census in contrast to direct interview in the Annual Housing Survey; differences in processing procedures; the estimation procedures and sample designs; the sampling variability of the estimates from the Annual Housing Survey; to a smaller extent, the sampling variability associated with the sample data from the census; the nonsampling errors associated with the Annual Housing Survey estimates; and the nonsampling errors associated with the census estimates.

Statistics on counts and characteristics of changes in the housing inventory between the 1960 and 1970 censuses are given for the United States and for 15 selected SMSA's in the 1970 Census of Housing, Volume IV, **Components of Inventory Change**. In volume IV the data are based on information for a sample of housing units enumerated in late 1970 as part of the 1970 census. Data are provided for such components of change between 1960 and 1970 as new construction, conversions, other additions, demolitions, mergers, other losses, and housing units that were the same in 1960 and in 1970.

In parts A and E of this series, data are shown only for new construction units and units removed from the inventory by demolition, disaster, or some other means. The 1975 data on new construction were obtained primarily by enumeration of a sample of units selected from building permits. The 1970 **Components of Inventory Change** data were obtained from the 1970 census tabulations of the "year structure built" item; i.e., housing units built in 1960 or later were classified as added by "new construction."

Data as of 1971 for "mortgage status," "mortgage insurance," "real estate taxes last year," "selected monthly housing costs," and "acquisition of property" are presented in the 1970 Census of Housing, Volume V, **Residential Finance**. In volume V, the data are based on information collected for a sample of housing units in the Residential Finance Survey which was conducted in 1971 as part of the 1970 census. The 1971 report provided data on the financing of homeowner and rental properties, including characteristics of the mortgages, properties, and owners.

Differences in the concepts and definitions between the data in this report and volume V include the following. The basic unit of tabulation in this report is the housing unit; in volume V, it is the property. Data on mortgage status and mortgage insurance in this report are based on the occupant's answer; in volume V, mortgage status and mortgage insurance were verified by the lender. In this report, real estate taxes and selected monthly housing costs reflect the total amount of real estate taxes and housing costs, excluding special assessments. In volume V, real estate taxes and selected monthly housing costs *include* special assessments.

Comparability with 1970 Census of Population data.—In the 1970 census, data for "years of school completed" were based on responses to two questions—the highest grade or year of regular school each household member attended, and whether or not that grade or year was completed. In the 1975 Annual Housing Survey, data for "years of school completed" were based on responses to a single question—the highest grade or year of regular school completed by the head. Therefore, the 1975 Annual Housing Survey may overstate the education level of the head of the household; that is, respondents may have reported the grade or year the head was currently enrolled in or had last been enrolled in whether or not the grade or year was completed.

Comparability with other current reports.—This series of reports contains information similar to that contained in some of the other current Census Bureau reports, such as the Current Housing Report, **Housing Vacancies**, the Current Population Reports, and the Current Construction Reports, published by the Bureau of the Census. Because of procedural differences mentioned below, care should be taken when comparing data from the Annual Housing Survey with data from other current surveys.

Comparability with Housing Vacancy Survey.—Data on vacancy rates and characteristics of vacant units from the Housing Vacancy Survey are available for the United States by inside and outside standard metropolitan statistical areas. This nationwide survey, covering a sample of approximately 58,000 housing units (occupied and vacant), is conducted monthly by the Bureau of the Census in conjunction with its Current Population Survey. Data are published quarterly and annually in Current Housing Reports, Series H-111, **Housing Vacancies**.

The concepts and definitions used in the 1975 Annual Housing Survey and the Housing Vacancy Survey are the same. Differences may be attributed to factors such as sampling variability, nonsampling errors, survey techniques, and processing procedures.

Current Population Reports from the Current Population Survey.—The Current Population Survey is a monthly sample survey of approximately 58,000 designated sample units. From the data collected in the Current Population Survey, the Bureau issues several publications under the general title Current Population Reports. Included are reports on household and family characteristics, mobility of the population, and income.

Although the concepts and definitions used in this report are essentially the same as those used in the Current Population Reports and the intent of both the Annual Housing Survey and the Current

Population Survey is the same, there is a major difference in the concept of "mover." In parts D and F, household heads that moved into their units during the 12 months prior to enumeration are classified as "recent movers." In the Current Population Reports, individuals whose current place of residence is different than in March 1970 are classified as "movers."

There are also likely to be significant differences in the data on income and years of school completed. The time period covering income is different in this series of reports because income data cover the 12 months prior to the date of enumeration while the income data in the Current Population Survey refer to the calendar year prior to the date of enumeration. There are also significant differences in the way income questions are asked. For "years of school completed by head," the differences cited in the section, "Comparability with 1970 Census of Population data," also apply to the Current Population Survey.

Additional differences between the 1975 Annual Housing Survey and the Current Population Survey may be attributed to factors such as the sampling variability and nonsampling errors of the figures from the two surveys, survey procedures and techniques, and processing procedures.

Current Population Reports from the Survey of Purchases and Ownership.—The 1974 Survey of Purchases and Ownership is a sample survey, covering approximately 20,000 of the designated sample units in the 1974 Annual Housing Survey. Data are collected on ownership, availability, and recent purchases of automobiles and other vehicles, television sets, and selected major household appliances. Information on the price paid is obtained for recently purchased items. The data can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

Although the Survey of Purchases and Ownership was taken in conjunction with the Annual Housing Survey, there are differences in the concepts and definitions between the two. For example, the data on automobiles and other four-wheel vehicles, such as pickup trucks and passenger vans, collected in the Survey of Purchases and Ownership reflect the number of such vehicles that are owned or being bought by a member of the family. The data collected in the Annual Housing Survey reflect the number of automobiles or trucks owned or regularly used by any member of the household, including nonrelatives. Additional differences may be attributed to such factors as estimation procedures, sampling variability, and nonsampling errors.

Current Construction Reports from the Survey of Construction and Survey of Residential Alterations and Repairs.—The Census Bureau issues several publications under the general title, Current Construction Reports. The data for these reports are primarily from the Survey of Construction and Survey of Residential Alterations and Repairs.

The Survey of Construction consists of approximately 14,000 permit-issuing places throughout the United States. The reports from the survey contain current data on housing starts and completions, construction authorized by building permits, housing units authorized for demolition in permit-issuing places for selected areas, and new one-family homes sold and for sale. The concepts and definitions used in this report differ from some of those used in the Survey of Construction. The major difference is that the Survey of Construction shows counts and characteristics of housing units in various stages of construction through completion. The Annual Housing Survey shows counts and characteristics of the existing housing inventory. Additional differences between the 1975 Annual Housing Survey and the Survey of Construction may be attributed to factors such as the sampling variability and nonsampling errors of the figures from the two surveys, survey procedures and techniques, and processing procedures.

The Survey of Residential Alterations and Repairs is a sample survey of approximately 5,000 designated owner-occupied properties. The survey collects data on expenditures by property owners for upkeep and improvement of residential properties including renter-occupied housing units, single as well as multiunit structures, and units on 10 acres or more. The data on alterations and repairs in this report are restricted to one-family homes on less than 10 acres and no business on property. For additional information on the Survey of Residential Alterations and Repairs, see Current Construction Reports, Series C50, **Residential Alterations and Repairs.**

Living Quarters (Parts A, B, C, D, E, F)

Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a one-family home, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars.

Housing units. (Parts A, B, C, D, E, F)—A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hall which is used or intended to be used by the occupants of another unit or by the general public or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units, the criteria of separateness, direct access, and complete kitchen facilities for exclusive use are applied to the intended occupants whenever possible. If the information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that mobile homes, trailers, tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

Group quarters. (Parts A, B, C, D, E, F)—Group quarters are living arrangements for institutional inmates or for other groups containing five or more persons not related to the person in charge. Group quarters are located most frequently in institutions, boarding houses, military barracks, college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and five or more persons unrelated to him, or, if there is no person in charge, by six or more unrelated persons. Information on the housing characteristics of group quarters was not collected.

Rules for mobile homes, hotels, rooming houses, etc. (Parts A, B, C, D, E, F)—Mobile homes or trailers, tents, boats, or railroad cars are not considered housing units if vacant, used only for business, or used only for vacations.

Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents; i.e., persons who consider the hotel as their usual place of residence or have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only in those hotels, motels, and similar places in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have either direct access or complete kitchen facilities for exclusive use, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain four or fewer roomers unrelated to the head, they are classified as one housing unit; if the combined quarters contain five or more roomers unrelated to the head or person in charge, they are classified as group quarters. In a dormitory, residence hall, or similar place, living quarters of the supervisory staff and other employees are separate housing units if they satisfy the housing unit criteria; other living quarters are considered group quarters.

Institutions. (Parts A, B, C, D, E, F)—Living quarters of staff personnel are separate housing units if they satisfy the housing unit criteria. Other living quarters are considered group quarters.

Year-round housing units. (Parts A, E)—Data on housing characteristics are limited to year-round housing units; i.e., all occupied units plus vacant units which are intended for year-round use. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, this report does present counts of the total housing inventory which includes all vacant housing units.

The statistics in the 1974 and 1975 reports shown for "all year-round housing units" may not be comparable to the corresponding data shown in the 1973 reports, because the 1974 and 1975 tabulations included an estimation procedure which adjusted the survey counts of "vacant year-round" and "vacant—seasonal and migratory" units separately to independent current estimates. (See section on "Estimation" in Appendix B—Source and Reliability of the Estimates.) In 1973, "vacant—seasonal and migratory" units were combined with several categories of year-round vacancies (rented or sold, not occupied; held for occasional use; and other vacant) and adjusted to the combined total of the independent estimates for these categories. Thus, the 1974 and 1975 data for "vacant—seasonal and migratory" housing units and for "all year-round housing units" adhere more closely to the independently derived current estimates than they did in 1973. The 1974 and 1975 characteristics for "all occupied units," "owner occupied," and "renter occupied" are, however, comparable with the corresponding 1973 data.

Changes in the Housing Inventory

Units added by new construction. (Parts A, E)—A housing unit built in April 1970 or later is classified as a unit added by "new construction." Vacant units under construction at the time of enumeration were enumerated only if construction had proceeded to a point that all exterior windows and doors were installed and final usable floors were in place. Housing units built during this period but removed from the housing inventory before enumeration are not reflected in the new construction counts for the 1970 to 1975 period. In the Annual Housing Survey, data on new construction were obtained primarily by the enumeration of a sample of units selected from building permits; in the 1970 Census of Housing, Volume IV, **Components of Inventory Change**, new construction data were obtained from tabulations of the 1970 census sample records of units built 1960 or later.

Units lost from the inventory. (Parts A, E)—Characteristics are presented for the total of all units removed from the 1973 housing inventory in 1973 or later through demolition or disaster and through other means. Separate counts of "demolition or disaster" losses and of "other losses" are shown in part A of this series. The 1974 and 1975 surveys cover all losses, including those in structures that were not completely lost.

Units lost through demolition or disaster. (Parts A, E)—A housing unit which existed in October 1973 and was torn down on the initiative of a public agency or as a result of action on the part of the owner is classified as a unit lost through demolition. Units destroyed by fire, flood, or other causes are classified as units lost through disaster. In the 1973 survey, a housing unit was counted as a demolition or disaster loss when the whole structure in which it was located was lost from the inventory. In the 1974 and 1975 surveys and in the 1970 Census of Housing, Volume IV, **Components of Inventory Change**, the data on losses refer to all housing unit losses, including losses of units in structures which still contained one or more housing units. In addition, units lost through disaster were counted in 1970 as "units lost through other means."

Units lost through other means. (Parts A, E)—Any housing unit which existed in October 1973 is counted as lost through other means when it was lost from the

housing inventory through means other than demolition or disaster. This component includes the following types of losses:

1. Units lost by change to group quarters; for example, a housing unit that was occupied by a family in 1973 and by a family and five lodgers at the time of the 1975 enumeration.

2. Units lost from the inventory because they are vacant and unfit for human habitation. A unit is unfit for human habitation if the roof, walls, doors, and windows no longer protect the interior from the elements.

3. Vacant units lost from the inventory because there is positive evidence (sign, notice, mark on the house or block) that the units are scheduled for demolition or rehabilitation or that they are condemned for reasons of health or safety so that further occupancy is prohibited.

4. Units lost by change to nonresidential use.

5. Units moved from site since October 1973. Such moves in the same area do not necessarily result in a net loss from the total inventory since they presumably represent units added in the place to which they were moved.

In the 1973 Annual Housing Survey, a housing unit was counted as lost through other means when the entire structure in which it was located was lost to the housing inventory through means other than demolition or disaster. In the 1974 and 1975 surveys, the data on losses refer to all housing unit losses including losses of units in structures which still contained one or more housing units.

Unspecified units. (Part A)—There are other components of change in the housing inventory for which the Annual Housing Survey provides no specific measures. The survey procedures do not include a measure of conversions and mergers and units added from other sources such as nonresidential structures. The net effect of these omissions on the change in the total housing inventory is not known.

Units changed by conversion.—Conversion refers to the creation of two or more housing units from fewer units through structural alteration or change in use. Structural alteration includes such changes as adding a room or installing partitions to form another housing unit. Change in use is a simple rearrangement in the use of space without structural alteration, such as locking a door which closes off one or more rooms to form a separate housing unit.

Units changed by merger.—A merger is the result of combining two or more housing units into fewer units through structural alteration or change in use. Structural alteration includes such changes as the removal of partitions or dismantling of kitchen facilities. Change in use may result from a simple rearrangement of space without structural alteration, such as unlocking a door which formerly separated two housing units. A change in use also occurs, for example, when a family occupies both floors of a house which formerly contained a separate housing unit on each floor.

Units added through other sources.—Any housing unit added to the inventory through sources other than new construction or conversion is classified as a unit added through other sources. This component includes units created from living quarters previously classified as group quarters and units created from nonresidential space such as a store, garage, or barn. Also included are units moved from one site to another. Such units, if moved within the same area, do not necessarily result in a net addition to the total inventory since they presumably represent units lost in the place from which they were moved. A previously vacant mobile home or trailer, whether on a different site or the same site, is a net addition if currently occupied as a housing unit.

Occupancy and Vacancy Characteristics

Occupied housing units. (Parts A, B, C, D, E, F)—A housing unit is classified as occupied if a person or group of persons is living in it at the time of enumeration or if the occupants are only temporarily absent—for example, on vacation. However, if the unit was occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

Race. (Parts A, B, C, D, E, F)—The classification by race shown here refers to the race of the head of the household occupying the housing unit. The concept of race as used by the Census Bureau does not denote clear-cut scientific definitions of biological stock. The enumerator was to report the race of the head of the household in three categories: White, Black (Negro), and other. The last category includes American Indian, Chinese, Eskimo, Japanese, Korean, and any other race except White and Black. Figures on tenure are given separately for White and Black household heads; units with household heads of other races are included in the total in table 1 of parts A and E and may be derived by subtracting the sum of White and Black from the total. More detailed characteristics of units with Black household head are presented in separate tables. The classification of race in the Annual Housing Survey was made by the enumerator based on his own observation. In the 1970 census, race was essentially a self-classification by people according to the race with which they identified themselves.

Spanish origin. (Parts A, B, C, D, E, F)—The classification by Spanish origin here refers to the origin of the head of the household occupying the housing unit. Detailed characteristics of units with head of Spanish origin are presented in separate tables. Spanish origin was determined on the basis of a question that asked for self-identification of a person's origin or descent. Respondents were asked to select their origins from a "flash card." Persons of Spanish origin were those who indicated that their origin was either Mexican American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American, or other Spanish.

In the 1970 census and current surveys' reports, Spanish persons are identi-

fied according to various criteria: Birthplace, birthplace of parents, language, surname, and origin or descent. For this reason, care should be taken in making comparisons of Spanish-origin estimates from the Annual Housing Survey and other surveys.

Tenure. (Parts A, B, C, D, E, F)—A housing unit is "owner occupied" if the owner or co-owner lives in the unit even if it is mortgaged or not fully paid for. A cooperative or condominium unit is "owner occupied" only if the owner or co-owner lives in it. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent.

In addition in parts A and E of this series, separate data are available on tenure of mobile home and trailer sites. Site tenure for owner-occupied, mobile homes and trailers is restricted to mobile homes and trailers on less than 10 acres. The site is owned if the occupants own or are buying the site on which the mobile home is located. The site is considered rented if the occupants pay a rental fee for the use of the site, the site rent is paid by someone not living in the sample unit, or the occupants neither own nor pay cash rent for the site.

Cooperatives and condominiums. (Part A)—A cooperative is housing owned by a corporation of member-owners. The individual member is entitled to occupy an individual housing unit and is a shareholder in the corporation which owns the property.

A condominium is an ownership that enables a person to own an apartment or house in a project of similarly owned units. The owner has his own deed and very likely his own mortgage on his unit. The owner also holds common or joint ownership in all common areas such as grounds, hallways, entrances, elevators, etc.

Cooperative or condominium ownership may include ownership of single-family houses, rowhouses, townhouses, etc., as well as apartment units.

Reason for no-cash-rent occupancy. (Part E)—For units which are occupied without payment of cash rent, data are shown on the reason for occupancy; i.e., whether the unit is provided by a farm related job, such as a tenant farmer, farm manager, foreman, or laborer; provided by a nonfarm related job, such as a minister, resident manager, or janitor; or, provided by a relative or friend.

Duration of occupancy. (Parts B, E, F)—Data on duration of occupancy are based on information for the head of household; the data refer to the period when present occupancy began. Statistics are shown on whether the head lived in the unit "less than 3 months" or "3 months or longer." A head who "lived here last winter," must have moved into his unit prior to the previous February.

Year head moved into unit. (Parts A, C, D, E)—The data are based on the information reported for the head of the household and refer to the year of latest move. Thus, if the head moved back into a unit he had previously occupied, the year of his latest move was to be reported; if he moved from one apartment to another in the same building, the year he moved into his present unit was to be reported. The intent is to establish the year the present occupancy by the head began. The year the head moves is not necessarily the same year other members of the household move, although in the great majority of cases the entire household moves at the same time.

Recent movers. (Parts D, E)—Households that moved into their present units within 12 months prior to the date of enumeration are termed "recent movers." The household is classified by year moved into unit on the basis of information reported for the head of the household.

Present and previous units of recent movers. (Part D)—The "present" unit is the unit occupied by the recent mover at the time of enumeration. The "previous" unit is the unit from which he moved. If the household moved more than once during the 12 months prior to the date of enumeration, the "previous" unit is the one from which the household last moved.

Same or different head. (Part D)—Characteristics of the present and previous units occupied by recent movers are largely restricted to households that were essentially the same in the two units. The definitions of the characteristics for the previous unit are generally the same as those for the present unit.

A household for which the head in the present unit is the same person as the head in the previous unit (identified in the tables as "same head") is considered essentially the same even though there may have been some changes in the composition of the household. Conversely, a household in which there was no change except for a new household head was considered a household with "different head."

Main reason for move into present unit. (Parts D, E)—The statistics presented are restricted to units occupied by recent movers in which the present head of household was also the head at the previous unit he occupied. The classification categories refer to the principal reason the head of the household moved into his present unit. The category "job related reasons" refers to reasons such as job transfer, new job, retirement, and commuting reasons. The category "family status" refers to reasons such as newly married, family increased in size, and moved to be closer to relatives. The category "housing needs" refers to reasons such as wanted to own his own residence, wanted a less expensive house, and didn't like his old neighborhood. The category "other reasons" includes reasons for moving which do not fall into any of the above classifications.

Owner or manager on property. (Parts B, C, E)—These statistics are based on the number of housing units in structures of two or more units with the owner or the resident manager or superintendent living on the property. The category "with owner on property" refers to the owner and not his agent, resident manager, or superintendent. "With resident manager or superintendent on property" refers to a resident manager, superintendent, janitor, or other representative of the owner.

Vacant housing units. (Parts A, B, E)—A housing unit is vacant if no one is living in it at the time of enumeration, unless its

occupants are only temporarily absent. In addition, a vacant unit may be one which is occupied entirely by persons who have a usual residence elsewhere.

New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if unfit for human habitation; that is, if the roof, walls, windows, or doors no longer protect the interior from the elements, or if there is positive evidence (such as a sign on the house or in the block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.

The concepts and definitions of vacant housing units used in this report are the same as those used in the 1970 Census of Housing reports.

Vacancy status. (Parts A, B, E)—Vacant housing units are classified as either "seasonal and migratory" or "year-round." "Seasonal" units are intended for occupancy during only certain seasons of the year. Included are units intended for recreational use, such as beach cottages and hunting cabins, and vacant units held for herders and loggers. "Migratory" units are vacant units held for occupancy by migratory labor employed in farm work during the crop season.

"Year-round" vacant housing units are available or intended for occupancy at any time of the year. A unit in a resort area which is usually occupied on a year-round basis is considered year-round. A unit used only occasionally throughout the year is also considered year-round.

"Year-round" vacant units are subdivided as follows:

For sale only.—Vacant year-round units "for sale only" also include vacant units in a cooperative or condominium building if the individual units are offered for sale only.

For rent.—Vacant year-round units "for rent" also include vacant units offered either for rent or for sale.

Rented or sold, not occupied.—If any money rent has been paid or agreed upon but the new renter has not moved in as of the date of enumeration, or if the unit has recently been sold but the new owner has not yet moved in, the year-round vacant unit is classified as "rented or sold, not occupied."

Held for occasional use.—This category consists of vacant year-round units which are held for weekend or other occasional use throughout the year. The intent of this question was to identify homes reserved by their owners as second homes. Because of the difficulty of distinguishing between this category and seasonal vacancies, it is possible that some "second homes" are classified as "seasonal" and vice versa.

Temporarily occupied by persons with usual residence elsewhere (URE).—If all the persons in a housing unit usually live elsewhere, that unit is enumerated as vacant provided the usual place of residence is held for the household and is not offered for rent or for sale. For example, a beach cottage occupied at the time of enumeration by a family which has a usual place of residence in the city is included in the count of vacant units. If their house in the city were in the survey sample, the house would be reported "occupied" and would be included in the count of occupied units since the occupants are only temporarily absent.

Held for other reasons, or other vacant.—If a vacant year-round unit does not fall into any of the classifications specified above, it is classified as "held for other reasons." For example, this category includes units held for settlement of an estate, units held for occupancy by a caretaker or janitor, and units held for personal reasons of the owner. In parts A and E of this series, the "other vacant" category includes all units temporarily occupied by persons with usual residence elsewhere and units held for other reasons.

Characteristics of vacant housing are limited to year-round vacant units. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, counts of seasonal units are given in parts A and E of this series.

The 1974 and 1975 counts for "seasonal and migratory," "Year-round, rented or sold not occupied," "Year-round, held for occasional use," and "Year-round, other vacant" may not be comparable to the corresponding counts shown in the 1973 reports, because a more detailed estimation procedure was used in the 1974 and 1975 tabulations. For 1974 and 1975, the estimation procedure adjusted the survey counts of "vacant year-round" and "vacant—seasonal and migratory" units separately to independent current estimates. (See section on "Estimation" in Appendix B—Source and Reliability of the Estimates.) In 1973, vacant—seasonal and migratory units were combined with several categories of year-round vacancies (rented or sold, not occupied; held for occasional use; and other vacant) and were adjusted for the combined total of the independent estimates for these categories. Thus, the 1974 and 1975 data for vacant units adhere more closely to the independent estimates than the 1973 data.

Homeowner vacancy rate. (Parts A, E)—The 1975 homeowner vacancy rate is the number of year-round vacant units for sale as a percent of the total homeowner inventory; i.e., all owner-occupied units and year-round vacant units for sale or sold, not occupied. The homeowner vacancy rate for 1970 excludes vacant units sold but not occupied.

Rental vacancy rate. (Parts A, E)—The 1975 rental vacancy rate is the number of year-round vacant units for rent as a percent of the total rental inventory; i.e., all renter-occupied units and all year-round vacant units for rent or rented, not occupied. The rental vacancy rate for 1970 excludes vacant units rented but not occupied.

Duration of vacancy. (Parts B, E)—The statistics on duration of vacancy refer to the length of time (in months) from the

date the last occupants moved from the unit to the date of enumeration. The data, therefore, do not provide a direct measure of the total length of time units remain vacant. For newly constructed units which have never been occupied, the duration of vacancy is counted from the date construction was completed. For recently converted or merged units, the time is reported from the date conversion or merger was completed. Units occupied entirely by persons with usual place of residence elsewhere are excluded from the data.

Utilization Characteristics

Persons. (Parts A, B, C, D, E, F)—All persons occupying the housing unit are counted. These persons include not only occupants related to the head of the household but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the household head. The data on "persons" show the number of housing units occupied by the specified number of persons.

A person is enumerated at his usual place of residence. This refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile.

Rooms. (Parts A, B, C, D, E, F)—The statistics on "rooms" are for the number of housing units with specified number of rooms. Rooms counted include whole rooms used for living purposes, such as living rooms, dining rooms, bedrooms, kitchens, finished attic or basement rooms, recreation rooms, permanently enclosed porches that are suitable for year-round use, and lodger's rooms. Also included are rooms used for offices by a person living in the unit.

A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists only of shelves or cabinets.

Not included in the count of rooms are bathrooms, halls, foyers or vestibules, balconies, closets, alcoves, pantries, strip or pullman kitchens, laundry or furnace rooms, unfinished attics or basements, other unfinished space used for storage, open porches, trailers used only as bedrooms, and offices used only by persons not living in the unit.

If a room is used by occupants of more than one unit, the room is included with unit from which it is most easily reached.

Persons per room. (Parts A, C, D, E)—"Persons per room" is computed for each occupied unit by dividing the number of persons in the unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room.

Bedrooms. (Parts A, B, C, D, E, F)—The number of bedrooms in the unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping such as guest rooms, even though used infrequently, are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hideaway bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified by definition as having no bedroom.

Data on bedrooms lacking privacy are shown for housing units with two or more bedrooms. Units have bedrooms lacking privacy when it is necessary to pass through a bedroom to get to another room, such as a den, and/or to get to the bathroom. The bathroom access criterion is applied only to units with one complete bathroom or one bathroom plus half bath in which the half bath lacks a flush toilet.

In addition, statistics are shown in parts B, E, and F for households with bedrooms used by three or more persons of all ages, but are shown separately for such households when one or more of these persons is 13 years of age or older.

Structural Characteristics

Complete kitchen facilities. (Parts A, B, C, E, F)—A unit has complete kitchen facilities when it has all three of the following for the exclusive use of the occupants of the unit: (1) An installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure. They need not be in the same room. Quarters with only portable cooking equipment are not considered as having a range or cookstove. An icebox is not included as a mechanical refrigerator.

The kitchen facilities are for the exclusive use of the occupants when they are used only by the occupants of one housing unit, including lodgers or other unrelated persons living in the unit. When a structure consists of only one housing unit, all equipment located inside the structure is classified, by definition, for exclusive use.

For vacant units from which one or all of the kitchen facilities had been removed, the kitchen facilities used by the last occupant were to be reported.

Condition of kitchen facilities. (Parts B, E, F)—Units with complete kitchen facilities were classified as to whether all the kitchen facilities were in usable condition. If one or more of the kitchen facilities (sink, range or cookstove, and refrigerator) could not be used for its intended purpose, the unit was classified as having "1 or more not in usable condition." Kitchen facilities that normally function properly, but which were temporarily out of use (two weeks or less) because of a breakdown, were classified as usable.

Basement. (Parts A, B, C, D, E, F)—Statistics on basements are based on the number of housing units located in structures built with a basement. A structure has a basement if there is enclosed space in which persons can walk upright under all or part of the building.

In parts B, E, and F of this series, basements in structures with occupied units are further classified by signs of water leakage. The category, "with water leakage," consists of units in which the basement shows signs of water having leaked in from the outside, even if the signs only appear when it rains or during other similar situations. "No water leakage" means that the basement shows no signs of water leakage, or that the signs of water

leakage are caused by a problem inside the structure such as faulty plumbing. If the basement shows signs of water having leaked in from the outside but the problem causing the leakage has been corrected, the unit was classified as having no water leakage.

The 1975 data on basements are for "all year-round housing units"; the 1970 data on basements are restricted to "all occupied housing units."

Year structure built. (Parts A, B, C, D, E)—"Year structure built" refers to when the building was first constructed, not when it was remodeled, added to, or converted. The figures relate to the number of units in structures built during the specified periods and in existence at the time of enumeration. For mobile homes and trailers, the model year was assumed to be the year built.

Units in structure. (Parts A, B, C, D, E, F)—In determining the number of units in a structure, all housing units, both occupied and vacant, were counted. The statistics are presented for the number of housing units in structures of specified type and size, not by the number of residential structures.

A structure is a separate building that either has open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. Structures containing only one housing unit are further classified as detached or attached (see parts A and E).

A one-family house is detached if it has open space on all four sides even though it has an adjoining shed or garage. A one-family house is attached if it has one or more walls extending from ground to roof which divide if from other adjoining structures, such as in row houses, townhouses, etc.

Mobile homes and trailers are shown as a separate category (see parts A, C, D, and E). When one or more rooms have been added to a mobile home or trailer it is classified as a one-family house. If, however, only a porch or shed has been added, it is still counted as a mobile home or trailer.

Elevator in structure. (Parts A, B, C, E)—Statistics on elevator in structure are for the number of housing units in structures with four floors or more which have a passenger elevator. Units are in a "walk-up" structure of four floors or more if the structure has no passenger elevator or if the only elevator service is for freight.

Stories between main and apartment entrances. (Parts B, F)—This item is restricted to two or more unit structures and is concerned with the number of floors from the main entrance of the apartment building to the main entrance of the apartment. The number of stories is determined from ground level if an apartment has its own private entrance, or it is entered from an area *not located inside* the building and there is no main building entrance, or if there is a main building entrance but the entrance to the apartment cannot be reached by using the main building entrance.

Storm windows, storm doors, and attic or roof insulation. (Parts A, E)—The purpose of these three items is to determine if a housing unit has some form of insulation which helps to reduce heat loss during the winter and heat gain during the summer. The statistics are shown only for occupied, one-family homes and mobile homes and trailers.

Storm windows or other protective window covering.—This category refers to protective window covering, such as storm windows, double-glazed glass, closeable shutters, or plastic. Housing units with "Some windows covered" have protective coverings over some, but not all windows.

Storm doors.—This category refers to additional doors hung in exterior doorways. Doors on attached garages are not included. Housing units with "Some doors covered" have storm doors on some, but not all, exterior door openings.

Attic or roof insulation.—This category includes roll or blanket insulation encased in a paper covering, fiberglass batting, and loose insulation which is poured or blown between the attic floor joists.

Mobile homes anchored with tie downs or other means. (Parts A, E)—An anchored mobile home or trailer is one that is secured to the ground through the use of tie downs, bolts, etc. The main purpose in anchoring a mobile home or trailer is to protect the unit from wind movement or destruction.

In group of 6 or more mobile homes. (Parts A, E)—Mobile homes and trailers that are gathered close together are considered to be in a "group." This may be a large mobile home park containing many units or it may be a small number grouped together on a single site or adjacent sites.

Roof. (Parts B, E, F)—Units "with water leakage" are those in which the roof shows signs of water having leaked in from the outside or where the roof leaks when it rains. "No water leakage" means that the roof shows no signs of water having leaked in from the outside, or that the roof shows signs of water leakage but the problem causing the leakage has been corrected. If the signs of water leakage are caused by a problem inside the structure such as faulty plumbing, the unit was classified as having no water leakage.

Interior ceilings and walls. (Parts B, E, F)—Statistics are presented on whether or not there are open cracks or holes and broken plaster or peeling paint on the interior ceilings or walls of a housing unit. Included are cracks or holes that do not go all the way through to the next room or to the outdoors. "Hairline cracks" or cracks that appear in the walls or ceilings but are not large enough for a fingernail file to be inserted in, and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

Broken plaster or peeling paint must be on the inside walls or ceilings, and at least one area of the broken plaster or peeling paint must be approximately one square foot or larger.

Interior floors. (Parts B, E, F)—Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go through the floor. Excluded are very small holes caused by nails or other similar objects.

Selected structural deficiencies and wish to move. (Parts B, E, F)—The category "household would like to move" consists of housing units in which the respondent considers one or more of the following structural deficiencies so objectionable that he would like to move from his unit: (1) A basement with signs of water leakage, (2) roof leaks, (3) open cracks or holes in the interior walls or ceiling, (4) holes in the floor, and (5) broken plaster or peeling paint on the ceiling or inside walls.

Overall opinion of structure. (Parts B, E, F)—The data presented are based on the respondent's overall opinion of his house or building as a place to live. The respondent was asked to rate the structure as excellent, good, fair, or poor.

Common stairways. (Parts B, E, F)—The statistics on common stairways are presented for housing units in structures of two or more units with common stairways. The figures reflect the physical condition of the stairway; i.e., whether there are loose, broken, or missing steps or stair railings. Common stairways are stairways which are usually used by the occupants of more than one unit or by the general public. They may be either inside the structure or attached to the outside of the building.

Light fixtures in public halls. (Parts B, E, F)—The statistics on light fixtures in public halls are presented for housing units in structures of two or more units with public halls which have light fixtures and whether the light fixtures are in working order. Light fixtures include wall lights, ceiling lights, or table lamps in the public halls of the building. Public halls are used by the occupants of more than one unit or by the general public.

Electric wiring. (Parts B, E, F)—A housing unit is classified as having exposed electric wiring if the unit has any wiring that is not enclosed, either in the walls or in metal coverings, or if the wiring is outside the walls but enclosed in some material other than metal. Extension cords and other types of wiring that extend from a wall outlet to an appliance or lamp are not considered as exposed wiring.

Electric wall outlets. (Parts B, E, F)—A housing unit is classified as having electric wall outlets in each room if there is at least one working electric wall outlet or wall plug in each room of the unit. A working electric wall outlet or wall plug is one that is in operating condition; i.e., can be used when needed. If a room does not have an electric wall outlet, an extension cord used in place of a wall outlet is not considered to be an electric wall outlet.

Electric fuse blowouts. (Parts B, E, F)—These statistics are for occupied housing units which had had an electric circuit fuse blown or breaker switch tripped during the three months prior to enumeration. The data are restricted to households that had been at their present address for at least three months prior to the date of enumeration. A blown fuse or tripped breaker switch results in the temporary loss of electricity until the fuse is replaced or the breaker switch reset. Blown fuses inside certain appliances or equipment (such as some large air conditioners) are counted as "fuse or switch blowouts."

Parking facilities. (Parts D, E)—The statistics on parking facilities presented in this report are restricted to renter-occupied units for which cash rent is paid and exclude one-family homes on 10 acres or more. The data refer to off-street parking facilities which are available in connection with the building. The facilities are provided by the landlord or management and must be available without an additional cost to the renter. The parking facility may be a garage, carport, driveway, or open lot where the occupant may park his car off the street.

Plumbing Characteristics

Plumbing facilities. (Parts A, B, C, D, E, F)—The category "with all plumbing facilities" consists of units which have hot and cold piped water inside the structure as well as a flush toilet and a bathtub or shower inside the structure for the exclusive use of the occupants of the unit. All plumbing facilities must be located in the structure but they need not be in the same room. "Lacking some or all plumbing facilities" means that the unit does not have all three specified plumbing facilities (hot and cold piped water, as well as flush toilet and bathtub or shower inside the structure), or that the toilet or bathing facilities are also for the use of the occupants of other housing units.

Complete bathrooms. (Parts A, B, C, D, E, F)—A housing unit is classified as having a complete bathroom if it has a room with a flush toilet and bathtub or shower and a wash basin, as well as piped hot water in the structure for the exclusive use of the occupants of the unit. A half bathroom has either a flush toilet or a bathtub or shower for exclusive use, but does not have all the facilities for a complete bathroom.

The category "also used by another household" consists of units with bathroom facilities which are also for the use of the occupants of other housing units.

The category "none" consists of units with no bathroom facilities, units with only a half bathroom, and units with all bathroom facilities but not in one room.

Source of water or water supply. (Parts A, C, E)—"A public system or private company" refers to a common source supplying running water to six or more housing units. The water may be supplied by a city, county, water district, or private water company, or it may be obtained from a well which supplies six or more housing units. If a well provides water for five or fewer housing units, it is classified as an "individual well." Individual wells are further classified by whether they were originally "drilled" or "dug." Water sources such as springs, creeks, rivers, cisterns, ponds, or lakes are included in the "other" category.

Breakdowns or failures in the water supply were asked when the unit had piped water inside the structure. The water may be available from sources such as a sink, wash basin, bathtub, or shower. A unit is classified as having no piped water inside structure if the unit has no piped water or if the only piped water available is outside the structure—for example, on an open porch or in another building. Data on breakdowns or failures

of water supply are shown if the housing unit was occupied by the head of the household at least 3 months prior to enumeration and if the breakdown or failure lasted 6 consecutive hours or longer during the 3 months prior to enumeration. Breakdowns or failures in the water supply mean that the unit was completely without running water from its regular source. A unit was considered to be completely without running water if (1) the water system servicing the unit supplied no water at all, or (2) no water was available in the unit due to a breakdown or failure in the water supply inside the structure, or (3) the equipment and facilities (i.e., faucets in the kitchen and the bathroom sinks, faucet and shower in the bathtub, flush toilet, etc.) were all inoperable. If the faucet in the kitchen was broken, but the one in the bathtub was working, the unit was not classified as being completely without water.

Units with a breakdown or failure in the water supply are also classified according to the number of breakdowns or failures and to the most common source of the problem. "Problems inside the building" refer to such problems as broken pipes in the unit (or building) or turning the water off in the unit (or building) for maintenance and repairs. "Problems outside the building" refer to such problems as power failures, breaks in the main water line, or shutdowns by the water company for maintenance and repairs.

Availability of piped water. (Part E)—Units with no piped water in the building are classified by whether piped water is available within a quarter of a mile.

Sewage disposal. (Parts A, B, C, D, E, F)—A "public sewer" is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. It may be operated by a governmental body or private organization. A "septic tank or cesspool" is an underground tank or pit used for disposal of sewage. Small sewage treatment plants which in some localities are called neighborhood septic tanks are classified as public sewers. A chemical toilet uses chemicals to breakdown or dissolve sewage, a privy refers to an "outhouse" or other small shelter outside the unit which contains a toilet. Units for which sewage is disposed of in some other way are included in the "other" category.

The data on breakdowns or failures in the means of sewage disposal are limited to units in which the means of sewage disposal was a public sewer, septic tank, or cesspool. The breakdown or failure may have been the result of an overloaded sewage disposal system, lack of running water, a broken or cracked tank, etc. Data on breakdowns are shown if the housing unit was occupied by the head of the household at least 3 months prior to enumeration and if the breakdown or failure lasted 6 consecutive hours or longer during the 3 months prior to enumeration.

Flush toilet. (Parts B, C, E, F)—The statistics on breakdowns or failures of flush toilet are limited to units that had all plumbing facilities with only one flush toilet; that is, one complete bathroom or one complete bathroom plus a half bath without flush toilet. The flush toilet may be completely unusable because of broken pipes, stopped up soil pipe, lack of water supplied to the flush toilet, or some other reason.

Units with breakdown or failure in flush toilet are classified by the number of breakdowns or failures and to the most common source of the problem. "Problems inside the building" refer to such breakdowns or failures as broken pipes in the unit (or building), a cracked or broken bowl, or faulty flushing mechanism. "Problems outside the building" refer to such breakdowns or failures as breaks in the main water or sewer line or shutdowns by the water company for maintenance or repairs.

Data on breakdowns or failures of flush toilet are shown if the housing unit was occupied by the head of household at least 3 months prior to enumeration, and if the breakdown or failure lasted 6 consecutive hours or more during the 3 months prior to enumeration.

Equipment and Fuels

Telephone available. (Parts A, E)—A unit is classified as having a telephone if there is a telephone available for receiving calls to the occupants of the unit. The telephone may be located outside or inside the housing unit, and one telephone may serve the occupants of several units. The number of housing units with a telephone available, therefore, does not indicate the number of telephones installed in homes.

Heating equipment. (Parts A, B, C, E, F)—"Warm-air furnace" refers to a central system which provides warm air through ducts leading to various rooms; central heat pumps are included in this category. "Steam or hot water" refers to a central heating system in which heat from steam or hot water is delivered through radiators or other outlets. "Built-in electric units" are permanently installed in floors, walls, ceilings, or baseboards. A "floor, wall, or pipeless furnace" delivers warm air to the room right above the furance or to the room(s) on one or both sides of the wall in which the furnace is installed. "Room heaters with flue" include circulating heaters, convectors, radiant gas heaters, and other nonportable heaters that burn gas, oil, kerosene, or other liquid fuels, and which are connected to a flue, vent, or chimney to remove smoke and fumes. "Room heaters without flue" include any room heater (not portable) that burns gas, oil, or kerosene which is not connected to a flue, vent, or chimney. "Fireplaces, stoves, or portable heaters" also include room heaters that burn coal or wood.

For vacant units from which the heating equipment had been removed, the equipment used by the last occupants was to be reported.

For breakdowns or failures of heating equipment, data are shown for units occupied by the household head during the winter prior to enumeration if the equipment was unusable for 6 consecutive hours or longer during that time. To qualify as having lived here "last winter," the household head must have moved into the unit prior to February 1975.

Heating equipment is considered unusable if it cannot be used for the purposes intended; the breakdown or failure may be caused by broken pipes, electrical or gas parts out of order, or downed power lines.

Insufficient heat. (Parts B, E, F)—The statistics presented refer to housing units in which the household head occupied the unit during the winter prior to the date of enumeration. To qualify as having lived here "last winter," the household head must have moved into the unit prior to February 1975.

Separate data are shown for units with additional heat source, rooms which lacked specified heat source, and units with closed rooms. The term "specified heating equipment" includes warm-air furnace; steam or hot water system; built-in electric units; floor, wall, or pipeless furnace; and room heaters with flue. Excluded are room heaters without flue or vent, fireplaces, stoves, and portable heaters.

The data on additional heat source refer to units with "specified heating equipment" which *had* to use additional sources of heat to supplement the regular heating system because the regular system did not provide enough heat. Additional sources of heat such as kitchen stoves, fireplaces, or portable heaters, may have been used only in the mornings or on very cold evenings. Electric blankets, heating pads, or hot water bottles are not considered additional sources of heat.

"Rooms lacking specified heat source" include rooms lacking hot air ducts, registers, radiators, and room heaters. The intent of this item was to identify rooms in units with "specified heating equipment" which did not contain the means of conveying the heat to the room. The kitchen was not considered to be a room for this item.

Separate data are also shown for rooms which were closed because they could not be kept warm. The rooms must have been closed for 7 consecutive days or longer during the previous winter, and the unit must have "specified heating equipment." For this item, also, the kitchen was not considered a room.

Air conditioning. (Parts A, B, C, D, E)—Air conditioning is defined as the cooling of air by a refrigeration unit; excluded are evaporative coolers, fans, or blowers which are not connected to a refrigeration unit. A room unit is an individual air conditioner which is installed in a window or an outside wall and is generally intended to cool one room, although it may sometimes be used to cool more than one room. A central system is a central installation which air-conditions the entire housing unit. In an apartment building, a central system may cool all apartments in the building, each apartment may have its own central system, or there may be several systems, each providing central air conditioning for a group of apartments. A central installation with individual room controls is a central air-conditioning system.

Automobiles and trucks available. (Parts A, C, D, E)—Statistics on "automobiles available" represent the number of passenger automobiles, including station wagons, which are owned or regularly used by any member of the household and which are ordinarily kept at home. The figures include leased automobiles, taxicabs, and company-owned automobiles kept at home. Police cars, pickups, or larger trucks were not to be counted. In the 1973 Annual Housing Survey, taxicabs kept at home were not included in the count of "automobiles available."

The data on "trucks available" represent the number of pickups and small panel trucks of one-ton capacity or less which are owned or regularly used by any member of the household and which are ordinarily kept at home. Trucks used for business purposes were included only if also used for personal activities of household members.

The statistics do not reflect the number of privately owned automobiles or trucks or the number of households owning such vehicles.

Fuels used for house heating and cooking. (Parts A, C, E)—"Utility gas" is gas that is piped through underground pipes from a central system and serves the neighborhood. "Bottled; tank, or LP gas" is stored in tanks which are refilled or exchanged when empty. "Fuel oil, kerosene, etc." includes fuel oil, kerosene, gasoline, alcohol, and other combustible liquids. "Other fuel" includes any other fuel such as briquettes made of pitch and sawdust, coal dust, corncobs, or purchased steam.

Owned second home. (Parts A, C, E)—A second home may be a single-family house, vacation cottage, hunting cabin, ski lodge, etc., which is owned and held for use sometime during the year by the owner or members of his household. Second homes may also be owned in partnership with members of a different household. The figures include second homes which are sometimes rented or leased on a short-term basis to other persons but are principally held for the owner's occasional use during the year.

The statistics refer to the number of households that own (one or more) second homes. The data, therefore, do not reflect the number of owned second homes. (See also discussion of vacant units "Held for occasional use" in section on "Occupancy and Vacancy Characteristics.")

Services and Neighborhood Conditions

Garbage collection service. (Parts A, B, D, E, F)—A housing unit is classified as having garbage collection service if either a private or public company collects the trash or garbage on a regular basis and carries it to public disposal areas. In some areas where the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, data are obtained only for the garbage collection service.

If the household does not have garbage collection service, the means of garbage disposal is classified as follows:

Incinerator, trash chute, or compactor.—An incinerator is a large unit on the property designed to burn all trash and garbage. Trash chutes and compactors were marked as the means of garbage disposal when the final means of disposal was not known; i.e., if the respondent knew only that he put his garbage down a trash chute or that his garbage goes into a compactor. A compactor is a unit which packs trash and garbage into smaller units for disposal.

Garbage disposal unit.—A garbage disposal unit is connected to the kitchen sink and grinds up the garbage which is disposed of through the sewage system.

Other means.—If the method of disposal does not fall into any of the classifications specified above, it is classified as "other means."

The statistics on garbage and trash collection service presented in part D are restricted to renter-occupied units for which cash rent is paid and exclude one-family homes on 10 acres or more. The data refer to whether or not the cost of garbage and trash collection service is paid by the renter.

Exterminator service. (Parts B, E, F)—The statistics on exterminator service refer to households that have been at their present address for at least three months prior to the date of enumeration and who reported that they had seen mice or rats or signs or traces of their presence *inside* the house or building during the last 3 months. Signs of mice and rats or traces of their presence include droppings, holes in the wall, or ripped or torn food containers. "Regular extermination service" refers to periodic visits by a licensed company or individual who uses chemicals and sprays to control or kill pests and rodents. The regular service interval may be once a month, four times a year, or any other such interval. "Irregular extermination service" includes visits by an exterminator who is called only when needed by the household or building manager, or where it is known that a building is serviced but it is not known whether the service is regular or irregular. "No extermination service" includes units in a house or building that has not been serviced during the 12 months prior to enumeration and where it is not known if there is any exterminator service.

Neighborhood conditions and neighborhood services. (Parts B, E, F)—The statistics presented are based on the respondent's opinion and attitude toward the neighborhood in which he lives. Thus, the respondent's answer may or may not reflect the "actual" description of the neighborhood. Furthermore, the respondent may not have the same opinion as his neighbor about the neighborhood conditions and/or neighborhood services; for example, the respondent may feel that the street lighting or neighborhood shopping facilities are inadequate while his neighbor may not.

Neighborhood conditions, and neighborhood conditions and wish to move.—Data on neighborhood conditions are based on the respondent's answers to a three-part question concerning specific neighborhood conditions listed below. The respondent was asked (1) if the condition was present in his neighborhood, (2) if the condition bothered him, and (3) if the condition was so objectionable that he "would like to move" from the neighborhood. In parts B, E, and F, data are presented concerning parts 1 and 3 of the aforementioned question. In part F, data are also presented concerning part 2 of the question.

1. Airplane noise.—This category refers to the respondent's opinion concerning noise made by airplanes in landing or taking off or sonic booms from nearby airports or military bases.

2. Street noise.—Street noise refers to noise made by children playing outdoors, noise from a factory or business or any other sounds that the respondent considers street noise.

3. Heavy traffic.—This category refers to the presence of cars and/or trucks which the respondent classifies as heavy traffic.

4. Odors.—This category refers to the respondent's opinion concerning fumes, smoke, or gas coming from cars, trucks, nearby industries, factories, businesses, etc.

5. Litter.—Included are all types of trash, debris, or junk such as paper, cans, or abandoned cars in the street, on empty lots, or on properties on the street which the respondent considers as litter.

6. Abandoned buildings.—Abandoned buildings refer to both single and multiunit buildings which the respondent reported to be abandoned or boarded up. Included in this category are remains of previous buildings.

7. Deteriorating housing.—Deteriorating housing refers to occupied housing units which, in the respondent's opinion, are in run-down condition.

8. Commercial or industrial.—This category refers to commercial, industrial, or other activities, including both large and small industries as well as businesses and stores, that the respondent considers to be nonresidential.

9. Streets need repair.—The data are based on the respondent's opinion that the streets, either paved or unpaved, are continually in need of repair or are bordered by open ditches used for water or sewage drainage.

10. Roads impassable.—This category refers to roads that the respondent reported to be neglected by State, county, or city crews during snowstorms, heavy rainstorms, or other such conditions that make a road impassable.

11. Poor street lighting.—Poor street lighting includes areas, in the opinion of the respondent, that have no street lighting, streets with insufficient lighting, and streets where the lighting does not work adequately.

12. Crime.—This category refers to all forms of street and neighborhood crime such as petty theft, assaults against the person, burglary, etc., or any related activities that the respondent judges to be a crime.

The figures shown for the categories under "undesirable conditions" will not add to the total because more than one undesirable neighborhood condition may be reported for the same unit.

Neighborhood services.—The data shown are based on the respondent's opinion of the adequacy of the following neighborhood services:

1. Public transportation.—The data are based on the respondent's opinion of the availability of public transportation such as bus, subway, or taxicab service.

2. Schools.—The statistics are based on the respondent's opinion about the schools in his neighborhood, such as the proximity of the school, population of the student body, etc.

3. Neighborhood shopping.—This category refers to the respondent's opinion regarding stores such as grocery or drug stores and their merchandise, prices, or services in his vicinity.

4. Police protection.—This category refers to the presence, quality, quantity, and response time of services that, in the respondent's opinion, should be provided by the police.

5. Fire protection.—The data are based on the respondent's opinion regarding the presence and response time of the local fire protection services.

6. Hospitals and health clinics.—This category refers to the quality and proximity of health facilities, etc., serving the local community in the opinion of the respondent.

Neighborhood services and wish to move.—The category "household would like to move" consists of housing units in which the respondent considers one or more of the specified neighborhood services (such as public transportation) so inadequate or unsatisfactory that he would like to move from the neighborhood.

The figures shown for the categories under "household would like to move" will not add to the total because more than one inadequate service may have been reported for the same unit.

Overall opinion of neighborhood.—The data presented are based on the respondent's overall opinion of the neighborhood according to the street conditions and the neighborhood services available (described in preceding paragraphs). The respondent was asked to rate the street or neighborhood as excellent, good, fair, or poor. Data are also shown for wish to move because of undesirable street conditions cross-classified by the respondent's overall opinion of his neighborhood.

Financial Characteristics

Value. (Parts A, C, D, E, F)—Value is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. The statistics on value are shown only for one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, mobile homes, and trailers are excluded from the value tabulations.

Value-income ratio. (Parts A,C,E)—The value-income ratio is computed by dividing the value of the housing unit by the total money income of the family or primary individual. The ratio is presented for the same owner-occupied units for which value was tabulated; thus, the statistics on value-income ratio reflect the exclusion of certain owner-occupied units. The ratio was computed separately for each unit and was rounded to the nearest tenth. In reporting value, respondents were asked to select an appropriate class interval. The midpoints of the value intervals were used in the computation of the value-income ratio, except that a mean of $2,000 was assigned for values less than $2,500 and a mean of $70,000 was assigned for values of $60,000 or more. For income, the dollar amounts were used. Units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

The 1975 income statistics are for the 12 months prior to the date of enumeration. For 1970, the income statistics cover the calendar year 1969.

Sales price asked. (Parts B, E)—For vacant units, the sales price is the amount asked for the property at the time of enumeration and may differ from the price at which the property is sold. The statistics on sales price asked are shown only for vacant for sale one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property.

Garage or carport on property. (Parts B, C, D, E)—The garage or carport must be currently available for use by the occupants of the unit; i.e., members of the household can use it for parking even if it is currently used as a storage area for items such as lawn equipment or furniture. It may be attached to the house or it may be completely unattached, but it must be on the property. Excluded are garages or carports that have been converted to other uses such as living quarters, an extra room for business purposes, rented to someone else, or for some reason cannot be used for parking.

Mortgage or debt status. (Parts A, C, E)—Mortage status refers to one-family homes and debt status refers to mobile homes and trailers. Units with no mortgage or similar debt outstanding on the property comprise the category "owned free and clear." Also included in this category are housing units in which the owner has no mortgage but pays a "ground rent"; that is, the owner owns the unit but leases, rents, or pays a fee for the use of the land.

Mortgage status.—The data are limited to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. A mortgage or similar debt refers to all forms of debt where the property is pledged as security for repayment of the debt. It includes such debt instruments as deeds of trust, trust deeds, mortgage bonds, and vendor liens. In such arrangements, the borrower generally has the title to the property. Also included as a mortgage or similar debt are contracts to purchase and land contracts where the title to the property remains with the lender.

Debt status.—The data are limited to owner-occupied, mobile homes and trailers on less than 10 acres. Units where payments are being made toward the purchase of the mobile home or trailer comprise the category, "Installment loan or contract."

Mortgage insurance. (Parts A, C, D, E)—The data are restricted to owner-occupied units with a mortgage or similar debt. In

addition, the units must be one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property.

A mortgage or similar debt is considered insured if it is currently insured by the Federal Housing Administration (FHA), the Veterans' Administration (VA), the Farmers Home Administration, or by private mortgage insurance companies. Mortgages or similar debts insured or guaranteed by State or local government agencies are not included.

The Federal Housing Administration insures loans on homes. The Veterans' Administration guarantees or insures loans under the Serviceman's Readjustment Act (G.I. Bill). The Farmers Home Administration provides much the same service as the Federal Housing Administration, but confines its assistance to rural areas. Private mortgage insurance companies insure loans that are not insured or guaranteed by an agency of the Federal government. It should be noted that many conventional loans are not insured or guaranteed at all.

Real estate taxes last year. (Parts A, C, E)—The data are restricted to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. "Real estate taxes last year" refers to the total amount of all real estate taxes payable on the entire property during the last billing period. It includes State and local real estate taxes. Not included are payments on delinquent taxes due from prior years or payments for special assessments, facilities, or services. When the real estate taxes are included with the mortgage, a separate amount for the taxes is obtained.

In part C, the mean real estate taxes for last year per $1,000 value of the property (house and lot) are presented. Housing units for which no taxes are paid are excluded from the computation of the mean.

Property insurance. (Parts A, C, E)—This refers to fire and hazard insurance; that is, policies which protect the unit and its contents against loss due to damage by fire, lightning, wind, hail, explosion, etc. Homeowners' policies also are included since this type of insurance has fire and hazard insurance together with other types of homeowner protection such as liability. If the cost of the insurance was included as part of the mortgage payments, a separate amount for the insurance was obtained. The amount of the insurance premium reported was the amount paid for an entire 12-month period even if made in two or more installments. Property insurance is shown only as a component of "Selected monthly housing costs" and "Selected monthly housing costs as percentage of income." (See parts A, C, and E.) The data are presented separately for owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property and for owner-occupied, mobile homes and trailers on less than 10 acres.

Selected monthly housing costs. (Parts A, C, E)—The data are presented separately for owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property and for owner-occupied, mobile homes and trailers on less than 10 acres. Separate distributions are shown for units "with a mortgage" and for units "owned free and clear." Selected monthly housing costs is the sum of payments for mortgage or loan outstanding, real estate taxes (including taxes on mobile home or trailer site if the site is owned), property insurance, utilities (electricity, gas, water, and sewage disposal), fuel (oil, coal, kerosene, wood, etc.), and garbage and trash collection.

Households that did not pay mortgage and/or real estate taxes (or households that did not pay loan payments and/or real estate taxes on their mobile home or trailer) were included in the "not reported" category.

Selected monthly housing costs as percentage of income. (Parts A, C, E)—The yearly housing costs (selected monthly housing costs multiplied by 12) are expressed as a percentage of the total income of the family or primary individual. This percentage is presented for the same owner-occupied units for which "selected monthly housing costs" were tabulated; thus, the statistics on selected monthly housing costs as percentage of income reflect the exclusion of certain owner-occupied units. The percentage was computed separately for each unit and was rounded to the nearest tenth. For income and "selected monthly housing costs" the dollar amounts were used. Units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

Households that did not report the amount of, or did not pay mortgage or similar debt and/or real estate taxes were included in the "not reported" category.

Acquisition of property. (Parts A, C, E)—This item indicates how the current owner acquired the property; i.e., whether by purchase or by means other than purchase. Data are presented for one-family homes which are on less than 10 acres, owned free and clear and without a commercial establishment or medical or dental office on the property.

Placed or assumed a mortgage.—This includes units where the present owner had to place one or more new mortgages in order to obtain the property or assume an existing mortgage on the property. The intent was to determine whether the property was ever mortgaged by the present occupants even though there was no mortgage at the time of enumeration.

Acquired through inheritance or gift—This includes property acquired as a beneficiary of an estate and property acquired through a gift.

Paid all cash.—In these cases, the owner paid cash for the total cost of the property and no mortgage or other similar debt was involved.

Acquired in other manner.—This category includes acquisitions of properties through foreclosure, delinquent tax sale, corporate reorganization, or trade for another property. Also included are those cases in which the owner acquired the property with borrowed funds (for all or part of the purchase price or cost of construction) and this loan was not secured by a mortgage, deed of trust, land contract, etc.

Alterations and repairs during the last 12 months. (Parts A, C, E)—The statistics refer to the 12 months prior to enumeration and are restricted to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property.

The data are presented according to whether the alterations and repairs cost less than $100 or $100 or more. The total cost of the labor and materials was to be reported. However, if the labor was performed by the occupants or provided without charge, only the cost of the materials was obtained. The cost pertains to a single job; for example, if several jobs were done, each costing less than $100 but the sum total was over $100, it was reported as costing less than $100 since none of the jobs by themselves cost $100 or more.

Additions.—Additions refer to floor space built onto, above, or below an existing unit in order to increase the enclosed space within the house, such as a bedroom or basement added onto a house. It may also be construction of other buildings on the property; for example, a garage.

Alterations.—These are permanent changes made either to the inside or outside of a structure including the surrounding grounds. Alterations inside the structure include any type of remodeling resulting in permanent modification of space; for example, construction of a breakfast nook in a kitchen. It may involve completely remodeling a room, such as a kitchen or bathroom, or a structural change, such as separation of living and dining areas by a permanent room divider. It may also include attached equipment installed in the house for the first time; i.e., built-in dishwasher. Alterations outside the structure consist of installing walks, driveways, fences, storm windows or doors, planting trees or shrubbery, or swimming pools built into the ground.

Replacements.—This refers to the *complete* substitution of a new piece of fixed equipment, surfacing, or fixed appliances for an old item that was previously there; for example, a new gas furnace or central air-conditioning system for one that no longer functioned properly. Excluded are appliances such as clothes washers, refrigerators, or window air-conditioners.

Repairs.—This refers to jobs necessary for maintenance and preventive care of the structure, property, and fixed equipment; for example, painting, papering, floor sanding, mending water pipes, and replacing parts of large equipment such as a furnace valve.

Plans for improvements during the next 12 months. (Parts A, C, E)—This item is restricted to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. This item refers to the respondent's plans, if any, to make improvements on his property (additions, alterations, replacements, or repairs) during the 12-month period following enumeration and whether the labor and/or materials for any one job would cost more or less than $100.

Purchase price of mobile home. (Parts A, E)—This item refers to owner-occupied, mobile homes and trailers on less than 10 acres. The purchase price is the total cost of the mobile home or trailer at the time of purchase including the down payment but excluding site costs or closing costs. The "not purchased" category refers to mobile homes and trailers that were not purchased by any occupant of the unit; for example, the unit was obtained as a gift.

Year mobile home acquired. (Parts A, E)—This item pertains to owner-occupied, mobile homes and trailers on less than 10 acres. "Year acquired" is the calendar year the current family took possession of the mobile home or trailer, not the year the mobile home or trailer was built. "Acquired" includes purchase as well as other forms of taking possession such as inheritance, gift, trade, and foreclosure.

Mobile home acquired new. (Parts A, E)—The data pertain to owner-occupied, mobile homes and trailers on less than 10 acres. "Acquired new" means that no other person or family lived in the mobile home or used it for a business, etc., before the present owner acquired it.

Contract rent. (Parts A, E)—Contract rent is the monthly rent agreed to, or contracted for, even if the furnishings, utilities, or services are included. The statistics on rent exclude one-family homes and mobile homes and trailers on 10 acres or more. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

Gross rent. (Parts, A, C, D, E, F)—The computed rent termed "gross rent" is the contract rent plus the estimated average monthly cost of utilities (electricity, gas water) and fuels (oil, coal, kerosene, wood, etc.) if these items are paid for by the renter (or paid for him by someone else, such as a relative, welfare agency, or friend) in addition to rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Thus, gross rent is intended to eliminate differentials which result from varying practices with respect to the inclusion of utilities and fuel as part of the rental payment. The estimated costs of water and fuels are reported on a yearly basis but they are converted to monthly figures in the computation process.

The statistics on rent exclude one-family houses on 10 acres or more. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

Gross rent in nonsubsidized housing. (Parts A, E)—The gross rent for nonsubsidized housing units excludes units reported in public housing projects, units with Federal, State, or local government rent subsidies, as well as one-family homes on 10 acres or more. Data on nonsubsidized units in this report are not based on government or local records; the figures are, therefore, subject to the ability of a respondent to properly classify his unit as subsidized or nonsubsidized housing.

Gross rent as percentage of income. (Parts A, C, E)—The yearly gross rent (monthly gross rent multiplied by 12) is expressed

as a percentage of the total income of the family or primary individual. The percentage is presented for the same renter-occupied units for which gross rent was tabulated; thus, the statistics on gross rent as percentage of income reflect the exclusion of certain renter-occupied units. The percentage was computed separately for each unit and was rounded to the nearest whole number. For gross rent and income, the dollar amounts were used in the computation. Units for which no cash rent is paid and units occupied by families or primary individuals who reported no income or a net loss comprise the category not "computed."

The 1975 income statistics are for the 12 months prior to the date of enumeration. For 1970, the income statistics cover the calendar year 1969.

Gross rent in nonsubsidized housing as percentage of income. (Parts A, E)—This item was computed in the same manner as gross rent as percentage of income except that rents and incomes for public and subsidized housing units were excluded. Data on nonsubsidized units in this report are not based on government or local records; they are, therefore, subject to the ability of a respondent to properly classify his unit as subsidized or nonsubsidized housing.

Inclusion in rent (parking facilities, garbage and trash collection, and furniture). (Part C)—Counts are shown separately for units in which parking facilities, garbage and trash collection, and furniture are included in the rent. The data are restricted to renter-occupied units for which cash rent is paid and exclude one-family homes on 10 acres or more.

Parking facilities.—The statistics refer to off-street parking facilities which are available in connection with the building. The facilities are provided by the landlord or management and must be available without additional cost to the renter. The parking facility may be a garage, carport, driveway, or open lot where the occupant may park his car off the street.

Garbage and trash collection.—Included are units which have garbage and trash collection service available in connection with the building. The service may be public or private and must be available without additional cost to the renter. If the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, the data refer to the garbage collection service. In tables 3, 6, and 9, separate counts are also shown for renter-occupied units reporting additional amounts paid for garbage and trash collection service.

Furniture.—The statistics refer to furnished apartments or houses in which the management supplied major pieces of furniture such as a bed, sofa, chest of drawers, and table and chairs for the use of the occupant. Refrigerator, cooking range or stove, lamps, and rugs are not considered furniture. Units in which the occupants rent furniture from some source other than the management are not classified as furnished units.

Rent asked. (Parts B, E)—For vacant units, the rent is the amount asked for the unit at the time of eunmeration and may differ from the rent contracted for when the unit is occupied. The data are for vacant, year-round units for rent, excluding one-family homes on ten acres or more. The median rent asked is shown separately for units in which the rent includes payment for all utilities (electricity, gas, and water) and fuels (oil, coal, kerosene, wood, etc.). Median rent asked is also shown for units in which the rent includes utilities, fuels, and payment for garbage and trash collection service.

Public, private, or subsidized housing. (Parts B, C, D, E)—A housing unit is classified as being in a "public housing project" if the structure in which the unit is located is owned by a local housing authority or other public agency, such as a housing and redevelopment authority or a housing development agency, and operated as public housing. These organizations may receive subsidies from the Federal or State government but the local agency owns the property. All other housing units are classified as "private housing."

Private housing units are further classified by whether the unit is subsidized; that is, the respondent pays a lower rent because a Federal, State, or local government program pays part of the cost of construction, building mortgage, or operating expenses. These programs include (1) the interest subsidy programs of the Department of Housing and Urban Development (HUD) for rental and cooperative housing for moderate-income families, (2) the rent supplement program where part of the rent for low-income families occupying certain types of rental housing projects is paid by HUD, and (3) the direct loan program of HUD for housing the elderly.

The statistics on public or subsidized housing exclude one-family homes on 10 acres or more and renter units occupied without payment of cash rent. In addition, the data are not based on government or local records; the figures are, therefore, subject to the ability of a respondent to properly classify his unit as public or private and, if private, as subsidized or nonsubsidized housing.

Household Characteristics

Household. (Parts A, B, C, D, E, F)—A household consists of all the persons who occupy a housing unit. By definition, the count of households is the same as the count of occupied housing units.

Head of household. (Parts A, B, C, D, E, F)—One person in each household is designated as the "head"; that is, the person who is regarded as the head by the members of the household. However, if a married woman living with her husband is reported as the head, her husband was considered the head for the purpose of simplifying the tabulations.

Household composition or type of household. (Parts A, B, C, D, E, F)—Statistics by age of head are presented separately for two-or-more-person households and for one-person households. Households having two or more persons are further subdivided as follows:

Male head, wife present, no nonrelatives.—Each household in this group consists of the head and his wife, and

other persons, if any, all of whom are related to him. In parts B and F, the category "husband-wife" consists of the head and his wife and all other persons occupying the unit whether or not they are related to the head.

Other male head.—This category includes households with male heads who are married, but with wife absent because of separation or other reason where husband and wife maintain separate residences; and male heads who are widowed, divorced, or single. In parts A, C, D, and E, this category includes households with male head, wife present *and* nonrelatives living with them. In parts B and F, all "male head, wife present" households are included in the "husband-wife" category.

Female head.—This group comprises households with female heads regardless of their marital status. Included are female heads with no spouse and female heads whose husbands are living away from their families; as for example, husbands in the Armed Forces living on military installations.

Households consisting of only one person are shown separately as "one-person households" and are not included in the subcategories "other male head" and "female head."

Family or primary individual. (Parts A, C, D, E, F)—Housing units are occupied by either "families" or "primary individuals." The term "family" refers to the head of a household and all (one or more) other persons living in the same household who are related to the head by blood, marriage, or adoption. If the head lives alone or with nonrelatives only, then the head is considered a "primary individual."

Married couples related to the head of a family are included in the family and are not considered as separate families. A lodger, servant, or other persons unrelated to the head is considered a member of the household but not of the family.

In the statistics on household composition, families are always included in one of the three major groups of two-or-more-person households. Primary individuals with nonrelatives living with them are tabulated as "other male head" or "female head:". Primary individuals living alone are always tabulated as "one-person households."

Subfamily. (Parts A, B, C, D, E, F)—A subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including the head of the household or his wife. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents.

Age of head. (Parts A, C, D, E)—The age classification refers to the age reported for the head of the household as of his last birthday.

Persons 65 years old and over. (Parts A, D, E)—All persons, including the head, who are members of the household and are 65 years and over are included in the count of persons 65 years old and over.

Own children. (Parts A, B, C, D, E, F)—Statistics on presence of "own" children of household heads are shown in this report. A child under 18 years old is defined as an "own" child if he or she is a single (never married) son, daughter, stepchild, or adopted child of a household head. Own children of subfamilies are excluded from the total count of own children.

Other relative of head. (Parts A, B, E, F)—This category includes all persons related to the head by blood, marriage, or adoption except wife or child of head and members of subfamilies.

Nonrelative. (Parts A, B, C, D, E, F)—A nonrelative of the head is any person in the household who is not related to the head by blood, marriage, or adoption. Roomers, boarders, lodgers, partners, resident employees, wards, and foster children are included in this category.

Years of school completed by head. (Parts A, C, E)—The statistics refer to the highest grade of regular school completed and not to the highest grade attended. For persons still attending school, the highest grade completed is one less than the one in which they are currently enrolled. "Regular" school refers to formal education obtained in graded public, private, or parochial schools, colleges, universities, or professional schools, whether day or night school, and whether attendance was full or part time. That is, "regular schooling" is formal education which may advance a person toward an elementary or high school diploma, or college, university, or professional school degree. Schooling or tutoring in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system. Household heads whose highest grade completed was in a foreign school system or in an ungraded school were instructed to report the approximate equivalent grade (or years) in the regular United States school system. A head was not reported as having completed a given grade if he dropped out or failed to pass the last grade attended. Education received in the following types of schools is not counted as "regular schooling": Vocational schools, trade schools, business schools, and non-credit adult education classes.

Means of transportation and distance and travel time to work. (Parts A, E)—The statistics are restricted to household heads who had a job the week prior to enumeration. A job is defined as a definite arrangement for regular part-time or full-time work every week or every month for pay. Heads who do not report to the same place of work every day comprise the "No fixed place of work" category.

Head's principal means of transportation to work.—If different means of transportation are used on different days, the means used most often is recorded. If more than one means of transportation is used each day, the means covering the greatest distance is recorded. A "carpool" is where one or more persons regularly ride in the car with the head; the head may share driving, drive others, or ride with

someone else. The category "mass transportation" includes railroad, subway, elevated transportation system, bus and streetcar.

Distance from home to work.—The statistics refer to the one-way distance the head of household travels from home to work.

Travel time from home to work.—The data refer to the average time it takes the household head to travel one-way from home to work.

Income. (Parts A, C, D, E, F)—The statistics on income in the Annual Housing Survey are based on the respondent's reply to questions on income for the 12 months prior to enumeration and is the sum of the amounts reported for wage and salary income, net self-employment income, Social Security or railroad retirement income, public assistance or welfare payments, and all other money income. The figures represent the amount of income received before deductions for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, Medicare deductions, etc.

In this report, the statistics relate to the money income of the family or primary individual occupying the housing unit; i.e., the sum of the income of the head of the family and all other members of the family 14 years old and over, or the income of the primary individual. Incomes of persons living in the unit but not related to the head of the household are not included in this sum.

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to enumeration. It includes wages, salaries, piece-rate payments, commissions, tips, cash bonuses, and Armed Forces pay. Net self-employment income is defined as net money income (gross receipts minus operating expenses) received from a business, professional practice, partnership, or farm in which the person was engaged on his own account.

Social Security or railroad retirement income includes cash receipts of Social Security pensions; survivors' benefits; disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers; and deductions for Medicare and health insurance premiums. Cash receipt of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from estates and trust funds; dividends; interest; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; money received for transportation and/or subsistence by persons participating in special governmental training programs such as the Area Redevelopment Act and the Manpower Development and Training Act; workmen's compensation cash benefits; periodic payments by the Veterans' Administration to disabled members of the Armed Forces or to survivors of deceased veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from persons who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind," such as free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank deposits; accrued interest on "uncashed" savings bonds; exchange of money between relatives living in the same household; and gifts and lump-sum insurance payments, inheritances, and other types of lump-sum receipts.

The income statistics and the characteristics of the household refer to different periods in time. For 1975, the income data refer to the 12 months prior to enumeration (April 1975 through March 1976), and the household characteristics refer to the date of enumeration. For 1970, income data refer to the calendar year 1969, but the household characteristics refer to April 1, 1970. Thus, the income of the family does not include amounts received by persons who were members of the family during all or part of the income period if these persons no longer resided with the family at the time of enumeration. On the other hand, family income includes amounts reported by related persons who did not reside with the family during the income period but who were members of the family at the time of enumeration. For most families, however, the income reported was received by persons who were members of the family throughout the income period.

There may be significant differences in the income data between the Annual Housing Survey and other Bureau of the Census' surveys and censuses. For example, the time period for income data in the Annual Housing Survey refers to the 12 months prior to enumeration while other income data generally refer to the calendar year prior to the date of enumeration. Additional differences in the income data may be attributed to factors such as the various ways income questions are asked, the sampling variability and nonsampling errors between the Annual Housing Survey and other Bureau surveys and censuses, survey procedures and techniques, and processing procedures.

Section IIB – VACANT UNITS

7a. Is this unit intended for year-round use, for occupancy only on a seasonal basis or for use by migrant workers? — (241)
6 ☐ YEAR ROUND – *Ask b*
Seasonal
8 ☐ Summers only . . . . . } *Skip to 8*
9 ☐ Winters only . . . . . }
10 ☐ Other seasonal – *Specify in Notes on page 2* . . . . }
7 ☐ Migratory – *Skip to 8*

b. Is this house (apartment) for rent, for sale only, rented not occupied, sold not occupied, held for occasional use, or something else? — (038)
1 ☐ Vacant – for rent
Vacant – for sale only
2 ☐ Regular ownership
3 ☐ Condominium ownership
4 ☐ Cooperative ownership
5 ☐ Rented, not occupied
6 ☐ Sold, not occupied
7 ☐ Held for occasional use
8 ☐ Other vacant – *Specify* _____

8. How many months has this house (apartment) been vacant? — (039)
1 ☐ Less than 1 month
2 ☐ 1 month up to 2 months
3 ☐ 2 months up to 6 months
4 ☐ 6 months up to 12 months
5 ☐ 1 year up to 2 years
6 ☐ 2 years or more

9. How many bedrooms are in this house (apartment)? — (058)
_____ Bedrooms
OR
0 ☐ None – *Skip to 11*

10a. Is it necessary to go through anyone's bedroom to get to a bathroom? — (059)
1 ☐ Yes
2 ☐ No

b. Is it necessary to go through anyone's bedroom to get to any other room? — (060)
1 ☐ Yes
2 ☐ No

11. Does this house (building) have complete kitchen facilities; that is, a kitchen sink with piped water, a refrigerator, and a range or a cookstove? — (063)
☐ Yes – **Are these facilities only for the use of the intended occupants?**
1 ☐ Yes – Used for this household only
2 ☐ No – Also used by another household
3 ☐ No

12. Does this house (building) have complete plumbing facilities; that is, hot and cold piped water, a flush toilet and a bathtub or shower? — (072)
☐ Yes – **Are these facilities only for the use of the intended occupants?**
1 ☐ Yes – Used for this household only – *Ask 13*
2 ☐ No – Also used by another household – *Skip to 14a*
3 ☐ No – *Skip to 14a*

13. How many complete bathrooms and half bathrooms does this house (apartment) have?
A complete bathroom is a room with a flush toilet, bathtub or shower, and a washbasin with piped water.
A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.
(Mark only one box) — (073)
1 ☐ Complete plumbing facilities but not in one room
2 ☐ 1 complete bathroom
3 ☐ 1 complete bathroom plus a half bath with no flush toilet
4 ☐ 1 complete bathroom plus a half bath with flush toilet
5 ☐ 2 complete bathrooms
6 ☐ More than 2 complete bathrooms

FORM AHS-2 (4-17-75) Page 4

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

Section IIB – VACANT UNITS – Continued

14a. Is this house (building) connected to a public sewer? (078) 1 ☐ Yes – *Skip to 15* 2 ☐ No

b. What means of sewage disposal does it have? (079) 1 ☐ Septic tank or cesspool 2 ☐ Chemical toilet 3 ☐ Privy 4 ☐ Use facilities in another structure 5 ☐ Other – *Specify* _____

15. What type of heating equipment does this house (apartment) have? *(Read answer categories)* *(If more than one, mark MAIN type of heating equipment)* (084)
1 ☐ A central warm-air furnace with ducts in individual rooms, or a heat pump
2 ☐ Steam or hot water system
3 ☐ Built-in electric units (permanently installed in wall, ceiling, or baseboard)
4 ☐ Floor, wall, or pipeless furnace
5 ☐ Room heaters WITH flue or vent burning gas, oil, or kerosene
6 ☐ Room heaters WITHOUT flue or vent burning gas, oil, or kerosene
7 ☐ Fireplaces, stoves, or portable room heaters
8 ☐ Unit has no heating equipment
Skip to 17a

16. How many rooms are there without hot air ducts or registers, radiators, or room heaters? *(Exclude kitchen and bathrooms)* (086) 1 ☐ None 2 ☐ 1 room 3 ☐ 2 rooms 4 ☐ 3 rooms or more

17a. Does this house (apartment) have air conditioning? (091) 1 ☐ Yes 2 ☐ No – *Skip to 18*

b. Does it have a central air-conditioning system or individual room units? (092) 1 ☐ Central – *Skip to 18* 2 ☐ Room units

c. How many room units? (093) 1 ☐ 1 2 ☐ 2 or more

18. Is there a basement is this house (building)? *(A basement is an enclosed space in which persons can walk upright under all or part of the building.)* (099) 1 ☐ Yes 2 ☐ No

CHECK ITEM A

VACANCY STATUS *(See item 7b)*

FOR SALE ONLY
☐ A condominium – *Skip to 20*
(See Control Card item 27a) ☐ One-unit structure – *Ask 19*
☐ Two-or-more-unit structure, or a mobile home or trailer – *Skip to 21*

FOR RENT
(See Control Card item 27a) ☐ One-unit structure – *Ask 19*
☐ Two-or-more-unit structure, or a mobile home or trailer – *Skip to 22*

☐ **ALL OTHERS** *(See items 7a and 7b)* (Other vacants, units rented or sold, units held for occasional use, seasonal, and similar units) – *Skip to Check Item C, page 7*

FORM AHS-2 (4-17-75) Page 5

Section IIB – VACANT UNITS – Continued

(If rural transcribe from cc item 37b. If urban ask or fill by observation.)
19. Does this place have 10 acres or more? (109) 1 ☐ Yes, 10 acres or more 2 ☐ No, less than 10 acres

CHECK ITEM B

VACANT FOR SALE ONLY
If this is a –
☐ One-unit structure on less than 10 acres and there is no commercial establishment or medical or dental office on the property *(Control Card items 27e and f)* – *Ask 20*
☐ All others – *Skip to 27a*

VACANT FOR RENT
If this is a –
☐ One-unit structure on less than 10 acres – *Skip to 22*
☐ One-unit structure on 10 acres or more – *Skip to 27a*

20. What is the sale price asked for this property? *SHOW FLASHCARD B* (110)
1 ☐ Less than $5,000
2 ☐ $ 5,000 – $ 7,499
3 ☐ 7,500 – 9,999
4 ☐ 10,000 – 12,499
5 ☐ 12,500 – 14,999
6 ☐ 15,000 – 17,499
7 ☐ 17,500 – 19,999
8 ☐ 20,000 – 24,999
9 ☐ 25,000 – 29,999
10 ☐ 30,000 – 34,999
11 ☐ 35,000 – 39,999
12 ☐ 40,000 – 49,999
13 ☐ 50,000 – 59,999
14 ☐ 60,000 – 74,999
15 ☐ 75,000 or more

21. Is there a garage or carport on this property which is available for the use of occupants? (043) 1 ☐ Yes 2 ☐ No – *Skip to 27a*

22. What is the MONTHLY rent? *(If rent is not to be paid by the month, mark the time period covered, compute the monthly rent in the "Notes" space, and enter the monthly rent on the line provided.)* *(Include site rent for mobile homes if it is to be paid separately.)* (146) $_____ . 00 Per month

(147) 1 ☐ More frequently than once a month 2 ☐ Less frequently than once a month 3 ☐ Once a month

Notes

23. Is this house (apartment) in a public housing project; that is, is it owned by a local housing authority or other public agency? (151) 1 ☐ Yes 2 ☐ No

24. In addition to rent, does the renter also pay for –

a. Electricity? (153) 1 ☐ Yes 2 ☐ No, included in rent 3 ☐ No, electricity not used

b. Gas? (155) 1 ☐ Yes 2 ☐ No, included in rent 3 ☐ No, gas not used

c. Water? (157) 1 ☐ Yes 2 ☐ No, included in rent or no charge

d. Oil, coal, kerosene, wood, etc.? (159) 1 ☐ Yes 2 ☐ No, included in rent 3 ☐ No, these fuels not used or obtained free

FORM AHS-2 (4-17-75) Page 6

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

Section IIB – VACANT UNITS – Continued

25. In addition to rent, does the renter also pay for garbage and trash collection? (161) 1 ☐ Yes 2 ☐ No

CHECK ITEM C (See Control Card item 27a)
☐ One-unit structure, or a mobile home or trailer – *Skip to 27a*
☐ Two-or-more-unit structure – *Ask 26a*

26a. Does the owner of this building/Do you (if speaking to the owner) live on this property? (172) 1 ☐ Yes – *Skip to 27a* 2 ☐ No 3 ☐ Don't know

b. Is there a resident manager, superintendent or janitor who lives on this property? (173) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know

OBSERVATION
27a. Is the unit boarded-up? (239) 1 ☐ Yes 2 ☐ No

OBSERVATION
b. Are there any buildings (other than this building) that appear to be abandoned and/or are there any buildings with windows broken or boarded-up on this street? (240) 1 ☐ Yes 2 ☐ No

CHECK ITEM D (See Control Card item 27 a)
☐ One-unit structure, or a mobile home or trailer – *End AHS-2 Interview and go to Control Card item 39*
☐ Two-or-more-unit structure – *Ask 28a*

OBSERVATION
28a. Do the public halls in this building have light fixtures? (242) 1 ☐ Yes 2 ☐ No 3 ☐ No public halls } *Skip to 29a*

b. Are the light fixtures in working order? (243) 1 ☐ All in working order 2 ☐ Some in working order 3 ☐ None in working order

29a. Are there loose, broken, or missing steps on any common stairways inside this building or attached to this building? (244) 1 ☐ Yes 2 ☐ No 3 ☐ No common stairways – *Skip to 30*

b. Are all stair railings firmly attached? (245) 1 ☐ Yes 2 ☐ No 3 ☐ No stair railings

OBSERVATION – *Fill for 2 or more unit structures*
30. How many stories (floors) are there from the main entrance of the building to the main entrance of the apartment? (289) 1 ☐ None, on same floor 2 ☐ One (up or down) 3 ☐ Two or more (up or down) } *End AHS-2 Interview and go to Control Card Item 39*

b. Which of the items are not in usable condition? *(Mark all that apply)*

(065) 1 ☐ Kitchen sink
2 ☐ Refrigerator
3 ☐ Range or cookstove
} *Skip to Check Item C*

40. Do you have piped water –

a. In this building?

(066) 1 ☐ Yes – *Skip to Check Item C*
2 ☐ No

b. Available within 1/4 mile?

(067) 1 ☐ Yes
2 ☐ No
} *Skip to 45b*

Facsimile of the Annual Housing Survey Questionnaire: 1975—Continued

Section IIIC – OCCUPIED UNITS (Include URE) – Continued

CHECK ITEM C

Household head lived here last 90 days (See Check Item A(1), page 14)
- ☐ Yes – Ask 41a
- ☐ No – Skip to 42

41a. At any time in the last 90 days were you COMPLETELY without running water? (068)
1 ☐ Yes
2 ☐ No – Skip to 42

b. Were you completely without running water for 6 consecutive hours or more? (069)
1 ☐ Yes
2 ☐ No
3 ☐ Don't know
Skip to 42

c. How many times? (070)
1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

d. What was the (most common) reason you were completely without water for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building? (071)
1 ☐ Inside – Specify problem
2 ☐ Outside – Specify problem

42. Do you have complete plumbing facilities in this house (building); that is, hot and cold piped water, a flush toilet and a bathtub or shower? (072)
1 ☐ Yes – For this household only
2 ☐ Yes – Also used by another household
3 ☐ No
Skip to 45a

43. How many complete bathrooms and half bathrooms do you have?
A complete bathroom is a room with a flush toilet, bathtub or shower, and a washbasin with piped water. A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.
(Mark only one box) (073)
1 ☐ Complete plumbing facilities but not in one room
2 ☐ 1 complete bathroom
3 ☐ 1 complete bathroom plus a half bath with no flush toilet
4 ☐ 1 complete bathroom plus a half bath with flush toilet
5 ☐ 2 complete bathrooms
6 ☐ More than 2 complete bathrooms
Skip to 45a

CHECK ITEM D

Household head lived here last 90 days (See Check Item A(1), page 14)
- ☐ Yes – Ask 44a
- ☐ No – Skip to 45a

44a. At any time in the last 90 days was there a breakdown in your flush toilet; that is, was it completely unusable? (074)
1 ☐ Yes
2 ☐ No – Skip to 45a

b. Did any of these breakdowns last 6 consecutive hours or more? (075)
1 ☐ Yes
2 ☐ No – Skip to 45a

c. How many of these breakdowns were there? (076)
1 ☐ 1
2 ☐ 2
3 ☐ 3
4 ☐ 4 or more

d. What was the (most common) reason you were completely without the use of your flush toilet for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building? (077)
1 ☐ Inside – Specify problem
2 ☐ Outside – Specify problem

b. What means of sewage disposal do you use? (079)
1 ☐ Septic tank or cesspool
2 ☐ Chemical toilet
3 ☐ Privy
4 ☐ Use facilities in another structure
5 ☐ Other – Describe
Skip to 47

CHECK ITEM E

Household head lived here last 90 days (See Check Item A(1), page 14)
- ☐ Yes – Ask 46a
- ☐ No – Skip to 47

46a. At any time in the last 90 days was there a breakdown in your public sewer (septic tank or cesspool); that is, was it completely unusable? (080)
1 ☐ Yes
2 ☐ No – Skip to 47

b. Did any of these breakdowns last 6 consecutive hours or more? (081)
1 ☐ Yes
2 ☐ No
3 ☐ Don't know
Skip to 47

c. How many of these breakdowns were there? (082)
1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

47. How is your house (apartment) heated – by gas, oil, electricity, or with some other fuel? (083)
Gas
1 ☐ From underground pipes serving the neighborhood
2 ☐ Bottled, tank, or LP
3 ☐ Fuel oil, kerosene, etc.
4 ☐ Electricity
5 ☐ Coal or coke
6 ☐ Wood
7 ☐ Other fuel
8 ☐ No fuel used

48. What type of heating equipment does your house (apartment) have? (Read answer categories)
(Mark heating equipment used most) (084)
1 ☐ A central warm-air furnace with ducts to individual rooms, or a heat pump
2 ☐ Steam or hot water system
3 ☐ Built-in electric units (permanently installed in wall, ceiling, or baseboard)
4 ☐ Floor, wall, or pipeless furnace
5 ☐ Room heaters WITH flue or vent burning gas, oil, or kerosene
6 ☐ Room heaters WITHOUT flue or vent burning gas, oil, or kerosene
7 ☐ Fireplaces, stoves, or portable room heaters
Skip to Check Item G
8 ☐ Unit has no heating equipment – Skip to 53a

CHECK ITEM H — Household head lived here last 90 days (See Check Item A(1), page 14)
☐ Yes – Ask 54a
☐ No – Skip to 55a

54a. Have any electric fuses or breaker switches blown in your house (apartment) in the last 90 days?
(094) 1 ☐ Yes 2 ☐ No . . . . . 3 ☐ Don't know } Skip to 55a

b. How many times did this happen?
(095) 1 ☐ 1 2 ☐ 2 3 ☐ 3 or more

55a. Does your house (apartment) have garbage collection service (either public or private)?
(096) 1 ☐ Yes 2 ☐ No . . . . . 3 ☐ Don't know } Skip to 55c

b. How often is the garbage collected?
(097) 1 ☐ Less than once a week 2 ☐ Once a week . . . . . 3 ☐ Twice a week . . . . . 4 ☐ Three or more times a week 5 ☐ Don't know . . . . . } Skip to 56a

c. How do you dispose of your garbage
(If more than one method used, mark the one used most.)
(098) 1 ☐ Incinerator 2 ☐ Trash chute or compactor 3 ☐ Garbage disposal 4 ☐ Carry out to be picked up 5 ☐ Other – Specify

56a. Is there a basement in this house (building)?
(A basement is an enclosed space in which persons can walk upright under all or part of the building.)
(099) 1 ☐ Yes 2 ☐ No – Skip to 57

b. Does the basement show any signs of water having leaked in from the outside?
(100) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know

57. Does the roof of this house (building) leak?
(101) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know

58a. Does this house (apartment) have open cracks or holes in the interior walls or ceiling?
(Do not include hairline cracks)
(102) 1 ☐ Yes 2 ☐ No

b. Does this house (apartment) have holes in the floors?
(103) 1 ☐ Yes 2 ☐ No

59a. Is there any area of broken plaster on the ceiling or inside walls which is larger than this piece of paper?
(SHOW CLOSED QUESTIONNAIRE)
(104) 1 ☐ Yes 2 ☐ No

b. Is there any area of peeling paint on the ceiling or inside walls which is larger than this piece of paper?
(SHOW CLOSED QUESTIONNAIRE)
(105) 1 ☐ Yes 2 ☐ No

Section IIIC – OCCUPIED UNITS (*Include URE*) – Continued

CHECK ITEM I

☐ If "Yes" was marked to any of the six previous questions 56b, 57, 58a, 58b, 59a, and/or 59b – *Ask 60*

☐ "No" marked in all of the above items – *Skip to Check Item J*

60. Is . . .(*Specify the condition(s) mentioned in any of the six previous questions*) so objectionable that you would like to move from this house? (104) 1 ☐ Yes 2 ☐ No

CHECK ITEM J

Household head lived here last 90 days (*See Check Item A(1), page 14*)

☐ Yes – *Ask 61a*

☐ No – *Skip to Check Item K*

61a. At any time in the last 90 days have you seen any mice or rats, or signs of mice or rats in this house (building)? (107) 1 ☐ Yes 2 ☐ No – *Skip to Check Item K*

b. Is this house (building) serviced by an exterminator regularly, only when needed, irregularly, or not at all?

(*Include only exterminator service for mice or rats*) (108) 1 ☐ Regularly 2 ☐ Only when needed 3 ☐ Irregularly 4 ☐ Not at all

CHECK ITEM K

TENURE (cc item 25a)

☐ **OWNED AS A COOPERATIVE** – *Skip to 80*

☐ **OWNED AS A CONDOMINIUM** – *Skip to 63*

OWNED OR BEING BOUGHT

(See cc item 27a) ☐ One-unit structure, or a mobile home or trailer – *Ask 62* ☐ Two-or-more-unit structure – *Skip to 80*

RENTED FOR CASH

(See cc item 27a) ☐ One-unit structure – *Ask 62* ☐ Two-or-more-unit structure, or a mobile home or trailer – *Skip to 71*

☐ **OCCUPIED WITHOUT PAYMENT OF CASH RENT** – *Ask 62*

(*If rural transcribe from cc item 37b. If urban ask or fill by observation.*)

62. Does this place have 10 acres or more? (109) 1 ☐ Yes 2 ☐ No

CHECK ITEM L

(*See Check Item K*)

OWNED OR BEING BOUGHT

If this is a –

☐ One-unit structure on less than 10 acres and there is no commercial establishment or medical or dental office on the property ("No" in Control Card items 27e and f) – *Ask 63*

☐ Mobile home or trailer on less than 10 acres – *Skip to 64a*

☐ All others – *Skip to 80*

RENTED FOR CASH

If this is a –

☐ One-unit structure on less than 10 acres – *Skip to 71*

☐ One-unit structure on 10 acres or more – *Skip to 80*

OCCUPIED WITHOUT PAYMENT OF CASH RENT

If this is a –

☐ One-unit structure on less than 10 acres – *Skip to Check Item N, page 23*

☐ One-unit structure on 10 acres or more – *Skip to 80*

☐ Two-or-more-unit structure, or a mobile home or trailer – *Skip to Check Item N, page 23*

Section IIIC – OCCUPIED UNITS (*Include URE*) – Continued

63. How much do you think this property, that is, house and lot, would sell for on today's market?

SHOW FLASHCARD B

(110) 1 ☐ Less than $5,000 2 ☐ $ 5,000 – $ 7,499 3 ☐ 7,500 – 9,999 4 ☐ 10,000 – 12,499 5 ☐ 12,500 – 14,999 6 ☐ 15,000 – 17,499 7 ☐ 17,500 – 19,999 8 ☐ 20,000 – 24,999 9 ☐ 25,000 – 29,999 10 ☐ 30,000 – 34,999 11 ☐ 35,000 – 39,999 12 ☐ 40,000 – 49,999 13 ☐ 50,000 – 59,999 14 ☐ 60,000 – 74,999 15 ☐ 75,000 or more

CHECK ITEM M

(*See Control Card item 25a*)

☐ **OWNED AS A CONDOMINIUM** – *Skip to 80*

☐ All others – *Skip to 65*

64a. Do you own the mobile home (or trailer) SITE or is it rented? (111) 1 ☐ Owned – *Skip to c* 2 ☐ Rented – *Ask b*

b. What is the MONTHLY rent for the site? 0 ☐ Occupied without payment of cash rent (112) $ _____ . 00

c. Do you have an installment loan or contract on this mobile home (or trailer) or do you own it free and clear? (113) 1 ☐ Installment loan or contract – *Skip to 66a* 2 ☐ Owned free and clear – *Skip to 67a*

65. Do you have a mortgage, deed of trust, or land contract on this property, or do you own it free and clear? (114) 1 ☐ Mortgage, deed of trust, or land contract 2 ☐ Owned free and clear – *Skip to 67a*

66a. In regard to the mortgage (loan), what are the required payments to the lender? If more than one mortgage (loan) on this property (mobile home or trailer), give sum of payments.

(*If there are separate loans on the mobile home and its site, combine amounts.*)

(115) $ _____ . 00 PER

(116) 1 ☐ Month 2 ☐ Year ☐ Other – *Specify* _____

b. In regard to the mortgage (loan), do the required payments include –

(1) Real estate taxes on this property? (117) 1 ☐ Yes 2 ☐ No

(2) Fire and hazard insurance? (118) 1 ☐ Yes 2 ☐ No

c. (1) What kind of mortgage do you have?

SHOW FLASHCARD C

(119) 1 ☐ Federal Housing Administration 2 ☐ Veterans Administration 3 ☐ Farmers Home Administration ☐ None of the above } *Skip to 68*

(2) Is your mortgage privately insured? Do not count borrowers life insurance.

(*Private mortgage insurance insures the lender if the borrower fails to keep up his mortgage payments.*) (119) 4 ☐ Yes 5 ☐ No 6 ☐ Don't know } *Skip to 68*

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

Section IIIC – OCCUPIED UNITS *(Include URE)* – Continued

67a. Did you place or assume a mortgage (loan) when you acquired this property (mobile home)?
(120) 1 ☐ Yes – *Skip to 68*
2 ☐ No

b. How did you acquire this property (mobile home)?
(121) 1 ☐ Inheritance or gift
2 ☐ Paid all cash
3 ☐ Other manner – *Specify* _____

68. Do you pay for –

a. (1) Electricity?
(122) 1 ☐ Yes
2 ☐ No, electricity not used – *Skip to b(1)*

(2) What is the average MONTHLY cost?
(123) $ _____ . 00

b. (1) Gas?
(124) 1 ☐ Yes
2 ☐ No, gas not used – *Skip to c(1)*

(2) What is the average MONTHLY cost?
(125) $ _____ . 00

c. (1) Oil, coal, kerosene, wood, etc.?
(126) 1 ☐ Yes
2 ☐ No, these fuels not used or obtained free – *Skip to d(1)*

(2) What is the YEARLY cost?
(127) $ _____ . 00

d. (1) Fire and hazard insurance? *(Also include if part of mortgage payments.)*
(128) 1 ☐ Yes
2 ☐ No – *Skip to e(1)*

(2) What is the YEARLY cost?
(129) $ _____ . 00

e. (1) Real estate taxes? *(Also include if part of mortgage payments.)*
(130) 1 ☐ Yes
2 ☐ No – *Skip to f(1)*

(2) What is the YEARLY cost? *(Do not include taxes in arrears from previous years.)*
(131) $ _____ . 00

f. (1) Water and sewage disposal, separately from real estate taxes?
(132) 1 ☐ Yes
2 ☐ No or payment included in real estate taxes – *Skip to g(1)*

(2) What is the YEARLY cost?
(133) $ _____ . 00

g. (1) Garbage and trash collection, separately from real estate taxes?
(134) 1 ☐ Yes
2 ☐ No or payment included in real estate taxes – *Skip to 69a*

(2) What is the YEARLY cost?
(135) $ _____ . 00

FORM AHS-2 (4-17-75)

d. (1) Oil, coal, kerosene, wood, etc.? (200) 1 ☐ Yes; 2 ☐ No, included in rent; 3 ☐ No, these fuels not used or obtained free } *Skip to 99a*

(2) What was the YEARLY cost? (201) $ ____ . 00

99a. (In addition to rent), did . . . (you) (head) also pay for garbage and trash collection? (202) 1 ☐ Yes; 2 ☐ No – *Skip to Check Item T*

b. What was the YEARLY cost? (203) $ ____ . 00

CHECK ITEM T (See item 91, page 27) ☐ Rented for cash – *Ask 100a* ☐ Occupied without payment of cash rent – *Skip to 102a, page 30*

100a. Did . . . (you) (head) rent the apartment (house) furnished or unfurnished? (204) 1 ☐ Furnished; 2 ☐ Unfurnished – *Ask 100c*

b. Was the cost of the furniture included in the rent or did . . . (you) (head) pay for it separately? (205) 1 ☐ Included in rent – *Skip to 101a*; 2 ☐ Separately – *Ask 100d*

c. Did . . . (you) (head) rent furniture from some other source? (206) 1 ☐ Yes; 2 ☐ No – *Skip to 101a*

d. What was the MONTHLY cost? (207) $ ____ . 00

Section IIIC – OCCUPIED UNITS (*Include URE*) – Continued

101a. Were parking facilities available in connection with the building? (208) 1 ☐ Yes; 2 ☐ No – *Skip to 101e*

b. Did . . . (you) (head) rent such a space? (209) 1 ☐ Yes; 2 ☐ No – *Skip to 101e*

c. What was the MONTHLY cost for that parking space? (210) $ ____ . 00

d. Was the cost of the parking space included in the $ . . . (rent entered in 95), or did . . . (you) (head) pay for it separately? (211) 1 ☐ Included in rent; 2 ☐ Separately . . . . } *Skip to 102a*

e. Did . . . (you) (head) rent a parking space in the neighborhood other than that connected with the building? (212) 1 ☐ Yes; 2 ☐ No

NOTE – Ask all categories in 102a before proceeding to 102b.

NOTE – Ask 102b only for those categories in 102a which were answered "Yes."

102a. The following questions are concerned with different aspects of your present neighborhood. Here is a list of conditions which many people have on their streets. Which, if any, do you have?		b. Does it (condition) bother you?	c. Is it so objectionable that you would like to move from the neighborhood?
(1) Street or highway noise?	(213) 1 ☐ Yes; * 2 ☐ No	(1) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(2) Heavy traffic?	(214) 1 ☐ Yes; * 2 ☐ No	(2) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(3) Streets or roads continually in need of repair, or open ditches?	(215) 1 ☐ Yes; * 2 ☐ No	(3) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(4) Roads impassable due to snow, water, etc.?	(216) 1 ☐ Yes; * 2 ☐ No	(4) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(5) Poor street lighting?	(217) 1 ☐ Yes; * 2 ☐ No	(5) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(6) Neighborhood crime?	(218) 1 ☐ Yes; * 2 ☐ No	(6) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(7) Trash, litter, or junk in the streets (roads), or on empty lots, or on properties in this neighborhood?	(219) 1 ☐ Yes; * 2 ☐ No	(7) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(8) Boarded-up or abandoned structures?	(220) 1 ☐ Yes; * 2 ☐ No	(8) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(9) Occupied housing in rundown condition?	(221) 1 ☐ Yes; * 2 ☐ No	(9) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(10) Commercial, industrial, or other nonresidential activities?	(222) 1 ☐ Yes; * 2 ☐ No	(10) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(11) Odors, smoke, or gas?	(223) 1 ☐ Yes; * 2 ☐ No	(11) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No
(12) Noise from airplane traffic?	(224) 1 ☐ Yes; * 2 ☐ No	(12) 3 ☐ Yes – Ask c; 4 ☐ No	5 ☐ Yes; 6 ☐ No

NOTE – If "Yes" was answered for one or more of the categories in 102a, ask 102b.

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

Section IIIC – OCCUPIED UNITS *(Include URE)* – Continued

103. The following questions are concerned with neighborhood services.

	a. Do you have adequate or satisfactory –	b. Is it so inadequate or unsatisfactory that you would like to move from the neighborhood?
(1) Public transportation?	(225) 1 ☐ Yes; 2 ☐ No – Ask b; 3 ☐ Don't know	(226) 1 ☐ Yes; 2 ☐ No
(2) Schools?	(227) 1 ☐ Yes; 2 ☐ No – Ask b; 3 ☐ Don't know	(228) 1 ☐ Yes; 2 ☐ No
(3) Neighborhood shopping such as grocery stores or drug stores?	(229) 1 ☐ Yes; 2 ☐ No – Ask b; 3 ☐ Don't know	(230) 1 ☐ Yes; 2 ☐ No
(4) Police protection?	(231) 1 ☐ Yes; 2 ☐ No – Ask b; 3 ☐ Don't know	(232) 1 ☐ Yes; 2 ☐ No
(5) Fire protection?	(233) 1 ☐ Yes; 2 ☐ No – Ask b; 3 ☐ Don't know	(234) 1 ☐ Yes; 2 ☐ No
(6) Hospitals or health clinics?	(235) 1 ☐ Yes; 2 ☐ No – Ask b; 3 ☐ Don't know	(236) 1 ☐ Yes; 2 ☐ No

104a. In view of all the things we have talked about, how would you rate this NEIGHBORHOOD as a place to live – would you say it is excellent, good, fair or poor?
(237) 1 ☐ Excellent; 2 ☐ Good; 3 ☐ Fair; 4 ☐ Poor

b. How would you rate this HOUSE (building) as a place to live – would you say it is excellent, good, fair or poor?
(238) 1 ☐ Excellent; 2 ☐ Good; 3 ☐ Fair; 4 ☐ Poor

OBSERVATION
105. Are there any buildings that appear to be abandoned and/or are there any buildings with windows broken or boarded-up on this street?
(239) 1 ☐ Yes; 2 ☐ No

CHECK ITEM U
☐ URE Household (See item 7, page 1) – Ask 106
(See Control Card item 27a)
☐ A one-unit structure, or a mobile home or trailer – Skip to 109
☐ Two-or-more-unit structure – Skip to 107a

FORM AHS-2 (4-17-75) Page 31

Section IIIC – OCCUPIED UNITS *(Include URE)* – Continued

(Ask for URE Households only)
106. Is this UNIT intended for year-round use, for occupancy only on a seasonal basis or for use by migrant workers?
(241) 6 ☐ YEAR ROUND (occupied temporarily at time of interview) — *Fill items 112 and 113 and Go to Control Card item 38a*
Seasonal
8 ☐ Summers only
9 ☐ Winters only
10 ☐ Other seasonal – *Specify in notes*
7 ☐ Migratory

OBSERVATION
107a. Do the public halls in this building have light fixtures?
(242) 1 ☐ Yes; 2 ☐ No; 3 ☐ No public halls — *Skip to 108a*

b. Are the light fixtures in working order?
(243) 1 ☐ All in working order; 2 ☐ Some in working order; 3 ☐ None in working order

108a. Are there loose, broken, or missing steps on any common stairways inside this building or attached to this building?
(244) 1 ☐ Yes; 2 ☐ No; 3 ☐ No common stairways – *Skip to 109*

b. Are all stair railings firmly attached?
(245) 1 ☐ Yes; 2 ☐ No; 3 ☐ No stair railings

109. In the last 12 months, how much did . . . earn in wages, salaries, tips and commissions (before taxes and deductions)?
(Obtain family income for head and all persons 14+ in household related to head by blood, marriage, or adoption. If the family has more than six members 14+, combine the amounts for all other persons on the last "Amount" line.)

Line No.	Amount (Dollars only)
(246)	(247) $ .00
(248)	(249) $ .00
(250)	(251) $ .00
(252)	(253) $ .00
(254)	(255) $ .00
(256)	(257) $ .00

110a. In the past 12 months, how much did this family earn in net income from its own business, professional practice or partnership?
(Exclude income previously reported in item 109.)
(258) $ .00
(259) 1 ☐ None; 2 ☐ Lost money *(Enter amount LOST on line above)*

b. In the past 12 months, how much did this family earn in net income from its own farm or ranch?
(Exclude income previously reported in items 109 and 110a.)
(260) $ .00
(261) 1 ☐ None; 2 ☐ Lost money *(Enter amount LOST on line above)*

FORM AHS-2 (4-17-75) Page 32

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

Section IIIC – OCCUPIED UNITS – Continued

NOTE – Ask 111a for all categories before asking 111b.

(Obtain family income for head and all persons 14+ in household related to head by blood, marriage, or adoption.)

111a. In the past 12 months, did any member of this family receive any money from –		*NOTE – Ask 111b only for those categories in 111a which were answered "Yes."* 111b. How much was received from (source of income)?
(1) Social Security or Railroad Retirement payments?	(262) 1 ☐ Yes 2 ☐ No	(263) $ _____.00
(2) Estates, trusts or dividends?	(264) 1 ☐ Yes 2 ☐ No	(265) $ _____.00
(3) Interest on savings accounts or bonds?	(266) 1 ☐ Yes 2 ☐ No	(267) $ _____.00
(4) Net rental income?	(268) 1 ☐ Yes 2 ☐ No	(269) $ _____.00
(5) Welfare payments or other public assistance?	(270) 1 ☐ Yes 2 ☐ No	(271) $ _____.00
(6) Unemployment compensation?	(272) 1 ☐ Yes 2 ☐ No	(273) $ _____.00
(7) Workmen's compensation?	(274) 1 ☐ Yes 2 ☐ No	(275) $ _____.00
(8) Government employee pensions?	(276) 1 ☐ Yes 2 ☐ No	(277) $ _____.00
(9) Veterans payments?	(278) 1 ☐ Yes 2 ☐ No	(279) $ _____.00
(10) Private pensions or annuities?	(280) 1 ☐ Yes 2 ☐ No	(281) $ _____.00
(11) Alimony or child support?	(282) 1 ☐ Yes 2 ☐ No	(283) $ _____.00
(12) Regular contributions from persons not living in this household?	(284) 1 ☐ Yes 2 ☐ No	(285) $ _____.00
(13) Anything else?	(286) 1 ☐ Yes 2 ☐ No	(287) $ _____.00

NOTE – If "Yes" was answered for one or more of the categories in 111a, ask 111b.

OBSERVATION – Fill for mobile home in group of 6 or more.

112. How many mobile homes are in this group? (288) 1 ☐ 6–99 2 ☐ 100 or more

OBSERVATION – Fill for 2 or more unit structures

113. How many stories (floors) are there from the main entrance of the building to the main entrance of the apartment? (289) 1 ☐ None, on same floor 2 ☐ One (up or down) 3 ☐ Two or more (up or down)

CHECK ITEM V *(See Control Card item 11b)*

☐ Household contains only family members – *Skip to Check Item W, page 35*

☐ Household contains persons 14+ NOT RELATED TO THE HEAD by blood, marriage or adoption – *Ask 114*

Section IIIC – OCCUPIED UNITS – Continued

114. In the last 12 months, how much did . . . earn in wages, salaries, tips and commissions (before taxes and deductions)?

(Obtain income for persons 14+ in household NOT RELATED TO HEAD by blood, marriage or adoption.)

115a. In the past 12 months, how much did . . . earn in net income from his/her own business, professional practice or partnership?

b. In the past 12 months, how much did . . . earn in net income from his/her own farm or ranch?

NOTE – Ask 116b for each "Yes" response in 116a. Ask 116a (and 116b, as appropriate) for all categories before asking 116c.

116a. In the past 12 months did . . . (names of persons 14+ NOT RELATED TO HEAD by blood, marriage or adoption) receive any money from –		116b. Who received this type of income? (Enter line numbers)
(1) Social Security or Railroad Retirement payments?	(290) 1 ☐ Yes 2 ☐ No	
(2) Estates, trusts or dividends?	(291) 1 ☐ Yes 2 ☐ No	
(3) Interest on savings accounts or bonds?	(292) 1 ☐ Yes 2 ☐ No	
(4) Net rental income?	(293) 1 ☐ Yes 2 ☐ No	
(5) Welfare payments or other public assistance?	(294) 1 ☐ Yes 2 ☐ No	
(6) Unemployment compensation?	(295) 1 ☐ Yes 2 ☐ No	
(7) Workmen's compensation?	(296) 1 ☐ Yes 2 ☐ No	
(8) Government employee pensions?	(297) 1 ☐ Yes 2 ☐ No	
(9) Veterans payments?	(298) 1 ☐ Yes 2 ☐ No	
(10) Private pensions or annuities?	(299) 1 ☐ Yes 2 ☐ No

CHECK ITEM W (See Control Card item 27a.)

☐ One-unit structure, detached, except mobile home or trailer — *Skip to Section IV, page 36*

☐ All others — *Skip to Section V, page 37*

Section IV – ENERGY CONSERVATION

INTRODUCTION I have some questions about insulation you might have added or installed to your house during the past 12 months.

CHECK ITEM A (Control Card item 34a)

☐ "Yes, all windows" or "Yes, some windows" in 34a — *Ask 1*

☐ "No" marked in item 34a — *Skip to Check item B*

1. During the past 12 months were any storm windows, double-glazed glass, or other protective covering, such as closeable shutters, plastic, etc., installed over the window openings on this house. (380) 1 ☐ Yes 2 ☐ No

CHECK ITEM B (See Control Card item 34b)

☐ "Yes, all doors" or "Yes, some doors" in 34b — *Ask 2*

☐ "No" marked in item 34b — *Skip to 3*

2. During the past 12 months were any storm doors installed on this house? (381) 1 ☐ Yes 2 ☐ No

3. During the past 12 months was any insulation added or installed in this house? (382) 1 ☐ Yes 2 ☐ No — *Skip to 5*

CHECK ITEM C (See Control Card item 34c)

☐ "Yes" marked in 34c — *Ask 4a*

☐ "No" or "Don't know" in 34c — *Skip to 4c*

4a. During the past 12 months was attic or roof insulation installed? (383) 1 ☐ Yes 2 ☐ No — *Skip to c*

b. How much insulation was ADDED to the attic or roof — was it less than 3 inches, 3 up to 6 inches, or 6 inches or more? (384) 1 ☐ Less than 3 inches 2 ☐ 3 up to 6 inches 3 ☐ 6 inches or more 4 ☐ Don't know

c. During the past 12 months was any insulation added or installed in the exterior walls? (385) 1 ☐ Yes 2 ☐ No

5. During the past 12 months have you added caulking or weatherstripping to the exterior doors or windows? (386) 1 ☐ Yes 2 ☐ No

CHECK ITEM D (See Control Card item 25a)

☐ Owned or being bought

☐ "Yes" marked in any of 1, 2, 4a, 4c, or 5 above — *Ask 6*

☐ "No" marked in 1, 2, 4a, 4c, and 5 above — *Skip to Section V, page 37*

(See Control Card item 25a)

☐ Rented or rent free — *Skip to Section V, page 37*

6. What was the total cost of the (storm windows, storm doors, additional attic or roof insulation, additional wall insulation, or caulking or weatherstripping) which was added or installed during the past 12 months? (387) 1 ☐ $1–99 2 ☐ 100–199 3 ☐ 200–399 4 ☐ 400 or more 5 ☐ Don't know 6 ☐ No charge, or none

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

PGM 4

Section V – TRAVEL TO WORK

Interviewer note: Fill item 1 after completing Section V

1. Section V – Interview status
   - 1 ☐ Interview
   - NONINTERVIEW
   - 2 ☐ Refusal
   - 3 ☐ Other

2. Enter line number and name of each household member 14+ and then ask item 2c for each.

Line number (a)	Name (b)	2c. Did . . . have a job last week? (Include if temporarily absent from work due to illness, vacation, layoff, etc.) (Mark one box for each line No.) Yes [1]	No [2]
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐
		1 ☐	2 ☐

[1] Transcribe the line number for each "Yes" answer in question 2c above to the top of a separate page and ask the appropriate questions.
[2] All "No" go to Control Card item 38a

INTRODUCTION The following questions are concerned with how persons in your household usually get to work.

FORM AHS-2 (4-17-75) Page 37

PGM 5

Line number of person (388) | Line number of respondent (389)

If last worker in this household, mark this box ☐

3a. What is . . .'s principal means of transportation to work? (390)
- 1 ☐ Truck . . . . .
- 2 ☐ Car or carpool → ▼ (391)
  - 1 ☐ Drives alone – *Skip to 4a*
  - 2 ☐ Shares driving . . . . . } *Skip to 3c*
  - 3 ☐ Drives others . . . . . } *Skip to 3c*
  - 4 ☐ Rides with someone else } *Skip to 3c*
- 5 ☐ Walks only – *Skip to 4a*
- 6 ☐ Works at home – *Skip to 8a*
- 7 ☐ Railroad
- 8 ☐ Subway or elevated
- 9 ☐ Bus or streetcar
- 10 ☐ Taxicab
- 11 ☐ Motorcycle
- 13 ☐ Bicycle
- 12 ☐ Other means – *Specify* _____

b. Does . . . usually ALSO use a car for part of the trip to work? (392)
- 1 ☐ Yes
- 2 ☐ No – *Skip to 4a*

c. How many people, including . . . , usually ride in the car to work? (393) _____ Number

4a. Does . . . usually WORK at the same location each day? (394)
- 1 ☐ Yes – *Skip to 4c*
- 2 ☐ No

b. Does . . . usually REPORT to the same location to begin work each day? (395)
- 3 ☐ Yes
- 4 ☐ No – *Skip to 8a*

c. Where is . . .'s usual place of work?
(1) Company or business establishment name
(2) Address *(Number and street)*
Note – If address (number and street name) are not known, enter building name, shopping center name, or other physical location description.
(3) Names of nearest intersecting streets
(4) Name of city, town, village, borough, etc. Place type →
(5) County
State ZIP code

4d. Is . . .'s place of work inside the incorporated (legal) limits of (name of city, town, village, etc., listed in 4c(4))? (396)
- 1 ☐ Yes
- 2 ☐ No
- 3 ☐ Don't know

5. What time does . . . usually leave for work? (397) _____ Time (398)
- 1 ☐ a.m.
- 2 ☐ p.m.

6. How long does it usually take . . . to get from home to work? (399) _____ Minutes

7. What is . . .'s ONE-WAY distance from home to work? (400) _____ Miles OR
- 0 ☐ Less than 1 mile

8a. In the last year, has . . . changed his principal means of transportation to work? (401)
- 1 ☐ Yes
- 2 ☐ No – *Skip to 9*

b. What was . . .'s principal means of transportation to work (prior to the change)? (402)
- 1 ☐ Truck . . . . .
- 2 ☐ Car or carpool → ▼ (403)
  - 1 ☐ Drove alone
  - 2 ☐ Shared driving
  - 3 ☐ Drove others
  - 4 ☐ Rode with someone else
- 5 ☐ Walked only
- 6 ☐ Worked at home
- 7 ☐ Railroad
- 8 ☐ Subway or elevated
- 9 ☐ Bus or streetcar
- 10 ☐ Taxicab
- 11 ☐ Motorcycle
- 13 ☐ Bicycle
- 12 ☐ Other means – *Specify* _____

9. If "Yes" marked in 8a – *ASK* Compared to . . .'s previous means of transportation to work (Given in 8b), how satisfied is . . . with his present means of transportation to work – much more, more, about the same, less or much less satisfied? (404)

If "No" marked in 8a – *ASK* Compared to a year ago, how satisfied is . . . now with his principal means of transportation to work – much more, more, about the same, less or much less satisfied?
- 1 ☐ Much more satisfied
- 2 ☐ More satisfied
- 3 ☐ About the same satisfaction
- 4 ☐ Less satisfied
- 5 ☐ Much less satisfied
- 6 ☐ Don't know
- 7 ☐ Did not work last year

INTERVIEWER Be sure to transcribe items 2c, 3a, 3b, 6 and 7 for head of household to items 82a–e on page 13 of AHS-2 questionnaire.

Ask Question 10, page 39, for the HEAD

FORM AHS-2 (4-17-75) Page 38

Facsimile of the Annual Housing Survey Questionnaire: 1975 —Continued

CHECK ITEM A (Mark all 3 parts)

(1) Head had job last week. ("Yes" in item 2c) . . . ☐ Yes* ☐ No
(2) Head reports to same location each day. ("Yes" in item 4a or 4b) ☐ Yes* ☐ No
(3) Head works 5 miles or more from home. (Item 7 is 5 miles or more. If item 7 is blank, mark the "No" box.) . . . ☐ Yes* ☐ No

* All "Yes," go to item 10. Any other combination, go to the next worker.

10a. Does . . . (head) have any objections to the distance (he/she) travels to get to work? (405) 1 ☐ Yes — Skip to c; 2 ☐ No — Ask b

b. What would you say your reasons are for living 5 or more miles from . . .'s (head) place of work?
Is it because —

(1) You like the neighbors in your present neighborhood?	(406)	3 ☐ Yes	4 ☐ No
(2) You like your house (apartment)?	(407)	1 ☐ Yes	2 ☐ No
(3) Your present home is close to good schools, or church?	(408)	3 ☐ Yes	4 ☐ No
(4) Your present home is convenient to shops, recreation, and similar facilities?	(409)	1 ☐ Yes	2 ☐ No
(5) Your present home is close to the jobs of others (besides the head) in your family?	(410)	3 ☐ Yes	4 ☐ No
(6) You can afford your present home?	(411)	1 ☐ Yes	2 ☐ No
(7) You're used to your present home, you're comfortable, you've always lived here?	(412)	3 ☐ Yes	4 ☐ No
(8) Some other reason I have not already mentioned? If "Yes," specify reason(s) — _____	(413)	1 ☐ Yes — (Skip to Note above item 11)	2 ☐ No

c. What are the reasons you don't live closer to . . .'s (head) place of work?
Is it because —

(9) You don't like any houses which are closer to work?	(414)	3 ☐ Yes	4 ☐ No
(10) You would not like to live among the type of people in the neighborhoods which are closer to work?	(415)	1 ☐ Yes	2 ☐ No
(11) The neighborhoods closer to work have poor schools or lack churches?	(416)	3 ☐ Yes	4 ☐ No
(12) The neighborhoods closer to work are inconvenient to shops, recreation, or other similar facilities?	(417)	1 ☐ Yes	2 ☐ No
(13) The neighborhoods closer to . . .'s (head) work are too far from other family members' jobs?	(418)	3 ☐ Yes	4 ☐ No
(14) You cannot afford housing in neighborhoods closer to work?	(419)	1 ☐ Yes	2 ☐ No
(15) There is no closer housing available?	(420)	3 ☐ Yes	4 ☐ No
(16) You don't like change; it's trouble to move?	(421)	1 ☐ Yes	2 ☐ No
(17) . . . (head's) present job is temporary, or . . . (head) expects to change jobs?	(422)	3 ☐ Yes	4 ☐ No
(18) Some other reason I have not already mentioned? If "Yes," specify reason(s) — _____	(423)	1 ☐ Yes	2 ☐ No

NOTE> If 2 or more "Yes" answers in categories 1–18, ask item 11. If one "Yes" or all "No," go to next worker.

11. You have told me that the reasons you live 5 or more miles from work are (Specify "Yes" answers mentioned in 1–18 above). Which reason would you say is the most important reason you live 5 or more miles from . . .'s (head) work? (424) _____ Reason number (Go to next worker)

SAMPLE DESIGN

The 1975 estimates are based on data collected in October through December 1975 for the Annual Housing Survey (AHS), which was conducted by the Bureau of the Census, acting as collection agent for the Department of Housing and Urban Development. The sample for this survey was spread over 461 sample areas (called primary sampling units), comprising 923 counties and independent cities with coverage in each of the 50 States and the District of Columbia.

Approximately 72,600 sample housing units (both occupied and vacant) were eligible for interview in the 1975 Annual Housing Survey. Of this number, 3,700 interviews were not obtained because, for occupied housing units, the occupants were not found at home after repeated calls or were unavailable for some other reason; or, for vacant housing units, no informed respondent could be found after repeated visits. In addition to the 72,600, there were also 7,300 sample units which were visited but found not to provide information relevant to the 1974 housing inventory.

Selection of sample areas.—The United States was divided into areas made up of counties and independent cities referred to as primary sampling units (PSU's). Then the PSU's were grouped into 376 strata, 156 of which consisted of only one PSU which was in sample with certainty. These 156 strata were mostly the larger SMSA's and were called self-representing (SR) since the sample from the sample area represented just that PSU. Each one of the other 220 strata consisted of a group of PSU's and were referred to as non-self-representing (NSR), since the sample of housing units from the sample PSU in a stratum represented the other PSU's in the stratum as well.

One PSU was selected from each NSR stratum with probability proportionate to the 1970 census population of the PSU. (This resulted in 220 NSR sample PSU's.) In addition, the NSR strata were grouped into 110 pairs and one stratum was picked at random from each pair. From this stratum, an additional PSU was selected independent of the other PSU selected from this stratum. Since the two PSU's were independently selected, it was possible for the same PSU to be selected twice. This occurred in 25 instances, producing an additional 85 NSR sample PSU's, and giving a grand total of 461 PSU's.

Designation of sample housing units for the 1975 enumeration.—The sample housing units designated to be interviewed in the 1975 enumeration consisted of the following categories, which are described in detail in succeeding sections.

1. All sample housing units that were interviewed in the 1974 enumeration.
2. All sample housing units that were either type A noninterviews (i.e., units eligible to be interviewed) or type B noninterviews (i.e., units not eligible for interview at the time of enumeration but which could become eligible in the future) in the 1974 enumeration. (For a list of type A and type B noninterview reasons, see facsimile of 1975 AHS questionnaire, page 1.)
3. All sample housing units that were selected from the list of building permits issued since the 1974 enumeration. (This sample represents the housing units built in permit-issuing areas, since the 1974 enumeration.)

Selection of the 1973 sample housing units.—The overall sampling rate used to select the sample for the 1973 AHS was about 1 in 1,366. The within-PSU sampling rate for AHS was determined so that the overall probability of selection for each sample housing unit was the same (e.g., if the probability of selecting a NSR PSU was 1 in 10, then the within-PSU sampling rate would be 1 in 136.6).

Within the sample PSU's, a sample of the housing units enumerated in the 1970 Census of Population and Housing was selected for AHS. In addition, a sample of new construction building permits was also selected to represent the units constructed since the 1970 census. These samples were selected at about twice the rate mentioned previously (i.e., at 2 in 1,366), thereby producing a sample twice as large as needed. This sample was split into two equal-sized samples—one to be used for AHS and one to be held in reserve for possible future use for AHS. The procedure used to split this sample into half-samples is described in the next section.

The sample of 1970 census units was selected in several stages of sampling. The

first step was the selection of a sample of census enumeration districts (ED's), administrative units used in the 1970 census. The probability of selection for an ED was proportionate to its 1970 population. The next step was to select an expected cluster of about four neighboring housing units within each sample ED. For most of the ED's, the selection was accomplished using the list of addresses for the ED as compiled in the 1970 census. However, in those ED's where addresses were incomplete or inadequate (mostly rural areas), the selection process was accomplished using area sampling methods. These ED's were divided into segments, i.e., small land areas with well-defined boundaries, having an expected size of four, or a multiple of four, housing units. Those segments with an expected size which was a multiple of four were further subsampled at the time of enumeration so that an expected four housing units were chosen for interview.

The sample of new construction units was selected from building permits issued since January 1970. Within each sample PSU, the building permits were chronologically ordered by month issued, and compact clusters of approximately four housing units were created. These clusters were then sampled for inclusion in the AHS at the sampling rate of 2 in 1,366. Housing units constructed since the 1970 census in areas which do not issue building permits were brought into the sample as a result of the area sample described above.

Splitting of the sample.—The sample selection procedure as described above produced segments of size-four housing units for the sample taken from the census address frame, the new construction frame, and the area sampling frame (mainly rural areas). One can expect a minimum loss in precision for segments of size-four housing units in rural areas because of the heterogeneity of this type of housing unit. Segments of size-two, however, were considered to be more optimal for sampling within those areas where one could expect neighboring units to be very similar (e.g., urban areas and new construction units). It is felt that if one were to go to segments of size-four housing units in this type of area, a significant loss in precision would result. A splitting operation was then carried out for segments selected from the census address and new construction frames. This consisted of halving each segment of four housing units that was selected for the sample. Two housing units from each segment were to be included in the survey and two housing units were to be held in reserve. No splitting operation was carried out within the segments selected from the area sampling frame; every other area sample segment of four housing units was used for the survey and the remaining segments were assigned to the reserve sample.

Selection of supplemental sample housing units in rural areas.—In 1974, it was decided to increase the reliability of the AHS estimates of rural housing characteristics by doubling the number of sample housing units from rural areas. This was accomplished by reactivating the reserve sample selected in the original sampling operations in 1973 from rural areas only. For the reserve sample selected in census address and new construction segments, this meant that the other half of the segment (an expected two housing units) was reactivated in 1974 if the segment was rural. Similarly for area segments, this meant the entire reserve segment (an expected four housing units) was reactivated in 1974 if the segment was rural. This supplementation increased the overall probability of selection for sample housing units in rural areas to about 2 in 1,366; whereas, the overall probability of selection for sample housing units in urban areas remained at 1 in 1,366.

1970 Census of Population and Housing.—The estimates pertaining to the 1970 housing inventory (i.e., the housing inventory that existed at the time of the 1970 census) are based on either 20-percent, 15-percent, or 5-percent sample data collected in April 1970 for the Decennial Census of Population and Housing. A detailed description of the sample design can be obtained in the 1970 census report, HC(1)-B1, **Detailed Housing Characteristics, United States Summary.**

ESTIMATION

AHS-National Sample.—The AHS-National sample produced estimates of two types: Estimates of the 1975 housing inventory and estimates of units removed from the housing inventory between 1973 and 1975 (i.e., 1973-1975 lost units). Each type of estimate employed a separate, though similar, estimation procedure as described below.

1975 housing inventory.—The 1975 AHS estimates employed a three-stage ratio estimation procedure. However, prior to implementation of the procedure, the basic weight (i.e., the inverse of the probability of selection) was adjusted to account for the type A noninterview housing units encountered in AHS. This noninterview adjustment was done separately for different categories of occupied and vacant units. The noninterview adjustment was equal to the following ratio:

$$\frac{\text{Interviewed housing units + noninterviewed housing units}}{\text{Interviewed housing units}}$$

The first-stage ratio estimation procedure was employed for sample housing units from non-self-representing (NSR) PSU's only. The procedure was designed to reduce the contribution to the variance arising from the sampling of NSR PSU's. The first-stage ratio estimation procedure takes into account the differences that existed at the time of the 1970 census in the distribution by tenure and residence of the housing population estimated from the sample NSR PSU's and that of the NSR housing population in each of the four census regions of the country.

The first-stage ratio estimation factor for each specified category was as follows:

$$\frac{\text{The 1970 census housing population in the residence-tenure category for all NSR strata in a census region}}{\text{Estimate of the housing population category using 1970 census housing counts for sample NSR PSU's in a census region}}$$

The numerators of the ratios were calculated by obtaining the 1970 census housing counts for each of the residence-tenure categories for each NSR stratum and summing these counts across the NSR strata in each census region. The denominators were calcuated by obtaining the 1970 census housing counts for each of the residence-tenure categories for each NSR sample PSU, weighting these counts by the inverse of the probability of selecting that PSU, and summing these weighted counts across the NSR PSU's in each census region. The computed first-stage ratio estimation factor was then applied to the existing weight for each NSR sample unit in each first-stage ratio estimation category.

The second-stage ratio estimation procedure was only employed for AHS new construction sample units (i.e., sample units built April 1, 1970, or later). This procedure was designed to adjust the AHS sample estimates of new construction units to independently derived current estimates for nine categories of new construction units for each of the four regions (i.e., six categories for conventional new construction units and three for new construction mobile homes). These independent estimates were considered to be the best estimates available for the number of new construction units. This adjustment was necessary to correct for known deficiencies in the AHS sample with regard to representation of new construction units (see the section on nonsampling error).

The second-stage ratio estimation factor for each specified category was as follows:

$$\frac{\text{Current independent estimate of new construction units in the category}}{\text{AHS sample estimate of new construction units in the category}}$$

The numerators of the ratios were derived from data based on the Survey of Construction (SOC), a survey of building permits conducted monthly by the Bureau of the Census. The numerators of the ratios for new construction mobile homes were derived from estimates of mobile home shipments adjusted to account for mobile homes shipped and actually occupied as primary residences.

The denominators of the ratios were obtained from the weighted estimates for the AHS sample units, using the existing weight after the first-stage ratio estimation procedure (i.e., the estimates employing the noninterview and first-stage adjustments). The computed second-stage ratio estimation factor was then applied to the existing weight for each sample unit in each second-stage ratio estimation category.

The third-stage ratio estimation procedure was employed for all AHS sample units. This procedure was designed to adjust the AHS sample estimates of housing (i.e., the estimates employing the noninterview, first-stage, and second-stage adjustments) to independently derived current housing estimates for four types of vacant housing units and for 24 categories for occupied housing units. Each of these 24 categories is a combination of the characteristics of residence, tenure, race of head, and sex of head.

The third-stage ratio estimation factor for each specified category was as follows:

$$\frac{\text{Current independent estimate of housing units in the category}}{\text{AHS sample estimate of housing units in the category}}$$

The numerators of the ratios for occupied housing units were derived from data based on the Current Population Survey (CPS), a household survey conducted monthly by the Bureau of the Census. The numerators of the ratios for vacant housing units were derived from data based on the Housing Vacancy Survey (HVS), a quarterly vacancy survey conducted by the Bureau of the Census.

The denominators of the ratios were obtained from the weighted estimates for the AHS sample units, using the existing weight after the second-stage ratio estimation procedure. The computed third-stage ratio estimation factor was then applied to the existing weight for each sample unit in each third-stage ratio estimation category.

The second- and third-stage ratio estimation procedures were repeated in an iterative process in order to bring the AHS estimates into close agreement with both sets of independent estimates (i.e., the independent estimates employed for both the second-stage ratio estimation process as well as those employed for the third-stage ratio estimation process). The factors resulting from this iterative process were then applied to the existing weight on the appropriate records, and the resulting product was used as the final weight for tabulation.

The effect of the third-stage ratio estimation procedure, as well as the overall estimation procedure, was to reduce the sampling error for most statistics below what would have been obtained by simply weighting the results of the sample by the inverse of the probability of selection. The distribution of the housing population selected for the sample differed somewhat, by chance, from that of the nation as a whole in such basic housing characteristics as tenure, vacancy status, residence, race of head, and sex of head. These characteristics are probably closely correlated with other housing characteristics measured for AHS. Therefore, through the use of the three-stage ratio estimation procedure one can expect the sample estimate to be improved substantially when the sample housing population is brought into close agreement with a known distribution of the entire housing population with respect to these basic housing characteristics.

1973-1975 lost units.—The 1973-1975 lost unit estimates employed the three-stage ratio estimation procedure used to produce the AHS-National estimates of the 1973 housing inventory, as was described in the 1973 Current Housing Report, series H-150-73A, **General Housing Characteristics for the United States and Regions.** Since the 1973-1975 lost units existed by definition in the 1973 housing inventory, there was a 1973 housing inventory weight associated with each 1973-1975 lost unit. This weight was used to tabulate the estimates of the characteristics of the 1973-1975 lost units. Also, the general effect of this estimation procedure was to reduce the sampling error for most statistics below what would have been obtained by simply

weighting the results of the sample by the inverse of the probability of selection.

Ratio Estimation Procedure of the 1970 Census of Population and Housing.—This report presents data on the housing characteristics of the 1970 Census of Population and Housing. The statistics based on 1970 census sample data employed a ratio estimation procedure which was applied separately for each of the three census samples. A detailed description of the ratio estimation procedure employed for the 1970 census can be obtained in the 1970 census report, HC(1)-B1, **Detailed Housing Characteristics, United States Summary.**

RELIABILITY OF THE ESTIMATES

There are two types of possible errors associated with estimates based on data from sample surveys—sampling and nonsampling errors. The following is a description of the sampling and nonsampling errors associated with the AHS-National sample and of the nonsampling errors associated with the 1970 census estimates. A description of the sampling errors associated with the sample estimates from the 1970 census appears in the 1970 census report, HC(1)-B1, **Detailed Housing Characteristics, United States Summary.** The sampling errors for 1970 census data are much smaller than for AHS data. In making comparisons between the two data sources, it can be safely assumed that the census data are subject to zero sampling errors.

Sampling errors.—The particular sample used for this survey is one of a large number of possible samples of the same size that could have been selected using the same sample design. Even if the same schedules, instructions, and enumerators were used, estimates from each of the different samples would differ from each other. The deviation of a sample estimate from the average of all possible samples is defined as the sampling error. The standard error of a survey estimate attempts to provide a measure of this variation among the estimates from the possible samples and, thus, is a measure of the precision with which an estimate from a sample approximates the average result of all possible samples.

As calculated for this report, the standard error also partially measures the variation in the estimates due to response and enumerator errors (nonsampling errors), but it does not measure, as such, any systematic biases in the data. Therefore, the accuracy of the estimates depends on both the sampling and nonsampling errors measured by the standard error, and biases and some additional nonsampling errors not measured by the standard error.

The sample estimate and its estimated standard error enable one to construct interval estimates such that the interval includes the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these surveyed under essentially the same general conditions, and an estimate and its estimated standard error were calculated from each sample, then:

TABLE I. **Standard Errors of Estimated Number of Total Housing Units: 1975 (Excluding estimates of housing units pertaining to Cooking Fuel, Lacking Complete Plumbing Facilities, Mobile Homes, Sewage Disposal, Source of Water, and Households with Head of Spanish Origin)**

500	28	27	33	32					

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples may or may not be contained in any particular computed interval. However, for a particular sample, one can say with specified confidence that the average result of all possible samples is included in the constructed interval.

The figures presented in the tables below are approximations to the standard errors of various estimates shown in this report. In order to derive standard errors that would be applicable to a wide variety of items and also could be prepared at a moderate cost, a number of approximations were required. As a result, the tables of standard errors provide an indication of the order of magnitude of the standard errors rather than the precise standard error for any specific item.

Tables I through V present the standard errors applicable to the 1975 housing inventory estimates in this report, and table VI presents the standard errors applicable to 1973-1975 lost housing unit estimates in this report. Table I shows the approximate standard errors applicable to all 1975 housing inventory estimates except those pertaining to the specified items in the table, those pertaining to urban or rural items, and those pertaining to estimates of vacant housing units.

The standard errors shown in table II should be used for those specified items in table I, the standard errors shown in tables III and IV should be used for urban and rural items respectively, and the standard errors shown in table V should be used for estimates pertaining to vacant housing units. Linear interpolation should be used to determine standard errors for levels of estimates not specifically shown in tables I through VI.

The reliability of an estimated percentage computed by using sample data for both numerator and denominator depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the nu-

merators of the percentages, particularly if the percentages are 50 percent or more.

Tables VII through XI present the standard errors of estimated percentages. Table VII shows the approximate standard errors of all estimated percentages of the 1975 housing inventory except those pertaining to the specified items in table VIII. In addition to those specified items, table VIII also shows the approximate standard errors of urban, vacant housing units and of total 1973-1975 lost housing units. Table IX shows the approximate standard errors of all estimated percentages of the 1975 rural housing inventory except those pertaining to the specified items in table X. Table X also shows the approximate standard errors of vacant housing units and of the 1975 urban housing inventory except those pertaining to the specified items in table XI. Table XI also shows the approximate standard errors of urban 1973-1975 lost housing units. Two-way linear interpolation should be used to determine standard errors for estimated percentages not specifically shown in tables VII through XI.

For ratios of the form, 100(x/y), where x is not a subclass of y, tables VII-XI underestimate the standard error of the ratio when there is little or no correlation between x and y. For this type of ratio, a better approximation of the standard error may be obtained by letting the standard error of the ratio be approximately equal to:

$$(100)\,(x/y)\,\sqrt{\left(\frac{\sigma_x}{x}\right)^2 + \left(\frac{\sigma_y}{y}\right)^2}$$

where: x = the numerator of the ratio

y = the denominator of the ratio

σ_x = the standard error of the numerator

σ_y = the standard error of the denominator

Illustrations of the use of the standard error tables. Illustration I.—Table A-1 of this report shows that in urban areas of the United States there were 31,107,000 owner-occupied housing units in 1975. Interpolation in column 1 of table III of this appendix shows that the standard error of an estimate of this size is approximately 151,000. Consequently, the 68-percent confidence interval, as shown by these data, is from 30,956,000 to

TABLE VII. **Standard Errors of Estimated Percentages of Housing Units: 1975 (Excluding estimated percentages of housing units pertaining to Cooking Fuel, Lacking Complete Plumbing Facilities, Mobile Homes, Sewage Disposal, Water Supply, Households with Head of Spanish Origin, 1973-1975 Lost Housing Units, and Vacants)**

(68 chances out of 100)

Base of percentage (000)	Estimated percentage[1]						
	1 or 99	2 or 98	5 or 95	10 or 90	15 or 85	25 or 75	50
5	5.3	7.5	11.7	16.1	19.2	23.3	26.9
10	3.8	5.3	8.3	11.4	13.6	16.5	19.0
25	2.4	3.4	5.2	7.2	8.6	10.4	12.0
50	1.7	2.4	3.7	5.1	6.1	7.4	8.5
100	1.2	1.7	2.6	3.6	4.3	5.2	6.0
250	0.8	1.1	1.7	2.3	2.7	3.3	3.8
500	0.5	0.8	1.2	1.6	1.9	2.3	2.7
1,000	0.4	0.5	0.8	1.1	1.3	1.6	1.9
2,500	0.2	0.3	0.5	0.7	0.8	1.0	1.2
5,000	0.2	0.2	0.4	0.5	0.6	0.7	0.8
10,000	0.1	0.2	0.3	0.4	0.4	0.5	0.6
25,000	0.07	0.1	0.2	0.2	0.3	0.3	0.4
50,000	0.05	0.08	0.1	0.2	0.2	0.2	0.3
75,000	0.04	0.06	0.1	0.1	0.2	0.2	0.2

[1] Standard errors are presented to the nearest one-tenth of one percentage point except when the standard error is less than one-tenth of one percentage point; in those cases, the standard error is shown to the nearest one-hundredth of one percentage point.

31,258,000 housing units. Therefore, a conclusion that the average estimate, derived from all possible samples, of 1975 owner-occupied housing units in urban areas lying within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate, derived from all possible samples, lies within the interval from 30,865,000 to 31,349,000 housing units with 90 percent confidence; and that the average estimate lies within the interval from 30,805,000 to 31,409,000 housing units with 95 percent confidence.

Table A-1 also shows that of the 31,107,000 owner-occupied housing units in urban areas, 9,691,000, or 31.1 percent, were occupied by two persons. Interpolation in table X (i.e., interpolation on both the base and the percent) of this appendix shows that the standard error of the above percentage is approximately .3 percentage points. Consequently, the 68-percent confidence interval, as shown by these data, is from 30.8 to 31.4 percent, the 90-percent confidence interval is from 30.6 to 31.6 percent, and the 95-percent confidence interval is from 30.5 to 31.7 percent.

Illustration II.—Table A-2 of this report shows that in the rural areas of the United States there were 127,000 specified owner-occupied, farm housing units in 1975. Interpolation in column 1 of table IV of this appendix shows that the standard error of an estimate of this size is approximately 12,000. Consequently, the 68-percent confidence interval, as shown by these data, is from 115,000 to 139,000 housing units. Therefore, a conclusion that the average estimate, derived from all possible samples, of 1975 specified owner-occupied, farm housing units lying within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate, derived from all possible samples, lies within the interval from 108,000 to 146,000 housing units with 90 percent confidence; and that the average estimate lies within the interval from 103,000 to

TABLE VIII. **Standard Errors of Estimated Percentages of Housing Units Pertaining to Cooking Fuel, Lacking Complete Plumbing Facilities, Mobile Homes, Sewage Disposal, Water Supply, Households with Head of Spanish Origin, 1973-1975 Lost Housing Units, and Vacant Urban Housing Units: 1975**

151,000 housing units with 95 percent confidence.

Table A-2 also shows that of the 127,000 specified owner-occupied, farm housing units in rural areas, 64,000, or 50.4 percent; were owned free and clear. Interpolation in table IX (i.e., interpolation on both the base and percent) of this appendix shows that the standard error of the above percentage is approximately 5.1 percentage points. Consequently, the 68-percent confidence interval, as shown by these data, is from 45.3 to 55.5 percent; the 90-percent confidence interval is from 42.2 to 58.6 percent; and the 95-percent confidence interval is from 40.2 to 60.6 percent.

Differences.—The standard errors shown are not directly applicable to differences between two sample estimates. The standard error of a difference between estimates is approximately equal to the square root of the sum of the squares of the standard errors of each estimate considered separately. This formula is quite accurate for the difference between estimates of the same characteristic in two different areas or the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive correlation between the two characteristics, the formula will overestimate the true error. Also, if there is a high negative correlation between the two characteristics, the formula will underestimate the true standard error.

Illustration of the computation of the standard error of a difference.—Table A-1 of this report shows that in urban areas of the United States there were 5,537,000 owner-occupied housing units with three persons in 1975. Thus, the apparent difference between the number of 1975 owner-occupied housing units in urban areas with two persons and those with three persons is 4,154,000. Column 1 of table III shows that the standard error of 9,691,000 is approximately 114,000 and that the standard error of 5,537,000 is approximately 89,000. Therefore, the standard error

of the estimated difference of 4,154,000 is about

$$145{,}000 = \sqrt{(114{,}000)^2 + (89{,}000)^2}$$

Consequently, the 68-percent confidence interval for the 4,154,000 difference is from 4,009,000 to 4,299,000 housing units. Therefore, a conclusion that the average estimate of this difference, derived from all possible samples, lying within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, the 90-percent confidence interval is from 3,922,000 to 4,386,000; and the 95-percent confidence interval is from 3,864,000 to 4,444,000. Thus, we can conclude with 95 percent confidence that the number of 1975 owner-occupied housing units inside SMSA's with two persons is greater than the number with three persons since the 95-percent confidence interval of this difference does not include zero or negative values.

Medians.—For the medians presented in certain tables, the sampling error depends on the size of the base and on the distribution upon which the median is based. An approximate method for measuring the reliability of the estimated median is to determine an interval about the estimated median such that there is a stated degree of confidence that the average median from all possible samples lies within the interval. The following procedure may be used to estimate confidence limits of a median based on sample data:

1. From the tables, determine the standard error of a 50 percent characteristic on the base of the median;
2. Add to and subtract from 50 percent the standard error determined in step 1; and
3. Using the distribution of the characteristic, read off the confidence interval corresponding to the two points established in step 2.

For about 68 out of 100 possible samples, the average median from all possible samples would lie between these two values.

A two-standard-error confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step 1. For about 95 out of 100 possible samples, the average median from all possible samples would lie between these two values.

Illustration of the computation of the 95-percent confidence interval for a median.—Table A-1 of this report shows the median number of persons in owner-occupied housing units in urban areas was 2.8 in 1975. The base of the distribution from which this median was determined is 31,107,000.

1. From table X, the standard error of a 50-percent characteristic on the base of 31,107,000 is .4 percentage points.
2. To obtain a two-standard-error confidence interval on the estimated median, add to and subtract from 50 percent twice the standard error determined in step 1. This yields percentage limits of 49.2 and 50.8.
3. From table A-1, it can be seen by cumulating the frequencies for the first two categories that 13,885,000 housing units, or 44.5 percent, had one and two persons (actually, for purposes of calculating the median, the category of two persons is considered to be from 1.5 to 2.5 persons) and that an additional 5,537,000 owner-occupied housing units, or 17.8 percent, had three persons (i.e., 2.5 to 3.5 persons). By linear interpolation, the lower limit of the 95-percent confidence interval is found to be about

$$2.5 + (3.5 - 2.5)\left(\frac{49.2 - 44.5}{17.8}\right) = 2.8$$

Similarly, the upper limit of the 95-percent confidence interval is found to be about

$$2.5 + (3.5 - 2.5)\left(\frac{50.8 - 44.5}{17.8}\right) = 2.9$$

Thus, the 95-percent confidence interval ranges from 2.8 to 2.9 persons. Although it appears that this confidence interval has the sample estimate as the lower limit, it actually is a reflection of the rounding error associated with this median (see the paragraph on rounding error in the nonsampling errors section of this appendix).

Nonsampling errors.—In general, nonsampling errors can be attributed to many sources: Inability to obtain information about all cases, definitional difficulties, differences in the interpretation of questions, inability or unwillingness to provide correct information on the part of respondents, mistakes in recording or coding the data, and other errors of collection, response, processing, coverage, and estimation for missing data. As can be seen from the above list, nonsampling errors are not unique to sample surveys since they can, and do, occur in complete censuses as well.

Obtaining a measurement of the total nonsampling error associated with the estimates from a survey is very difficult, considering the number of possible sources of error. However, an attempt was made to measure some of the nonsampling errors associated with the estimates for both the 1970 Census of Population and Housing and the 1975 AHS-National.

1970 Census.—A number of studies were conducted to measure two types of general errors associated with 1970 census estimates: "Coverage" and "content" errors. The "coverage" errors determined how completely housing units were counted in the census and included space errors, definitional errors, and occupancy errors. The "content" errors measured the accuracy of the data collected for enumerated housing units. These errors were measured by reinterviews, record checks, and other surveys.

The detailed results of these studies on coverage and content errors, as well as the methodology employed, can be found in the 1970 Census of Population and Housing Evaluation and Research Program reports PHC(E)-5, **The Coverage of Housing in the 1970 Census;** and PHC(E)-10, **Accuracy of Data for Selected Housing Characteristics as Measured by Reinterviews.**

Reinterview program.—For the AHS-National sample, a study was conducted to obtain a measurement of some of the components of the nonsampling error associated with the AHS estimates. A reinterview program was conducted for a sample of the AHS households. These households were revisited and answers to some of the questions on the AHS questionnaire were obtained again. The original interview and the reinterview were assumed to be two independent readings and thus were the basis for the measurement of the "content" error of these AHS estimates.

As part of the reinterview, a check was made at each of these households to determine if the following was done during the original interview:

1. The correct unit was visited.
2. The correct number of housing units was interviewed at that address.
3. The correct information on "Year Built" was obtained.
4. The correct information on "Tenure" was obtained.
5. The correct information on "Household Composition" was obtained.
6. The correct information on "Type of Housing Unit" was obtained.
7. The correct information on "Occupancy Status" was obtained.

This check was for interviewer evaluation and control.

The results of the 1975 reinterview study are not available; however, it is felt that they will be similar to the results of the 1974 reinterview study which are presented in the following Census Bureau memorandum, "Reinterview Results for the Annual Housing Survey—National Sample: 1974."

Twenty-five items were included in the 1974 reinterview study, some for the first time. The estimated indexes of inconsistency for these items ranged from 4 to 35 with most items in the 20 to 30 range. The items with the higher levels of inconsistency tended to be the attitude and opinion items which were expected to have relatively high inconsistency levels and were included in the AHS reinterview programs because they had not been previously tested. A 20-50 interval is considered moderate on a range of 0-100 with a high index associated with a high level of response variability.

The 1970 census reinterview results provide illustrations of possible nonsampling errors for some of the items which also appear in the AHS. For example, median value of homes was consistently underestimated by about five percent, and the average monthly costs of electricity and utility gas were consistently overestimated although the effect on the average gross rent was fairly small.

A possible explanation for the results of the AHS and census reinterview studies, as well as the surveys themselves, is that the data are based on the answers given by the respondents, who may lack precise information. Also, the results of the reinterview studies are derived from sample surveys, so there is sampling error associated with these estimates of nonsampling error. Therefore, the possibility of such errors should be taken into account when considering the results of this study.

Coverage Errors.—With respect to errors of coverage and estimation for missing data, it was mentioned previously, in the section on estimation that the AHS new construction sample had deficiencies in representing both conventional new construction in permit-issuing areas and new construction mobile homes. During the sampling of building permits, only those issued January 1, 1970, or later were eligible to be sampled to represent conventional new construction in permit-issuing areas. It had been assumed that units with permits issued prior to 1970 would have been completed by the time of the 1970 census (i.e., April 1970), and therefore would have been represented in the sample selected from 1970 census units. However, it has been estimated that the 1975 AHS sample misses about six percent (i.e., about 600,000 units) of *all* conventional new construction (i.e., all conventional housing units built after April 1970 in both permit-issuing and non-permit-issuing areas) because the permits for these missed units, which were built after April 1970, were issued before 1970.

In addition, unlike the procedure for conventional new construction, there is no sampling procedure specifically for new construction mobile homes. However, new mobile homes in segments where area sampling methods were used do come into the AHS sample. In addition, new mobile homes in segments sampled from the 1970 census list also come into sample if the mobile homes are located in mobile home parks, identified as such in the 1970 census. However, new mobile homes in these segments that are located in mobile home parks not in existence at the time of the 1970 census or not identified as such in the 1970 census have no chance of coming into the AHS sample. It has been estimated that the 1975 AHS sample misses at least 200,000 new mobile homes. The second-stage ratio estimation procedure was employed to reduce the effect of both these deficiencies although some bias in the AHS sample still exists. This is especially true for new mobile homes, since it is believed that the corresponding, independent estimate substantially understates the actual new mobile home inventory.

Rounding errors in AHS.—For errors associated with processing, the rounding of estimates introduces another source of error in the data, the severity of which depends on the statistics being measured. The effect of rounding is significant relative to the sampling error only for small percentages, median number of persons, and median number of rooms when these figures are derived from relatively large bases. This means that confidence intervals formed from the standard errors given may be distorted, and this should be taken into account when considering the results of the survey.

Table Finding Guide, Part E

Subjects by Type of Area and Table Number

This guide lists all subjects covered in this report but does not indicate all cross-classifications, for example, by tenure.

Tables with prefix letter "A" are for the United States total, "B" for the Northeast region, "C" for the North Central region, "D" for the South region and "E" for the West region. Tables 3 through 6, tables 9 through 12, and tables 15 through 18 do not contain 1970 data.

TABLE FINDING GUIDE—Continued

This guide lists all subjects covered in this report but does not indicate all cross-classifications, for example, by tenure.

Tables with prefix letter "A" are for the United States total, "B" for the Northeast region, "C" for the North Central region, "D" for the South region and "E" for the West region. Tables 3 through 6, tables 9 through 12, and tables 15 through 18 do not contain 1970 data.

Subject	United States and Regions Urban Rural (Nonfarm/Farm; Inside/Outside SMSA's)	United States Urban Rural					United States and Regions Urban Rural (Nonfarm/Farm; Inside/Outside SMSA's)	United States Urban Rural
	All housing units (1975-1970)	Mobile homes and trailers (1975)	New construction units (1975)	Units removed from the inventory (1973)	Recent movers (1975)	Vacant units (1975)	Units occupied by households with Black household head (1975-1970)	Units occupied by households with Spanish-origin head (1975-1970)
