000195-000241	Memorandum: Estimating the Undocumented Population by State for use in Apportionment	2020-03-27	(b)(5)	A memorandum and presentation for Dr. Ron S Jarmin from Doctors Victoria A. Velkoff and John M. Abowd, analyzing various models for estimating the undocumented population.	The memorandum is part of the decision making process for choosing a model for estimating the population of undocumented individuals. It precedes the choice of a model, and provides candid discussion and advice of the pros and cons of various possible models to choose from. Disclosure of this memorandum could chill the frank provision of strengths and weaknesses of various models and undermine the give-and-take inherent in the deliberative process. Furthermore, disclosure of the memorandum could cause confusion in the public between the model chosen and other models discussed that were not selected. Therefore, it is an intra- or inter-agency memorandum that is both pre-decisional and deliberative. There is no reasonably segregable, non-exempt information that has been withheld.
