2020

Overall RCS Wave 2 Batch* Status as of 10/16/2020

All Batch Types (Available-English, Available-Spanish, Referral)

	Number of Batches	Percent
Total New (Not started)	0	0
Total In Process	0	0
Total Completed	6288	100
Total (all)	6288	100

* Each batch of responses for residual coding contains 100 unique write-in entries.

Wave 2 RCS progress

- Production Coding – Completed 10/8/20
- Verification Coding – Completed 10/9/20
- Adjudication Coding – Completed 10/9/20
- Referral Coding – Completed 10/16/20

Overall RCS Wave 3 Batch* Status as of 10/28

All Batch Types (Available-English, Available-Spanish, Referral)

	Number of Batches	Percent
Total New (Not started)	4496	85.0
Total In Process	634	12.0
Total Completed	158	3.0
Total (all)	5288	100

* Each batch of responses for residual coding contains 100 unique write-in entries.

Waves 3-4 Schedule

Wave	Start Date	End Date	Days	Training Dates	NPC Coders Available	PC Coders	VC Coders	AC Coders	Batch Workload
1	4/20/2020	8/7/2020	78						7180
2	8/17/2020	10/16/2020	43	08/10/20 - 08/14/20	332	207	109	16	6288
3	10/26/2020	12/2/2020	27	10/19/20 - 10/23/20	340	215	77	48	5254
4	12/7/2020	12/11/2020	5	N/A	TBD	TBD	TBD	TBD	All remaining data

Other Notes:

- **Codes from waves 1-3 will be applied to the initial CUF and the codes from wave 4 will be applied to the final CUF. This cut off is being applied to meet the adjusted schedule for the initial CUF, the final CUF, and CEF. The more data available for the early review serves as a mitigation in meeting these narrowly spaced target dates which are contingent on the successful completion and review of the previous step in the process.**
- **Working with DRPS on an estimate for the Wave 4 workload. We should have a better idea of this once the final response data is received this week.**

Operational Delivery 12.1-

Residual Coding (RCS)

The process of manually coding write-in responses collected from the Hispanic origin and race questions that cannot be assigned codes through autocoding.

At the start of Wave 1 of residual coding (4/17/20), the autocoding rate for write in responses was 98.8%

Residual Coding Process

Wave 1 RCS progress

- Production Coding – Completed 7/9/20
- Verification Coding – Completed 7/15/20
- Adjudication Coding – Completed 8/11/20

Overall RCS Wave 1 Batch* Status

All Batch Types (Available-English, Available-Spanish, Referral)

	Number of Batches	Percent
Total New (Not started)	0	0
Total In Process	0	0
Total Completed	7180	100
Total (all)	7180	100

* Each batch of responses for residual coding contains 100 unique write-in entries.
