Q&A
How the Data Are Used?

• Veteran Affairs uses data to:
  • Measure veteran needs
  • Evaluate impact of veteran’s programs for education, employment and healthcare
  • Conduct policy analysis
  • Plan programs
  • Budget for Federal veterans’ programs
  • Report to Congress on state projections of veterans; facilities and services

https://census.gov/topics/population/veterans/guidance/data-uses.html

Data on Veterans **NOT** available from any U.S. Census Bureau surveys

- Military rank, branch of service, length of service
  - Exception: Branch and length are available in the CPS veteran supplement

- Combat experience
  - Exception: Available in the CPS veteran supplement

- Homelessness

- VA benefits other than service-connected disability

- Health status of veterans
Decennial Census

History of Veteran Questions

The first data on veterans to be published by the U.S. government were based on an inquiry in the 1840 census which asked the name, age, and place of residence of pensioners of the Revolutionary War.

Veteran status questions were asked in every decennial census from 1910 to 2000, with the exception of 1920.

Prior to 1980, the veteran status questions were asked of all males 14 years and older.

Starting in 1980, the veteran status questions were asked of all individuals 15 years and older.

Complete question wording for the 1910 through 2000 decennial censuses can be found here: https://census.gov/content/dam/Census/topics/population/veterans/guidance/veteran-questions-over-time.pdf

The American Community Survey
The Foundation

The American Community Survey is on the leading edge of survey design, continuous improvement, and data quality

- The nation’s most current, reliable, and accessible data source for local statistics on critical planning topics such as age, children, veterans, commuting, education, income, and employment
- Surveys 3.5 million households and informs over $675 billion of Federal government spending each year
  - Visit 20,000 Group Quarter facilities and sample approximately 194,000 residents each year
- Covers 35+ topics, supports over 300 evidence-based Federal government uses, and produces 11 billion estimates each year
- Three key annual data releases:
  - 1-year Estimates (for large populations)
  - 1-year Supplemental Estimates (for small populations)
  - 5-year Estimates (for very small populations)

Meeting Federal Needs
• Used primarily by the Department of Veterans Affairs to:
  • Measure the needs of veterans and evaluate the impact of veterans’ programs dealing with education, employment, and health care
  • Measure a veteran’s service-connected disability compensation entitlement status to accurately anticipate the need for VA care and its associated cost

Community Benefits
• Budgeting and program planning for medical services and nursing homes for veterans
• Planning locations and sizes of veterans’ cemeteries
• Determining segments of population who may not be receiving needed medical services
• Allocating funds for employment and job training programs for veterans
• Allowing VA medical centers and their regional networks to engage in meaningful local area planning that accounts for expectations of the future demand for VA care
American Community Survey
History of Veteran Questions

For the 1999 to 2002 ACS, the veterans series of questions matched Census 2000.

At the request of the Department of Veterans Affairs:

- **In 2003**, several changes were made to the veteran status and periods of military service questions.

- **In 2008**, new content about service-connected disability was added to the questionnaire and the years of service question was removed.

- **In 2013**, the veteran status question was simplified and the periods of military service categories were collapsed.

Census Geography Hierarchy

Central axis describes a nesting relationship

- 600 to 3,000 population
- 240 to 1,200 housing units

Blocks are not defined by population and are the smallest geographic level at which data are ever released (Decennial Census, not the ACS)

- 1,200 to 8,000 population (optimum 4,000)
- 480 to 3,200 housing units

- Cities and towns -- incorporated
- Census Designated Places (CDPs):
  - Unincorporated; no size threshold
  - Separate and distinct from city/town
  - Redefined each census

Accessing Census Data
How to Access Data

Statistics on the veteran population can be found in many of our online data tools:

• **QuickFacts**
  • **When to use**: If you need an estimate of veterans in a state, county, or city (5K population threshold)

• **My Congressional District**
  • **When to use**: If you need an estimate of how many veterans live in your Congressional District

• **Census Business Builder**
  • **When to use**: If you need an estimate of how many veterans live in your state, county, city, ZCTA, or census tract (Veteran-Owned Business data available for the RAE edition)

• **American FactFinder**
  • **When to use**: If you need detailed demographic or socio-economic statistics about veterans in a specific geography

• **Public Use Microdata Sample (PUMS)**
  • **When to use**: If you need to create custom tabulations
