# About the Census Bureau

- The U.S. Census Bureau is the federal government's largest statistical agency.
- We conduct more than 130 censuses and surveys each year, including
  - **The Decennial Census** – the once-a-decade population and housing count of the United States
  - **The American Community Survey** – the ongoing annual survey of the nation's population
  - **The Census of Governments** – identifies the scope and nature of the nation's state and local government sector
  - **The Economic Census** – the official five-year measure of American business
- Our mission is to serve as the leading source of quality data about America's people, places, and economy.

## Census Economic Surveys

- Census Bureau Economic Surveys are a key source for official statistics companies can use:
  - Monthly and Quarterly are small sample surveys that provide the most **TIMELY** data available
  - Annual surveys have larger samples and provide the most up-to-date **TREND** data available
  - Every 5 years, the Economic Census measures all businesses and provides the most **COMPREHENSIVE** data available
- These surveys set the standard for U.S. economic statistics, and are fueled by the data provided by individual businesses
