Q: Where can we get county level data that shows household income for children 5 to 8 and, if possible whether the children are in public or private education? We are in a data desert.

A: You can do this in the data.census.gov portal.

S0201 Has both household income and educational enrollment but not combined and no private school data

Q: I'm sorry, but I missed the beginning. Will the slide deck be provided after the webinar?

A: We're recording this, so you can watch the recording later. You will find the recording and materials on census.gov/academy.

Q: Is the Statistics in Schools on the census website or is that a separate website?

A: Stats in schools should be on our website.
https://www.census.gov/programs-surveys/sis.html

Q: Some ACS data is down to the Block Group level, which is smaller than Census Tract. Would this be true?

A: True, but there will be data drop out, and higher margins of error at the BG level.
Q: Some states are tracking educational attainment as college degrees and certifications. Where can we find data about attainment for non-college degrees such as cosmetology, or other license/certifications?

A: That should be within the data.census.gov portal (ACS), but you may have to dig for it.

There are data released in 08/2021 for enrollment for vocational courses but not in detail. This data is from the Current Population Survey and the School Enrollment Supplement of October 2020. The link ...

https://www.census.gov/data/tables/2020/demo/school-enrollment/2020-cps.html

Q: Have tried that portal but couldn't figure out how to get it. At a later date, could someone walk me through?

A: Yes, you can contact me directly at david.j.kraiker@census.gov and I can set up a time to help you or go to askdata@census.gov and someone will be assigned to work with you.

Q: What about adults over 15 years and above regarding level of education? As well as women in a subcategory which have gone back to school that have dependents? Where do you find this information?

A: I suspect we wouldn't have a table broken out like that. You might have to construct that yourself using MDAT. For assistance using MDAT email us at askdata@census.gov.

From the American Community Survey, table B13014 and maybe could be useful C15001
Q: Will we receive a copy or is there a weblink to where it will be posted?
   A: All material will be post to the census.gov/academy.

Q: How do you get the raw data in an excel spreadsheet or csv form?
   A: Above her table there is a download button to hit.

Q: Cities, towns, boroughs but not counties??
   A: You can get it by county, state, etc. she forgot to mention that.

Q: I frequently need educational attainment by age/sex for all adults 18+. Much of the data are understandably for age 25+. IIRC, I can find 18+ on a statewide level, but is there a good source for it for sub-state geographies?
   A: Did you try to get it at a sub-county level? You would probably need the 5-year data.

_B15001 Sex by age by educational attainment for the population 18 years and over is available at the county level_
Q: It looks like, when I last downloaded, I needed by race as well and it was only available in CPS data.

A: Perhaps contact me outside of this webinar, at askdata@census.gov.

Educational data from American Community Survey is available for White, Black or African American, American Indian and Alaska Native, Asian, Native Hawaiian and other Pacific Islander, and Hispanic.

Q: This is the first time participating in your webinars, but is there any way to visually enhance the screens whereby the information is clearer and the graphics are bigger?

A: Please verify you are in full screen mode.

Q: Where do we go to get the list of tables?

A: Go to census.gov/academy and the tables will be found under this webinar within 30 days.

Q: Will any of these webinars be "on demand"

A: So to speak, yes. They will be recorded and posted.
Q: So where are the tables by race and gender?

A: For education data, you can select education as your first topic then select populations and people as your second topic and select age and sex.

Q: Are there any nuggets for arts?

A: There is data for professional schools that could include ‘arts’. From the American Community Survey table B15010 - Detailed Field of Bachelor’s Degree for First Major for the Population 25 Years and Over also S1502 – Field of Bachelor’s Degree for First Major.

Also check out new data released from Current Population Survey at this link ...

https://www.census.gov/data/tables/2021/demo/educational-attainment/cps-detailed-tables.html

Q: Are there any api’s or integrated connections available for major visualization applications? RSS feeds for updates? Best practices for creating automated flows?

A: Please see this link for API information: API (census.gov)
