2017 Economic Census

Census Scientific Advisory Committee Briefing

William Samples
Economic Census Assistant Survey Director
Economy-Wide Statistics Division
December 7, 2018
Economic Census Background

- Authorized under Title 13 U.S.C., Section 131 to take, compile, and publish censuses of manufacturers, of mineral industries and of other businesses every fifth year; Response required by law
- Data are collected every 5 years, for years ending in ‘2’ and ‘7’
- Content developed in cooperation with business and government
- Most comprehensive measurement of the U.S. economy, providing statistics at the national, state and local levels
- Provides information on industry revenues and other measures of American business performance that are consistent, comparable, and comprehensive across industries and geographic areas
Economic Census Data Users

- The Bureau of Economic Analysis (BEA) uses the data for gross domestic product (GDP), personal consumption expenditures (PCE), and national income and product accounts (NIPA)
- Centers for Medicare and Medicaid Services (CMS) uses Economic Census data as input into geographic health care spending by state
- The Federal Reserve Board (FRB) uses Economic Census data as a benchmark for industrial production (IP) and industry capacity numbers
- The Bureau of Labor Statistics (BLS) uses Economic Census data as input into the producer price index (PPI)
- Used by trade associations, economic development agencies, governments and individual businesses for business decisions and policymaking
# Economic Census Coverage

## Scope

Core coverage of 18 industrial sectors (951 North American Industry Classification System (NAICS) Industries):

## Data Collected

- 7,900 goods and services products on the new North American Product Classification System (NAPCS) basis
- Business location
- Statistics on key economic data items, such as number of establishments, payroll, employment and sales/revenue/shipments
- Additional topics such as number of locations, inputs and outputs, capital expenditures, inventories, and intellectual capital

### By geographic area:

- Nearly 21,000 geographic areas: U.S., States, Metro areas, Counties, Places, and U.S. Territories
- 15,000+ Cities and towns, and 41,000+ ZIP Code areas

### By Island area:

- Puerto Rico
- Commonwealth of the Northern Mariana Islands
- American Samoa
- Guam
- U.S. Virgin Islands
There are 32.1 million business establishments in the United States.

Only 7.8 million of these establishments have employees.

Only 4 million receive the Economic Census.
(Select multi-location company data is reported through alternative reporting units. Admin Records are used for the rest)

891,000 establishments, from the nation's largest companies, are covered by Census Bureau Account Managers.

Program Changes for 2017

- All Electronic Collection
  - New Electronic Instrument
    - Online reporting for all companies
    - 800+ questionnaire paths tailored for NAICS industry-specific data collection
  - Paper option available for U.S. territories
- Implementing New Content
  - North American Product Classification System (NAPCS) economy-wide
  - Industry-specific content
- Economy-wide data releases
Mailings

- Data Collection for the Economic Census is conducted in two parts:
  - Classification Mailing
    - Mailed February 1, 2018. Due date was March 15, 2018.
    - Requests primary business activity information from 390 thousand selected single-location businesses.
  - Main Econ Census Mailing
    - Mails in early May 2018. Due date was June 12, 2018.
    - Requests full set of economic data for almost 3.7 million U.S. business locations, including the U.S. Territories.
Data Collection

- Respondent Support
  - Account Managers
  - Respondent Advocate
  - New Respondent Portal
- How-To Videos
  
  https://www.census.gov/programs-surveys/economic-census/technical-documentation/how-to-videos.html
U.S. Territories Data Collection

- Outreach activities, including response promotion, were conducted with local governments of U.S. territories
  - Contacts were established for each Island
  - Introductory letters sent to Governors
  - Meetings set up with local Chambers of Commerce and news media during visits
- Traveled to American Samoa, Commonwealth of the Northern Mariana Islands, and Guam in early April – provided support on incoming calls and nonresponse follow-up
- Traveled to Puerto Rico and St. Thomas (USVI) in early August – discussed hurricane impacts on potential response for both territories; St. Thomas to provide nonresponse support
- Paper forms were mailed to small companies, with Spanish paper forms available for Puerto Rico small companies
Outreach Activities

- Consistent look and feel
- Promotional campaign
- Intermediary meetings/activities
- Conferences
- Congressional outreach
- Social media
- Webinars
When it was time for James to open his second restaurant, he used U.S. Census Bureau economic statistics to help pick the location – free and available online.

With industry trends and zip code level data, he identified a downtown spot with high potential for growth.

Where did these statistics come from?

They came from James’ first restaurant and all the other companies who responded to Census Bureau surveys. Together, their data fueled the local, state, and national statistics used for planning and decision making.
“It All Adds Up”

DATA FROM THE NATION’S BUSINESSES + STATS ON EVERY INDUSTRY AND GEOGRAPHY = ONE VALUABLE RESOURCE FOR YOUR BUSINESS

THE ECONOMIC CENSUS.
SEE HOW IT ALL ADDS UP.

Every five years, the Economic Census measures U.S. businesses to provide comprehensive statistics on every industry and geography. By completing the survey, you’re contributing to a wealth of valuable data—and sometimes surprising insights—that can help you grow your business.

Status Update – Collection

- Iterative implementation of contact strategy research through the use of annual survey programs has provided invaluable information to improve our follow-up methodology.
- Testing has enabled data-driven decisions, leading to a comprehensive, integrated, cost-effective contact strategy to maximize response for the 2017 Economic Census.

Contact Strategy – 2017 Economic Census

MUs and Priority SUs (Includes DDR & OGC):

All Other SUs:

1st Standard Mail Follow-up
07/06 – 07/16/18

2nd Standard Mail Follow-up
08/20 – 08/27/18

Split Certified/Standard Mail Follow-up
10/16 – 10/22/18

Last Contact + 1 month

Targeted Telephone Follow-up
11/05/18 – 01/18/19

Processing/Business Register Closeout
02/22/19
Current Check-in Rates

- Economic Census Check-in Rates (excluding Island Areas):
  - Main Mailing
    - Total = Slightly behind compared to 2012 response rates (days past mailout)
      - Multi units = even
      - Single units = behind
      - Island areas = ahead
  - Classification Mailing
    - Total = significantly behind
Status Update – Collection

- Incoming Phone Operations
  - Total Calls – a large number of incoming calls to the Call Centers since May 1; more than 25% handled by Interactive Voice Response (IVR)
- Account Managers for largest companies
  - Analysts to continue making contact with these companies until report forms are returned
## 2017 Data Product Release Schedule

Questions for the Committee

- We have attempted to promote response through various methods, including intermediaries (i.e., trade associations, chambers of commerce) and promotion materials. Are there other methods that could be implemented to increase overall response?
- Based on your experience/expertise, is the removal of a paper instrument a deterrent to response, especially for smaller reporting units (single location businesses)?
- Looking toward the 2022 Economic Census, we want to reduce respondent burden while providing the data of greatest need to stakeholders. How can we best reach our stakeholders (Federal government, private industry, academia/researchers, public, etc.), in a cost-effective manner, to identify which current data collected/disseminated meets the highest level of need for stakeholders?
