NOTE 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

NOTE 2.—The temporary loan per act of July 11, 1862, is included in the 4 per cents. from 1862 to 1868, inclusive, with the exception of the amount outstanding for August 31, 1865, the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., redeemable on ten days' notice after thirty days, but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.

a Prior to the year 1864 the tonnage of British Columbia is combined with that of the British Possessions on the Atlantic; subsequent to that period they are shown in a separate column.

b A small portion of the tonnage from the United Kingdom during these years entered at lake ports, and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

c No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

a This statement is the result of original estimates, made by Mr. J. R. Dodge, from annual returns to the Department of Agriculture, of the comparative condition and area of the crop and price of product; and as to quantity of production, mainly from the official records of manufacture and exportation. It has been demonstrated that returns of production of tobacco, which bears a heavy tax, are uniformly underestimates, whether census returns or those of the Department of Agriculture; a fact in accord with the experience of all governments with respect to voluntary statistical returns of taxed products. The prices are the average home or farm value of leaf-tobacco.

a The statistics for 1869 are derived from the United States Census. The statistics for 1876, 1877, 1878, 1879, 1880, and 1881 are compiled from data collected and estimates made by Mr. Frederick E. Saward, editor of the Coal Trade Journal of New York.

b This is inclusive of 3,000,000 tons estimated by Mr. Saward, as the local consumption in and around the mines. It is also stated by Mr. Saward that there has been no material increase in this local consumption since the year 1876, in consequence of economies introduced by the use of coaldust, &c.
