NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

[a] The price on board fixed at Baltimore by the Seaboard Coal Association.
[b] Price of soft-coal pool.
[c] Owing to unusual conditions in the coal market the association price for 1902 is not a correct guide as to the actual selling price, Clearfield coal selling as high as $7 at the mines and as high as $9 in New York Harbor. Unsettled conditions lasted until the 1st of March, 1903, or nearly so; then, on April 1, prices were made $3.30 at Baltimore; later on in the year this price was discounted from 10 to 15 per cent.
[d] Shipments nominal.
[e] Cumberland coal now includes "thin seam" as well as "big vein" coal, the former selling about 25 cents per ton lower than the latter.

No. 229.—RELATIVE WHOLESALE PRICES OF RAW AND OF MANUFACTURED COMMODITIES, 1890 TO 1907, AND PER CENT OF INCREASE IN PRICES FOR 1907 OVER PRICES FOR EACH PRECEDING YEAR.

[From reports of the Bureau of Labor, Department of Commerce and Labor. This table summarizes wholesale prices of 258 staple commodities. The commodities designated as "Raw" are such as are marketed in their natural state and also such as have been subjected to only a preliminary manufacturing process; this group includes 50 articles. The commodities designated as "Manufactured" are such as have been subjected to more than a preliminary factory manipulation and in which the manufacturing labor cost constitutes an important element in the price; this group includes 208 articles. A relative price, or index number, as it is technically called, of any article is the per cent which the price of that article at any date is of the price of the same article at a date or period which has been selected as the base or standard. The base selected by the Bureau of Labor for this compilation is the average price for the ten-year period 1890 to 1899. The relative prices shown under each group are simple averages of the relatives of all articles included within the group. Average price for 1890–1899=100.]

No. 231.—RELATIVE RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD: 1890 TO 1907.

[From reports of the Bureau of Labor, Department of Commerce and Labor. The total number of statements of prices collected by the Bureau of Labor in 1906 was 6,176 from 993 retail merchants. The number has varied somewhat from year to year. The 993 merchants are located in 69 cities, which are principal industrial centers of 39 States. For each of the 30 articles the prevailing price each month was secured. As previously explained under the title of wholesale prices, the relative price of any article is the per cent which the price of that article at any date is of the price of the same article at a date or period which has been selected as the base or standard. The base selected by the Bureau of Labor for retail as well as for wholesale prices is the average price for the ten-year period 1890 to 1899. Average price for 1890-1899=100.]

This table summarizes for each of the 5 geographical divisions and for the United States the relative retail prices of food for each year from 1890 to 1907. In the first column under each division is shown the simple average of the relative prices of the 30 articles. In the second column under each division is shown the relative prices computed by giving to the relative price of each article its proper weight as determined by the average consumption in 2,567 families of workingmen investigated by the Bureau of Labor in 1901. Average price for 1890-1899=100.]

[a] The production statistics relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898. Census figures have, however, been used when available, including those for 1899 to date.

[b] The value of lint per pound shown since 1902 relates to the average grade of upland cotton marketed prior to April 1 of the following year; from 1890 to 1901, the average price of middling cotton on the New Orleans Cotton Exchange; and from 1858 to 1889, as published in reports of the United States Department of Agriculture.

[c] Compiled from publications of the United States Department of Agriculture for 1858 to 1894; from the reports of Latham, Alexander & Co., for 1895 to 1903. Census figures have been taken when available. Discrepancies in the figures for census years as compared with those of the table entitled "Statistical Record of the Progress of the United States" are caused mainly by difference of method in the making up of the respective tables.

[d] Compiled from "Commerce and Navigation of the United States," 1858 to date. The export year begins July 1, 1858 to 1866, and September 1 for 1867 to date. The period for consumption, exports, and imports is designated by the year in which the record begins rather than that in which it ends.

[e] Equivalent bales of 400 pounds.

[f] Excess of foreign exports over total imports.

[a] The cost of collecting the internal revenue embraces the following items: Salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, and expenses of detecting and punishing violations of internal-revenue laws.

[b] The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include expenditures for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor expenditures for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the expenditures for salaries, etc., incident to auditing these accounts in the Departments at Washington.

[a] The law provides for a tax on wine made in imitation of champagne, etc., but no internal revenue was derived from the same during the fiscal years 1888–1898. The amounts thus received in some of the subsequent years are so small as to be negligible in the following table, except in 1905, when they amounted to nearly $700.

[b] From 1884 to 1890, inclusive, year ended April 30.

[c] Fourteen months ended June 30.
