[4] Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

[5] 1821; no complete data for 1820 or earlier years.

[1] The statistics since 1913 represent the commerce of the districts named in the boxhead, as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914 the statistics given in this table for Massachusetts and Maryland were returned as for the (former) districts of Boston and Baltimore, respectively.

[1] The figures are those of the Bureau of the Census and cover census years which, as regards manufactures, are calendar years preceding those in which the censuses were taken. For explanation of cases of disagreement with other tables of manufactures in this volume, due to variation in branches of industry covered, see census reports.

[2] Includes custom work and repairing.

[3] The figures are for calendar years.

[6] Exclusive of fast freight line service.
[7] Overvalued by reason of depreciation of Brazilian paper milreis.
[8] Information for 1901 and 1902 relative to commerce between continental United States and noncontiguous customs districts in coffee and tea is somewhat fragmentary.
[9] Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.
[10] Figures for railroads exclude switching and terminal companies not segregated prior to 1908; also, 1913 to date, except for "miles in operation," the mileage of so-called small roads having operating revenues below $100,000 for the year.

[1] Includes gold, silver, and other coin.
[2] "Specie" includes subsidiary coin in banks.
[3] Estimates for the United Kingdom prior to 1910 were for coin only; these figures include $100,000,000 for bullion in banks.
[4] Based on estimate of active rupee circulation by Accountant General of India in 1908.
[5] Includes Straits Settlements, Malay States, and Johore.
[6] Based upon a calculation by Messrs. P. Arminjon and B. Michel in 1908, who then estimated the stock of gold at 33,000,000 to 41,000,000 Egyptian pounds. The mean of these figures was adopted. Since then the net imports of Egypt, by customs records, have been $50,000,000, but the 1908 estimate has been changed only to the extent of the increase in bank holdings. It does not seem probable that Egypt can have absorbed the amount of gold indicated by the customs records.
[7] Estimate of A. De Foville, 1909. Silver for 1912 repeated for 1913.
[8] The figures for the stock of gold in Germany are based upon an estimate by Dr. Arnold, a director of the Reichsbank, of 3,000,000,000 marks in German coin in the country at the end of 1910. At the close of 1913 the Reichsbank held $114,873,080 in bullion and foreign coin.

NOTE.—The blank spaces in this table signify that no satisfactory information is available. The data shown above have been gathered from various reliable sources. However, it is not complete or satisfactory, but is the best obtainable at this time. In some instances the amount of gold in banks and public treasuries is carried out as the total stock in one country, although an unknown amount is in circulation. The case of Italy is an example of this. The per capita circulation is based upon known amounts only. All estimates for stock of money in circulation must be accepted with reserve.
