[1] See also prior table of "Merchandise imported into and exported from the United States and excess of imports or exports, by countries."

[2] The marked discrepancy between the United States figures of exports to the Philippine Islands prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

[1] Years specified in the stub represent commercial years instead of years of growth. This explains the apparent difference between this table and reports of the Bureau of the Census.

[2] Covering as nearly as possible the crop grown during the preceding calendar year and picked mainly during the cotton year specified in the stub.

[3] 1863–1910, market prices; subsequently, growers' prices.

[4] Statistics cover 14 months.

[5] Excess of foreign exports over total imports.

[6] Equivalent 400-pound bales.

[7] Statistics for August, 1914, are included in both 1914 and 1915.

No. 321.—DISTILLED SPIRITS, WINES, AND MALT LIQUORS: QUANTITIES CONSUMED AND AVERAGE ANNUAL CONSUMPTION PER CAPITA IN THE UNITED STATES, 1850 TO 1918.[1]

[Source: The production of domestic wines has been estimated by the Department of Agriculture, by Mr. J. W. Schopp, of Bonfortis Wine and Spirit Circular (Inc.), New York, and other well-informed persons. The production of domestic spirituous and malt liquors has been derived from the reports of the Commissioner of Internal Revenue. The table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, nor since 1906 withdrawals for denaturation, free of tax. For 1918 these amounts were 6,005,858 tax gallons and 90,644,723 proof gallons, respectively.]

[1] With respect to units of quantity, see explanatory notes, p. XV.
[2] Since 1885 includes domestics spirits exported and returned.
[3] Data relate to the United States as a whole, except that figures of production of noncontiguous territory are incomplete.
[4] Product less domestic exports.
[5] Included with "All other."
[6] Owing to changes in the internal-revenue laws, spirits distilled from fruits can not be separately stated in 1918.
[7] Figures of production for states outside of California and New Jersey in 1918 have been estimated.

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

[1] The price on board fixed at Baltimore by the Seaboard Coal Association.

[2] Price of soft-coal pool.

[3] Owing to unusual conditions in the coal market the association price for 1902 is not a correct guide as to the actual selling price, Clearfield coal selling as high as $7 at the mines and as high as $9 in New York Harbor. Unsettled conditions lasted until Mar. 1, 1903, or nearly so; then, on Apr. 1, prices were made $3.30 at Baltimore; later on in the year this price was discounted from 10 to 15 per cent.

[4] Shipments nominal. No sales made after 1908.

[5] Cumberland coal now includes "thin seam" as well as "big vein" coal, the former selling about 25 cents per ton lower than the latter.

[6] Freight on "big vein" coal to Baltimore having been reduced 15 cents, $2.60 in 1909 and subsequent years is equivalent to $2.75 in 1908 and previous years.

[7] Nominal; includes State tax of 10 cents per ton in 1913.

[8] During the latter months of 1916 there was a marked increase in the price of "spot" or free coal as compared with that of contract coal. It would probably not be far out of the way to say that during the last quarter of the year the former sold for twice the price of the latter.

[9] From Jan. 1 to July 1 no Government regulations were in effect and the average price was $4.50 per ton at the mines. From Jan. 1 to some time in April the freight rate from the mines to Baltimore was $1.23 per ton; the rate was then advanced to $1.28 per ton. From July 1 to Aug. 21 the price was $3 per net ton at the mines under voluntary agreement of the operators, and from Aug. 21 to November the fixed maximum price was $2 at the mines; the price at the close of the year was $2.45 at the mines, the maximum price established by the President under the Lever Act.

[10] From Jan. 1 to Feb. 1, 1918, the price of Cumberland coal was $2.45 per net ton at the mines. On Feb. 1 the price was increased to $2.85 per ton. On May 25 it was reduced to $2.75, at the time when all bituminous coals were cut 10 per cent, and that price remained in effect for the remainder of the year.

[1] This table has been revised and shows slight changes from previous figures in some of the items.

[2] $12,445,564 in gold coin and $62,365,800 in gold certificates were held by Federal Reserve banks and Federal Reserve agents against Federal Reserve notes, July 1, 1915, $8,963,000 in gold coin and $151,577,000 in gold certificates were so held on July 1, 1916, and $3,100,000 in gold coin and $372,878,550 in gold certificates (in which latter amount is included $180,780,000 Federal Reserve gold settlement fund deposited with Treasurer of the United States) on July 1, 1917.

[3] For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government. Gold coin became available for circulation Jan. 1, 1879, as a result of the resumption act of Jan. 14, 1875. Silver certificates were authorized by acts of Feb. 28, 1878, and Aug. 4, 1886.

[4] Subsidiary silver, which disappeared from circulation in 1862, was reintroduced under operation of the act of Jan. 14, 1875.

[5] As the result of special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years.

[6] The Director of the Mint made a revised estimate of the stock of subsidiary silver coin Sept. 1, 1910; as a consequence of such revision there was a reduction of $9,700,000.

[7] Includes $345,515,000 Federal Reserve gold settlement fund deposited with Treasurer of the United States.

[1] Commodity rates were established during September and October, 1915, and merged with those for commercial paper of corresponding maturities in November and December, 1917.
[2] Commodity paper rates for bills maturing within 30 days, 3½ per cent; 31 to 60 days, 4 per cent; 61 to 90 days, 4½ per cent.
[3] Oct. 20, 1917, rate of 3½ per cent for commodity paper maturing within 60 days, and 4 per cent for paper maturing after 60 days but within 90 days.

NOTE: Whenever during 1918 the 60-day trade acceptance rate was higher than the 15-day discount rate, trade acceptances maturing within 15 days were taken at the lower rate.

[1] The acts of Apr. 24 and Sept. 24, 1917, appropriated $3,000,000,000 and $4,000,000,000, respectively, for the establishment and extension of credits to foreign Governments engaged in war with the enemies of the United States.

[2] Of the credits and loans in favor of the Russian Government, $5,000,000 represents a loan to the Roumanian Government, the advance being made in this manner through the Russian Government in the absence of a Roumanian representative in the United States who could negotiate a direct loan to his Government.
