11. Income and Expenditures

(Sent to print March 19, 1952)

The income statistics in this section are of two fundamental types: First, those which provide data on aggregate amounts (national income and national product data) and second, those which provide data on the distribution of families or persons by size of their income (size distribution data). Statistics representing the former type are compiled primarily by the Office of Business Economics of the Department of Commerce and are based on a wide variety of data from government and private sources. Statistics representing the latter type of income data are derived from sample surveys of income conducted by several different agencies. Since these surveys were taken at different times and for different purposes, they differ somewhat in the definitions of income and the income-receiving unit. In addition to the income data, expenditures and savings of families and single persons have been included in this section.

Nation's economic budget.—The Nation's Economic Budget is designed to give a synoptic picture of the economy. (See table 301.) It shows the magnitudes of income and expenditure of major economic groups, net additions and absorption of saving by these groups, and the gross national product or income. Statistics are based on the "National income and product" accounts of the Department of Commerce, except that the Federal Government account is based mainly on "Cash receipts from the public" and "Cash payments to the public" as computed by the Bureau of the Budget and State-local cash receipts and payments are rearranged to approximate a cash basis.

Business receipts retained include corporate retained earnings plus inventory valuation adjustment and capital consumption allowances of all business. Government cash loans to the "rest of the world" are considered as a transfer payment and have been entered as a receipt in the international account. However, unilateral transfers or grants to foreign countries are included as a direct expenditure for goods and services of either consumers or government and are netted out of the international account.

The adjustments for receipts relating to gross national product include the statistical discrepancy and the operating surplus of Government enterprises less subsidies. Other adjustments arise from the fact that the basis of accounting for the income and product series differs from that used in Government cash receipts and payments, particularly in the timing of receipts or payments, and that the cash concept of Government operations is somewhat more inclusive than that incorporated in the income and product series.

A fuller explanation of the Nation's Economic Budget may be found in the Annual Review of the Council of Economic Advisors, included in the *Economic Report of the President to Congress.*

Aggregate income.—The aggregate income statistics presented here are of three general types: Gross national product or expenditure, national income (by distributive shares and by industrial origin), and income payments to individuals by States.

Gross national product is the market value of the output of goods and services produced by the Nation's economy, before deduction of depreciation charges and other allowances for business and institutional consumption of durable capital goods.

Other business products used up by business in the accounting period are excluded. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Gross national product comprises the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment. Gross national product differs from national income mainly in that no allowance is made for depreciation or for indirect business taxes, both of which items constitute expenses in the computation of business net incomes.

National income is the aggregate earnings of labor and property which arise from the current production of goods and services by the Nation's economy. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are recorded in the forms in which they accrue to residents of the Nation, inclusive of taxes on those earnings.

National income originating by industry is the sum of factor costs incurred by the industry in production. Hence, it is the net value added to production by the industry, measured at factor costs.

Personal income is the current income received by persons from all sources, inclusive of transfers from government and business but exclusive of transfers among persons.

Income payments to individuals is a measure of income received from all sources during the calendar year by residents of each State. It comprises income received by individuals in form of (1) wages and salaries, after deduction of employees' contributions to social security, railroad retirement, railroad unemployment insurance, and government retirement programs; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, consisting of dividends, interest, and net rents and royalties; and (4) "other" income, which includes public assistance and other direct relief; labor income items such as work relief, government retirement payments, veterans' pensions and benefits, workmen's compensation, and social insurance benefits; mustering-out payments to discharged servicemen; family-allowance payments and voluntary allotments of pay to dependents of military personnel; enlisted men's cash terminal leave payments; and State government bonuses to veterans of World War II. For discussion of distribution by State, see headnote, table 309.

Size distribution of income.—The statistics on the size distribution of income are based on data collected in various field surveys of income which have been conducted since 1939. The primary purpose of these field surveys was to show the distribution of families or persons by income levels rather than the aggregate amounts of income received by these families. Whereas the aggregate income data provide an indication of the level of total purchasing power, the field survey size distribution data, by showing the numbers and kinds of families and persons in each income bracket, provide an indication of the distribution of purchasing power in the population. In each of these field surveys trained enumerators interviewed representative samples of the civilian noninstitutional population with respect to the income received by the respondents or their families during the previous year.

The income represented in these tables is consumer money income, defined as the sum of civilian money wages and salaries; net farm entrepreneurial income; net nonfarm entrepreneurial income from business or profession; interest, dividends, and periodic income from estates and trusts; rents and royalties; armed forces pay of persons living in private households at the time of the survey; dependency allotments and contributions from members of the armed forces; veterans payments; social security payments, unemployment and workmen's compensation, pensions and assistance; and miscellaneous items such as periodic contributions for support from persons not

in the household, periodic payments from insurance policies or annuities, and alimony. The income is for the calendar year and is before deduction of income taxes (except for 1944 Bureau of Labor Statistics data in table 315) or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is comparable with consumer money income. The nearest approximation is personal income.

Expenditures and savings.—The Bureau of Labor Statistics most recent survey of family income, expenditures, and savings on a Nation-wide basis for which tabulations are available is for the year 1944. The Survey of Prices Paid by Consumers in 1944 was based on a sample of 1,700 families and single persons in 28 metropolitan districts and 20 cities with populations under 50,000 outside of metropolitan districts. These places were selected to represent (with respect to region, State and city size) all cities in the United States with a population of 2,500 or more.

For this study a family is defined as a group of persons dependent on a common or pooled income for the major items of expense and usually living in the same household. A single person is one who lives alone or with unrelated people in a private home, lodging house, or hotel. From 1945 through 1949, the Bureau has made similar surveys of family expenditure in selected cities each year to obtain data necessary to check the prices and weighting patterns used in the consumers' price index; 1945 expenditure data were obtained for Birmingham, Ala.; Indianapolis, Ind.; and Portland, Oreg. (see *Monthly Labor Review*, June 1948); 1946 data for Milwaukee, Wis.; Scranton, Pa., and Savannah, Ga. (available upon request to the Bureau of Labor Statistics); 1947 data for Washington, D. C.; Manchester, N. H.; and Richmond, Va. (see *Monthly Labor Review*, April, June-August, and October 1949); 1948 data for Denver, Colo.; Detroit, Mich.; and Houston, Tex. (see *Monthly Labor Review*, December 1949); and 1949 data for Memphis, Tenn. (see *Monthly Labor Review*, June 1951).

A Nation-wide Consumer Expenditure Survey was made for 1950 by the Bureau of Labor Statistics in 91 cities yielding 12,500 usable schedules from families and single consumers. Data from this survey were not available for inclusion here at the time this section was sent to the printer. For field methods and purposes, see *Monthly Labor Review*, January 1951. For selection of cities for the survey, see *Monthly Labor Review*, April 1951.

1950 Census data.—As a part of the 1950 Census of Population, the Bureau of the Census collected data on the distribution of income from a sample of the population. Figures in this section from the 1950 Census (see table 316) are those available at the time this section was sent to the printer and are preliminary sample data based on a sample of 150,000 persons for the nation as a whole.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series A 117–133") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*.

No. 308.—National Income by Industrial Origin: 1929 to 1950

[**In millions of dollars.** National income (for definition, see text, p. 250) originating in each industry is the sum of factor costs incurred by the industry in production. Hence, it is net value added to production by industry, measured at factor costs]

INDUSTRIAL DIVISION	1929	1933	1939	1945	1946	1947	1948	1949 [1]	1950 [1]

No. 309.—Income Payments to Individuals, by States: 1929 to 1950

["Income payments to individuals" is a measure of income received from all sources during the calendar year by the residents of each State. For six States and the District of Columbia, however, totals shown below are not strictly measures of income received by residents. Totals for District of Columbia, New York, and Maine are too high—and those for Maryland, Virginia, New Jersey, and New Hampshire too low—in terms of measures of total income received by residents. Estimates shown here for D. C. include income paid out to residents of Maryland and Virginia employed in D. C., but exclude income of D. C. residents employed in these 2 States. Estimates for New York include income paid to residents of New Jersey employed in New York, but do not include income of New York residents employed in New Jersey. Similarly, estimates for Maine include income paid to residents of New Hampshire employed in Maine. In computation of per capita income for these 7 States, income totals shown here were first adjusted to a residence basis before division by population. Following are amounts (in millions) of adjustments for 1950: District of Columbia, −488; Maryland, +249; Virginia, +239; New York, −480; New Jersey, +480; Maine, −15; New Hampshire, +15. For definition of income payments to individuals, see text, p. 250]

No. 310.—Percent Distribution of Family Liquid Assets and Saving, by Income Groups: 1950

[National estimate based on sample interview survey of 3,029 families, defined as all (one or more) persons living in same household and related by blood, marriage, or adoption. Universe covered is population of U. S. residing in private households during interview period, which was January through March 1951. Following groups are excluded: (1) Members of armed forces living at military reservations; (2) residents of hospitals and in religious, educational, and penal institutions; and (3) floating population, that is, people living in hotels, large boarding houses, and tourist camps. For liquid asset holdings of individuals and businesses, see table 464, p. 407]

ANNUAL 1950 MONEY INCOME BEFORE TAXES	Liquid assets [1]	Positive saving [2]	Negative saving [2]	Net saving [2]
All income groups	100	100	100	100
Under $1,000	5	1	19	−14
$1,000–$1,999	7	3	10	−2
$2,000–$2,999	11	7	18	−2
$3,000–$3,999	10	11	16	7
$4,000–$4,999	9	11	10	11
$5,000–$7,499	25	24	19	28
$7,500 and over	33	43	8	72

[1] Liquid assets include all U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions held at time of survey in early 1951. Currency is excluded.

[2] Positive saving comprises the saving of all family units with money incomes in excess of expenditures, negative saving comprises the dissaving of all family units with expenditures in excess of money incomes, and net saving (plus or minus) is positive saving less negative saving for all family units combined. The survey does not undertake to measure directly consumer expenditures and taxes but measures the saving of each family by obtaining detailed information on the changes in the various asset and liability items that make up each unit's balance sheet of saving. The saving of each unit during the year is computed by subtracting algebraically the total change in its liabilities (plus or minus) from the total change in its assets (plus or minus). Positive saving results from a larger increase in assets than in liabilities or a larger decrease in liabilities than in assets. The reverse is true for negative saving. The more important asset and liability items for which information is obtained are changes in liquid asset holdings, changes in consumer indebtedness, net sales or purchases of stocks and bonds, payments of life insurance premiums, payments to retirement funds, net sales and purchases of houses, payments on house mortgages, house improvements, and investment or withdrawal of investment in unincorporated businesses. Capital gains or losses are excluded from saving.

No. 312.—Percent Distribution of Spending Units Having Specified Characteristics, by Amount of Net Worth, Early 1950

[Net worth is defined as difference between total selected assets and total debt reported in interviews during January–March 1950. Selected assets include liquid assets (U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions), owner-occupied homes and farms, other real estate, farm machinery, crops and livestock, automobiles, interests in unincorporated nonfarm businesses and privately held corporations, and common and preferred stock in corporations open to investment by the general public. Liabilities include all forms of debt other than charge accounts. For method of computing net worth, see *Federal Reserve Bulletin*, December 1950, pp. 1610–1611. Net worth figures should be considered as minimum estimates because of omission of assets such as currency, corporate bonds, reserve value of life insurance policies, consumer durable goods other than automobiles, jewelry, etc., and because of under-reporting of assets covered]

Characteristic of spending unit	All cases		Amount of net worth					
	Number	Percent	Negative	$1–$999	$1,000–$4,999	$5,000–$24,999	$25,000 and over	Not ascertained

No. 314.—Income Shares of Upper and Lower Groups of Total Population: 1919 to 1948

[Data are based on comparisons between Federal tax data and countrywide totals of income receipts by individuals. Individuals' incomes underlying the basic and economic income variants are defined as receipts for the participation of individuals or of their property in the production process; include employee compensation and other payments to labor, entrepreneurial income, rent, interest, dividends; exclude capital gains and other transfers and do not allow deductions except of business expenses. The basic variant is a first approximation to shares in income thus defined. The economic income variant represents an adjustment of the basic variant to take account of some items omitted from the tax data (compensation of nonfederal government employees and imputed rent on owner-occupied houses), to allow for a finer division of tax returns by distinguishing between head of family and nonhead returns, and to allow for the effect of classifying returns by net income, as defined for tax purposes, instead of by economic income. The disposable income variant measures shares in individuals' incomes after deducting Federal income taxes and including gains and losses from sales of assets. See also *Historical Statistics*, series A 195-197]

Year	Percentage of individuals' incomes received by—								
	Top 1 percent	2d to 5th percentage band	Lower 95 percent	Top 1 percent			Top 5 percent

[1] Family size based on equivalent persons, with 52 weeks of family membership considered equivalent to 1 person; 26 weeks equivalent to 0.5 person, etc.

[2] Earner defined as a family member that worked for pay (as wage or salary worker or on his own account) at any time during year.

[3] Personal taxes (income, poll and personal property) have been deducted from money income. Total money income may be obtained by combining amounts shown for both items. Inheritances and large gifts are not considered current income; inheritances and gift taxes excluded from personal taxes.

[4] Includes expenditures for alcoholic beverages.

[5] Includes rents for tenant-occupied dwellings and for lodging away from home and current operation expenses of home owners. Excludes principal payments on mortgages on owned homes.

[6] Value of bonds purchased less those cashed.

[7] Represents differences between income and expenditures plus net war bond purchases and insurance premium payments. Includes amounts deducted for social security, retirement plans, etc., not available separately.

No. 317.—Distribution of Families and Unrelated Individuals in Households, by Total Money Income, Urban and Rural: 1947 to 1950

[Based on samples of population residing in households only. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Family" not used here with same meaning as in 1940 census. It refers to a group of two or more related persons residing in same household. "Unrelated individual" is used to refer to a person living alone or with persons not related to him. See source for evaluation of sampling reliability. For explanation of urban and rural areas, see p. 2]

No. 319.—Percent Distribution of Primary Families and Unrelated Individuals With Wage or Salary Income, by Wage or Salary Income and Receipt of Nonwage Income, Urban and Rural: 1939 to 1950

[Based on samples of population residing in households only; see source for evaluation of sampling variability. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Primary family" refers to head of household and all persons related to him. A "primary individual" refers to household head who has no relatives living with him. These terms were not used in 1940 Census. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, Armed Forces pay, etc., as well as receipts commonly referred to as wages or salaries. It excludes value of income in kind, such as living quarters, meals, clothing, etc. A primary family was considered to have other income if any person 14 years of age and over in family had $50 or more of income from sources other than money wages or salaries. For explanation of urban and rural areas, see p. 2]

No. 324.—Median Wage or Salary Income of Persons 14 Years of Age and Over with Wage or Salary Income, by Color and Major Industry Group, by Sex: 1939 and 1950

[Data based on sample (see source for evaluation of sampling reliability), and restricted to persons who were wage or salary workers at time of survey. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, armed forces pay, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. Median wage or salary income based on number of persons reporting $1 or more of wage or salary income. For definition of median, see headnote, table 23, p.28]

12. Prices

(Sent to print March 19, 1952)

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 28 commodities; indexes of food prices at retail in 56 large cities; and indexes of consumers' prices for moderate-income families in 34 large cities.

Wholesale price index.—Since 1902, the official monthly wholesale price index has been prepared as an indicator of general price trends and average changes in commodity prices at primary market levels. The official series on the base, 1926=100, has been carried back to 1890; separate monthly indexes are available for major groups of commodities from January 1890, and for subgroups of commodities beginning with 1913. This index, based on 1926=100, is the official index for December 1951 and all earlier dates.

A newly-revised index, based on 1947–49=100, is now the official index for January 1952 and all subsequent months. The new index has been computed back to 1947 for purposes of comparison only (see table 327). Weights used represent all sales at the primary market level during the calendar year 1947. Moreover, the new index has expanded the number of commodities covered to 2,000 instead of the 900 measured by the earlier index. For a detailed description of the new index, see the *Monthly Labor Review*, February 1952.

The index (1926=100) measures average changes in commodity prices of about 900 commodities at the primary market level—usually the level at which the commodity is first sold commercially in substantial volume. The prices are ordinarily those charged by representative manufacturers or producers to the types of distributors or industrial consumers who are characteristic buyers of the product. Wherever feasible the prices are f. o. b. point of production or sale. In the case of some commodities, prices quoted in organized commodity markets are used.

The index (1926=100) measures completely the price changes of only the 900 commodities (and others that are closely related) which are specifically defined for pricing both physically and in terms of market structure. It is not an over-all measure of the "general price level" or of "the purchasing power of the dollar"—it does not include all classes of commodities (real estate, securities, services, etc.) which are factors in the "general price level."

Commodities are priced in terms of a given specification at stated terms of trade. Most of the commodities are represented by a single quotation. Since 1934, in computing the index the price of each article is weighted by the quantities marketed during the years 1929–1931, except for agricultural commodities. For agricultural commodities, average market sales in the years 1929, 1930, and 1931 are used. Indexes are computed for 10 major commodity groups, 49 subgroups and 5 economic groups.

Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one group are included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, are included among both farm products and foods. Duplication also occurs between the metals and metal products and building materials groups. However, in computing the index for all commodities, such articles are counted only once.

Consumers' price index.—This index measures average changes in retail prices of goods, rents and services, purchased by wage-earners and lower-salaried clerical workers in large cities. The weights used in calculating the index are based on studies of actual expenditures by families of wage-earners and lower-salaried workers. A study

conducted in 1917–19 provided the weights used from 1913 to 1935. From 1935 to January 1950, time-to-time changes in retail prices were weighted by 1934–36 average expenditures of urban families whose annual incomes averaged $1,524 in 1934–36. Weights used beginning January 1950 have been adjusted to 1949–50 spending patterns.

The index does not measure changes in the total amount families spend for living or relative differences in prices or living costs between cities. The list of items priced for the index includes approximately 225 goods and services. For many goods a number of different articles or qualities of articles are included in the index. Sales taxes are reflected wherever applicable, but income taxes, social security deductions, and bond deductions are not included. Since March 1943, food indexes have been based upon changes in food prices in 56 cities. From September 1940 through June 1947, comsumers' price indexes were computed monthly for 21 cities, and in March, June, September, and December for 13 additional cities; beginning July 1947, indexes have been computed monthly for 10 cities, and once every 3 months for 24 additional cities according to a staggered schedule. Since July 1947, the following schedule has been in effect:

Food prices and indexes, for 56 cities each month;

Fuel prices and indexes for 34 cities each month;

Commodities (other than food and fuel) and services indexes for 10 cities monthly and for 24 additional cities quarterly on a rotating cycle;

Rents quarterly for 34 cities, on a rotating cycle;

All items and group indexes for 10 cities monthly, and for 24 additional cities quarterly on a rotating cycle;

National indexes (average of large cities) for all items and groups, monthly, based upon prices in the cities surveyed and estimated changes in the unpriced cities.

The **retail food price indexes** presented in this section are one component of the consumers' price index. For periods from January 1935 to March 1943 they are based on the distribution of expenditures as shown by the 1934–36 study of expenditures of wage-earners' and lower-salaried clerical workers' families. In March 1943, the weights for this index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. In January 1950, the weights were adjusted to estimated 1949–50 spending patterns. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, 50 foods from June 1947 to January 1950, and 60 foods thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923–25 base.

Other indexes.—The Bureau of Agricultural Economics prepares currently **indexes of prices received for farm products and of prices paid by farmers.** (See text, p. 569.)

In comparing the movement of **the indexes of consumers' prices** and of **the prices paid by farmers for** commodities bought for family living (table 710), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series L 15–25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945.*

No. 327.—Wholesale Prices—Indexes, by Major Commodity Groups: 1947 to 1951 and January 1952

[1947–49=100. This index is the official wholesale price index, beginning with January 1952. Although the new index has been computed back to 1947 for comparison, the official index for December 1951 and all earlier dates is that based on 1926=100, shown in tables 325 and 326. See also text, p. 271]

Commodity group	1947	1948	1949	1950			1951			Jan. 1952
				Avg.	June	Dec.	Avg.	June	Dec.	
All commodities	96.4	104.4	99.2	103.1	100.2	112.1	114.8	115.1	113.5	113.0

No. 328.—Indexes of Spot Market Prices of 28 Commodities: 1939 to 1951

[August 1939=100. Figures in column heads represent number of commodities. Index is computed daily; represents unweighted geometric average of daily price quotations of 28 commodities, traded on organized exchanges. The index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

Period	General Index	Import and domestic		Domestic agricultural	Foodstuffs and industrial	
		Import commodities	Domestic commodities		Foodstuffs	Raw industrial
	(28)	(11)	(17)	(7)	(11)	(16)
1939—Average	109.2	110.1	108.6	109.4	111.2	107.7
1940—Average	114.3	117.2	112.4	119.7	110.6	116.9
1941—Average	143.9	147.8	141.5	147.8	150.5	139.1
1942—Average	167.6	162.4	171.0	183.8	186.9	154.2
1943—Average	176.7	167.2	183.2	210.0	201.7	159.9
1944—Average	181.5	168.4	190.5	222.7	207.3	164.1
1945—Average	184.4	168.9	195.2	227.6	209.5	167.4
1946—Average	228.2	209.7	241.0	274.7	273.8	198.8
1947—Average	322.7	290.1	345.6	362.7	393.9	276.1
1948—Average	321.2	282.0	349.4	364.4	391.3	278.0
1949—Average	253.1	261.7	254.0	205.6	204.0	236.3
1950—Average	292.1	306.1	283.4	335.1	340.5	260.4
1951—Average	353.1	376.6	338.6	379.9	381.1	340.0
March	380.0	420.2	357.5	411.7	398.6	370.9
June	351.2	375.5	336.4	373.2	376.9	337.5

No. 330.—Wholesale Prices—Indexes, All Commodities and by Economic Classes: 1930 to 1951

[Figures in column heads indicate current number of quotations. Indexes of National Bureau of Economic Research are weighted arithmetic means for 680 price series, weights being based upon average value of production in 1927 and 1931. For method of computing Department of Labor index, see general note, p. 271 (1926=100 base shifted to 1929=100)]

YEAR	DEPARTMENT OF LABOR, BUREAU OF LABOR STATISTICS 1929=100				NATIONAL BUREAU OF ECONOMIC RESEARCH 1929=100

1950	169.5	176.8	166.1	165.9	172.9	181.7	161.8	189.0	166.6
1951	189.3	197.3	189.1	185.1	194.0	205.0	180.2	207.2	190.5

[1] Perishable and semidurable.
[2] Sum of number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than number of all commodities owing to duplication of certain price series in classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

No. 331.—Consumers' Price Index for Moderate-Income Families in Large Cities: 1913 to 1951

[1935-39=100. For detailed explanation, see general note p. 271. The Consumers' Price Index has been adjusted to incorporate a correction of new unit bias in rent index beginning with indexes for 1940 and adjusted population and commodity weights beginning with indexes for January 1950. These adjustments make a continuous comparable series. See also *Historical Statistics*, series L 41-47]

Year and month	All items	Food	Apparel	Rent	Fuel, electricity, and refrigeration				House-furnishings	Miscellaneous[1]
					Total	Gas and electricity	Other fuels	Ice

[1] Average of four quarterly indexes.
[2] Weighted average of two quarterly indexes and six monthly indexes.
[3] 12-month average. Price movements in 10 key cities measured monthly; for other cities (surveyed quarterly on a staggered schedule), preceding surveyed index used for each nonsurveyed month.
[4] Not available.
[5] Discontinued.
[6] St. Paul combined with Minneapolis.

No. 342.—Annual Average Unit Values of Important Articles Imported: 1924 to 1950

[Values required by law to represent values *in foreign markets* whence exported to United States. "Ton" signifies long ton of 2,240 pounds except where otherwise specified. Averages obtained by dividing total value of imports of specified article by total quantity. Where, as in some commodities considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

YEAR	Cheese, per pound	FISH, CURED, PER BARREL (200 POUNDS)		HIDES AND SKINS, PER POUND		Wheat, per bushel	Bananas, per bunch	Cocoa, per pound	Coffee, per pound	Tea, per pound
		Herring	Mackerel	Cattle	Goat

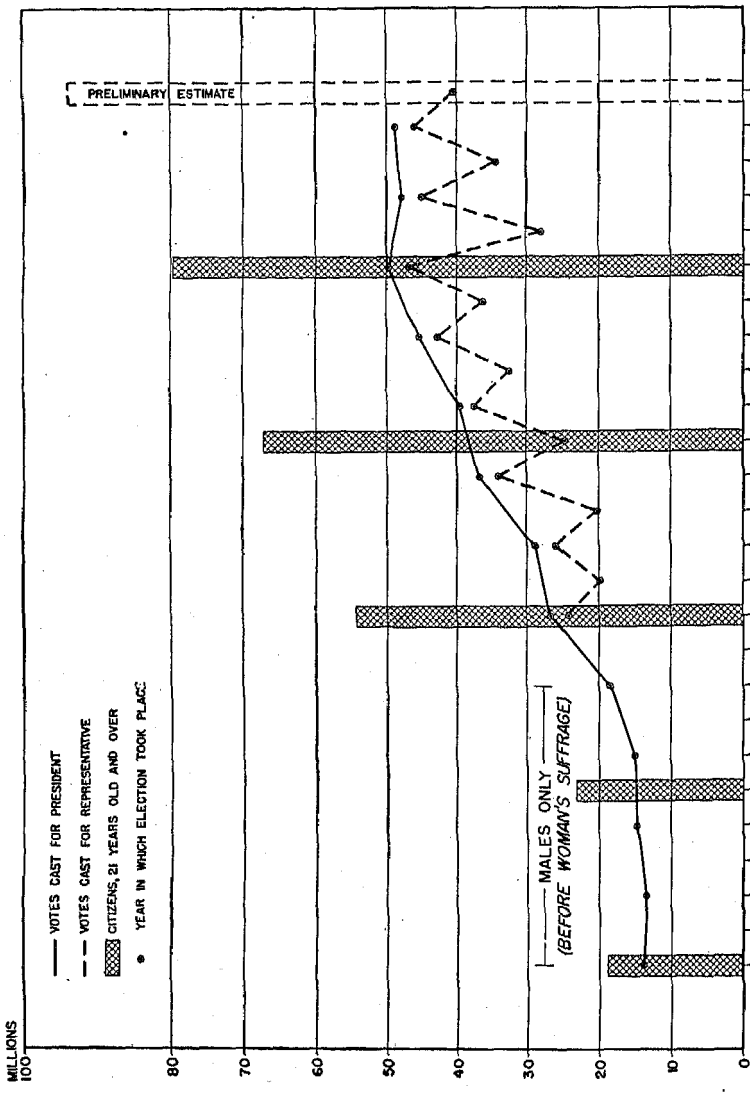
FIG. XVI.—PARTICIPATION IN NATIONAL ELECTIONS: 1900 TO 1950

[See tables 344, 347–350, and 352]



Source: Department of Commerce, Bureau of the Census. Election data from U. S. Congress, Clerk of the House, and *Vote Cast in Presidential and Congressional Elections, 1928–44.*

13. Elections

(Sent to print March 19, 1952)

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 120 thousand governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of governments holding elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The tables in this section give summary data, by State, on elections to Federal offices. The number of registered voters in 1942 in each city of 25,000 inhabitants or more is given in the *Cities Supplement to the Statistical Abstract*.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 27–31) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*.

No. 344.—Vote for Presidential Electors, by Major Political Parties: 1888 to 1948

Year	Total [1]	Republican	Democratic	Socialist and Socialist-Labor	Miscellaneous independent [2]	Prohibition	Communist	Percent of total	
								Rep.	Dem.

1948	48,833,680	21,969,170	[10] 24,105,695	168,070	[10] 2,487,529	103,216	----------	45.0	49.4

[1] Totals for years prior to 1928 exclude votes cast for names not appearing on electoral tickets for parties specified. Totals for 1928–44 exclude void and blank ballots.

[2] For 1888, Union Labor Party; 1892, 1900, and 1904, Populist; 1896, National Democrat; 1908, Populist and Independent; 1912, Progressive; 1916 to 1948, miscellaneous. [3] Democrat-Populist.

[4] Socialist-Labor only. In 1924 practically all Socialist votes cast for La Follette and Wheeler, official candidates of both Socialist and Independent Progressive parties, included in miscellaneous.

[5] Includes scattering votes; 445 in Iowa; 633 in New Jersey; and 131 in Pennsylvania. [6] Workers.

[7] Included with miscellaneous are 798 Union votes cast in endorsement of Republican candidate.

[8] Included with miscellaneous are 417,418 American Labor votes cast in endorsement of Democratic candidate.

[9] Included with miscellaneous are 496,405 American Labor and 329,235 Liberal votes cast in endorsement of Democratic candidate.

[10] Included with miscellaneous are 1,169,021 votes for Thurmond (States' Rights Democrats) and 1,156,103 votes cast for Wallace (Progressives, etc.); included with Democratic are 222,562 Liberal votes cast for Democratic nominees.

No. 345.—Apportionment of Congressional Representation, by States, From Adoption of Constitution to 1950

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives; from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 7 below)]

[1] To be effective in 1953.
[2] Number of Representatives not to exceed 1 for each 30,000 inhabitants.
[3] See headnote.
[4] Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See note 7.
[5] Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See note 7.
[6] Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.
[7] Assigned after apportionment.
[8] Included in apportionment act in anticipation of Statehood.
[9] Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 350.—Vote for United States Representatives, by Major Political Parties, by States: 1948 and 1950

[In thousands. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In New Mexico and North Dakota, no representatives were elected from districts, but more than one was elected from the State at large; in these States, each party total represents votes cast for that candidate of the party receiving highest vote. In Delaware, Nevada, Vermont, and Wyoming only one representative is elected. In Connecticut and Ohio, representatives are elected by district except one, who is elected at large; the at-large vote is not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are here counted as for the endorsing party. See also notes below]

[1] In California a person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.

[2] Less than 500.

[3] Includes 208,892 blanks.

[4] Includes 87,673 blanks.

[5] Democratic-Farmer-Labor party.

[6] Included in "Other" are endorsing votes cast for major party candidates, as follows: in 1948 for Democrats 263,339 and for Republicans 31,735; in 1950 for Democrats 164,695 and for Republicans 25,355. Republican totals include endorsing votes cast for Democrats: 115,824 in 1948 and 40,575 in 1950.

14. Federal Government Finances and Employment

(Sent to print March 19, 1952)

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for budget appropriations and other authorizations for the maintenance of the various departments and establishments. It includes estimates to carry out both existing laws and proposed legislation. Data from *The Budget of the United States Government* for the fiscal year ending June 30, 1953, are presented in tables 358–363. The Treasury Department publishes a *Digest of Appropriations* each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the *Combined Statement of Receipts, Expenditures and Balances*, an abstract of the Treasury books relating to all of the receipt and appropriation accounts of the Government.

The day-to-day financial operations of the Federal Government are reflected in the *Daily Statement of the United States Treasury*, which covers all of the receipts and expenditures of the Government, including those arising under public debt operations, and also exhibits a *Statement of the Public Debt*, as of the end of the month on the first working day of the next month. The *Treasury Bulletin*, a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains texts of most of the public documents relating to fiscal policy and operations. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are presented in the Treasury Department's *Circulation Statement of United States Money* (monthly) and *Prices and Yields of Public Marketable Securities . . .* (monthly). See tables 438, 439, and 497.

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department. This Bureau's annual report, *Statistics of Income, Part 1*, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. *Statistics of Income, Part 2*, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. See tables 369–382, 520, 522, 523, and 530.

Federal employment figures are compiled primarily by the Civil Service Commission. The figures are issued by that agency in its regular *Annual Report* and in its *Monthly Report on Employment*. The Commission also publishes an annual report on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service*. Data on Federal employment and pay are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the general fund of the Treasury, from which all expenditures are made. Receipts and expenditures are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as contrasted with those effected through trust accounts. A brief description of the items handled through these accounts is as follows:

1. General accounts.—Money represented in the general accounts may be withdrawn from the Treasury only in pursuance of appropriations made by Congress. The principal sources of general account receipts are income taxes, miscellaneous internal revenue, social security taxes, taxes upon carriers and their employees, customs duties, and miscellaneous receipts, such as proceeds from the sale of surplus property.

2. Special accounts.—Receipts in these accounts are generally funds received under special authorization of law which may be expended only for the particular purposes specified therein, and not for general purposes. The larger items are those receipts for the reclamation fund, Alaska Railroad fund, and receipts under the Mineral Leasing Act, under the Department of the Interior, and the national forest funds, under the Department of Agriculture.

3. Trust accounts.—Trust account receipts are those received for the benefit of individuals or groups of individuals and are to be used for the purposes specified in the trust, and are not, therefore, available for general expenditures. An example of a trust account is the Federal old-age and survivors insurance trust fund, to which amounts equivalent to the receipts from the taxes on employment levied for the support of old-age benefits are automatically appropriated.

BASIS OF TABLES

A number of different bases are used in compiling data relating to Federal finances, as explained below, and the basis used is noted at the head of each table.

Daily Treasury Statement.—Most tables at present dealing with Federal fiscal affairs are compiled on the basis of the *Daily Treasury Statement.* This statement is compiled from the latest daily financial reports received from Government depositaries and Treasury offices holding Government funds, and, because of the promptness with which the information is obtained and made public, it has come into general use as reflecting the Government's finances and the condition of the Treasury from day to day. Effective with the beginning of the fiscal year 1947 expenditures of several departments and establishments serviced by the Division of Disbursement, Treasury Department, are reported in the *Daily Treasury Statement* on the basis of checks issued. A clearing account is provided to take care of outstanding checks. Beginning July 1, 1948, such expenditures are reported as of the day on which checks are issued in payment of obligations, through the use of teletype facilities.

Other tables are on bases reflecting the accounts or statistics of the various Treasury offices compiling them for the definite period under review. Such other bases are the following:

Public debt accounts.—Tables on this basis reflect the audited accounts of the Bureau of the Public Debt for the actual transactions of the period under review.

Warrants issued.—Warrants issued (receipts) by the Secretary of the Treasury for certain moneys (primarily revenues and miscellaneous receipts) received by the Treasurer of the United States, represent, as provided by law, the formal covering of receipts into the Treasury. All certificates of deposit for a particular fiscal year must have reached the Treasury before total receipts can be compiled on a warrants-issued basis. Warrants issued (expenditures) by the Secretary of the Treasury represent charges against appropriations provided by law. Certain moneys are disbursed by the Treasurer of the United States upon such warrants. Some warrants do not represent actual payments to claimants but are merely advances of funds to disbursing officers for the payment of Government obligations. Expenditures compiled on this basis necessarily include unexpended balances to the credit of disbursing officers.

Checks issued.—This basis, more than any other, reflects the real expenditures of the Government since it relates to expenditures made on the basis of checks drawn by disbursing officers.

Collection basis.—Statements showing receipts on this basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as actual collections recorded on their books by collectors of internal revenue and collectors of customs but without regard to the time of deposit of such collections to the credit of the Treasurer. Deposits of income taxes and social security taxes withheld by employers, which are made directly with depositaries and not

recorded by collectors of internal revenue until quarterly tax returns are filed, are included in statements of receipts on a collection basis as receipts of the Secretary of the Treasury in the fiscal year in which deposited and as receipts of the collectors in the fiscal year in which returns are filed.

Further details with respect to Treasury accounting bases and procedures are shown on pages 675–678 of the *Annual Report of the Secretary of the Treasury* for the fiscal year 1951.

Public and private debt.—Data from a special study on debt by the Office of Business Economics of the Department of Commerce are presented in this section. (See table 384.) These data are published annually in the *Survey of Current Business.*

Gross debt, as defined in this study, consists of all classes of legal indebtedness except the following: (1) Deposit liability of banks and the amount of bank notes in circulation; (2) value of outstanding policies and annuities of life insurance carriers; (3) short-term debts among individuals and unincorporated nonfinancial business firms; and (4) nominal debt of corporations, such as bonds which are authorized but unissued or outstanding but reacquired.

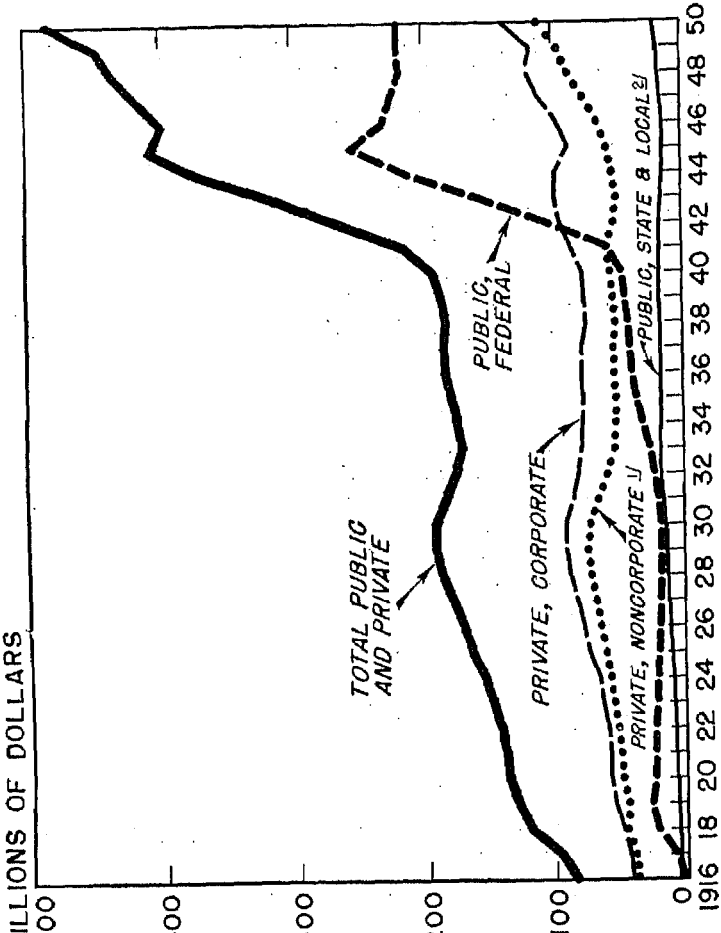
Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following sectors of the economy: (1) Federal Government and its corporations and agencies generally; (2) State and local governments treated as a single entity; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management, treated here as a unit. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

The net debt concept for each of the four sectors can be summarized as follows: Federal Government net debt is that owed to all other sectors of the economy except the Federal Government proper and its corporations and agencies; State and local government net debt is that owed to all other economic entities except State and local governments; corporate net debt is that owed to all other entities (including corporations) except to corporate members of an affiliated system; and private noncorporate net (or gross) debt is summation of all forms of legal indebtedness except that among individuals and unincorporated nonfinancial business firms. Data represent balances of debts outstanding at end of calendar years, except data for State and local governments which are for June 30 of each year.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 109) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945.*

FIG. XVII.—NET PUBLIC AND PRIVATE DEBT, BY MAJOR COMPONENTS: 1916 TO 1950

[See table 334]



1 Data represent individual and noncorporate private debt.
2 Data are for June 30 of each year.

[1] Net receipts equal total receipts less (a) appropriations to Federal old-age and survivors insurance trust fund beginning 1937 and (b) refunds of receipts beginning 1931.
[2] Figures adjusted beginning 1931 on account of refunds of receipts and capital transfers.
[3] Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in other receipts.
[4] On basis of warrants issued 1789 through 1930; thereafter, on basis of checks issued.
[5] Average for period Mar. 4, 1789, through Dec. 31, 1800.
[6] Averages are for entire period though there were no amounts under these items for certain years.
[7] Years ending Dec. 31, 1801 to 1842; average for 1841–50 is for period Jan. 1, 1841, through June 30, 1850.
[8] Average for 1863–65.
[9] Less than $500.
[10] Average for 1881 and 1884.
[11] One year only, 1895.
[12] One year only, 1910.
[13] Sales of public lands included in other receipts.

[1] Excludes debt retirements and beginning 1931, refunds of receipts and capital transfers.
[2] Excludes civil expenditures under War and Navy Depts. in Washington through 1915. Subsequent to 1915 includes all expenditures made by Dept. of Army (including rivers and harbors and Panama Canal) and Dept. of Navy. Dept. of Army includes expenditures of Dept. of Air Force from funds made available prior to 1949. Expenditures of Dept. of Air Force for 1949 were $1,690,461,000, for 1950, $3,520,633,000, and for 1951, $6,358,041,000.
[3] On basis of warrants issued through 1930; thereafter, on basis of checks issued. Expenditures for Indians exclude interest accounts, which are included in trust fund expenditures beginning 1940. Veterans' pensions represent expenditures under appropriation "Army and Navy pensions," administered by Veterans' Administration.
[4] Includes civil expenditures under War and Navy Depts. in Washington through 1915, expenditures of Office of Secy. of Defense, unavailable funds charged off under Act of June 3, 1922, expenditures for "Govt. corporations (wholly owned), etc. (net)" beginning 1932, and expenditures for Indians and veterans' pensions beginning 1949.
[5] Represents gross debt as of end of each period; e. g., 1800, 1810, etc.
[6] Years ending Dec. 31 through 1842; average for 1789-1800 begins Mar. 4, 1789; average for 1841-50 is for Jan. 1, 1841-June 30, 1850. See note 5 concerning gross debt.
[7] Included in all other.
[8] For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to $3,000,000,000) have been consolidated with budget expenditures.
[9] Beginning 1951, investments of wholly owned Government corporations in public debt securities are excluded from budget expenditures.

No. 358.—Federal Government Expenditures by Organization Unit: 1944 to 1951

[**In millions of dollars.** For years ending June 30. Expenditures reported on a checks-issued basis, adjusted in total to daily Treasury statement basis (which is partly checks issued and partly checks paid). "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Two important exceptions are appropriations from general fund to Federal old-age and survivors trust fund and refunds of receipts, both of which are excluded from expenditures and deducted from receipts. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly owned Government corporations and the United States Treasury, and debt transactions of Government enterprises (expenditures from public debt authorizations are included; see also table 361). Figures in early years have not been revised to reflect recent changes in organizational structure]

[1] Excludes transfer of $3 billion of 1948 surplus to foreign economic cooperation trust fund for expenditure in 1949.
[2] Excludes $11,036,000 representing net purchases of United States securities which is included in Treasury totals (see table 357).
[3] Other expenditures are shown under various agencies to which funds are allocated.
[4] Less than $500,000. [5] Deduct. [6] Included with Department of Commerce.
[7] Includes transactions of mixed-ownership corporations of $290,515,000 (net) which are shown separately in the *Daily Treasury Statement*.
[8] Since 1950, sales and redemptions of obligations of wholly-owned Government corporations have been excluded from this table.

No. 359.—Receipts From and Payments to the Public by the Federal Government: 1929 to 1951

[In billions. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust accounts as well as budget accounts of Federal Government. This table therefore shows flow of money on cash basis between Federal Government as a whole and the public. Net borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government corporations, and also excludes certain types of public debt transactions like issuance and redemption of armed forces leave bonds. The public is defined to include individuals; banks (including Federal Reserve and Postal Savings System); businesses; private corporations; State, local and foreign governments; and international organizations. For additional explanation, see 1953 Budget, pp. 1141–1142, headnote to table 358, and general note, p. 301]

YEAR	Receipts from the public [1]	Payments to the public [1]	Excess of receipts from (+) or payments to (−) the public	Receipts from exercise of monetary authority [2]	Excess of Treasury cash income (+) or outgo (−) [3]	Decrease (+) or increase (−) in Treasury cash balance	Decrease (+) or increase (−) in Exchange Stabilization Fund balance	Net borrowing (−) or repayment of borrowing (+) from the public

No. 361.—Budget Appropriations and Other Authorizations for Federal Agencies, by Organization Unit: 1951

[**In millions of dollars.** For year ending June 30. The Budget total of "new obligational authority" represents total of new authorizations enacted for any fiscal year for Federal agencies to incur obligations. This total includes "net new appropriations," "reappropriations," "contract authorizations," and "authorizations to expend from public debt receipts." "Net new appropriations" represent total of all appropriations less appropriations enacted to liquidate prior year contract authorizations. "Reappropriations" continue available in the succeeding fiscal year the unused balance of an appropriation which would otherwise expire for obligation purposes. "Contract authorizations" permit placement of specific obligations or contracts but require subsequent appropriations to "liquidate" them (i. e., to authorize withdrawal of funds from Treasury in payment of obligations). "Authorizations to expend from public debt receipts" authorize use of proceeds of Treasury borrowing to finance certain types of Government programs. See also general note, p. 301, and headnote to table 358]

No. 369.—Individual and Taxable Fiduciary Income Tax Returns—Summary. 1925 to 1949

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, the filing requirements applicable to individuals (citizens or residents of the United States), for the years shown, are as follows: (1) Single, or married and not living with husband or wife: for 1925 and 1930, net income of $1,500 or over; 1935, $1,000 or over; 1940, gross income of $800 or over; (2) Married and living with husband or wife: for 1925 and 1930, combined net income of $3,500 or over; 1935, $2,500 or over; for 1940, combined gross income of $2,000 or over; (3) For 1945–47, every individual with gross income of $500 or over; and for 1948–49, $600 or over; for refund purposes, returns are also required with respect to gross incomes under $500 for 1945–47, or under $600 for 1948–49, from which taxes have been withheld. (For 1925–35, returns are required to be filed by individuals having gross income of $5,000 or over if single, or married and not living with husband or wife; or having combined gross income of $5,000 or over if married and living with husband or wife; regardless of net income.) *Data for returns showing no net income or no adjusted gross income, filed in accordance with these provisions, are not included in statistics given here.* Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien and, beginning 1938, for every trust having net income of $100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares. See also *Historical Statistics*, series P 144–147]

Total tax do					176	173	176	144

[1] Taxable fiduciary returns included with individual returns through 1940, shown separately thereafter.

[2] *Net income (shown for 1940 and prior years)* is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. *Adjusted gross income (shown for 1945–49)* is defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales of property.

[3] Tax tabulated for 1940 and prior years is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while tax for 1945–49 is after deduction of such credits.

[4] Includes defense tax.

[5] For individual returns only, 1945 and later years.

Number of returns (thousands)	49,865	52,722	54,910	51,847	51,402	51,302	100

[1] See note 2, table 369.

[2] Salaries, wages, commissions, etc., include annuities, pensions, and retirement pay not reported in schedule for annuities and pensions, but exclude wages of not more than $100 per return from which no tax is withheld, reported on Form W-2 for 1945-47, and on Form 1040A for 1948-49. (See note 12.)

[3] Dividends received exclude amounts received through partnerships and fiduciaries; exclude amounts not exceeding $100 per return reported on Form W-2 for 1945-47 and on Form 1040A for 1948-49. (See note 12.)

[4] Interest received includes interest on notes, mortgages, bank deposits, corporation bonds before amortization of bond premium, and taxable and partially tax-exempt interest on Government obligations before amortization of bond premium; also includes, when received through partnerships and fiduciaries, partially tax-exempt interest on Government obligations and partially tax-exempt dividends on share accounts in Federal savings and loan associations. Excludes amounts not exceeding $100 per return reported on Form W-2 for 1945-47 and on Form 1040A for 1948-49. (See note 12.)

[5] Net profit from rents and royalties is excess of gross rents over depreciation, repairs, interest, taxes, and other rent expenses and excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is excess of expenses over gross receipts.

[6] Net profit from business is excess of gross receipts over business expenses and net operating loss deduction due to net operating loss from business, partnership, and common trust funds for two preceding years. Conversely, net loss from business is excess of business expenses and net operating loss deduction over gross receipts from business.

[7] Partnership profit or loss excludes partially tax-exempt interest on Government obligations, dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is the net operating loss deduction allowed.

[8] Capital assets consist of all property held by taxpayer *other than* (1) stock in trade or other property held primarily for sale to customers, or (2) kinds of property specified in note 9. Net gain or loss reported is a combination of current year capital gains and losses to be taken into account (including those from partnerships or common trust funds in which taxpayer participates) and net capital loss carry-over from five preceding years but not prior to 1942. Allowable net loss is limited to amount of such loss, or to net income (adjusted gross income if taxed under Supplement T) computed without regard to gains and losses from sales of capital assets, or to $1,000, whichever is smallest. For details as to portion of gains and losses taken into account, description of capital loss carry-over, and special treatment of certain gains and losses, see *Statistics of Income*, Part 1.

[9] Sales of (1) property used in trade or business of a character which is subject to allowance for depreciation, (2) Government obligations issued on or after Mar. 1, 1941, on a discount basis and payable, without interest, within 1 year from issue, and (3) real property used in trade or business.

[10] Income shown from annuities and pensions is only the taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income equals cost. Thereafter, entire amounts received are taxable and must be included in income. Annuities, pensions, and retirement pay from which tax is withheld may be reported as salaries and wages.

[11] Income from estates and trusts excludes partially tax-exempt interest on Government obligations and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Such income is reported in partially tax-exempt interest.

[12] Miscellaneous income includes all taxable income not accounted for elsewhere in this table; also includes wages not subject to withholding, dividends, and interest, not exceeding in total $100 per return reported on Form W-2 for 1945-47 and Form 1040A for 1948-49.

Joint returns of husbands and wives	68,814,105	68,726,636	77,003,356	82,321,452	118,549,475	118,377,474
Separate returns of husbands and wives:						
Men	8,932,990	9,405,380	10,672,264	12,202,471	3,390,452	2,805,600
Women	4,516,423	4,541,274	5,121,373	6,190,606	2,435,848	2,060,508
Separate community property returns:						
Men	2,663,921	4,050,276	4,574,918	7,117,655	942,193	698,883
Women	2,586,072	3,735,452	4,246,183	5,979,593	934,978	625,393
Returns of single persons:						
Men	14,035,945	14,526,588	17,759,551	20,266,550	21,066,176	20,221,921
Women	15,165,369	15,315,523	14,952,367	16,216,945	16,854,765	16,673,427

[1] Preliminary.

[2] An unequal number of returns of husbands and wives results from use of sampling in certain income areas, from the fact that some returns lack sufficient information to identify the family relationship, and from deferment of filing returns by members of the armed forces for 1944-46.

[3] See note 2, table 369.

No. 376.—Corporation Income Tax Returns—Summary: 1925 to 1949

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934–41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940–41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. For other corporation data based on income tax returns, see pp. 444–446 and 450. See also *Historical Statistics*, series P 152–164]

[Money figures in millions of dollars]

Adjusted excess profits net income	-------	-------	-------	912	8,368	-------	-------	-------

[1] Preliminary.

[2] Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

[3] Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940–47, amount shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 522, p. 445). Beginning 1936, dividends received on stock of domestic corporations are included in taxable income. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

[4] Includes defense tax.

[5] Number of returns with no net income, for 1925, includes returns of inactive corporations, not available separately.

[6] For tax reported, see above.

[1] A corporation is classified industrially according to the business reported on the return. When diversified activities are reported, the classification is determined by the industry which accounts for the largest percentage of total receipts.
[2] For changes in classification affecting comparability of data, see "Statistics of Income for 1938, Part 2."
[3] Less than $500,000.

[1] A return is required of every citizen or resident alien who transferred by gift during calendar year to any one donee property exceeding $3,000 in value or who, regardless of value, made a gift of future interest in property. A nonresident alien is similarly required to file a return if gift consists of property situated in the United States.

[2] An exclusion is allowed of the first $3,000 of gifts, except gifts of future interest in property, made to any one donee during calendar year.

[3] The specific exemption of $30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

No. 381.—Federal Estate Tax Returns—Summary: 1932 to 1948

[All money figures in thousands of dollars. An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (*a*) in period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in period 5 p. m., June 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds $50,000; (*b*) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds $100,000; (*c*) in period Aug. 31, 1935 through Oct. 21, 1942, the value of whose gross estate exceeds $40,000; and (*d*) on or after Oct. 22, 1942, the value of whose gross estate exceeds $60,000; and (2) for estate of every nonresident alien who died (*a*) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (*b*) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds $2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Internal Revenue Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax]

[1] Net taxable estate for 1933 and subsequent years is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940, through Sept. 20, 1941.

[2] Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

[3] Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

[4] No data compiled for 1946.

[1] Net estate classes are based on amount of net estate for additional tax plus specific exemption. (See note 2.)

[2] The specific exemption tabulated (*a*) for estates subject to additional tax is $60,000 under 1942 act; $40,000 under 1941, 1940, and 1935 acts; $50,000 under 1934 and 1932 acts; and (*b*) for estates subject to earlier acts is $100,000 under 1926 act; and $50,000 under 1924 and prior acts.

[3] Represents excess of total amount of funeral and administration expenses, debts of decedents, mortgages and liens, and support of dependents, over value of property includible in gross estate subject to claims.

[4] Excess of gross estate over allowable deductions, exclusive of specific exemption.

[5] Net estate after deducting specific exemption of $100,000, except for returns filed under 1924 or prior acts for which specific exemption is $50,000.

[6] Applies only to estates of individuals who died subsequent to June 6, 1932.

[7] Credits for (*a*) estate, inheritance, legacy, or succession taxes paid to States, etc., and (*b*) gift taxes paid to the Federal Government.

[1] Figures for 1800-50 are as of Jan. 1.
[2] Revised in accordance with Bureau of Census estimated population for continental United States as of July 1 of each year beginning 1850.
[3] Excludes bonds issued to Pacific railways and Navy pension fund.
[4] Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.
[5] Less than $500,000. [6] Includes old Treasury (war) saving securities for 1925.

State and local governments [6]	(5)	(5)	(5)	400	5,300	8,000	8,700	9,400
Individuals: [7]								
Savings bonds	----------	----------	(5)	2,600	40,700	48,800	49,900	40,000
Other securities	(5)	(5)	(5)	7,500	18,300	18,100	17,400	16,200
Miscellaneous investors [8]	(5)	(5)	(5)	700	8,900	10,000	10,000	10,900

[1] Holdings of commercial banks and mutual savings banks for 1925 to 1935 are reported book values, and holdings of residual investors therefore deviate from par values in these years. U. S. savings bonds, Series A–F, included at current redemption value.
[2] Includes all securities issued or guaranteed by U. S. Government, but excludes guaranteed securities held by the Treasury.
[3] Includes Postal Savings System.
[4] Consists of commercial banks, trust companies, and stock savings banks in United States and in Territories and insular possessions. Figures exclude securities held in trust departments.
[5] Not available separately. Combined totals of these items as follows: 1925, $13,874,000,000; 1930, $9,097,000,000; and 1935, $11,511,000,000.
[6] Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.
[7] Includes partnerships and personal trust accounts.
[8] Includes savings and loan associations, dealers and brokers, corporate pension funds, nonprofit institutions, and investments of foreign balances and international accounts in this country.

[1] Includes partnerships, personal trust accounts. [2] Exclusive of banks and insurance companies.
[3] Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.
[4] Includes savings and loan associations, non-profit associations, corporate pension trust funds, dealers and brokers, and investment of foreign balances and international accounts in this country.
[5] Data on daily Treasury statement basis. Since data exclude noninterest bearing debt, they differ slightly from those in table 386. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by Treasury.
[6] Includes Electric Home and Farm Authority notes, Federal intermediate credit bank debentures, Central Bank for Cooperatives debentures, Federal National Mortgage Association notes, home loan bank debentures, War Finance Corporation bonds (World War I), and joint stock land bank bonds. Includes Federal land bank bonds only through June 30, 1946; on June 27, 1947, the U. S. proprietary interest in these banks ended. Excludes stocks and interagency loans.
[7] Less than $50 million. [8] Excludes obligations of the Philippine Islands after June 30, 1946.

No. 388.—Interest-Bearing Securities Issued by All Governmental Units in the United States—Estimated Amounts Outstanding, by Tax Status and Issuer: 1913 to 1951

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of Daily Treasury Statement. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of these issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former derived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers, with no allowance for any other public assets. For exception to par value, see table 387]

[Par value. In millions of dollars]

[1] Includes Government corporations. Based, for the most part, on reports of respective agencies to Civil Service Commission adjusted to improve comparability throughout period. Differs from data in tables compiled by Civil Service Commission in following respects: (1) Excludes seamen and trainees on ships contracted by U. S. Maritime Commission and substitute rural mail carriers; (2) includes temporary employees of Post Office Department hired to handle Christmas mail each year, Federal Reserve banks, and mixed-ownership banks of Farm Credit Administration.

Source: Department of Labor, Bureau of Labor Statistics. Data for executive branch based mainly on reports of Civil Service Commission. Current data published in *Monthly Labor Review* and in mimeographed releases.

No. 395.—Paid Civilian Employment in the Executive Branch of the Federal Government, by Area and Sex: June 1941 to 1951

1941 represents number on pay roll with pay on last regular pay period of month; thereafter, number in active-duty status as of last day of month. 1941 excludes Panama Railroad Co. and Inland Waterways Corp. Prior to 1947, excludes seamen and trainees of U. S. Maritime Commission, and beginning 1948, excludes Central Intelligence Agency. See also *Historical Statistics*, series P 63 for earlier data on Washington, D. C., metropolitan area total]

[1] From geographic study which excluded temporary postal substitutes; distribution for June 1938 not available.
[2] Represents peak of total employment. [3] Not available.
[4] Beginning 1950, Washington, D. C., metropolitan area includes Dist. of Columbia; Alexandria City, Arlington and Fairfax Counties, Virginia; and Montgomery and Prince Georges Counties, Maryland. In 1945, only parts of these counties were included. These areas excluded from data for 48 States.
[5] Relates to District of Columbia only.

50 years and over	140	137	3	97.9	(2)	(2)	(2)	4,312	4,356	2,303

[1] Average age is 40.6 years for all employees, 41.6 years for men, and 37.7 years for women. Age is determined by subtracting birth year from year 1947.

[2] Less than 0.1 percent.

[3] Pay rates represent base pay before any deductions for retirement, taxes, or bonds, but exclude overtime, bonuses, night differentials, etc. Pay rates other than annual rates are converted to annual full-time equivalent.

[4] Average length is 10.2 years for all employees, 11.3 years for men, and 7.2 years for women. Service represents all Federal employment, whether or not retirement deductions were taken from pay, and military service.
