Section 1

Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of Members of the House of Representatives among the several States. Until 1902, the census organization was temporary. The Bureau of the Census was then established as a permanent agency of the Government charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, this Bureau supplies intercensal data based on surveys and estimates in addition to making the comprehensive decennial census enumeration.

Decennial censuses.—In accordance with census practice dating back to 1790, each person enumerated in the 1960 Census was counted as an inhabitant of his usual place of residence (the place where he lives and sleeps most of the time). This place is not necessarily his legal residence, voting residence, or domicile; in most cases, however, the use of these different bases of classification would produce substantially the same statistics, although there may be appreciable differences for a few areas.

For the 1940, 1950, and 1960 Censuses, certain of the data are indicated as being obtained from representative samples of the population: 25 percent in 1960, 20 percent in 1950, and 5 percent in 1940. Exact agreement is not to be expected among the various samples, nor between them and the complete census count, but the sample data may be used with confidence where large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources.

Current Population Survey.—Until May 1956, this Survey, conducted monthly by the Bureau of the Census, covered a sample of approximately 21,000 interviewed households spread over a sample of areas throughout the United States. Since then, the sample has been expanded to approximately 35,000 interviewed households in a larger number of areas. For a discussion of the reliability of estimates based on this sample, see Technical Note, page 217.

Population estimates.—Population estimates for dates after April 1950, which are not the result of sample surveys, are based on data from the 1950 and 1960 Censuses; statistics of births and deaths provided by the Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service; statistics on the Armed Forces provided by the Department of Defense; and statistics on net movement from Puerto Rico reported by the Puerto Rico Planning Board. Estimates of State population are based on the same types of data and also on school statistics provided by State Departments of Education and parochial school systems.

Urban and rural areas.—According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (*a*) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (*b*) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (*c*) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a popu-

lation of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (*d*) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (*e*) unincorporated places of 2,500 inhabitants or more.

This definition of urban is substantially the same as that used in 1950. The major difference between 1950 and 1960 is the designation in 1960 of urban towns in New England and of urban townships in New Jersey and Pennsylvania. In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different special rules relating to population size and density.

In all definitions, the population not classified as urban constitutes the rural population. The term "current urban definition" refers to the population classified in accordance with the definitions used in 1950 and 1960. The term "previous urban definition" refers to the definition used prior to 1950.

A number of large and densely settled places are not included as urban because they are not incorporated places. To improve its measure of the urban population, the Bureau of the Census adopted, in 1950, the concept of the urbanized area and delineated, in advance of enumeration, boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition.

Farm and nonfarm residence.—The rural population is divided into the rural-farm population, which comprises all residents living on farms, and the rural nonfarm population, which comprises the remaining rural population. According to the definition used in the 1960 Census, the farm population consists of all persons living in rural territory on places of less than 10 acres yielding agricultural products which sold for $250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for $50 or more in the previous year. In the 1950 Census, farm population was determined by answers to the question, "Is this house on a farm (or ranch)?" However, persons on "farms" who paid cash rent for a house and yard only were classified as nonfarm. In both the 1950 and the 1960 Censuses rural persons in institutions, motels, and tourist camps were classified as nonfarm.

Color and race.—The concept of race as it has been used by the Bureau of the Census is derived from that which is commonly accepted by the general public. It does not, therefore, reflect clear-cut definitions of biological stocks, and several categories used obviously refer to nationality. "Color" divides the population into two groups, white and nonwhite. The nonwhite population consists of Negroes, American Indians, Japanese, Chinese, Filipinos, and all other groups not classified as white. Persons of Mexican birth or ancestry who are not definitely Indian or of other nonwhite stock are included in the white population. Persons of mixed parentage are placed in the race or color classification of the nonwhite parent.

Beginning with the 1960 Census, however, information regarding color and race was obtained by self-enumeration or self-reporting, whereas formerly race and color classification was obtained in most cases by the Census enumerator's observation.

Mobility status.—The population of the United States has been classified according to mobility status on the basis of a comparison between the place of residence of each individual at the survey or census date and the place of residence at a specified earlier date. *Mobile persons or movers* includes all persons living in a different house in the United States at the end of the period from the one they occupied at the beginning. They are subdivided into "same county movers" and "different county movers, or migrants," depending on whether they moved within the same county or into a different county. Migrants in turn are classified according to whether they moved within the same State or into a different State. *Nonmobile persons or nonmovers* includes all persons who were living in the same house in the United States at the beginning and

end of the period. *Persons abroad* includes all persons whose place of residence was outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, or a possession of the United States. It also includes persons born in a foreign country or at sea who have at least one native United States parent. Persons whose place of birth was not reported are assumed to be native unless their census report contains contradictory information, such as an entry of a language spoken prior to coming to the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Household.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the housing unit who are related to the head) and also the lodgers and employees, if any, who regularly live in the house. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household.

Prior to 1960 a household was defined as all the persons occupying a "dwelling unit." See section 29, Construction and Housing, for definitions of "housing unit" and "dwelling unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A house with at least 5 lodgers, an institution, a college dormitory, or a military barracks.

Family.—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 Censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or group quarters (other than the negligible number of such groups among inmates of institutions) and related to each other.

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is defined as a husband and his wife living together, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refer to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or group quarters such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or group quarters.

Alaska and Hawaii.—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

Other citizens	n.a.	n.a.	[24] 187,834	----------

n.a. Not available.

[1] Includes estimated population of the Philippine Islands (16,356,000), not shown separately.

[2] Census taken as of Oct. 1, 1939.

[3] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[4] Enderbury Island uninhabited at time of enumeration.

[5] Sand Island uninhabited at time of enumeration.

[6] Less than 0.5 square mile.

[7] Not enumerated.

[8] Little Swan Island uninhabited at time of enumeration.

[9] Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukulailai, Nurakita, Palmyra, Penrhyn, Rakahanga, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands not inhabited in 1950 and 1960. Quita Sueño Bank, Roncador Cay, and Serrana Bank, claimed by both the United States and Colombia, not enumerated.

[10] Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

[11] Not enumerated or uninhabited at time of enumeration.

[12] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (combined area 3 square miles), and Palmyra (4 square miles). Excludes Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square miles); area of other islands listed in footnote 9 not available.

[13] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[14] Leased (1914) from the Republic of Nicaragua for 99 years.

[15] Figures from Government of Nicaragua. Little Corn Island uninhabited at time of enumeration.

[16] Under the United Nations Trusteeship System with the United States as administering authority since July 18, 1947.

[17] Population 1940, 131,258 (Census of Japan).

[18] Civilian population; Department of the Navy, *Report on the Administration of the Trust Territory of the Pacific Islands for the Period July 1, 1949, to June 30, 1950*, Government Printing Office, Washington, D.C., 1950.

[19] Census of 1958 conducted by the Office of the High Commissioner. Civilian population; see *Census Report, 1958: Trust Territory of the Pacific Islands*, Office of the High Commissioner, Agana, Guam, June 1959.

[20] See references in footnotes 18 and 19, above. Comprised of 687 square miles of land area and 7,797 square miles of water area.

[21] Excludes United States citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of households.

[22] Excludes dependents of Federal employees and crews of merchant vessels.

[23] Based on 20-percent sample of reports received.

[24] Represents U.S. citizens abroad for extended periods of time. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

No. 5. Center of Population: 1790 to 1960

["Center of population" is that point which may be considered as center of population gravity of the U.S. or that point upon which the U.S. would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

Year	North latitude			West longitude			Approximate location
CONTERMINOUS U.S.[1]	°	′	″	°	′	″	
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1800	39	16	6	76	56	30	18 miles west of Baltimore, Md.
1810	39	11	30	77	37	12	40 miles northwest by west of Washington, D.C. (in Virginia).

[2] For United States, population of U.S. has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940.

[3] Less than 0.1 percent.

[1] Includes changes due to admissions into and discharges from, Armed Forces abroad, and "error of closure," (the amount necessary to make the components of change add to the net change between censuses), for which figures are not shown separately. [2] Adjusted for underregistration.
[3] Adjusted for underregistration of infant deaths; includes estimates of deaths in Armed Forces abroad.

No. 10. Population—Standard Metropolitan Statistical Areas: 1960

[Minus sign (—) denotes decrease; percent increase based on areas as defined in 1960. A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. In addition to the county, or counties, containing such a city or cities, contiguous counties are included in a standard metropolitan statistical area if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities are the units used in defining standard metropolitan statistical areas. This list of areas is based on *Standard Metropolitan Statistical Areas, 1961*, issued by the Executive Office of the President, Bureau of the Budget]

No. 11. Population, by Area of Residence—Regions, Divisions, and States: 1960

[In thousands. Covers 212 areas listed in *Standard Metropolitan Statistical Areas, 1961*, issued by the Bureau of the Budget. For definitions, see headnote, table 10, and text, pp. 1, 2. Central cities are those cities named in the title of each standard metropolitan statistical area, as listed in table 10]

No. 14. Cities With 100,000 Inhabitants or More in 1960—Population, 1910 to 1960, and Area, 1960

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin. Land area figures generally supplied by city engineers and reviewed for reasonableness by Bureau of the Census]

[1] The cities of Madison, Wis., and Rockford, Ill., share the same rank of 96. In order to have the lowest rank equal to the number of cities presented, the number 97 is omitted.
[2] Population shown is for New York City as now constituted.
[3] Revised population figure for Norfolk is 304,869.
[4] Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1910: 150,355.

No. 31. Marital Status of the Population, by Sex: 1890 to 1962

[**In thousands of persons 14 years old and over.** Beginning 1960, includes Alaska and Hawaii. Total population, 1890 to 1940, and civilian population, 1950 to 1962. 1950–1962 based on Current Population Survey; see Technical Note, p. 217. Civilian population includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Armed Forces included are as follows: 1950, 547,000; 1955, 800,000; 1960, 1,117,000; 1962, 978,000. See also *Historical Statistics, Colonial Times to 1957*, series A 210–227]

1930 (Apr. 1)	29,905	542	2.02	4.11	26,983	2,804	118	90.2
1940 (Apr. 1)	34,949	504	1.56	3.77	31,680	3,142	127	90.6
1950 (Apr. 1)	42,857	791	2.06	3.53	39,044	3,633	149	91.2
1960 (Apr. 1)	53,021	1,016	1.92	3.38	47,868	5,153		90.3

[1] Computed by compound interest formula.
[2] Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.
[3] Includes small number of hotels, institutions, and other quasi-households. [4] Estimated.

No. 39. Households, Families, and Married Couples: 1962 and Projections to 1980

[**In thousands.** Includes Alaska and Hawaii. Data for 1962 based on current definition of a household; projections based on 1950 definition. (See text, pp. 3 and 742.) Figures take account of 1960 Census information on age and sex composition of the population. Projections based on Series II population projections from *Current Population Reports*, Series P-25, Nos. 241 and 251. (See also table 3.) Series A and B assume, in different degrees, increases in the proportion married in each age group. Given the initial projection of marital status for each series, the general method of projection for that series was as follows (except for the number of male primary individuals): A—average annual change from 1950 to 1956-58 in the proportion of persons in each age group who were household heads of a given type was assumed to continue to 1965; one-half assumed for 1965 to 1975; one-quarter assumed for 1975 to 1980. B—one-half the average annual change from 1950 to 1956-58 was assumed for 1957 to 1965; one-quarter assumed for 1965 to 1975; it was assumed that no change would occur thereafter. Projections of the number of male primary individuals were based on average annual change from 1950 to 1960-62. See *Current Population Reports*, Series P-20, No. 123]

No. 46. Religious Bodies—Church Membership, Number of Pastors, and Sunday School Enrollment

[Beginning 1959, includes Alaska and Hawaii. Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed]

Religious body	Year	Number of churches reported	Church membership (1,000)	Number of pastors with charges	Sunday or Sabbath School enrollment [1] (1,000)
Total	------	319,670	116,110	247,069	44,434

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental health, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the Public Health Service in its annual report, *Vital Statistics of the United States*, and its *Monthly Vital Statistics Report*. Reports in this field are also issued by the individual State bureaus of vital statistics.

Births and deaths.—The collection of death statistics on an annual basis began in 1900. Then the death-registration States consisted of 10 States and the District of Columbia. In 1915, the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas[1] makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, and in 1955, birth statistics were based on a complete count of the records received in the Public Health Service. From 1951 to 1954, and for 1956 and subsequent years, the figures were based on a 50-percent sample of all registered births. Adjustments shown for underregistration of births are based on the results of nationwide tests of registration completeness in 1940 and 1950. Such adjustments in the published data were discontinued in 1960.

Current death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) and deaths among Armed Forces abroad are excluded.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries and Causes of Death*. The current classification, "Seventh Revision of the International Lists," has been used in the United States beginning with 1958. It has been the practice to revise the *International Lists* every 10 years to keep abreast of medical knowledge. Each revision has produced some break in the comparability of cause-of-death statistics. Comparability ratios which measure the net effect of changes in classifications according to the Sixth and Seventh Revisions are shown in *Vital Statistics of the United States, 1958*, Vol. 1. The extent of earlier changes is discussed in "The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends," *Vital Statistics-Special Reports*, Vol. 36, No. 10, and *Vital Statistics of the United States, 1958*, Vol. 1.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence of the mother or of the decedent.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to 1940, and each year since 1944. Estimates have been made for the intervening years as well as for years in which collections were not complete. A marriage-registration

[1] For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1-5.

area was established by the Public Health Service on January 1, 1957, and a divorce-registration area on January 1, 1958. At the beginning of 1963, the marriage-registration area covered 35 States and 3 independent registration areas; the divorce-registration area, 21 States and 1 independent registration area.

Vital statistics rates.—Vital statistics rates computed by the Public Health Service are based upon the enumerated population figures as of April 1 for 1940, 1950, and 1960 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted. Birth and divorce rates for 1940 and 1947 to 1960, and death and marriage rates for 1940 to 1960, for the United States and the individual States are based on total population present in the area, excluding Armed Forces abroad; the population base for 1945 birth and divorce rates includes Armed Forces abroad.

Morbidity.—Annual data on morbidity are compiled by the Public Health Service and published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of notifiable diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are of national importance.

Another source of health statistics is the National Health Survey's continuing program which collects statistics on disease, injury, impairment, disability, and related topics on a uniform basis for the nation as a whole. The various reports are published under the general title, *Health Statistics From the U.S. National Health Survey*.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see pp. 248 and 249).

Medical care.—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually in *Hospitals*, Guide Issue, and include only hospitals that meet the Association's requirements for listing. Institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Included are nearly all hospitals in the country that meet the following definition: A hospital is any establishment providing medical and registered nurse supervision; and offering services, facilities, and beds for use beyond 24 hours by 6 or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality, or pregnancy; and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, (b) obstetrical care, or (c) other definitive medical treatment of similar extent. Statistics supporting comprehensive, long-range plans for construction of hospitals and related medical facilities authorized under Title VI of the Public Health Service Act, as amended, are submitted annually by the Hill-Burton State Agencies to the Public Health Service. National data on hospital beds in 1948 to 1962 and detailed State data as of January 1, 1962, appear in *Hill-Burton State Plan Data: A National Summary as of January 1, 1962*, Public Health Service Publication No. 930-F-2.

Statistics on institutional population based on the 1950 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U.S. Census of Population, 1950*, Vol. IV, Part 2C). Similar information was collected in the 1960 Census of Population and is scheduled to be published in one of the reports in Volume II of the 1960 Census of Population.

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. From 1926 to 1946, such data were collected annually by the Bureau of the Census. Beginning with the 1947 report, the data appear in the annual report, *Patients in Mental Institutions*, issued by the Public Health Service.

Nutrition.—Statistics on the apparent per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation*. A discussion of methods used to compute these figures and more detailed information appear in Agriculture Handbook No. 62, *Consumption of Food in the United States, 1909-52*. The 1961 supplement to that publication presents revised and current figures.

Statistics on Federal food distribution programs, data on the quantity and costs of the food commodities distributed, and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

Alaska and Hawaii.—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

n.a. Not available.
[1] Based on 50-percent sample of live births.
[2] Provisional. By place of occurrence.
[3] Rate per 1,000 population (excluding Armed Forces abroad) enumerated as of April 1 for 1940, 1950, and 1960, and estimated as of July 1 thereafter.
[4] Beginning 1960, includes Alaska and Hawaii.
[5] Includes estimate for Massachusetts.

No. 52. Registered Live Births, by Color, for Urban and Rural Areas—States: 1960 and 1961

[By place of residence. Based on a 50-percent sample. For definitions of urban and rural, see "Introduction" in 1960 annual report, *Vital Statistics of the United States*. Tests made in 1950 indicate that, for the country as a whole, errors in residence reporting result in a significant overstatement of births to residents of urban places, and a corresponding understatement in the number to residents of areas classified as rural]

No. 53. Live Births, by Sex of Child and by Attendant: 1940 to 1961

[**In thousands.** Beginning 1959, includes Alaska, and 1960, Hawaii. Represents registered births. For total estimated births prior to 1960, see table 50]

Year	Total	Number of live births			Attended by—		
		Male	Female	Males per 1,000 females	Physician, in hospital [1]	Physician, not in hospital	Midwife, other, and not specified
1940	2,360	1,212	1,149	1,055	1,317	825	218
1945	2,735	1,405	1,331	1,056	2,156	403	177
1950	3,554	1,824	1,731	1,054	3,126	252	177
1955	4,047	2,074	1,974	1,051	3,819	101	128
1956 [2]	4,163	2,134	2,030	1,051	3,959	85	119
1957 [2]	4,255	2,180	2,075	1,051	4,070	75	108
1958 [2]	4,204	2,153	2,051	1,050	4,037	65	103
1959 [2]	4,245	2,174	2,071	1,050	4,091	56	98
1960 [2]	4.258	2,180	2,078	1,049	4,114	49	94
1961 [2]	4,268	2,186	2,082	1,050	4,135	44	90

[1] It is assumed that all births in hospitals or institutions are attended by physicians.
[2] Based on a 50-percent sample.

No. 54. Live Birth Rate, by Color and Age of Mother: 1940 to 1961

[**Births per 1,000 female population in each specified group.** Beginning 1950, includes Alaska, and 1960, Hawaii. Data for 1940 to 1958 are adjusted for underregistration; 1959 data are shown for both registered and adjusted births; beginning 1960, registered births only. For 1940, 1950, and 1960, based on enumerated population as of April 1; for all other years, on estimated population as of July 1. See also *Historical Statistics, Colonial Times to 1957*, series 22–23]

Year	15 to 44 years [1]			Age of mother							
	Total	White	Nonwhite	10 to 14 years	15 to 19 years	20 to 24 years	25 to 29 years	30 to 34 years	35 to 39 years	40 to 44 years	45 to 49 years [2]

[1] Rates computed by relating total births, regardless of age of mother, to female population aged 15 to 44 years.
[2] Rates computed by relating births to mothers aged 45 years and over to female population aged 45 to 49 years.
[3] Based on a 50-percent sample.

No. 55. Live Birth Rate, by Order of Birth, for Native White Women: 1930 to 1961

[**Births per 1,000 women 15 to 44 years old.** Beginning 1959, includes Alaska, and 1960, Hawaii. Data for 1940 to 1958 are adjusted for underregistration; 1959 data are shown for both registered and adjusted births; beginning 1960, registered births only. Includes adjustments for States not in the birth-registration area prior to 1930. Figures for births of order not stated are distributed. Estimates and population bases for 1930 (as of July 1) prepared by P. K. Whelpton. For 1940, 1950, and 1960, based on enumerated population as of April 1; for 1955 to 1959 and 1961, estimated as of July 1. See also *Historical Statistics, Colonial Times to 1957*, series B 10–18]

Order of birth	1930	1940	1950	1955	1956 [1]	1957 [1]	1958 [1]	1959 [1] (adj.)	1959 [1] (reg.)	1960 [1]	1961 [1]

No. 56. Illegitimate Live Births, by Age and Color of Mother: 1940 to 1961

[Beginning 1959, includes Alaska, and 1960, Hawaii. Includes estimates for States in which legitimacy data were not reported. No estimates included for misstatements on birth records or failures to register births. Figures for 1959 to 1961 based on 50-percent sample of live births in the reporting States]

AGE AND COLOR	1940	1945	1950	1955	1959	1960	1961
Total	**89,500**	**117,400**	**141,600**	**183,300**	**220,600**	**224,300**	**240,200**
Rate [1]	7.1	10.1	14.1	19.3	22.1	21.6	22.6
By age of mother:							
Under 15 years	2,100	2,500	3,200	3,900	4,600	4,600	5,200
15 to 19 years	40,500	49,200	56,000	68,900	84,500	87,100	93,300
20 to 24 years	27,200	39,300	43,100	55,700	67,300	68,000	74,000
25 to 29 years	10,500	14,100	20,900	28,000	32,000	32,100	33,700
30 to 34 years	5,200	7,100	10,800	16,100	19,000	18,900	19,800
35 to 39 years	3,000	4,000	6,000	8,300	10,500	10,600	11,100
40 and over	1,000	1,200	1,700	2,400	2,800	3,000	3,200
By color of mother:							
White	40,300	56,400	53,500	64,200	79,600	82,500	91,100
Nonwhite	49,200	60,900	88,100	119,200	141,100	141,800	149,100

[1] Rate per 1,000 unmarried (never married, widowed, and divorced) female population aged 15 to 44 years enumerated as of April 1 for 1940 and 1950 and estimated as of July 1 for all other years.

No. 57. Gross and Net Reproduction Rate, by Color: 1905 to 1961

[Beginning 1959, includes Alaska, and 1960, Hawaii. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. Rates computed using annual vital statistics life tables and population estimates by age, except as noted for earlier years. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. A comparison of the net reproduction rate with the gross reproduction rate affords an indication of the loss sustained by the potential childbearing population through mortality. See also *Historical Statistics, Colonial Times to 1957*, series B 31–36]

PERIOD OR YEAR	NET RATE			GROSS RATE		
	Total	White	Nonwhite	Total	White	Nonwhite
1905 to 1910 [1]	1,336	1,339	1,329	1,793	1,740	2,240

No. 67. Death Rate Per 1,000 Population, by Color and Sex, and by Age: 1900 to 1961

[Beginning 1959, includes Alaska, and 1960, Hawaii. Excludes fetal deaths. Rates per 1,000 population (of specified groups) residing in area, enumerated as of April 1 for 1940, 1950, and 1960, and estimated as of July 1 for all other years. Data prior to 1933 for death-registration States only; see text, p. 49. See also *Historical Statistics, Colonial Times to 1957*, series B 129-136]

n.a. Not available.
[1] Provisional, by place of occurrence.
[2] Based on total population residing in area, enumerated as of April 1 for 1940, 1950, and 1960 and estimated as of July 1 thereafter.
[3] Beginning 1960, includes Alaska and Hawaii.
[4] Includes estimate for Massachusetts.
[5] By place of occurrence.

No. 74. Estimates of Marriages, United States, and Marriage Licenses Issued, Major City Areas, by Month: 1950 to 1962

[Beginning 1960, includes Alaska and Hawaii. Provisional data. Figures for major city areas represent licenses issued in 34 cities with population of 100,000 or more according to the 1960 Census, and in 69 counties containing the remaining 72 cities in that population-size group. These areas contain nearly two-fifths of the total population of the United States]

[1] Provisional. Represents either marriages performed, licenses issued, or intentions filed.
[2] Per 1,000 population. Based on total population residing in area; population enumerated as of April 1 for 1950 and 1960, estimated as of July 1 for 1962.
[3] Includes reported annulments. [4] Beginning 1960, includes Alaska and Hawaii. [5] Estimated.
[6] Incomplete. [7] Marriage licenses.

Two stays involving two kinds of ownership	0.2	----------	0.4	--------	----------	----------

[1] Aged beneficiary and spouse whether or not entitled to benefits (spouse may be under 65). Represents total medical costs for the couple.
[2] For the hospitalized person. If both spouses were hospitalized, but only one insured, the couple is classified as "with hospital insurance."
[3] In many cases, includes some "free" care, i.e., no bills rendered to anyone, or vendor paid directly by public assistance or other agency.

No. 94. Percent Distribution of Aged Couples and Nonmarried Beneficiaries, by Means of Meeting Medical Cost: 1957

[Based on survey of old-age and survivors insurance beneficiaries. For coverage under social security, see text, p. 281]

Means of meeting cost	Beneficiary couples [1]			Nonmarried beneficiaries		
	All couples	Not hospitalized	Hospitalized [2]	All beneficiaries	Not hospitalized	Hospitalized [2]
Total	100.0	100.0	100.0	100.0	100.0	100.0
No cost incurred	2.8	3.5	----------	8.3	9.8	----------
All costs met out of beneficiary's resources [3]	78.4	84.5	56.9	70.3	75.3	42.2
Some costs met out of beneficiary's resources; beneficiary incurred debts for balance	5.5	2.6	15.8	2.2	1.6	6.0
Some or all costs met by others, total [4]	13.2	9.3	27.0	19.0	13.3	51.8
By relatives [5]	6.5	4.4	14.1	10.4	7.3	28.1
By public assistance agency	2.2	1.6	4.1	5.6	3.9	15.3
By other public or private welfare agency, including hospital [6]	5.6	3.4	13.2	4.7	2.6	16.5
Percent with costs met by health insurance	15.2	4.4	52.9	7.7	1.4	43.4
Percent incurring medical debts	6.8	3.0	20.3	3.1	2.0	9.6

[1] See footnote 1, table 93.
[2] In a general hospital or in an institution for long-term care such as a nursing home or mental or tuberculosis hospital; in case of beneficiary couples, one or both members were hospitalized.
[3] Beneficiary resources include income, assets, and health insurance.
[4] Total is smaller than sum of sub-items because sub-items are not mutually exclusive.
[5] Includes only beneficiaries who had medical bills paid directly by relatives or who received money from relatives to pay their medical bills. Excludes beneficiaries whose housing and food costs were paid wholly or in part by relatives.
[6] Includes a few cases where a private physician made no charge.

Source: Department of Health, Education, and Welfare, Social Security Administration; records.

No. 95. Hospitals—Type of Service and Control: 1946 to 1961

[Beginning 1958, includes Alaska and Hawaii. Covers hospitals accepted for listing by the American Hospital Association. See text, p. 50. Short-term hospitals have an average patient stay of 30 days or less; long-term, an average stay of longer duration. See also *Historical Statistics, Colonial Times to 1957*, series B 195–248]

No. 100. Hospital Discharges and Percent of Hospital Bill Paid by Insurance, by Sex, Age, Race, Residence, and Income of Patients: 1958–60

[Includes Alaska and Hawaii. Data are annual averages based on household interviews from July 1958–June 1960 and refer to the civilian noninstitutional population]

Characteristics	Total hospital discharges (1,000)	Percent of bill partly or entirely paid by insurance
Total	19,875	68.0
By sex:		
Male	7,365	70.6
Female	12,509	66.4
Excluding deliveries	8,828	70.8
By age:		
Under 15 years of age	3,445	72.1
15 to 44 years	10,151	66.9
45 to 64 years	4,096	76.0
65 years and over	2,183	51.2
By race:		
White	18,083	70.6
Nonwhite	1,791	41.6
By residence:		
Urban	11,939	69.5
Rural nonfarm	5,984	69.3
Rural farm	1,952	54.6
By family income:		
Under $2,000	2,816	39.6
$2,000 to $3,999	4,322	59.2
$4,000 to $6,999	6,916	79.0
$7,000 and over	4,273	81.0
Unknown	1,548	58.8

No. 105. Days of Disability—Total and Per 100 Persons, by Acute Condition Group: 1962

[For year ending June 30. Includes Alaska and Hawaii. Data refer to civilian noninstitutional population and contain some duplications, since time lost because of several concurrent conditions is counted under each contributing condition. Based on a sample and subject to sampling variability; see source for detailed explanation. For definitions of types of time lost, see footnotes, table 106]

Item	Acute condition group				
	Infectious and parasitic	Respiratory	Digestive	Injuries	All other
Number of cases 1,000,000	49.1	230.8	22.4	52.2	47.3
Rate per 100 persons	27.2	127.7	12.4	28.9	26.2
Total disability days (1,000,000)					
Restricted activity	207.9	771.7	76.9	273.1	262.4
Bed disability	103.0	366.0	33.9	78.9	107.4
Work loss [1]	20.6	101.4	15.0	66.7	30.1
School loss [2]	43.0	135.8	5.5	10.7	11.6
Days per 100 persons					
Restricted activity	115.0	426.9	42.6	151.1	145.2
Bed disability	57.0	202.5	18.7	43.7	59.4
Work loss [3]	30.1	148.5	22.0	97.7	44.1
School loss [2]	108.4	342.2	13.8	27.1	29.2

[1] Computed for persons 17 years old and over.
[2] Computed for children 6 to 16 years old.
[3] Computed for persons 17 years old and over who reported "working" as their major activity during the 12-month period preceding the week of interview.

No. 106. Days of Disability—Total and Per Person, by Type of Disability, Sex, and Residence: 1962

[For year ending June 30. Includes Alaska and Hawaii. Data refer to civilian noninstitutional population. Based on a sample and subject to sampling variability; see source for detailed explanation]

Type of time lost	Total disability days (1,000,000)			Days per person					
	Both sexes	Male	Female	Total	Sex		Residence		
					Male	Female	Urban	Rural nonfarm	Rural farm
Restricted-activity days [1]	2,945.8	1,237.8	1,708.0	16.3	14.1	18.3	16.3	15.7	17.6
Bed-disability days [2]	1,163.4	472.9	690.5	6.4	5.4	7.4	6.5	6.4	6.4
Work-loss days [3]	394.1	258.3	135.8	5.8	5.7	5.8	5.7	5.3	7.4
School-loss days [4]	227.5	111.1	116.4	5.7	5.5	6.0	6.3	5.4	4.3

[1] A day when a person cut down on his usual activities for the whole of the day because of an illness or an injury. Includes bed-disability, work-loss, and school-loss days.
[2] A day when a person was kept in bed either all or most of the day because of an illness or injury. Includes those work-loss and school-loss days actually spent in bed.
[3] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over who were working or had a job or business during the 2-week period preceding the week of interview.
[4] A day when a child lost the entire school day because of illness or injury. Computed for children 6 to 16 years of age.

No. 112. Specified Reportable Diseases—Cases Reported, by Month: 1961

[Includes Alaska and Hawaii. Figures in this table and table 111 should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned]

DISEASE	Total [1]	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

No. 116. Nutrition—Nutrients Available for Civilian Consumption Per Capita Per Day: 1930 to 1962

[Excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics, Colonial Times to 1957*, series G 546–551]

[1] Represents cost to the Federal Government of the commodity as delivered to the State distributing agency; includes cost of purchase, handling, warehousing, and transportation, but excludes administrative costs.
[2] For 1940, represents School Milk Program, which was merged with indemnity plan in July 1943. See also headnote, table 118. Cost refers to subsidy payments by the Federal Government; excludes administrative costs.
[3] Initiated in September 1954 to increase the consumption of fluid milk in schools and child-care institutions authorized under the Agricultural Act of 1954, as amended.

Source: Department of Agriculture, Statistical Reporting Service; annual report, *Agricultural Statistics*.

No. 118. School Lunch Program (Indemnity Plan)—Schools and Children Participating, States and Other Areas: 1962

[Comprises elementary and secondary schools. The indemnity plan is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Federal Government for local purchases of food on a basis of quality and quantity of meals served]
