ESTIMATES OF THE POPULATION OF THE UNITED STATES JANUARY 1, 1950, TO NOVEMBER 1, 1965

(All estimates in this report include Alaska and Hawaii. Estimates for each month from January 1, 1950, to December 1, 1958, and estimates for July 1 of each year from 1900 to 1949 are given in Current Population Reports, Series P-25, No. 302)

The total population residing in the United States (excluding Armed Forces abroad) was about 194,593,000 on Nov. 1, 1965, according to estimates released today by the Bureau of the Census, Department of Commerce. This figure represents an increase of 15,270,000, or 8.5 percent, since April 1, 1960, the date of the most recent census, and an increase of 2,245,000, or 1.2 percent, over the estimate for the corresponding month a year ago.

This report presents estimates for (1) the total population including Armed Forces abroad, (2) the total resident population, and (3) the civilian resident population, for selected months back to January 1, 1950.

The estimates for dates prior to February 1, 1965, given in the present report agree with the estimates for these dates previously published in Current Population Reports, Series P-25, No. 302, which also presents data on the components of population change (births, deaths, and net immigration) for this period.

The estimates shown here are based on the total population counts from the 1960 and 1950 Censuses; statistics and estimates of births and deaths provided by the National Center for Health Statistics, U.S. Public Health Service; statistics on immigration and emigration provided by the Immigration and Naturalization Service, Department of Justice; net immigration of civilian citizens affiliated with the United States Government provided by the Department of Defense and the Civil Service Commission; data on movement between Puerto Rico and the United States mainland provided by the Puerto Rico Planning Board; and data on the Armed Forces provided by the Department of Defense. The figures on births have been adjusted for incomplete registration. For a complete discussion of the estimating procedure used in deriving these estimates, see Current Population Reports, Series P-25, No. 302.
