CURRENT POPULATION REPORTS

Consumer Income

Series P-60, No. 63
September 8, 1969

AVERAGE FAMILY INCOME UP 8 PERCENT IN 1968

(Advance data from March 1969 sample survey)

The median income of families in the United States was $8,630 in 1968, according to estimates recently released by the Bureau of the Census, Department of Commerce. This was about $660, or 8.3 percent, higher than the 1967 figure of $7,970. The gain in real purchasing power, however, between 1967 and 1968 was only about 4 percent, as prices also rose during this period.[1]

An estimated 5.2 million families, or 10.3 percent, of the 50.5 million families in the Nation, received money incomes under $3,000 in 1968.

Table A.--NUMBER OF FAMILIES BY TOTAL MONEY INCOME IN 1968, FOR THE UNITED STATES

(Families as of March 1969)

Total money income	Number of families
Total	50,510,000
Under $1,000	907,000
$1,000 to $1,999	1,741,000
$2,000 to $2,999	2,563,000
$3,000 to $3,999	3,068,000
$4,000 to $4,999	3,048,000
$5,000 to $5,999	3,466,000
$6,000 to $6,999	3,820,000
$7,000 to $7,999	4,121,000
$8,000 to $9,999	7,678,000
$10,000 to $14,999	12,637,000
$15,000 to $24,999	6,137,000
$25,000 and over	1,326,000

[1]See Monthly Labor Review, March 1969, U.S. Department of Labor, table D-1, page 122.

The number of families in this income range declined by approximately 1 million from the previous year. Another 6.1 million, or 12.1 percent, received incomes between $3,000 and $5,000; 7.3 million, or 14.5 percent, had incomes between $5,000 and $7,000; and 11.8 million, or 23.4 percent, had incomes between $7,000 and $10,000. The remaining 20.1 million families, or 39.7 percent, received money incomes of $10,000 or more.

In 1968, the median incomes of men and women were about $6,000 and $2,000, respectively. Median earnings of men working year round full time were $7,660 in 1968, while the median earnings of women working year round full time were $4,460.

The 1968 income statistics presented in this report were obtained from the Census Bureau's Current Population Survey of March 1969. The information was collected from the civilian noninstitutional population and members of the Armed Forces living off post or with their families on post in the United States. More detailed income data for families and persons will appear in a report in this series to be issued later this year.

This report covers money income only, prior to deductions for taxes. For more detailed definitions of the terms and concepts used in this report, see Current Population Reports, Series P-60, Nos. 59 and 60.

Since the estimates in this report are based on a sample, they are subject to sampling variability. Moreover, as in all field surveys of income, the figures are subject to errors of response and nonreporting.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, 10 cents. Current Population Reports issued in Series P-20, P-23, P-25, P-26, P-27, P-28 (summaries only), P-60, and P-65 are sold as a single consolidated subscription at $8.50 per year, $2.50 additional for foreign mailing.

☆U. S. GOVERNMENT PRINTING OFFICE : 1969—392-363/24

How does the proximity of a large city affect the social and economic characteristics of the neighboring rural population?
How do the rural-farm and rural-nonfarm populations compare with each other and with the urban population?

People of Rural America describes the changes in the characteristics of the farm and nonfarm components of the rural population in the decade from 1950 to 1960 and analyzes the differences between these components and between the urban and rural populations.

Exploring the assumption that urban influence radiates from large metropolitan centers to diminish the rurality of counties within a certain orbit of dominance, this book studies urban influence on such characteristics as education, income, occupation, and fertility. It also evaluates the second part of this assumption—that the effect of urban influence may be expressed as a linear function of both the size of the metropolitan agglomerate and the distance between it and the counties it influences. This is done by dividing the country into bands of distance from the central cities of standard metropolitan statistical areas and examining the urban impact on selected characteristics of the rural population based on size and size-distance concepts.

People of Rural America is issued as the third volume in the 1960 Census Monograph Series (see adjoining panel). This series, published by the Bureau of the Census, with the cooperation of the Social Science Research Council, is based on 1960 census data and provides comprehensive analyses not available in the published reports of that census.

This study was written by Dale E. Hathaway, J. Allan Beegle, and W. Keith Bryant. Dr. Hathaway is Professor of Agricultural Economics, Michigan State University; Dr. Beegle is Professor of Sociology, Michigan State University; and Dr. Bryant is Associate Professor of Agricultural Economics, University of Minnesota.

People of Rural America 300 pp. (cloth) $3.50

Tentative titles for other volumes in the 1960 Census Monograph Series include:

- THE METROPOLITAN COMMUNITY
- CHANGING CHARACTERISTICS OF THE NEGRO POPULATION
- POPULATION OF THE UNITED STATES IN THE 20TH CENTURY

To receive announcements of these forthcoming books, write to the Publications Distribution Section, Bureau of the Census, Washington, D.C. 20233
