Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the population of the United States. The principal source of these data is the Bureau of the Census, which conducts a decennial census of the population and a monthly current population survey and also prepares periodic population estimates. For a list of publications, see the Guide to Sources in Appendix III of this book.

Decennial censuses.—The Constitution provides for a census of population within every 10-year period, primarily to establish a basis for apportionment of Members of the House of Representatives among the States. For over a century after the first census in 1790, the census organization was a temporary one. In 1902, the Bureau of the Census was established as a permanent Federal agency, responsible for enumerating the population and also for compiling statistics on other subjects and at other times.

In population censuses, each person is counted as an inhabitant of his usual place of residence. While this place is not necessarily his legal residence, voting residence, or domicile, the use of these different bases of classification would usually produce substantially the same statistics.

In recent censuses, some data were obtained from representative samples of the population rather than from a complete count, as follows: 5 percent in 1940, 20 percent in 1950, 25 percent in 1960, and 5, 15, and 20 percent in 1970. Exact agreement is not to be expected among the various samples, nor between them and the complete count, but sample data may be used with confidence where large numbers are involved and assumed to indicate patterns and relationships where small numbers are involved.

Estimates based on evaluation studies of the 1970 census results indicate a total net underenumeration of about 5.3 million persons, compared with 5.1 million in 1960. Among the persons who were not counted in 1970, about 3.4 million were white and about 1.9 million were Negro. The overall rate of net underenumeration in 1970 was about 2.5 percent, compared with 2.7 percent in 1960 and 3.3 percent in 1950. Data from the 1950, 1960, and 1970 censuses have not been adjusted for the estimated underenumeration.

Current Population Survey.—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 449 areas comprising 863 counties and independent cities with coverage in every State and the District of Columbia. About 58,500 housing units and other quarters are designated for the sample at any time, of which about 50,000 (containing 105,000 persons 16 years old and over) are occupied by households eligible for interview; of these, in turn, about 4 to 6 percent are, for various reasons, unavailable for interview. See also text, section 8, Labor Force, Employment, and Earnings.

Population estimates and projections.—National estimates are derived by use of decennial census data as benchmarks and of data available from various agencies as follows: Births and deaths (Public Health Service); immigrants (Immigration and Naturalization Service); the Armed Forces (Department of Defense); net movement between Puerto Rico and the U.S. mainland (Puerto Rico Planning Board); and Federal employees abroad (Civil Service Commission and Department of Defense). State estimates are based on similar data and also on a variety of data series, including school statistics from State departments of education and parochial school systems.

National population projections indicate the approximate future level and characteristics of the population under given assumptions as to future fertility, mortality,

and net immigration. The method used to develop the projections involved preparation of projections of each of the components of population change—births, deaths, and net immigration—and the combination of these with July 1 estimates of the current population. Projections for States and metropolitan areas incorporate further assumptions about population redistribution through interarea migration.

Current estimates and projections are consistent with official census figures and are not adjusted for estimated census underenumeration. For details on methodology, see the source cited below individual tables.

Standard Metropolitan Statistical Areas (SMSA).—The entire territory of the United States has been classified by the Office of Management and Budget as (*a*) metropolitan, or "inside SMSA's," and (*b*) nonmetropolitan, or "outside SMSA's." For descriptive details, see the introductory text to section 33 of this book. A listing of area titles and components of each SMSA is given at the end of section 33.

Urban and rural areas.—According to the 1970 census definition, the urban population comprises all persons in (*a*) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except Alaska), and towns (except in New England, New York, and Wisconsin), but excluding persons living in the rural portions of extended cities; (*b*) unincorporated places of 2,500 inhabitants or more; and (*c*) other territory, incorporated or unincorporated, included in urbanized areas. Some urbanized areas contain one or more incorporated places which are designated as "extended cities" because they have one or more large portions (normally at the city boundary) with relatively low population density. These portions are classified as rural.

In 1960 (but not in 1970), certain towns in New England, townships in New Jersey and Pennsylvania, and counties elsewhere were also designated as urban. Substantially the same definition was used in the 1950 census as in the 1970 census except for the introduction of the concept of "extended cities." In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different rules relating to population size and density. In all definitions, the population not classified as urban constitutes the rural population.

Changes in the size of the urban population from one census to another are affected by 2 components: (*a*) Growth in areas classified as urban at the beginning of the decade; and (*b*) reclassification of rural territory as urban and urban territory as rural. Between censuses, it is possible only to obtain measures of the first component from the Current Population Survey (see p. 1). Measures of the second are too costly. Since about 40 percent of the urban population growth between 1960 and 1970 was attributable to expansion of urban territory, data on the urban population from the Survey may be misleading. Consequently, publication of data on urban-rural residence from the Current Population Survey has been discontinued.

Farm and nonfarm residence.—The rural population is divided into "rural-farm," comprising persons living on farms, and "rural-nonfarm," comprising the remainder. According to the 1960 and 1970 census definitions, the farm population consists of persons living in rural areas on places of less than 10 acres yielding agricultural products which sold for $250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for $50 or more in the previous year.

Race.—The population is divided into three major groups on the basis of race: White, Negro, and other. The 1960 and 1970 censuses obtained the information on race principally through self-enumeration; thus, the data represent essentially self-classification by people according to the race with which they identify themselves. Persons of Mexican or Puerto Rican birth or ancestry who did not identify themselves as of a race other than white were classified as white. In 1970, the father's race was used for persons of mixed parentage who were in doubt as to their classification. In 1960, persons who reported mixed parentage of white and any other race were classified

according to the other race; mixtures of races other than white were classified according to the father's race.

Mobility status.—Classification of the population by mobility status is based on comparison of an individual's place of residence at the survey or census date with that of a specified earlier date. *Mobile persons or movers* includes all persons living in different houses in the United States at the beginning and at the end of the period. According to their new location, they may be "same county movers" or "different county movers, or migrants." Migrants in turn are classified according to whether they moved within the same State or into a different State. *Nonmobile persons or nonmovers* includes all persons living in the same house in the United States at the beginning and end of the period. *Persons abroad* includes all persons living outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, an outlying area of the United States, or at sea. It also includes persons born in a foreign country who have at least one parent born in the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Ethnic Origin.—"Ethnic origin" is determined on the basis of a question asking for self-identification of the person's origin or descent and is, therefore, a report on what persons perceive their origin to be. A question on ethnic origin was included in the 1971 and 1972 Current Population Surveys. The answers to this question produce results somewhat different from those based on inferences from such characteristics as place of birth, country of origin, language spoken in the home, or surname.

Household.—A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household. See text, section 27, Construction and Housing, for definition of "housing unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A rooming house, an institution, a college dormitory, or a military barracks.

Family.—The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together in a household. A primary family consists of the head of a household and all other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household and related to each other.

Subfamily.—A "subfamily" is a married couple with or without children, or one parent with one or more unmarried children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A "married couple" is defined as a husband and his wife living together in the same household, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with nonrelatives only. A secondary individual in a household is a person such as a guest, lodger, or resident employee who is not related to any other person in the household. Persons in group quarters, except inmates of institutions, are classified as secondary individuals.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. II. UNITED STATES POPULATION—PROJECTIONS TO 2000

[See table 3]

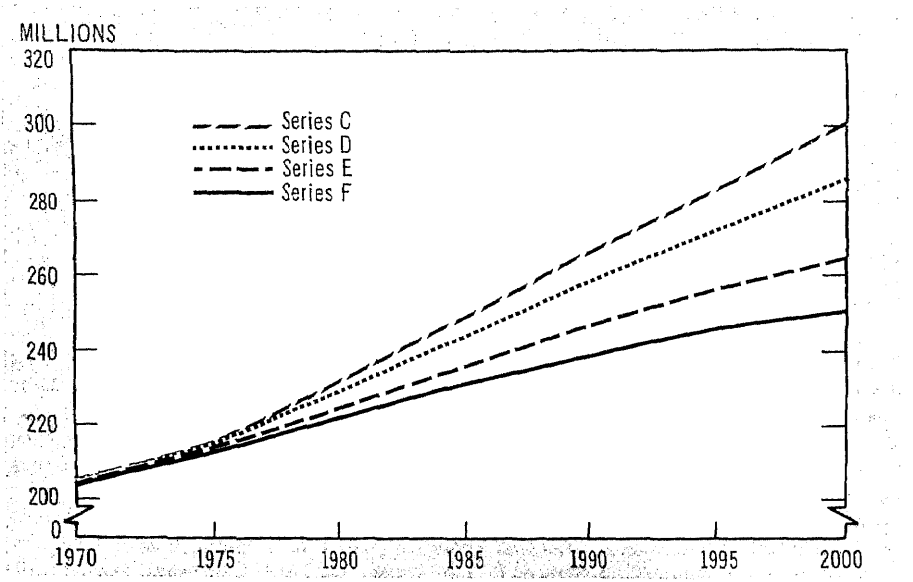

FIG. III. POPULATION CHANGES IN METROPOLITAN AREAS, BY RACE: 1950 TO 1960 AND 1960 TO 1970

Other citizens	(NA)	[15] 187,834	[15] 236,336	25.8	(X)

– Represents zero. NA Not available. X Not applicable. Z Less than 0.5 square mile.

[1] See footnote 1, table 1.

[2] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[3] Includes population of Corn Islands (1950, 1,304; 1960, 1,872) not shown separately. Lease of Corn Islands from Republic of Nicaragua was terminated in 1971. Area total excludes area of these islands (4 square miles).

[4] Enderbury Island uninhabited in 1950 and 1960; Canton and Enderbury in 1970.

[5] Sand Island uninhabited at time of enumeration.

[6] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (3 square miles), and Palmyra (4 square miles); uninhabited at time of enumeration.

[7] Under jurisdiction of the United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[8] Administered by United States since July 18, 1947, under United Nations Trusteeship system.

[9] Estimated civilian population as of June 30, 1950.

[10] Census of 1958 conducted by the Office of the High Commissioner, Trust Territory of the Pacific Islands.

[11] Comprises 717 square miles of land area and 7,772 square miles of water area.

[12] Excludes U.S. citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of their own households.

[13] Based on 20-percent sample of reports received.

[14] Based partially on tabulations provided by Dept. of Defense.

[15] Represents U.S. citizens abroad for extended periods. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

No. 6. Center of Population: 1790 to 1970

[“Center of population” is that point which may be considered as the center of population gravity of the United States, or that point upon which the United States would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

YEAR [1]	North latitude			West longitude			Approximate location
	°	′	″	°	′	″	
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1850	38	59	0	81	19	0	23 miles southeast of Parkersburg, W. Va.
1900	39	9	36	85	48	54	6 miles southeast of Columbus, Ind.
1950	38	50	21	88	9	33	8 miles north-northwest of Olney, Richland County, Ill.
1960	38	35	58	89	12	35	In Clinton County about 6½ miles northwest of Centralia, Ill.
1970	38	27	47	89	42	22	5.3 miles east southeast of the Mascoutah City Hall in St. Clair County, Ill.

No. 8. State Centers of Population: 1970

[See headnote, table 6]

STATE	Latitude			Longitude			Approximate location
	°	′	″	°	′	″	
Alabama	32	59	28	86	46	39	In Chilton County, 13 miles northwest of Clanton.
Alaska	61	08	24	148	58	47	In Anchorage Census Division, 35 miles southeast of Anchorage.
Arizona	33	17	09	111	41	15	In Maricopa County, 25 miles southeast of Phoenix.
Arkansas	34	54	52	92	21	05	In Pulaski County, 12 miles north-northwest of Little Rock.
California	35	28	03	119	28	31	In Kern County, 27 miles west-northwest of Bakersfield.
Colorado	39	26	37	105	07	36	In Jefferson County, 21 miles south-southwest of Denver.
Connecticut	41	29	17	72	52	38	In Cheshire town, New Haven County, 5 miles southwest of Meriden.
Delaware	39	28	44	75	33	33	In New Castle County, in the Delaware River, 19 miles south of Wilmington.
District of Columbia	38	54	22	77	00	29	1.2 miles north-northeast of the Capitol.
Florida	27	51	49	81	43	32	In Polk County, 7 miles east-southeast of Bartow.
Georgia	33	08	52	83	48	13	In Jasper County, 10 miles northeast of Forsyth.
Hawaii	21	13	38	157	39	20	In Honolulu County, in Kaiwi Channel, 4 miles southeast of Koko Head.
Idaho	44	12	00	114	49	57	In Custer County, 6 miles east of Stanley.
Illinois	41	13	03	88	23	12	In Grundy County, 12 miles south of Morris.
Indiana	40	11	48	86	17	30	In Clinton County, 13 miles southeast of Frankfort.
Iowa	41	59	46	93	05	14	In Marshall County, 10 miles southwest of Marshalltown.
Kansas	38	27	39	96	39	46	In Chase County, 16 miles southwest of Council Grove.
Kentucky	37	48	54	85	16	57	In Washington County, 10 miles east of Bardstown.
Louisiana	30	43	44	91	28	41	In West Feliciana Parish, 28 miles northwest of Baton Rouge.
Maine	44	26	57	69	37	20	In Vassalboro town, Kennebec County, 7 miles south of Waterville.
Maryland	39	09	51	76	47	11	In Howard County, 7 miles south of Ellicott City.
Massachusetts	42	17	26	71	23	40	In Framingham town, Middlesex County, 2 miles west-northwest of Natick.
Michigan	42	48	21	84	02	58	In Shiawassee County, 20 miles southwest of Flint.
Minnesota	45	14	12	93	39	01	In Wright County, 25 miles northwest of Minneapolis.
Mississippi	32	36	57	89	39	18	In Leake County, 3 miles west-northwest of Lena.
Missouri	38	31	27	92	01	36	In the Osage River, on the Osage County-Cole County line, 8 miles east-southeast of Jefferson City.
Montana	46	53	52	110	49	30	In Meagher County, 5 miles west-southwest of Neihart.
Nebraska	41	11	49	97	32	49	In Polk County, within the city of Osceola.
Nevada	37	38	16	116	45	08	In Nye County, 40 miles south-southeast of Tonopah.
New Hampshire	43	11	35	71	28	45	In Pembroke town, Merrimack County, 3 miles east of Concord.
New Jersey	40	29	45	74	24	04	In Edison township, Middlesex County, 1 mile east of Highland Park.
New Mexico	34	34	45	106	06	53	In Torrance County, 10 miles northeast of Mountainair.
New York	41	30	49	74	43	02	In Forestburgh town, Sullivan County, 9.5 miles south of Monticello.
North Carolina	35	34	28	79	40	12	In Randolph County, 11 miles south-southeast of Asheboro.
North Dakota	47	27	48	99	30	57	In Wells County, 8.5 miles east of Bowdon.
Ohio	40	32	42	82	40	45	In Morrow County, 18 miles south-southwest of Mansfield.
Oklahoma	35	35	02	96	56	20	In Lincoln County, 8 miles south-southwest of Chandler.
Oregon	44	44	33	122	33	10	In Linn County, 28 miles southeast of Salem.
Pennsylvania	40	27	17	77	11	59	In Centre township, Perry County, 3 miles north of Bloomfield.
Rhode Island	41	45	39	71	26	02	In Cranston City, Providence County, 1.25 miles south of Cranston city hall.
South Carolina	34	03	35	81	02	55	In Richland County, 5 miles north of Columbia.
South Dakota	44	08	29	98	57	55	In Buffalo County, 20 miles west-northwest of Wessington Springs.
Tennessee	35	45	45	86	30	06	In Rutherford County, 8 miles southwest of Murfreesboro.
Texas	31	04	52	97	31	30	In Bell County, 11 miles west of Temple.
Utah	40	33	51	111	49	43	In Salt Lake County, 7 miles south of Holladay.
Vermont	44	02	45	72	48	24	In Granville town, Addison County, 19 miles southwest of Montpelier.
Virginia	37	36	20	77	58	35	In Powhatan County, 30 miles west-northwest of Richmond.
Washington	47	21	10	121	31	57	In King County, 15.5 miles southeast of North Bend.
West Virginia	38	43	44	80	58	42	In Gilmer County, 16 miles south-southwest of Glenville.
Wisconsin	43	40	56	88	55	04	In Mackford town, Green Lake County, 4 miles southeast of Markesan.
Wyoming	42	40	09	106	46	59	In Natrona County, 26 miles west-southwest of Casper.

Z Less than 0.05 percent.

[1] For 1940–1972, includes admissions into and discharges from Armed Forces abroad. Through 1970, includes "error of closure" (the amount necessary to make the components of change add to the net change between censuses), for which figures are not shown separately. [2] Percent of population as of Jan. 1. [3] Adjusted for underregistration prior to April 1, 1970. [4] Prior to April 1, 1960 adjusted for underregistration of infant deaths.

[5] Annual births per 1,000 females 15 to 44 years of age.

Source: U.S. Bureau of the Census, *Current Population Reports*, series P-25, No. 499.

No. 10. Estimated and Projected Total Fertility Rates: 1960 to 2005

[Represents the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified calendar year. Rates differ slightly from those published by the National Center for Health Statistics. They are the sum of single year of age central birth rates which are based on births adjusted for underregistration and numbers of females adjusted for net census undercount. The rates for 1970 and 1971 were estimated on the basis of vital statistics data from selected States. For brief statement of assumptions, see headnote, table 3]

Year	Series C	Series D	Series E	Series F	Year	Series C	Series D	Series E	Series F
Estimates:					Projections—Con.

X Not applicable. Z Less than 0.05 percent. [1] For United States, population of United States has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted. [2] See footnote 1, table 1. [3] 1930 as of Oct. 1, 1929; 1940 as of Oct. 1, 1939.

Density—States and Puerto Rico: 1920 to 1970

present area of State. Minus sign (−) denotes decrease. For composition of regions, see fig. I, p. xii. See also *Historito 1957*, series A 123-180]

No. 15. Population Projections—States: 1980 and 1990

[In thousands. As of July 1. Preliminary. Roman numerals indicate interstate migration assumptions. Series I assumes 1960–1970 migration patterns will continue. Series III assumes no net interstate migration. Letters C and E represent national population projection series in *Current Population Reports*, series P–25, No. 470. See source for detailed explanation]

No. 18. Urban and Rural Places and Population, by Size of Place: 1910 to 1970

[Prior to 1960, excludes Alaska and Hawaii. "Previous urban definition" refers to the definition used prior to 1950 when a number of large and densely settled places were not included as urban because they were not incorporated. In 1950, the Bureau of the Census adopted the concept of the urbanized area and delineated boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition. See also *Historical Statistics, Colonial Times to 1957*, series A 181–209]

Class and size	Previous urban definition					Current urban definition		
	1910	1920	1930	1940	1950	1950	1960	1970
Places								
Urban [1]	2,262	2,722	3,165	3,464	4,054	4,741	6,041	7,062

[1] In 1940 and later censuses, Bluefield, Va., and Bluefield, W. Va.; Bristol, Tenn., and Bristol, Va.; Delmar, Del., and Delmar, Md.; Harrison, Ohio, and West Harrison, Ind.; Junction City, Ark., and Junction City, La.; Texarkana, Ark., and Texarkana, Tex.; Texhoma, Okla., and Texhoma, Tex.; and Union City, Ind., and Union City, Ohio, were counted as separate incorporated places, whereas in 1930 each pair was counted as a single place.

No. 23. Cities With 100,000 Inhabitants or More in 1970—Population, 1940 to 1970, and Area, 1970

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin]

No. 27. Components of Population Change, by Race, Between 1960 and 1970

[**In thousands, except as indicated.** Total population, including Armed Forces abroad; growth, birth, and death rates per 1,000 population estimated as of July 1]

ITEM	Total	White	Other races
Population:			
1960	180,007	159,467	20,540
1970	204,265	178,580	25,686
APR. 1, 1960 TO APR. 1, 1970			
Components of change:			
Net increase	24,258	19,113	5,145
Births [1]	39,033	32,476	6,557
Deaths [2]	18,247	16,030	2,217
Net immigration [3]	3,472	2,666	806
Percent of 1960 population:			
Net increase	13.5	12.0	25.0
Births [1]	21.7	20.4	31.9
Deaths [2]	10.1	10.1	10.8
Net immigration [3]	1.9	1.7	3.9
1960 (calendar year):			
Net growth rate	16.0	14.8	25.1
Birth and death rates:			
Births [1]	23.8	22.7	33.0
Deaths [2]	9.5	9.4	10.0
General fertility rate [4]	119.1	113.8	158.8
1970 (calendar year): [5]			
Net growth rate	10.9	9.6	20.1
Birth and death rates:			
Births [1]	18.3	17.3	25.3
Deaths [2]	9.4	9.5	9.1
General fertility rate [4]	88.0	83.9	114.3

[1] Adjusted for underregistration. [2] Includes deaths in the Armed Forces abroad.
[3] Includes changes due to admissions into, and discharges from, Armed Forces abroad, amounting to 11,000 for the total population, and "error of closure" (the amount necessary to make the components of change add to the net change between censuses). [4] Births per 1,000 females aged 15 to 44 as of July 1. [5] Preliminary.

No. 49. Households, by Population Per Household and Race of Head: 1900 to 1972

[Prior to 1960, excludes Alaska and Hawaii. Data for 1900-1970 are for census dates; see table 1. For definition of household, see text, p. 3. See also *Historical Statistics, Colonial Times to 1957*, series A 242 and A 255-263]

Item	1900 (June)	1910 (Apr.)	1920 (Jan.)	1930 (Apr.)	1940 (Apr.)	1950 (Apr.)	1960 (Apr.)	1970 (Apr.)	1972 (Mar.)
All households 1,000	15,964	[1] 20,256	[1] 24,352	29,905	34,949	42,857	53,021	63,450	66,676
Average annual change since prior year shown 1,000	(X)	434	418	542	504	791	1,016	1,043	1,683
Percent [2]	(X)	2.44	1.90	2.02	1.56	2.06	2.15	1.80	2.59
Population per household [3]	4.76	4.54	4.34	4.11	3.77	3.52	3.38	3.20	3.11
White households 1,000	14,064	[4] 18,002	21,826	26,983	31,680	[5] 39,044	47,868	56,529	59,463
Percent	88.1	88.9	89.6	90.2	90.6	91.2	90.3	89.1	89.2
Negro households 1,000	1,834	2,173	2,431	2,804	3,142	[5] 3,633	5,153	6,180	6,578
Other households 1,000	66	[4] 81	95	118	127	[5] 149		741	635

X Not applicable. [1] Includes small number of hotels, institutions, and other group quarters.
[2] Computed by compound interest formula. [3] Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of group quarters.
[4] Estimated. [5] Population in occupied housing units.

No. 50. Households, Families, and Individuals—Projections: 1975 to 1990

[**In thousands.** As of July 1. Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Series 1 assumes that the annual change in the proportions of the evermarried and single population who are heads of households or families will be the same as from 1957 to 1969, in general. Series 2 assumes that rates of change in the proportions of the evermarried and single population who are heads of households or families will be one-half those for Series 1. For additional explanation, see source]

Year and series	Households						All families	Unrelated individuals [1]
	Total	Primary families			Primary individuals

No. 62. Religious Bodies—Selected Data

[Represents latest information available from religious bodies with memberships of 50,000 or more; excludes a few groups giving no data. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and The Episcopal Church now report all baptized persons, and not only those confirmed. Data which appear in italics are "noncurrent," i.e., they are reported for 1970 or earlier. All other data are "current" and were reported in 1971 or 1972]

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental illness, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the National Center for Health Statistics in the annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *Monthly Vital Statistics Report*. Reports in this field are also issued by State bureaus of vital statistics. Current data on fertility of the population and on age of persons at first marriage are compiled by the Bureau of the Census from its Current Population Survey (see text, p. 1) and published in *Current Population Reports*, series P–20.

Births and deaths.—The collection of death statistics on an annual basis began in 1900 with 10 registration States and the District of Columbia; the collection of birth statistics began in 1915, also with 10 States and the District of Columbia. The changing composition of the two registration areas [1] makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. Beginning 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Before 1946, vital statistics for the United States were compiled by the Bureau of the Census. From 1946 until 1960 this function was located in the Bureau of State Services of the Public Health Service. In 1960 it became a part of the National Center for Health Statistics, now located in the Health Services and Mental Health Administration, Department of Health, Education, and Welfare.

Prior to 1951, birth statistics were the result of a complete count of the records received in the Public Health Service (now in the National Center for Health Statistics). Since 1951, they have been based on a 50-percent sample of all registered births (except for 1955 when they reverted to a complete count and for 1967 when they were based on a 20–50 percent sample). Current provisional death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) and deaths among Armed Forces abroad are excluded.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries, and Causes of Death*. The current classification, "Eighth Revision International Classification of Diseases, Adapted for Use in The United States," has been used beginning with 1968.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for various years from 1867 to 1940 and for each year since 1944. Estimates have been made for intervening years and for years in which collections were not complete. A marriage-registration area was established by the Public Health Service in 1957, and a divorce-registration area in 1958. At the beginning of 1973, the marriage-registration area covered 41 States and 3 independent registration areas; the divorce-registration area, 29 States and 1 independent area.

Vital statistics rates.—Vital statistics rates computed by the National Center for Health Statistics are based upon the enumerated population figures as of April 1 for 1940, 1950, 1960, and 1970 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted.

[1] For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1–5.

Medical care.—Historical data on national health expenditures, by source of public and private funds and by object of expenditure, are compiled by the Social Security Administration and appear annually in the *Social Security Bulletin*. From this series are derived estimates of total personal health care expenditures, private consumer expenditures for health services, and those portions of such expenditures met by private health insurance and third-party payments, which include private health insurance benefit payments, government expenditures, and philanthropy, and the expenditures of employers to maintain in-plant health facilities.

Data on physicians, dentists, nurses, and other providers of health services are published in the *Health Manpower Source Book Series*, Public Health Service Publication No. 263. A comprehensive compilation of data on some 35 categories of health occupations, three categories of inpatient health facilities, and outpatient and nonpatient health services is presented in the annual *Health Resources Statistics*, Public Health Service Publication No. 1509.

Statistics of hospitals are obtained from the American Hospital Association's annual survey of hospitals. They are published annually in *Hospitals*, Guide Issue, and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements, as follows: It must have at least 6 beds for the care of nonrelated patients for an average stay of over 24 hours per admission; be constructed and equipped to insure safety of patients and to provide sanitary facilities for their treatment; have an organized medical staff, registered nurse supervision, and nursing care for round-the-clock patient care; maintain clinical records on all patients and submit evidence of patient care by doctors; provide minimal surgical and obstetrical facilities or relatively complete diagnostic and treatment facilities; have diagnostic X-ray and clinical laboratory services readily available; and offer services more intensive than those required merely for room, board, personal services, and general nursing care.

The Social Security Administration is another source of data for hospitals and nursing homes. These data, available by State for such institutions and for extended care facilities and home health agencies, are based on the Health Insurance for the Aged program (Medicare) begun in 1966. They differ from those of the American Hospital Association and other sources because they are limited to the facilities meeting Federal eligibility standards for participation in Medicare.

Data on persons receiving inpatient care in short-stay hospitals, resident patients in mental hospitals, and residents of homes for the aged and chronically ill are collected by the National Center for Health Statistics and presented in *Vital and Health Statistics*, Series 12 and 13; data on patient visits to physicians, dentists, and other providers of health care are furnished in Series 10.

Another aspect of medical care is provided by statistics on patients in hospitals for the mentally ill, psychiatric services of general hospitals, outpatient psychiatric clinics, and institutions for the mentally retarded. From 1923 to 1946, data on mental health were collected annually by the Bureau of the Census. Since 1946 they have been issued by the Public Health Service. From 1947 through 1966, hospital data appeared annually in *Patients in Mental Institutions* and, from 1959 through 1966, clinic data appeared in *Data on Patients of Outpatient Psychiatric Clinics in the United States*. In 1967, these data appeared in *Mental Health Statistics*, Series A—*Mental Health Facilities Reports*. The 1968 and 1969 data are published as reference tables for the different types of facilities. *Mental Health Statistics—Current Facility Reports* presented provisional data through 1969. These are now in the Statistical Note series which also include special reports as they become available.

Statistics on institutional population based on the 1960 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (see table 60).

Illness and disability.—Annual data on notifiable diseases, based on reports from State health departments, are compiled by the National Center for Health Statistics at its Center for Disease Control in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report.* The list of notifiable diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are communicable diseases of national importance.

General health statistics, including morbidity, disability, and the utilization of health services, are provided by the various surveys that make up the National Health Survey of the National Center for Health Statistics. They are published in *Vital and Health Statistics,* Series 10 and 11. Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see p. 247).

Nutrition.—Statistics on the annual per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation.* Data beginning with 1909 are published in *Food Consumption, Prices, and Expenditures,* Agricultural Economics Report No. 138, July 1968; they are updated in annual supplements. Data on Federal food distribution programs, quantity and cost of food commodities distributed, value of food stamps issued, and number of persons participating in the programs are published annually in *Agricultural Statistics.*

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 76. Birth Rates, by Live-Birth Order, All Women: 1940 to 1968

[**Births per 1,000 women 15-44 years old.** Prior to 1960, excludes Alaska and Hawaii. Live-birth order refers to number of children born alive. Figures for births of order not stated are distributed. See also headnote, table 68, and *Historical Statistics, Colonial Times to 1957*, series B 10-18]

Live-birth order	1940	1945	1950	1955	1960	1964	1965	1966	1967	1968
Total	80	86	106	119	118	105	97	91	88	[1] 86
First birth	29	29	33	33	31	30	30	31	31	32
Second birth	20	23	32	32	29	25	23	22	23	22
Third birth	11	13	18	23	23	19	17	15	14	13
Fourth birth	6	8	9	13	15	12	11	9	8	8
Fifth birth	4	5	5	7	8	7	6	5	5	4
Sixth birth	3	3	3	3	5	4	4	3	3	2
Seventh birth	2	2	2	3	3	3	2	2	2	1
Eighth birth and over	4	4	4	4	4	4	4	3	3	2

[1] Birth rates for 1969 and 1970 are 86 and 88, respectively. Detail not available.

Source: U.S. National Center for Health Statistics, *Vital Statistics of the United States*, annual.

No. 77. Total Fertility Rate and Intrinsic Rate of Natural Increase, by Race: 1940 to 1968

[Excludes Hawaii and, prior to 1959, Alaska. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions. The *intrinsic rate of natural increase* is the rate that would eventually prevail if a population were to experience, at each year of age, the birth rates and death rates occurring in the specified year and if these rates remained unchanged over a long period of time]

Period or year	Total fertility rate			Intrinsic rate of natural increase (expressed as a percent)		
	Total	White	Negro and other	Total	White	Negro and other
1940-1944	2,523	2,460	3,010	0.5	0.4	1.0
1945-1949	2,985	2,916	3,485	1.2	1.1	1.7
1950-1954	3,337	3,221	4,185	1.7	1.5	2.6
1955-1959	3,690	3,549	4,716	2.1	2.0	3.1
1960-1964	3,459	[1] 3,331	[1] 4,375	1.9	[1] 1.7	[1] 2.8
1965	2,928	2,790	3,891	1.2	1.0	2.3
1966	2,736	2,609	3,615	1.0	0.8	2.0
1967	2,573	2,453	3,385	0.7	0.6	1.8
1968	2,477	2,368	3,197	0.6	0.4	1.6

[1] Figures by race exclude data for residents of New Jersey for 1962 and 1963.

NA Not available. [1] Represents deaths of infants under 1 year old, exclusive of fetal deaths.
[2] Per 100,000 live births from deliveries and complications of pregnancy, childbirth, and the puerperium. For 1960–1967, deaths are classified according to seventh revision of *International Lists of Diseases and Causes of Death;* thereafter, according to eighth revision; see text, p. 49.
[3] Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more or was not stated. [4] Represents deaths of infants under 28 days old, exclusive of fetal deaths.

Suicide	11.4	10.2	10.6	11.1	11.1	11.1	11.1	22,630	22,980
Homicide	5.3	4.5	4.7	5.5	7.7	7.6	8.5	15,610	17,580
All other causes	52.3	50.3	55.3	48.9	57.4	58.7	59.3	119,890	122,600

[1] Based on resident population enumerated as of Apr. 1 for 1950, 1960, and 1970, and estimated as of July 1 for other years.
[2] Estimated; based on a 10-percent sample of death certificates.
[3] Included in "All other causes." Comparable data not available separately.
[4] With or without renal disease.
[5] Excludes pneumonia of newborn.

No. 85. Death Rates for the 10 Leading Causes of Death—States: 1969

[**By place of residence.** Refers only to deaths occurring within the United States. Rates per 100,000 estimated midyear population in each area. Causes of death classified according to eighth revision of the International Classification of Diseases, see text, p. 49. For method of selecting the leading causes of death, see *Vital Statistics of the United States, 1968*, Technical Appendix, Part A]

S Does not meet publication standards because reporting less than 90 percent complete.

[1] Preliminary. Represents either marriages performed, licenses issued, or intentions filed. U.S. total based on receipts corrected for observed differences between provisional and final data. State data are not corrected in this manner. [2] Per 1,000 population. Based on total population residing in area; population enumerated as of Apr. 1 for 1960 and 1970, estimated as of July 1 for 1971. [3] Includes reported annulments.

[4] Incomplete. [5] Marriage licenses. [6] Estimated.

NA Not available.

[1] Places providing some form of nursing, personal, or domiciliary care; standards vary widely among States. For detailed definitions, see source.

[2] Covers facilities participating in Health Insurance for the Aged Program, which have transfer agreements with one or more participating hospitals and are primarily engaged in providing skilled nursing care and related services or services for the rehabilitation of injured, disabled, or sick persons.

[3] Skilled nursing beds only. Rates based on persons enrolled in hospital insurance program, as of Jan. 1, 1972.

[4] 1972 data.

– Represents zero. [1] Includes returns from extended leave as well as admissions and readmissions.
[2] Source: U.S. Social and Rehabilitation Service, *Residents in Public Institutions for the Mentally Retarded*, annual. [3] Excess of patients released alive from hospital (direct discharges plus leave placements) over those returning to hospitals. [4] Excludes 68 VA clinics. [5] No institutions for mentally retarded; patients requiring hospitalization receive care at State mental hospital.

Source: Except as noted, U.S. National Institute of Mental Health, *Psychiatric Services in General Hospitals, 1969–70*, series A, No. 11, and *Professional Patient Movement and Administrative Data, State and County Mental Hospitals, In-patient Services, July 1, 1971 to June 30, 1972*, Statistical note 77.

No. 119. Mentally Ill—Patient Care Episodes, by Type of Facility: 1955 to 1971

[Estimated. Includes resident patients at beginning of year or those on active rolls of outpatient clinics, plus those admitted during year. Number of patients at beginning of the year is an unduplicated count, equal to number of individual patients in this status. Number of admissions contains some duplication]

Item and year	All facilities	Hospitals, inpatient services					Outpatient psychiatric services [1]	Community mental health centers [4]	Day treatment services [5]

[1] A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days.
[2] A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.
[3] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over in the currently employed population, defined as those who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.
[4] Child's loss of entire school day because of illness or injury. Computed for children 6-16 years of age.

- Represents zero.
D Withheld to avoid disclosing figures for individual producers.
[1] Excludes alicyclic and heterocyclic compounds for 1960; beginning 1965, excludes methionine.
[2] Excludes benzenoid compounds.
[3] Includes some sales of aspirin tablets inadvertently reported as bulk sales through 1965.
[4] Includes most but not all choline salts. [5] Choline chloride only.
[6] For human or veterinary use only through 1960. Sales of mixture and dosage-form products included through 1960; excluded thereafter. [7] Excludes semi-synthetic penicillins.
[8] Beginning 1965, excludes derivatives other than salts. [9] Peperazine only.
[10] Peperazine and peperazine dehydrochloride only.
[11] Includes skeletal muscle relaxants.
[12] Excludes K vitamins through 1960.

No. 131. Nutrition—Nutrients Available for Civilian Consumption per Capita per Day: 1940 to 1972

[Prior to 1960, excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data include quantities of iron, thiamin, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A value added to margarine, milk of all types, milk extenders, and used in other foods; quantities of ascorbic acid added to fruit juices, drinks, flavored beverages and dessert powders, milk extenders, cereals, and used in other foods. Minus sign (–) denotes decrease. See also *Historical Statistics, Colonial Times to 1957*, series G 546-551]

No. 137. Cost of U.S. Department of Agriculture Food Plans: 1970 and 1972

[As of December. Cost of the Economy Plan is often used as the minimum price for purchasing a nutritionally good diet. Studies show that most families that spend this little do not select foods that make up a good diet. The Low-cost Plan costs about 25 percent more than the Economy Plan]

FAMILY MEMBERS	1970		1972	
	Cost per month		Cost per month	
	Economy plan	Low-cost plan	Economy plan	Low-cost plan
Woman, 35–55 years	$30.70	$38.40	$33.50	$41.90
Couple, 55–75 years	51.90	64.90	53.40	70.50
Parents, 20–35 years, two preschool children	92.00	114.80	99.80	124.90
Parents, 20–35 years, two elementary school children	106.70	133.30	115.90	145.00
Parents, 35–55 years, two preschool, two elementary school children and two teenagers	177.60	221.80	192.60	240.90

No. 140. School Lunch Program—States and Other Areas: 1972

[Comprises elementary and secondary schools. The cash plan is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Federal Government for local purchases of food on a basis of quality and quantity of meals served]
