MONEY INCOME IN 1972 OF FAMILIES AND PERSONS IN THE UNITED STATES

(Advance data from March 1973 Current Population Survey)

According to the most recent estimates of the Bureau of the Census, part of the U.S. Department of Commerce's Social and Economic Statistics Administration, the median money income of families in the United States rose to $11,120 in 1972, an increase of about 8.1 percent over 1971. Although some of this increase was eroded by rising prices, the net gain in real purchasing power was still notable. After adjusting for the rise in prices last year, the 1972 median in terms of constant dollars increased by about 4.6 percent over the 1971 median.

The median income of Negro families was $6,860 or about 59 percent of the median income of white families of $11,550. Statistically, this ratio is not significantly different from that of 1971. For Negro families, the 1972 median was significantly higher than the 1971 median of $6,440.

Of the 54.4 million families in the United States in March 1973, 30.7 million or 56.4 percent received incomes of $10,000 or more in 1972. There were 9.1 million families (16.8 percent) with incomes between $7,000 and $10,000; 5.6 million families (10.2 percent) with incomes between $5,000 and $7,000; and 9.0 million families (16.6 percent) with incomes below $5,000 in 1972.

The 1972 median income for men working year round full time was $10,540, an increase of 9.4 percent over the 1971 median. Between 1971 and 1972, the median income for women working year round full time increased by 6.2 percent reaching a level of $6,050, or about 57 percent of the income of men.

For income recipients in 1972, the median incomes of men and women were $7,450 and $2,600, respectively. The rate of increase between 1971 and 1972 for both medians was 7.9 percent.

The 1972 income statistics presented in this report were obtained from the Census Bureau's Current Population Survey (CPS) of March 1973.

Table A. Number of Families and Unrelated Individuals by Total Money Income in 1972

(Families and unrelated individuals as of March 1973)

Total money income	Number of--	
	Families	Unrelated individuals
Total.....	54,373,000	16,811,000
Under $1,000.....	683,000	1,638,000
$1,000 to $1,999.....	1,183,000	3,030,000

Median income.....	$11,116	$3,521

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, 25 cents. Current Population Reports issued in Series P-20, P-23, P-25, P-26, P-27, P-28 (summaries only), P-60, and P-65 are sold as a single consolidated subscription at $30.50 per year, $7.75 additional for foreign mailing.

The information was collected from the civilian noninstitutional population and members of the Armed Forces living off post or with their families on post in the United States. More detailed income data for families and persons will appear in a report in this series to be issued later this year. Furthermore, another report in this series will be issued which will show detailed income data for households.

Data on income collected in the CPS are limited to money income received before payments for personal income taxes, Social Security, union dues, Medicare deductions, etc. Money income is the sum of the amounts received from earnings; Social Security and public assistance payments; dividends, interest, and rent; unemployment and workmen's compensation; government and private employee pensions; and other periodic income. (Certain money receipts such as capital gains are not included.) Therefore, money income does not reflect the fact that many families receive part of their income in the form of nonmoney transfers such as food stamps, health benefits, and subsidized housing; that many farm families receive nonmoney income in the form of rent-free housing and goods produced and consumed on the farm; or that nonmoney incomes are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to underreport their income. Overall aggregate income compiled in the CPS was about 90 percent of preliminary benchmark estimates in 1972. From an analysis of independently derived income estimates, it has been determined that wages and salaries tend to be much better reported than such income types as public assistance, Social Security, and net income from interest, dividends, rentals, etc. For further details, see Current Population Reports, Series P-60, No. 85.

In the March 1973 Current Population Survey (CPS) of the Bureau of the Census, approximately 47,000 households were eligible for interview. Of this number, 2,000 occupied units, on the average, were visited, but interviews were not obtained because the occupants were not found at home after repeated calls or were unavailable for some other reason. Since the estimates in this report are based on a sample, they are subject to sampling variability. Moreover, as in all field surveys of income, the figures are subject to errors of response and nonreporting. All statements of comparison appearing in the text are significant at a 2.0 standard error level or better. Thus, for all differences cited in the text, the estimated difference is greater than twice the standard error of the difference. This means that the chances are at least 19 in 20 that a difference identified in the text indicates a true difference in the population rather than the chance variations arising from the use of samples. Statements of comparison qualified in some way (e.g., by use of the phrase "some evidence") have a level of significance between 1.6 and 2.0 standard errors.

Table 1. FAMILY INCOME, 1947, 1950, AND 1960 TO 1972--FAMILIES BY TOTAL MONEY INCOME

(Families as of March of the following year. This report excludes inmates of institutions. It includes members of the Armed Forces in the United States living off post or with their families on post but excludes all other members of the Armed Forces; the 1973 survey included about 979,000 members)
