Section 33

Statistics for Federal Administrative Regions and States

This section presents statistics for the ten standard Federal administrative regions (SFAR's) and their component States as officially designated by the U.S. Office of Management and Budget (Circular No. A-46, Transmittal Memorandum No. 16, August 1972). For reader identification, the title of each region, as shown here, includes the name of the city in which the region headquarters offices are located.

In a directive issued in 1969, President Nixon instructed various Federal agencies (among them the Department of Health, Education, and Welfare, the Department of Labor, the Office of Economic Opportunity, and the Small Business Administration) to adopt a uniform field system of ten geographic regions with common boundaries and headquarters cities. The President's action was taken to correct the development over a period of many years of a fragmentation of Federal field organization structures, as each agency or component evolved along its own lines with little reference to other agency arrangements. As a result of the President's directive, most Federal domestic agencies or their components have completed realignments and relocations to conform to the SFAR's shown here.

In February 1972, President Nixon issued Executive Order 11647 establishing a Federal Regional Council for each of the SFAR's in further implementation of "the development of closer working relationships between major Federal grant making agencies and State and local governments and improved coordination of the categorical grant system."

Reprints of this section of the *Statistical Abstract* and section 34, Metropolitan Area Statistics, may be obtained under the title of "Statistics for Federal Regions, States, and Metropolitan Areas" from the Superintendent of Documents, Washington, D.C., 20402, or from any U.S. Department of Commerce District Office. The price per copy is $1.15; a 25 percent discount is allowed on orders of 100 copies or more sent to the same address.

Metropolitan Area Statistics

Statistics from various Federal Government and private sources are presented here for areas officially designated by the U.S. Office of Management and Budget (OMB) as Standard Metropolitan Statistical Areas (SMSA's). Definitions of the SMSA's in terms of their geographic components are presented in U.S. Bureau of the Budget (predecessor of OMB), *Standard Metropolitan Statistical Areas*, issued in 1967, with subsequent amendments. See also U.S. National Bureau of Standards, *Metropolitan Statistical Areas*, Federal Information Processing Standards Publication (FIPS Pub. 8-4, June 30, 1974).

Data shown here are based on the SMSA definitions as amended by OMB to April 5, 1974. On that date, there were 269 SMSA's (including 4 in Puerto Rico). Area titles, county components, and population totals for all SMSA's are shown on pages 926–931. However, in the table beginning on p. 866, data are presented only for the 157 SMSA's having 200,000 or more inhabitants in 1970, excluding San Juan, Puerto Rico. A total of 202 items is shown for each SMSA. Many of the source publications cited also present statistics for the SMSA's with less than 200,000 inhabitants.

Standard definitions of metropolitan statistical areas were first issued by the then Bureau of the Budget in 1949, under the designation "Standard Metropolitan Areas"; the present designation was adopted in 1959. The general concept of a metropolitan area is one of an integrated economic and social unit with a large population nucleus.

The criteria for the establishment and definition of SMSA's have undergone several modifications since 1949. The current criteria were adopted in November 1971; they provide that each SMSA must include at least:

(a) One city with 50,000 or more inhabitants, or

(b) A city having a population of at least 25,000 which, with the addition of the population of contiguous places, incorporated or unincorporated, having a population density of at least 1,000 persons per square mile, and which together constitute, for general social and economic purposes, a single community with a combined population of at least 50 000, provided that the county or counties in which the city and contiguous places are located has a total population of at least 75,000. (In New England, the cities and towns qualifying for inclusion in an SMSA must have a total population of at least 75,000.)

In addition to the central city or cities, the criteria provide that the SMSA include the county in which the central city is located, and adjacent counties that are determined to be metropolitan in character and economically and socially integrated with the county of the central city, according to specific rules. (In New England, as noted below, the units comprising the area are cities and towns rather than counties.) The largest city in each SMSA is designated a "central city"; in addition, there may be up to two additional central cities if certain criteria are met. With two exceptions, the title of each SMSA includes the names of its central city or cities. An SMSA may include other cities of 50,000 or more besides its central cities, and may include territory in more than one State.

Reprints of this section and section 33 of the *Statistical Abstract* may be obtained under the title of "Statistics for Federal Regions, States, and Metropolitan Areas" from the Superintendent of Documents, Washington, D.C. 20402, or from any U.S. Department of Commerce District Office. The price per copy is $1.15; a 25 percent discount is allowed on orders of 100 copies or more sent to the same address.

New England SMSA's and SEA's. Because SMSA's in New England are defined in terms of cities and towns, rather than counties, some statistical data that are available only for counties cannot be compiled for individual New England SMSA's. Therefore, data are shown for New England areas for both metropolitan State economic areas (SEA's) and SMSA's wherever possible. The SEA's are defined in terms of counties and represent approximations of the New England SMSA's in county terms.

Effect of changes in SMSA definitions. Changes in the definitions of SMSA's since 1949, have included the recognition of new areas, for example, as cities reached 50,000 population, and the addition of counties (or towns in New England) to existing SMSA's. Several formerly separate SMSA's have been merged. and occasionally territory has been transferred from one SMSA to another or (in rare instances) from an SMSA to nonmetropolitan territory. Comparisons of SMSA figures over time may be affected if the SMSA definitions underwent alteration. Where possible in this volume, in order to maintain comparability, data for an earlier period have been revised to reflect the SMSA boundaries of the more recent period. However, this could not always be done. In particular, for data based on a sample survey, it is usually not possible to reflect changes in SMSA definitions that occurred after the survey was made.

In the 3 tables that follow, data are given for SMSA's as defined for specified dates, and thereby indicate the extent of change in population and land area resulting from revisions in definitions.

TABLE A. NUMBER, POPULATION, AND LAND AREA OF SMSA'S AS DEFINED AT SPECIFIED DATES: 1940 TO 1970

[The differences in population shown here for each census year (in the successive columns of the table) result entirely from net expansion of metropolitan territory through changes in the SMSA definitions. The differences in population shown for each SMSA definition (on the successive lines of the table) result entirely from population changes within that territory, unaffected by changes in SMSA definitions. The changes in 1970 land area result entirely from net expansion of SMSA territory. All data include Alaska and Hawaii and exclude Puerto Rico. Subtraction of any line of the table from the line below will show the net effect of change in population and land area undergone by the SMSA's as the result of changes in definitions between the specified dates. Such changes typically occurred throughout the period, not on any single date, and may have included subtractions from, as well as additions to, SMSA territory. The area data for the 1950 and 1960 census definitions of SMSA's differ from the data published in those censuses because they are based on a remeasurement of land areas made during the 1960's, and also reflect changes in inland water area occurring up to 1970]

SMSA DEFINITION AS OF—	Number of SMSA's	POPULATION				Land area (sq. mi.) 1970
		1940	1950	1960	1970	
1950 census (Mar. 1952)	169	[1] 69,534,737	[2] 84,853,700	106,344,548	122,132,357	207,474
1960 census (Nov. 1960)	212	[3] 72,844,551	89,316,903	[4] 112,885,139	130,924,721	309,677
1964 (Aug. 31, 1964) [5]	217	74,869,415	91,644,188	115,876,343	134,639,374	349,557
1968 (Jan. 31, 1968) [6]	230	76,408,154	93,629,986	118,413,604	137,915,338	378,322
1970 census (Feb. 28, 1971)	243	77,154,871	94,579,008	[7] 119,593,498	[8] 139,418,811	[9] 387,601
1972 (Dec. 31, 1972)	265	78,807,814	96,702,805	122,597,097	143,241,829	412,317
1973 (Dec. 31, 1973)	264	81,964,042	100,101,102	126,501,161	148,012,561	489,834
1974 (Apr. 5, 1974)	265	82,033,517	100,187,647	126,613,710	148,131,506	491,098

[1] Corresponds to total 1940 population for 1950 SMSA's published in 1950 census (69,279,675), with addition of Honolulu SMSA and corrected by subtracting population (3,194) of Colonial Heights town erroneously included in Richmond SMSA.

[2] Corresponds to total SMSA population for 1950 published in 1950 census (84,500,680) plus Honolulu SMSA.

[3] Corresponds to total 1940 population for 1960 SMSA's published in 1960 census (72,834,468), corrected by adding population (13,277) erroneously omitted from Stamford SMSA (remainder of Stamford town), and subtracting population (3,194) of Colonial Heights town erroneously included in Richmond SMSA.

[4] Corresponds to total SMSA population for 1960 published in 1960 census (112,885,178), corrected by subtracting population (39) erroneously included in Franklin County, Ohio (Columbus SMSA).

[5] SMSA's as defined for the 1963 economic censuses. [6] SMSA's as defined for the 1967 economic censuses.

[7] Corresponds to total 1960 population for 1970 SMSA's published in 1970 census (119,594,754), corrected by subtracting 1,256 population from Lawrence-Haverhill SMSA; this represented an addition to the 1960 population of Andover town made subsequent to the original census tabulations, and therefore not reflected in State or national totals. [8] Corresponds to total SMSA population for 1970 published in 1970 census.

[9] Corresponds to total SMSA land area published in 1970 census (387,616 square miles), corrected by subtracting 15 square miles erroneously included in Roanoke SMSA.
