LANGUAGE MINORITY, ILLITERACY, AND VOTING DATA USED IN MAKING DETERMINATIONS FOR THE VOTING RIGHTS ACT AMENDMENTS OF 1975 (PUBLIC LAW 94-73)

This report brings together previously unpublished statistical summaries from the 1970 census and current population estimates compiled in order to determine the political subdivisions covered under the 1975 amendments to the Voting Rights Act of 1965, (Public Law 94-73). Included are (1) data summaries on the citizen population of voting age for minority language groups of 400 or more in any county or equivalent or in minor civil divisions in New England, Michigan, or Wisconsin; (2) percent of these populations illiterate (less than a fifth grade education); and (3) November 1, 1972 estimates of the citizen voting-age population of political subdivisions together with votes cast in the 1972 Presidential election and percent casting votes.

Tables 1 and 2 list those political subdivisions covered by Titles II and III of the Act amendments, respectively, together with the pertinent data used to make the determinations. In order to provide the reader with comparable data for areas not covered by the amendments, table 3 presents data on language minority and illiteracy for all voting-age language minorities in each political subdivision of 400 or more language minority and table 4 contains voting-age summaries for all political subdivisions.

The information on the number of votes cast was obtained from Scammon, Richard M., **America Votes 10**, Election Research Center, Washington, D.C. or from individual State offices of the Secretaries of State. Data on language minority groups, citizenship, and illiteracy were obtained from special tabulations from the 1970 census.

COVERAGE UNDER THE ACT AMENDMENTS

The 1975 Amendments to the Voting Rights Act of 1965, Public Law 94-73 require the Director of the Bureau of the Census to make certain determinations as to which States or political subdivisions of States fall under the purview of the legislation.

1. Under Title II of the Act amendment, the Bureau was required to determine those States and political subdivisions:

a. where more than 5 percent of the citizens of voting age were members of a single-language minority, and
b. where less than 50 percent of the citizens of voting age voted in the Presidential election of 1972.

In addition, the Attorney General has the responsibility for determining which of the specified subdivisions conduct "English only" elections (i.e., have test or device).

2. Under Title III of the Act amendment, the Congress mandated the Bureau to determine those States and political subdivisions:

a. where more than 5 percent of the citizens of voting age were members of a single-language minority, and
b. where the illiteracy rate for citizens of voting age for the specified language minority was greater than the national rate (4.6 percent).

If the above factors were present, the State or political subdivision was covered by the Act. Under Title II, if an entire State meets the qualifications for a specific language minority, all of the political subdivisions come under the provisions of the Act for that minority. Under Title III, if an entire State qualifies for coverage for a specific language minority, the political subdivisions with more than 5 percent of their citizen population in that language minority come under the Act (irrespective of illiteracy level).

Political subdivisions for the purposes of the Act have been defined by the Department of Justice as counties or independent cities except for the following: cities and towns in New England; cities and townships in Michigan; cities, villages, and towns in Wisconsin; election districts in Alaska; and parishes in Louisiana.

Language minority group is defined as any one of the following: Spanish heritage, Japanese, Chinese, Filipino, Korean, and American Indian, and in Alaska, Native Alaskan (Eskimos and Aleuts and American Indians as a group). The legislation defines illiteracy rates as the percentage of the citizen population 18 years and over completing less than 5 years of school.

Spanish heritage as defined in the 1970 census represents persons of "Spanish language" in all States except eight.[1] In five Southwestern States (Texas, New Mexico, Colorado, Arizona, and California) "heritage"

[1] Persons of Spanish language comprise persons of Spanish mother tongue and all other persons in families in which the head or wife reported Spanish as his or her mother tongue. See U.S. Bureau of the Census, **1970 Census of Population**, Supplementary Report, PC(S1)-30, **Persons of Spanish Ancestry**.

Report prepared by Gilbert R. Felton of the State and Local Estimates Branch, Population Division.

covers persons of Spanish language plus persons of Spanish surname. In New York, New Jersey, and Pennsylvania "heritage" constitutes those persons of Puerto Rican birth or parentage. Data for the other language minorities were obtained from the census question on race.

METHODOLOGY FOR DETERMINING COVERAGE

The estimates of the citizen population of voting age for counties in November 1972 were based on: (1) estimates of the resident population for July 1, 1972 and 1973 published in **Current Population Reports,** Series P-26, interpolated to November 1972; and (2) independent estimates of the population under 18 years by Component Method II for July 1, 1972 and 1973 interpolated to November 1972.[2] The estimated population under 18 was then deducted from the total to provide an estimate of the voting-age population for each county. The estimates were then adjusted to an independent estimate of the voting-age population for each State consistent with estimates published for States in **Current Population Reports,** Series P–25, Nos. 539 and 518. As a final step, the 1970 census count of aliens of voting age was deducted to provide estimates of citizens of voting age. These estimates were then used as the denominator relative to the number of votes cast in the 1972 Presidential election to obtain a figure for the percentage voting in each political subdivision.

The estimates of the citizen population of voting age for areas below the county level (towns, townships, cities, or villages) were accomplished by interpolating between the 1970 census and the July 1, 1973 estimates published in individual State reports in **Current Population Reports,** Series P-25, Nos. 546 through 595 for the total population of places, and then by (1) assuming the same proportion of the population in ages 18 and over as in 1970, and (2) adjusting the sum of the areas in each county to the independent county estimates 18 years and over for November 1972 estimated as indicated above.

These derived percentages of citizens voting were used in making the determinations under Title II as to which political subdivisions had less than 50 percent of the citizen population of voting age voting in the Presidential election of November 1972.

In calculating the percentages of language minority citizen populations and their illiteracy rates, 1970 census special tabulations from the 5-, 15-, and 20-percent samples were used in conjunction with the data from the 100-percent file.

Since citizenship was only available from the 5-percent sample the proportion of adult citizens in the language groups who were "illiterate" had to originate from this source. In order to improve the reliability of the estimates, citizenship rates determined from the 5-percent sample were applied to population totals from the 15- and 20-percent samples and/or 100-percent counts, to take advantage of the greater reliability of the larger samples and complete count.

For the Spanish population however, citizenship tabulations were available only for Spanish origin or descent. Citizenship rates based on this population were applied to the Spanish heritage population available in the 15-percent sample (except for New York, New Jersey, and Pennsylvania, since persons of Puerto Rican birth or parentage are all citizens).

Determinations based upon the "improved" point estimates[3] results are relatively more reliable than those based solely on 5-percent data. It should be noted that such estimates are still subject to sampling error, however.

RELATED REPORTS

Estimates of the resident voting-age population of States and counties as of November 1, 1960, by race, were published in **Current Population Reports,** Series P-23, No. 14, together with votes cast and percent voting in those areas in 1960 and 1964. Estimates of the resident voting-age population of States for the general elections of 1960 through 1974 are contained in Series P-25, No. 526. Race and age detail are also shown in that report for 1974.

Related data from the Current Population Survey on reported voter registration and voting in the elections of November 1972 were published in **Current Population Reports,** Series P-20, No. 253.

ROUNDING OF ESTIMATES

The estimates of the citizen voting-age population for November 1972 have been rounded to the nearest hundred, independently. Percentages are based on unrounded numbers.

---

[2] For a description of this methodology see **Current Population Reports,** Series P-25, No. 520 and 437.

[3] See appendix A for a fuller discussion of the improved estimate methodology. A detailed documentation of the estimation procedure and variance methodology is available on request to Chief, Statistical Methods Division, Bureau of the Census, Washington, D.C. 20233.

Table 1. POLITICAL SUBDIVISIONS COVERED UNDER TITLE II OF THE VOTING RIGHTS ACT AMENDMENTS OF 1975: DATA ON CITIZENS OF VOTING AGE, PERCENT VOTING AND PERCENT LANGUAGE MINORITY

(Jurisdictions in which more than 5 percent of the citizen population of voting age are members of a language minority, and which had less than 50-percent voter participation in 1972. The asterisk (*) denotes those juridictions not certified by the Attorney General as of May 26, 1976, as having a test or device. See text for explanation of coverage and derivation of deta)

- Represents zero or rounds to zero. NA Not available.

[1]For Alaska, the data show the best approximation of 1970 population within the boundaries of the 1974 election districts.

[2]In the six New England States and Michigan and Wisconsin political subdivisions are defined as townships, towns, cities, or villages. Data for these States are also shown for counties with 400 or more persons of a language minority. Political subdivisions within these States with 400 or more persons of a language minority are arranged alphabetically under the county name.

Table 4. ESTIMATES OF THE CITIZEN POPULATION OF VOTING AGE AND PERCENT CASTING VOTES FOR PRESIDENT: POLITICAL SUBDIVISIONS, NOVEMBER 1972

[1]Because of extensive problems relating 1970 Alaska census divisions to 1972 election districts, percent voting below State level could not be computed.

[2]All political subdivisions shown for the State of Connecticut are towns, listed in county sequence.

Note: Political subdivisions are defined as counties or independent cities in all States, except Louisiana (parishes), Alaska (election districts), and the six New England States, Michigan, and Wisconsin (cities, villages, towns, and townships).

In some small areas, the percentage voting may exceed 100 percent since voting residence is not necessarily the same as "usual place of residence" used by the Bureau of the Census. Percentage based on unrounded numbers.

THIS PAGE IS INTENTIONALLY LEFT BLANK

APPENDIX

STATEMENT ON METHODOLOGY FOR OBTAINING IMPROVED ESTIMATES OF PERCENT IN A LANGUAGE MINORITY AND PERCENT OF THIS MINORITY ILLITERATE

Among the factors determining eligibility under Title II and/or Title III of the Voting Rights Act Amendment of 1975 are two that are obtainable only from sample tabulations from the 1970 census. They are:

1. The number of minority-language citizens of voting age 18 years of age or older as a percentage of total citizens 18 years of age or older in a political subdivision.

2. The illiteracy rate of minority citizens 18 years of age or older in the political subdivision.

Unpublished data from the 1970 census were used to calculate these percentages for each appropriate political subdivision. Since the characteristic "Citizenship" is collected only in the 5-percent census sample,[1] it is possible to compute the appropriate estimated percentages using data solely from the 5-percent sample as follows:

For each language minority in each political subdivision, let

x = the estimated number of adult minority-language citizens from the 5-percent sample

y = the estimated total number of adult citizens from the 5-percent sample

z = the estimated number of adult minority-language citizens with less than 5 years of school, based on the 5-percent sample

The percentages of interest may then be expressed as:

1. $\frac{x}{y}$ = the number of adult minority-language citizens as a fraction of total adult citizens based on 5-percent sample data.

2. $\frac{z}{x}$ = the number of illiterate adult minority-language citizens as a fraction of total adult minority-language citizens based on 5-percent sample data (minority-language adult citizen illiteracy rate).

Although these estimated percentages could have been used, it was decided to base the determinations on "improved estimates" employing data from the larger census samples and complete counts (100 percent data). All estimates based on a sample are subject to sampling variability, but statistics based on the 15- and 20-percent samples are relatively more reliable than those based only on 5-percent census data, and statistics based on 100-percent data (complete counts) are not subject to any sampling variability. Therefore, for each language minority in each jurisdiction, "improved" estimates were calculated and used for determining the eligibility of the jurisdiction for consideration under the Act.

The improved estimates[2] are figures based on using citizenship rates defined from 5-percent data and applying them to totals defined from 15-percent, 20-percent, and 100-percent data. In general:

a. For an improved estimate of $\frac{x}{y}$, the number of adult minority citizens as a fraction of total adult citizens, the improved estimate is found by first calculating a citizenship rate for adult minority persons in the jurisdiction and a citizenship rate for total adult persons in the jurisdiction using 5-percent data. These rates are then applied to more reliable counts of adult minority persons and total adult persons in the jurisdiction. For total persons and all minorities except Spanish, complete count data were used for the improved estimate. For Spanish-heritage persons, 15-percent data were used.

b. For an improved estimate of $\frac{z}{x}$, the illiteracy rate for adult minority citizens, the improved estimate is

[1] For a summary description of the sampling and estimation methodology employed for 1970 census sample data, see source note. The reference also presents definitions and concepts employed in tabulating minority-language persons and their characteristics.

[2] For Puerto Rican groups in New York, New Jersey and Pennsylvania, the imporved estimate did not incorporate 5-percent data as noted earlier.

Source: 1970 Census of Population, Volume I, **Characteristics of the Population**, U.S. Bureau of the Census. See appendix C, "Accuracy of the Data".

found by first calculating a citizenship rate for illiterate adult minority persons and a citizenship rate for total adult minority persons from 5-percent data. These rates are then applied to more reliable counts of illiterate adult minority persons and total adult minority persons in the jurisdiction. For all minorities except Spanish, 20-percent data were used for the improved estimate. For Spanish heritage persons, 15-percent data were used.

The determinations for the Voting Rights Act were made on the basis of the improved point estimates calculated as described above.

A more detailed description of the statistical considerations involved in the estimates for the Voting Rights Act Amendment may be obtained from the Statistical Methods Division, Bureau of the Census.
