Characteristics of Households and Persons Receiving Selected Noncash Benefits: 1980 (With Comparable Data for 1979)

NOTE

Estimates in this report for 1979 and 1980 are based on adjustment of weighted sample results to independent estimates of the civilian noninstitutional population derived from the 1980 Census of Population. The data shown in this report for 1979 may differ slightly from those published in the Series P-23, No. 110 report, because of modifications to data processing procedures.

INTRODUCTION

This report contains data on selected characteristics of households and persons receiving noncash benefits in 1979 and 1980. These data were obtained from the March Current Population Survey (CPS) conducted in 1980 and 1981 by the Bureau of the Census. Noncash benefits can be defined as benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. The Census Bureau began to collect noncash benefit data in March 1980 by supplementing the collection of annual money income data with questions designed to obtain information on a selected group of these benefits.

The data collection in March 1980 and 1981 concentrated on two major categories of noncash benefits: those which could be defined as public transfers and those which could be categorized as employer- or union-provided benefits to employees. In the area of public noncash transfers, the survey covered the following programs: Food Stamp Program; National School Lunch Program; public and other subsidized housing; Medicare health insurance; Medicaid health insurance; and CHAMPUS, VA, or military health insurance. Data were collected for two types of employer- or union-provided noncash benefits: pension plans and group health insurance plans.

This report contains the most comprehensive information on noncash benefits published by the Bureau. The detailed tables cover both 1979 and 1980, and except for minor differences, the tables are identical for both years. They are grouped together by year with the tables for 1979 following those for 1980. The highlights section which follows presents some general findings concerning noncash benefit recipiency households and changes in recipiency between 1979 and 1980. These findings were released previously in an advance report (Current Population Reports, Series P-60, No. 128). Because this report contains much more information than that shown in the advance report, the highlights section is followed by a summary of the data shown in the detailed tables.

HIGHLIGHTS

While households in general experienced significant declines in purchasing power and large increases in poverty[1] (measured solely in money terms) in 1980, there were significant increases in the number of households receiving noncash benefits. The decline of 5 percent in real median household income between 1979 and 1980 and the increase from 9.8 million to 11.0 million in the number of households with incomes below the poverty level was accompanied by an increase from 13.6 million to 14.3 million in the number of households receiving means-tested noncash benefits.[2] In addition, the number of households receiving nonmeans-tested benefits from one or more of four sources (Medicare, regular-price school lunches, employer- or union-provided pension plans, and employer- or union-provided group health insurance plans) increased from 67.6 million to 69.0 million.

Means-Tested Noncash Benefits

Because means-tested noncash benefits are received by households whose incomes and/or assets (resources) fall below specified program guidelines, the general deterioration in the income situation during 1980 helped contribute to the increase in the number of households receiving these noncash benefits. Of the four means-tested noncash benefits covered in this report, three showed significant increases in household recipiency between 1979 and 1980. The number of households receiving food stamps in 1980 increased by 12 percent to 6.8 million. The number of households containing children receiving free or reduced-price school lunches rose from 4.9 million to 5.5 million, a 12-percent increase. House-

[1] See appendix A for an explanation of the poverty concept. Data on money income and poverty status in 1980 were published in Current Population Reports, Series P-60, No. 127.

[2] A "means-tested" transfer program requires that the household's income and/or assets (resources) fall below specified guidelines in order to qualify for benefits. The means-tested programs in this report are food stamps, free or reduced-price school lunches, publicly owned or other subsidized housing, and Medicaid. Eligibility for Medicare is based on age or disability status only.

Table A. Households Receiving Means-Tested Noncash Benefits—Number, Percent Below the Poverty Level, and Percent of Poor Receiving Benefits in 1980 and 1979

(Households as of March of the following year. Households are classified according to the poverty status of the family or nonfamily householder)

Type of means-tested benefit	All households			Percent of households below the poverty level			Percent of all poor households receiving noncash benefits		
	Number (thousands)		Percent change			Difference (1980 minus 1979)			Difference (1980 minus 1979)
	1980	1979		1980	1979		1980	1979	
All households	82,368	80,776	*2.0	13.3	12.1	*1.2	(X)	(X)	(X)
Households with one or more means-tested benefits[1]	14,266	13,604	*4.9	44.6	40.5	*4.1	58.0	56.1	*1.9
Households receiving food stamps	6,769	6,054	*11.8	65.5	60.6	*4.9	40.4	37.4	*3.0
Households receiving free or reduced-price school lunches	5,532	4,933	*12.1	45.4	42.6	*2.8	[2]64.6	[2]63.6	[2]1.0

* Significant at the .05 level. X Not applicable.

[1]Detail does not add because some households have noncash benefits from more than one source.
[2]Based on poor households with school children 5 to 18 years old.
[3]Based on poor households in renter-occupied housing.

holds residing in public or other subsidized housing rose to 2.8 million, up 8 percent from the previous year. The number of households with members covered by Medicaid (8.3 million) remained at about the 1979 level.

Approximately 45 percent of households receiving these means-tested noncash benefits had incomes below the poverty level during 1980. (See table A.) Food stamp households had the highest poverty rate (66 percent), while households with children receiving free or reduced-price school lunches had the lowest poverty rate (45 percent). For households receiving means-tested noncash benefits, the proportion below the official poverty line increased between 1979 and 1980 for each of the four means-tested benefits.

The 6.8 million households receiving *food stamps* during 1980 accounted for 8 percent of all households. The median total money income for these households was $5,540, or 31 percent of the median for all households. Approximately two-thirds of all food stamp households had total money incomes below the poverty level in 1980; 77 percent had total money incomes below 125 percent of the poverty level. While overall only 8 percent of all households received food stamps during 1980, there were several subgroups with much higher rates of food stamp recipiency. These include households with Black householders (27 percent), those with householders of Spanish origin (19 percent), and households with a female householder, no husband present (30 percent).

Free or reduced-price school lunches were received by children in 21 percent of all households with school-age children (5 to 18 years). About 45 percent of households maintained by women (no husband present) with children in school received free or reduced-price school lunches. The South, which contains about 35 percent of all households with children 5 to 18 years old, accounted for about 45 percent of the total 5.5 million households receiving free or reduced-price school lunches. Of the 3.9 million poverty households with children 5 to 18 years old, about 65 percent received free or reduced-price school lunches.

About 10 percent of the 26.5 million renter-occupied households were residing in *publicly owned or other subsidized housing* in March 1981. (See table B.) Of the 6.1 million renter-occupied households below the poverty level, 24 percent resided in public or subsidized housing. Thirty-four percent of all households residing in public or subsidized housing had a householder 65 years or older. About three-fourths of all public or subsidized housing units were in metropolitan areas; 55 percent were in central cities.

Of the 8.3 million households with members covered by *Medicaid,* 4.4 million (about 53 percent) had incomes below the poverty level. The median income for households with Medicaid coverage was $6,100, or 34 percent of the median income for all households. Medicaid covered 40 percent of all poor households, 52 percent of all poor households with children under 19 years, and 37 percent of all poor households with a householder 65 years and over. Of all households with Medicaid coverage, 67 percent had a White householder, 30 percent had a Black householder, and 9 percent had a householder of Spanish origin. (See table C.)

Nonmeans-Tested Noncash Benefits

Households receiving nonmeans-tested benefits are not required to meet income or asset guidelines. Two major public programs are covered in this report: Medicare and regular-price school lunches. (All school lunches served at schools participating in the National School Lunch Program are subsidized.) During 1980, the number of households with

Table B. Percent of Households Receiving Means-Tested Noncash Benefits, by Selected Characteristics

(Households as of March 1981. Households are classified according to the race of the family or nonfamily householder)

Selected characteristics	Number (thousands)	Percent

Householder 65 years old and over	17.3	3.6	34.4	30.3
Residence in the South	40.5	44.8	31.0	31.0
Residence in metropolitan areas	63.3	61.3	75.2	69.2
Residence in central cities	40.4	36.9	55.2	41.3

[1]Persons of Spanish origin may be of any race.

one or more members covered by Medicare (19.8 million) remained essentially unchanged from 1979. The number of households with school children receiving regular-price school lunches declined by about 800,000 to 12.0 million. (See table D.) This decline appears to be largely the result of the 600,000 increase in the number of households with children receiving free or reduced-price school lunches, as the number of households with children who usually ate lunch prepared at school (17.6 million) was not significantly different from the 1979 figure.

About 24 percent of all households in the United States contained one or more persons covered by *Medicare* during 1980. Of these, about 82 percent had a householder 65 years old or over. The median income of Medicare households was $9,420 in 1980. The poverty rate for households in which one or more members were covered by Medicare was 19 percent, higher than the 13 percent poverty rate for all households. About 96 percent of all households with an elderly householder (65 years old or over) reported one or more members covered by Medicare; the percentage of poor households with an aged householder reporting Medicare coverage was about the same.

The 12.0 million households containing one or more children receiving *regular-price school lunches* in 1980 represented 45 percent of all households with children 5 to 18 years. The median income for households with children receiving regular-price school lunches was $25,840 in 1980, which is about 17 percent higher than the median

Table D. Households Receiving Nonmeans-Tested Noncash Benefits—Number, Median Income, and Percent Below the Poverty Level in 1980 and 1979

(Households as of March of the following year. Households are classified according to the poverty status of the family or nonfamily householder)

Type of nonmeans-tested benefit	All households						Percent of households below the poverty level		
	Total			Median income

[1]Detail does not add because some households have noncash benefits from more than one source.
[2]Includes only workers with group health insurance plans which were paid for in part (or all) by an employer or union.

income for all households with children 5 to 18 years and about 46 percent higher than the median income for all households.

Two important employer-provided noncash benefits are pension plans and group health insurance plans. While the number of households with one or more members having a group health insurance plan paid for, at least in part, by their employer increased from 46.9 million in 1979 to 48.8 million in 1980, the number of households with one or more workers covered by an employer- or union-provided pension plan (38.3 million) was not significantly higher in 1980.

Households in which one or more persons were covered by a *pension plan at work* during 1980 represented about 47 percent of all households. After excluding households in which the householder was 65 years old or over, this figure rises to 56 percent. The median income for households with one or more members covered by a pension plan at work was $25,660, or $7,950 more than the median for all households.

During 1980, households in which one or more members were covered by a *group health plan at work* which was paid for, in full or in part, by an employer or union represented 59 percent of all households. Of all households with a householder under 65 years old, 71 percent had at least one member covered by an employer- or union-provided group health plan. The median income for households in which one or more members were covered by an employer- or union-provided group health plan was $23,850, $6,140 higher than the median for all households.

DATA SUMMARY

Food stamps. Table 5 (1980) and table 26 (1979) display food stamp recipiency of households by total household money income, poverty status, and selected characteristics. Estimates are shown for all households and separately for the following subgroups: 1) female householder, no husband present; 2) householder 65 and over; and 3) total number of persons covered by food stamps in these households. Also, for all households receiving food stamps, data on the mean annual face value of food stamps and mean number of months receiving food stamps are shown.

Free or reduced-price school lunches. Table 6 (1980) and table 27 (1979) show participation in the free or reduced-price school lunch program of households with children 5 to 18 years old by total household money income, poverty status, and selected characteristics. These data are shown for all households and separately for the following subgroups: 1) female householder, no husband present and 2) total number of children 5 to 18 years old receiving free or reduced-price school lunch.

Publicly owned or other subsidized housing. Table 7 (1980) and table 28 (1979) display the number of households residing in publicly owned or other subsidized renter-occupied housing by total household money income, poverty status, and selected characteristics. These data are shown for all households and separately for the following subgroups: 1) female householder, no husband present; 2) householder

65 years and over; and 3) the total number of persons in these households.

Medicaid. Households with one or more members covered by Medicaid by total household money income, poverty status, and selected characteristics of the householder are displayed in table 8 (1980) and table 29 (1979) for all households and separately for the following subgroups: 1) female householder, no husband present; 2) householder 65 years and over; and 3) the total number of persons covered in these households.

Table 9 (1980) and table 30 (1979) display all persons covered by Medicaid by total household money income, poverty status, and selected characteristics.

Medicare. Table 12 (1980) and table 33 (1979) display all households with one or more members covered by Medicare by total household money income, poverty status, and selected characteristics.

Table 13 (1980) and table 34 (1979) show Medicare coverage for persons 15 years old and over and persons 65 years and over by total household money income, poverty status, selected characteristics, and sex.

Regular-price school lunches. Table 11 (1980) and table 32 (1979) show participation in the regular-price school lunch program for households with children 5 to 18 years old by total household money income, poverty status, and selected characteristics. These data are shown for all households and for the total number of children 5 to 18 years old purchasing regular-price school lunches.

Pension plan at work. Table 16 (1980) and table 37 (1979) display all households with one or more members covered by an employer- or union-provided pension plan by total household money income, poverty status, and selected characteristics.

Table 14 (1980) and table 35 (1979) show this pension plan coverage for civilian wage and salary workers 15 years old and over by wage or salary income, poverty status, selected characteristics, and sex.

Group health insurance plan at work. Shown in table 19 (1980) and table 40 (1979) are total households with one or more persons covered by an employer- or union-provided health insurance plan by total household money income, poverty status, and selected characteristics.

Table 18 (1980) and table 39 (1979) display group health insurance coverage for all persons by total household money income, poverty status, and selected characteristics. Also shown is the portion of the health insurance plan paid for by the employer or union, that is, the employer paid all the cost, part of the cost, or none of the cost. For 1979, the "paid all" and "paid part" of the cost categories are combined.

Tables 17 (1980) and 38 (1979) show civilian wage and salary workers 15 years old and over with an employer- or union-provided group health insurance plan by wage or salary income, poverty status, selected characteristics, and sex. Data are included for type of employer or union contribution.

Pension and group health plans. Civilian wage and salary workers 15 years old and over with both an employer- or union-provided pension plan and a group health plan by wage or salary income, poverty status, selected characteristics, and sex are shown in table 15 (1980) and table 36 (1979). These tables also display the type of employer or union contribution.

Multiple recipiency of noncash benefits. Tables 10 (1980) and 31 (1979) show combinations of means-tested noncash benefits by poverty status for households and persons in households. Tables 21 (1980) and 42 (1979) contain data on combinations of selected noncash benefits and cash income received by households.

Health care coverage. Tables 20 (1980) and 41 (1979) show persons covered by health care programs by source of coverage and selected combinations of coverage by household money income, poverty status, age, and sex.

Base tables. Tables 1 through 4 (1980) and 22 through 25 (1979) have been provided to allow comparisons between households or persons receiving noncash benefits and all households and persons. For example, table 4 shows all civilian wage or salary workers by wage and salary income and selected characteristics for 1980, while tables 14, 15, and 17 show the numbers of persons in this total universe receiving employer- or union-provided health and pension benefits. Hence, the data in table 4 can be used to determine the proportion of workers receiving such benefits.

Note on Limitations and Data Quality

Although these data on noncash benefits provide new information on the characteristics of households and persons receiving benefits, the data have some important limitations which must be noted before the results shown in this report are examined in detail.

1. The first limitation is the use of gross annual household income and poverty status based on gross annual income to classify households. It should be kept in mind that of the public noncash transfer programs covered in this report, only the school lunch program uses annual income to determine eligibility for participation. Almost all "means-tested" noncash transfer benefits are based, instead, on monthly or quarterly income "accounting" periods. Households with periodically low monthly or quarterly income but relatively high annual income may legally qualify for benefits. In addition, eligibility for benefits for most types of in-kind programs are based on "countable" income (i.e., gross income less certain types of excluded income and other allowable deductions). For example, the Food Stamp Program, which uses a monthly or quarterly accounting period, provides a standard deduction for all applicants and additional allowances for those with large housing (shelter) or medical care costs relative to income.

   It should also be noted that most means-tested noncash transfer programs require an "asset" or "resource" eligi-

bility test in addition to the income test. Therefore, low income alone does not guarantee eligibility. Finally, rules for eligibility may vary from State to State, as in the Medicaid program, and even from locality to locality, as in several public housing programs. The combined effect of these factors—the monthly or quarterly income accounting period, the income exclusions and deductions, the asset tests, and the variation in some programs by State and locality—may result in patterns of noncash benefit recipiency which are not fully explained by the annual gross income data presented in this report. Caution should be used, therefore, when examining the annual money income levels and their relationship to program eligibility.

2. A second limitation concerns household membership recorded in the survey. Household membership is defined as of the interview date in March 1980 or 1981. However, most questions on noncash benefits referred to respective calendar years. In some cases, therefore, household members present during part or all of 1979 or 1980 may have moved out or died by the time the survey was conducted. In other households, some persons may have been members of that household only a short time. Current membership, therefore, may not always reflect the true economic status of the household during the year. Household members who contributed significantly to the total household income may have entered or left the household during the year prior to the interview in March 1980 or March 1981. Other individuals with little or no income and, hence, eligible for many noncash benefits, may have moved into households with relatively high incomes.

3. A third limitation which should be kept in mind, especially when examining the Medicare and Medicaid data, is that the CPS sample universe is limited to the civilian noninstitutional population. Persons residing in institutions (such as nursing homes, mental health facilities, and prisons), at the time of the interview in March were excluded from all estimates. The estimation procedure used in this survey involved the inflation of weighted sample results to independent estimates of the total civilian noninstitutional population of the United States by age, race, and sex. These independent estimates are based on the 1980 Census of Population.

4. A final limitation involves data quality. A summary evaluation of data quality for the noncash benefit data is presented in appendix A of this report. A more detailed evaluation is presented in *Technical Paper No. 50, Alternative Methods for Valuing Selected In-Kind Transfer Benefits and Measuring Their Impact on Poverty.*

Table 1. Households and Persons in Households, by Household Money Income and Poverty Status in 1980

Appendix A. Definitions and Explanations

Population universe of the CPS. The CPS sample covers the civilian noninstitutional population of the United States and members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. The sample includes the 50 States and the District of Columbia, but excludes Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Trust Territory of the Pacific Islands. Estimates shown in this report are, therefore, restricted to this universe.

Noncash benefits. Noncash benefits can be defined as benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. The data collection in March 1980 and 1981 concentrated on two major categories of noncash benefits: those which could be defined as public transfers and those which could be categorized as employer-or union-provided benefits to employees. In the category of public noncash transfers, the survey covered the following programs: Food Stamp Programs; National School Lunch Program; public and other subsidized housing; Medicare health insurance; Medicaid health insurance; and CHAMPUS, VA, or other military health care. Data were collected for two types of employer- or union-provided noncash benefits: pension plans and group health insurance plans.

MEANS-TESTED

Means-tested transfer programs require that the household income and/or assets (resources) fall below specified guidelines in order to qualify for benefits. A description of each of the means-tested noncash transfers covered in this report is included in this section.

Food stamps. The Food Stamp Act of 1977 defines this Federally funded program as one intended to "permit low-income households to obtain a more nutritious diet."[1] Food purchasing power is increased by providing eligible households with coupons which can be used to purchase food. The Food and Nutrition Service of the U.S. Department of Agriculture (USDA) administers the Food Stamp Program through State and local welfare offices. The Food Stamp Program is the major national income support program which provides benefits to all low-income and low-resource households regardless of household characteristics (e.g., sex, age, and disability). The questions on participation in the Food Stamp Program in the March CPS were designed to identify households in which one or more of the current members received food stamps during 1979 or 1980. Once a food stamp household was identified, a question was asked to determine the number of current household members covered by food stamps during the year. Questions were also asked about the number of months food stamps were received during the year and the total face value of all food stamps received during that period.

Free or reduced-price school lunches. The National School Lunch Program is designed "to help safeguard the health and well-being of the Nation's children by assisting the States in providing an adequate supply of foods"[2] for all children at moderate cost. Additional assistance is provided for children determined by local school officials to be unable to pay the "full established" price for lunches. The program is administered by the Food and Nutrition Service of the U.S. Department of Agriculture (USDA) through State educational agencies or through regional USDA nutrition services for nonprofit private schools. The program is funded by a combination of Federal funds and matching State funds.

All students eating lunches prepared at participating schools pay less than the total cost of the lunches. Some students pay the "full established" price for lunch (which itself is subsidized), while others pay a "reduced" price for lunch, and still others receive a "free" lunch. Program regulations require students receiving free lunches to live in households with incomes below 125 percent of the official poverty level. Those students receiving a reduced-price school lunch (10 to 20 cents per meal) live in households with incomes between 125 percent and 195 percent of the official poverty level. The data in this report, however, do not distinguish between recipiency of free and reduced-price school lunches.

The questions on the March 1980 and 1981 CPS provide a very limited amount of data for the school lunch program. Questions concerning the school lunch program were designed to identify the number of members 5 to 18 years old in households who "usually" ate a hot lunch; this defined the universe of household members usually receiving this noncash benefit. This was followed by a question to identify the number of members receiving free or reduced-price lunches.

[1] For title XIII of P.L. 95-113, *The Food Stamp Act of 1977*, declaration of policy.

[2] From P.L. 79-396, *The National School Lunch Act of 1946*, declaration of policy. P.L. 91-248 further amended the P.L. 79-396 to provide free and reduced-price school lunches for children of needy families in 1970.

Public or other subsidized housing. There are several programs designed to "remedy the unsafe and unsanitary housing conditions and the acute shortage of decent, safe, and sanitary dwellings for families of low income."[3] Among these, the most important are Low Rent Public Housing and Sections 8, 236, and 101 (rent supplements) of the U.S. Housing Act. Low Rent Public Housing projects are owned, managed, and administered by a local housing authority. Partial financing may be provided by the State or the Department of Housing and Urban Development. Participation in public housing is determined by two factors: program eligibility and the availability of housing. Income standards for initial and continuing occupancy vary by local housing authority, although the limits are constrained by Federal guidelines. Rental charges, which, in turn, define net benefits, are set by a Federal statute not to exceed 25 percent of net monthly money income. A recipient unit can either be a family of two or more related persons or an individual who is handicapped, elderly, or displaced by urban renewal or natural disaster.

There are some programs through which housing assistance is provided to low-income families and individuals living in publicly or privately owned dwellings. Two of the more common types of programs in which Federal, State, and local funds are used to subsidize private sector housing are rent supplement plan (e.g., Sections 8 and 101), the difference between the "fair market" rent and the rent charged to the tenant is paid to the owner by a Government agency. Under an interest reduction program (e.g., Section 236), the amount of interest paid on the mortgage by the owner is reduced so that subsequent savings can be passed along to low-income tenants in the form of lower rent charges.

There were two questions dealing with public and low-cost housing on the March CPS supplement questionnaire. The first question identified residence in a housing unit owned by a public agency. The second question identified beneficiaries who were not living in public housing projects, but who were paying lower rent due to a government subsidy. These questions differed from other questions covering noncash benefits in that they established current recipiency status (as of the third week in March 1980 or 1981) rather than recipiency status during reference year. No information on Federally subsidized homeownership (e.g., Section 235) or subsidized mortgage interest guarantees (e.g., FHA and VA) was collected.

Medicaid. The Medicaid Program is designed "to furnish medical assistance on behalf of needy families with dependent children, and of aged, blind, or permanently and totally disabled individuals whose incomes and resources are insufficient to meet the costs of necessary medical services."[4] The program is administered by State agencies through grants from the Health Care Financing Administration of the Department of Health and Human Services. Funding for medical assistance payments consists of a combination of Federal, State, and in some cases, local funds.

[3] From P.L. 75-412, *The United States Housing Act of 1937,* declaration of policy.

[4] From title XIX of the 1965 Amendments to P.L. 89-97, *The Social Security Act,* "Grants to States for Medical Assistance Programs," declaration of policy.

Medicaid is for the most part a categorical program with complex eligibility rules which vary from State to State. There are two basic groups of eligible individuals: the categorically eligible and the medically needy. The major categorically eligible groups are all Aid to Families with Dependent Children (AFDC) recipients and most Supplemental Security Income (SSI) recipients. Other categorically eligible groups are (1) those who meet basic State cash assistance eligibility rules (the aged, blind, or disabled; needy single parents with children; and, in some States, needy unemployed parents with children who are not currently receiving money payments) and (2) needy persons who meet categorical eligibility standards but are institutionalized for medical reasons (e.g., low-income elderly persons in nursing homes). However, such institutionalized persons are not included in the CPS universe and, therefore, are not reflected in these statistics.

In roughly one-half of the States, coverage is extended to the medically needy: persons meeting categorical age, sex, or disability criteria whose money incomes and assets exceed eligibility levels for cash assistance but are not sufficient to meet the cost of medical care. In such States, qualifying income and asset levels are usually above those set for cash assistance. Families with large medical expenses relative to their incomes and assets may also meet medically needy eligibility standards in these States.

The Medicaid question on the March CPS attempted to identify all persons who were covered by Medicaid at *any* time during 1979 or 1980. The term "covered" means enrolled in the Medicaid program, i.e., had a Medicaid medical assistance card or incurred medical bills which were paid for by Medicaid. In order to be counted, the person *did not* have to receive medical care paid for by Medicaid.

After data collection and creation of an initial microdata file, further refinements were made to assign Medicaid coverage to children. In this procedure all children under 21 years old in families were assumed to be covered by Medicaid if either the householder or spouse reported being covered by Medicaid. (This procedure was required mainly because the Medicaid coverage question was asked only for persons 15 years old and over.) All adult AFDC recipients, their children, and SSI recipients living in States which legally require Medicaid coverage of all SSI recipients were also assigned coverage. The data shown in this report exclude children covered by Medicaid in households in which no adult member was covered by Medicaid.

NONMEANS-TESTED

Households receiving nonmeans-tested benefits are not required to meet income or asset guidelines. Following is a description of the nonmeans-tested programs covered in this report.

Medicare. The Medicare Program consists of two separate but complementary health plans to provide adequate medical care for the aged and disabled. The basic Hospital Insurance Plan (Part A) "is designed to provide basic protection against

the costs of hospital and related post-hospital services."[5] This plan also covers many persons under 65 years old who receive Social Security or Railroad Retirement benefits based on long-term disability. Part A is financed jointly by employers and employees through Social Security payroll deductions. Qualified persons 65 years old and over who are not otherwise eligible for Part A benefits may pay premiums directly to obtain this coverage. The Medical Insurance Plan (Part B) is a voluntary plan which builds upon the hospital insurance protection provided by the basic plan. It provides insurance protection covering physicians' and surgeons' services and a variety of medical and other health services received either in hospitals or on an ambulatory basis. It is financed through monthly premium payments (about $8.50 per month in 1979 and about $10.00 per month in 1980) by each enrollee and subsidized by Federal general revenue funds.

The Medicare question on the March CPS attempted to identify all persons 15 years old and over who were covered by Medicare at any time during 1979 or 1980. The term "covered" means enrolled in the Medicare Program. In order to be counted, the person *did not* necessarily have to receive medical care paid for by Medicare.

Regular-price school lunches. All school lunches served at schools participating in the National School Lunch Program are subsidized. Unless qualified for free or reduced-price lunches, students eating lunches prepared at participating schools pay the "full established" price which is less than the total cost of the lunches.

Employer- or union-provided group health insurance plans. The March CPS collected a limited amount of information on employer- or union-provided group health insurance for civilian persons 15 years old and over who worked during 1979 or 1980. Workers who participated in group health insurance plans of any kind were asked whether or not their employer or union helped pay for all, part, or none of the health insurance premium for 1980, but, just whether the employer or union helped pay any of the premium for 1979.

Employer- or union-provided pension plans. Civilian persons 15 years old and over who worked during 1979 or 1980 were asked about their participation in pension plans provided by employers or unions. This report assumes pension plans receive contributions from the employer or union or at least some benefit is derived by obtaining the pension plan from the employer or union.

CHAMPUS, VA, or other military health care. All active and retired military personnel and their dependents are eligible for medical treatment at any Department of Defense (DOD) installation medical facility. (Currently, DOD operates 180 hospitals.) Additionally, DOD operates the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) to provide reimbursement (after payment of a deductible) for covered medical care rendered in civilian facilities to wives and children of active military personnel, to retired military personnel and their dependents, and to dependents of deceased personnel (unless eligible for Part A of Medicare). The program is designed for those unable to use Government medical facilities for reasons of distance, overcrowding of such facilities or the unavailability of appropriate treatment at a military medical center.

The Veterans Administration (VA) operates 172 hospitals, 107 long-term facilities and 229 outpatient clinics for the care of individuals with active service in the Armed Forces who were discharged from duty other than dishonorably. Priority is given to patients with service-related ailments.

[5] As specified in Section 1811 of title XVIII of the 1965 Amendments to P.L. 89-97; *The Social Security Act,* "Health Insurance for the Aged."

MONEY INCOME

The income data shown in this report are restricted to money income received during the calendar year 1979 or 1980, the year preceding the March survey. The amounts shown are "gross" money income figures, that is, before deductions for any taxes, union dues, and Medicare premiums. The money income amounts shown exclude the value of noncash or in-kind benefits such as 1) food, in the form of food stamps and school lunches from the National School Lunch Program; 2) medical benefits, such as Medicare, Medicaid; and employer-provided group health insurance; 3) subsidized housing; and 4) employer-provided pension plans. These elements should be considered when comparing income levels. It should also be noted that household surveys tend to underestimate income received because of nonsampling errors such as underreporting, misreporting, nonreporting, and nonresponse. A discussion of these nonsampling errors is contained later in this appendix.

Total money income. Total money income is the sum of the amounts of income received from all sources covered by the March CPS. These sources are described in detail below. The CPS definition of money income excludes several sources of income. Excluded are (1) proceeds from the sale of property such as stocks, bonds, houses, land, or any other personal property; (2) withdrawals from savings accounts or other types of savings funds; (3) refunds or rebates of any type; (4) loans; (5) gifts; and (6) any one-time or lump-sum amounts such as insurance settlements or inheritances.

Earnings. The CPS collects individual amounts from three sources of earnings: (1) wages or salaries received by employees working for pay; (2) net nonfarm self-employment income received by persons operating their own nonfarm business, partnership, or professional practice; and (3) net farm self-employment income received by persons operating farms. Total money earnings is the sum of amounts received from these three sources. This amount may have a negative value (a loss) since losses can be reported for self-employment income.

Types of earnings. As mentioned above, the CPS collects information on three types of earnings. Each of these types

(1) wages and salary, (2) nonfarm self-employment, and (3) farm self-employment are described below.

Wages and salary are money received before deductions by persons working as employees. Included are the amounts earned from all jobs. In addition to "normal" wages and salary, the amount includes overtime pay, bonuses, tips, and severance pay. Wages and salary includes pay received by Armed Forces members in the CPS universe. It excludes money received for expense accounts or any food or lodging received as part of pay.

Nonfarm self-employment is the net income (gross receipts minus expenses) from a person's own business, professional practice, or the person's share of the net income from a partnership. The amount includes net income from all businesses, professional practices, and partnerships that the person owned and operated. The amount *does not* include earnings from incorporated businesses.

Farm self-employment is the net income (gross receipts minus expenses) a person receives from his/her own farm operation. It includes both owners and renters of farm land and sharecroppers. The amount covers net income from all farming operations. Income received from renting land on shares is included as farm income. Income received from renting land for cash is included as rental income, not as farm income. The farm income amounts *do* include amounts from incorporated farm operations because CPS editing procedures prevent the classification of farms as incorporated.

Cash Public assistance or welfare includes payments under the Aid to Families with Dependent Children (AFDC or ADC) program, Supplemental Security Income (SSI), and payments often categorized as general assistance. Other public assistance which may have also been included are payments from the Emergency Assistance Program, Cuban Refugee Assistance, and assistance for paying home heating and cooling expenses. One amount was recorded representing the total amount of public assistance or welfare received from the sources mentioned above.

Private pensions. Pensions received by retired or disabled workers or by the survivors of deceased workers which are paid by a previous private employer or union or from a retirement or disability plan purchased by the recipient. These pensions *exclude* those received from the Federal Government, military, or from State or local governments.

Median income. The median income is the amount which divides the distribution into two equal groups, one having incomes above the median, and the other having incomes below the median. The medians for households are based on all households. The medians for persons are based on the distributions of persons with income.

Mean income. The mean income is the amount obtained by dividing the total income of a group by the number of units in that group (households, families, unrelated individuals, or persons). The means for households, families and unrelated individuals are based on the total. The means for persons are based only on the number of persons with income.

POVERTY (LOW-INCOME) CLASSIFICATION

Families and unrelated individuals are classified as being above or below the poverty level using the poverty index developed at the Social Security Administration in 1964 and revised by a Federal Interagency Committee in 1969. The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits, such as food stamps, Medicaid, and public housing. The index is based on the Department of Agriculture's 1955 survey of food consumption that families of three of more persons spend approximately one-third of their income on food; the poverty level for these families was, therefore, set at three times the cost of the economy food plan. For smaller families and persons living alone, the cost of the economy food plan was multiplied by factors that were slightly higher in order to compensate for the relatively larger fixed expenses of these smaller households. In this report households are classified according to the poverty status of the family or the nonfamily householder. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index (CPI). The average poverty threshold for a nonfarm family of four was $8,414 in 1980, about 13.5 percent higher than the comparable 1979 cutoff of $7,412. For further details, see Current Population Reports, Series P-60, No. 130.

Table A-1. Annual Average Consumer Price Index (CPI): 1947 to 1980

(1977=100)

Year	CPI	Year	CPI
1947	36.9	1964	51.2
1948	39.7	1965	52.1
1949	39.3	1966	53.6
1950	39.7	1967	55.1
1951	42.9	1968	57.4
1952	44.6	1969	60.5
1953	44.1	1970	64.1
1954	44.4	1971	66.8
1955	44.2	1972	69.0
1956	44.8	1973	73.3
1957	46.4	1974	81.4
1958	47.7	1975	88.8
1959	48.1	1976	93.9
1960	48.9	1977	100.0
1961	49.4	1978	107.6
1962	49.9	1979	119.8
1963	50.2	1980	136.0

Table A-2. Weighted Average Thresholds—Poverty Cutoffs in 1980, by Size and Type of Family and Farm-Nonfarm Residence

(In dollars)

Size of family unit	Total	Nonfarm			Farm		
		Total	Families with female householder, no husband present[1]	All other families[2]	Total	Families with female householder, no husband present[1]	All other families[2]
One person (unrelated individual)	4,184	4,190	4,037	4,379	3,539	3,392	3,680
15 to 64 years	4,286	4,290	4,109	4,441	3,693	3,492	3,773
65 years and over	3,941	3,949	3,938	3,990	3,359	3,347	3,392
Two persons	5,338	5,363	5,316	5,373	4,502	4,302	4,513
Householder 15 to 64 years	5,518	5,537	5,415	5,568	4,714	4,497	4,721
Householder 65 years and over	4,954	4,983	4,946	4,988	4,233	4,185	4,237
Three persons	6,539	6,565	6,386	6,608	5,573	5,271	5,587
Four persons	8,385	8,414	8,382	8,418	7,170	7,152	7,170
Five persons	9,923	9,966	9,878	9,976	8,472	8,373	8,474
Six persons	11,215	11,269	11,227	11,274	9,613	9,168	9,625
Seven persons or more	13,883	13,955	13,767	13,986	11,915	12,133	11,889

[1]Includes female unrelated individuals.
[2]Includes male unrelated individuals.

DEFINITIONS FOR SOCIAL AND DEMOGRAPHIC CHARACTERISTICS

Household. A household consists of all persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters; that is, when the occupants do not live and eat with any other persons in the structure and there is either (1) direct access from the outside or through a common hall or (2) a kitchen or cooking equipment for the exclusive use of the occupants.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit or a group of unrelated persons sharing a housing unit as partners is also counted as a household. The count of households excludes group quarters, however, persons in group quarters are included in the estimates for persons. Group quarters are living arrangements for groups containing five or more persons unrelated to the person in charge, such as residents of lodging and boarding houses.

Householder. The householder is the person (or one of the persons) in whose name the home is owned or rented. If the home is owned or rented jointly by two persons, such as a husband and wife, either one, but only one, may be designated as the householder.

Family. The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together; all such persons are considered members of the same family. Thus, if the son of the householder and son's wife are in the household, they are treated as part of the householder's family. The householder's family is designated as the "primary" family. Other family units may also exist within the household. These are unrelated subfamilies which consist of two or more persons related to each other by blood, marriage, or adoption, but none of which are related to the householder or the spouse of the householder.

Unrelated individuals. The term "unrelated individuals" refers to persons 15 years old and over who are not living with any relatives. An unrelated individual may (1) constitute a one-person household, (2) be part of a household including one or more other families or unrelated individuals, or (3) reside in group quarters (such as a rooming house). Thus, a widow living by herself or with one or more other persons not related to her, a lodger not related to the householder or to anyone else in the household, and a servant living in an employer's household with no relatives are examples of unrelated individuals.

Unrelated individuals may be designated as "primary" or "secondary". Primary individuals are unrelated individuals who are also householders. Secondary individuals are household members other than a householder who are not related to any other person in the household.

Age. The age classification is based on the age of the person at the last birthday prior to the day of the interview in March.

Race. The population is divided into three groups on the basis of race: White, Black, and "other races." The last category includes Indians, Japanese, Chinese, and any other race except White and Black. "Other races" are sometimes shown in combination with the Black population.

Persons of Spanish origin. Persons of Spanish origin were determined on the basis of a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (or the origin of some other household member) from a "flash card" listing ethnic origins. Persons of Spanish origin, in particular, were those who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or some other Spanish origin. It should be noted that persons of Spanish origin may be of any race.

Own children and related children under 18 years of age. "Own" children in a family are sons and daughters, including stepchildren and adopted children of the householder. "Related" children in a family include own children and all other children in the household who are related to the householder by blood, marriage, or adoption.

School children. Data in tables 2, 23, and in those tables covering school lunch participation are restricted to households with school children 5 to 18 years old. School children were defined to be all persons between the ages of 5 and 14 and all never married, nonhouseholders attending school at or below the high school level during the reference year (1979 or 1980). This procedure should provide a slight overestimate of households with school children.

DEFINITIONS OF WORK EXPERIENCE AND OCCUPATION CHARACTERISTICS

The work experience characteristics shown in this report refer to work during the calendar year preceding the March survey. The definitions relate to the population 15 years old and over.

Work experience. A person with work experience is one who, during the preceding calendar year, did any civilian work for pay or profit or worked without pay on a family-operated farm or business at any time during the year.

Weeks worked. Persons are classified according to the number of different weeks in which they did any civilian work for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

Part-time or full-time jobs. Persons are classified as having worked at part-time jobs during the preceding calendar year, if they worked at civilian jobs which provided less than 35 hours of work per week in a majority of the weeks in which they worked during the year. They are classified as having worked at full-time jobs if they worked 35 hours or more per week during a majority of the weeks in which they worked.

Did not work. Refers to a person who did not do any civilian work during the preceding calendar year.

Occupation and industry. The occupation and industry data in this report refer to the worker's longest job during the preceding calendar year. The occupation and industry groupings shown in this report are based on the classification system used in the 1970 Census of Population. For details concerning the system for classifying industries and occupations, see the Bureau of Census publication, *Classified Index of Industries and Occupations,* September 1971.

In some tables the occupation groups are combined into four divisions, as follows:

White-collar workers. Professional, technical, and kindred workers; managers and administrators, except farm; sales workers; and clerical and kindred workers.

Blue-collar workers. Craft and kindred workers; operatives, except transport; transport equipment operatives; and laborers, except farm.

Service workers. Service workers, excluding private households, and private household workers.

Farm workers. Farmers and farm managers, and farm laborers and supervisors.

The sequence in which these four divisions appear is not intended to imply that any division has a higher social or skill level than another.

Weeks unemployed. For persons working less than 52 weeks, weeks unemployed represents the number of weeks looking for work or on layoff from a job.

DEFINITIONS OF GEOGRAPHICAL DETAIL

Geographic regions. The four major regions and nine Census divisions of the United States represent groups of States as follows:

Northeast:

New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Middle Atlantic: New Jersey, New York, and Pennsylvania.

North Central:

East North Central: Illinois, Indiana, Michigan, Ohio, and Wisconsin.

West North Central: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

South:

South Atlantic: Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia.

East South Central: Alabama, Kentucky, Mississippi, and Tennessee.

West South Central: Arkansas, Louisiana, Oklahoma, and Texas.

West:

Mountain: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.

Pacific: Alaska, California, Hawaii, Oregon, and Washington.

North and West:

Northeast, North Central, and West combined.

Metropolitan-nonmetropolitan residence. The population residing in standard metropolitan statistical areas (SMSA's) constitutes the metropolitan population. Except in New England, an SMSA is a county or group of contiguous counties which contain at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, SMSA's consist of towns and cities, rather than counties.

This report contains data for the 30 largest SMSA's; these figures are based on SMSA's as defined in the 1970 census. The counties (or towns and cities) which comprised these SMSA's in the 1970 census can be found in 1970 Census of Population, Vol. 1, *Characteristics of the Population, Part A,* "Number of Inhabitants."

Central cities. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. If only one central city is designated. then it must have 50,000 inhabitants or more. The area title may include, in addition to the largest city, up to two city names on the basis and in the order of the following criteria: (1) the additional city has at least 250,000 inhabitants or (2) the additional city has a population of one-third or more of that of the largest city and a minimum population of 25,000. An exception occurs where two cities have contiguous boundaries and constitute, for economic and social purposes, a single community of at least 50,000, the smaller of which must have a population of at least 15,000.

UNDERREPORTING OF NONCASH BENEFITS

The estimates of noncash benefit recipients and in the case of food stamps, the estimates of value derived from the March CPS are somewhat less than estimates derived from independent sources such as the Departments of Agriculture, Health and Human Services, and Housing and Urban Development. The difference between the survey estimate and the independent estimate is generally termed "underreporting."

Underreporting in household surveys can be attributed to four major factors: 1) respondents failure to report coverage or receipt of benefits, 2) respondents misclassifying the source of the benefit, 3) respondents underreporting of amounts, and 4) survey weighting procedures which do not account for the population undercount associated with the latest census of population.

In order to estimate the magnitude of underreporting for the noncash benefit data from the March CPS, the CPS estimates are periodically compared with independent estimates adjusted to CPS population coverage and annual recipiency concepts. Because of the difficulty in obtaining comparable data, independent estimates for some of the noncash benefits shown in this report have not been made. In addition, these problems in obtaining comparable data, adjusting to CPS concepts, and errors in the independent estimates themselves dictate that these estimates of underreporting should be used with caution.

Food stamps. The Department of Agriculture (USDA) makes available monthly estimates of persons receiving food stamps and the total face value of the food stamps received. These data can be used to derive independent estimates comparable to the March 1980 CPS data. These comparisons are shown in table A-3. USDA does not publish estimates of households receiving food stamps.

The CPS estimate of annual 17,549,000 persons receiving food stamps and $4.9 billion annual value received are 77.0 percent and 78.6 percent of the independent estimates, respectively. The independent estimate of the number of persons receiving food stamps was made by 1) first excluding from program counts persons living in Puerto Rico, Guam, the Virgin Islands, and other outlying areas; 2) computing the number of person months in which food stamps were received; and 3) computing the annual recipient estimate by dividing the number of person months by the average number of months in which food stamps were received as reported on the March 1980 CPS. The derivation of the independent estimates did not include adjustments for decedents or for persons residing in institutions in March 1980 but receiving food stamps in calendar year 1979.

School lunch participation. The USDA publishes monthly estimates of average daily participation in the free, reduced-price, and regular-price segments of the School Lunch Program. The data are shown in table A-4 for the month of highest participation for 1979 (February). The data exclude Puerto Rico, Guam, and the Virgin Islands.

The CPS estimate of free or reduced-price school lunch recipients was 10,339,000, about 89 percent of the peak monthly figure. Comparison of estimates of regular-price participation shows the CPS estimate of 21,701,000 was 35.8 percent above the USDA peak monthly estimate of 15,541,000.

The apparent overestimate of participants paying regular-price school lunch may be the result of several factors. First, the CPS estimate for regular-price school lunches includes both public and private schools, some of which serve lunches but are not involved in the National School Lunch Program. Second, the estimated participants from CPS were identified as "usually" eating school lunch. For this group, it is likely that the average daily number of lunches is lower than the number of students "usually" eating lunch. There does not appear to be sufficient data to adequately adjust the USDA figures to the CPS concept, therefore, the comparisons must be viewed with caution.

Table A-3. Comparison of CPS and Independent Estimates of Food Stamp Recipients and Aggregate Face Value of Food Stamps: 1979

(Numbers in thousands. Dollars in millions)

Recipient or value	Source		CPS as a percent of independent estimate
	CPS estimate	Independent estimate	
Persons receiving food stamps	17,549	22,800	77.0
Face value of food stamps	$4,922	$6,260	78.6

Table A-4. Comparison of March 1980 CPS and Independent Estimates of School Lunch Recipients

(Numbers in thousands)

Type of school lunch	Source		CPS as a percent of independent estimate
	CPS estimate	Independent estimate	
Total	32,040	27,148	118.0
Free or reduced-price school lunch	10,339	11,607	89.1
Regular-price school lunch	21,701	15,541	139.6

Public or other subsidized housing. The March 1980 CPS identified 2,573,000 households in public or other subsidized housing. A comparison of the CPS estimates with comparable estimates obtained from the Department of Housing and Urban Development (HUD) indicate that the CPS estimate is about 96 percent of the independent HUD figure overall and 92 percent of the estimate for the elderly (table A-5). This indicates a much less serious underreporting problem than for food stamps and public cash transfer programs, however, it is likely that the CPS estimate contains households which reside in subsidized units which were not counted in the independent estimate. These might include military personnel, student housing, or other smaller HUD or USDA programs. Without more detailed questions on the CPS and more detailed administrative data it is difficult to refine this comparison.

Medicaid. Development of independent estimates for Medicaid coverage required data from several sources within the Department of Health and Human Services (HHS) and some important assumptions. Comparisons of the CPS estimates with the independent figures are shown in table A-6. The comparison indicates that the CPS estimate was about 13 percent lower than the independently derived estimate of 20,794,000. The estimate derived from the HHS data is adjusted for the institutionalized population and for deaths. The independent estimate does not include persons covered under "State only" medical assistance programs primarily in New York and California. At this time we have no reasonably accurate estimate of this group, however, assuming some were counted as Medicaid in the CPS, the underreporting estimate of 13 percent is probably conservative.

The CPS was edited extensively for Medicaid coverage. All recipients of AFDC and SSI were assigned Medicaid coverage. This added a substantial number of recipients. In addition, own children of AFDC recipients and spouses (in States with unemployed father allowances) were assigned coverage.

Medicare. The independent estimates of persons covered by Medicare which have been adjusted for decedents and the institutionalized are probably the most reliable of all independent estimates. The CPS estimate of 26,197,000 Medicare beneficiaries is 97 percent of the independent estimate of 27,081,000 for 1979. As in the case of Medicaid, edits significantly affected the CPS estimate. The edit which was most significant involved the assignment of Medicare coverage to all Social Security income recipients age 65 years old and over.

Table A-5. Comparison of CPS and Independent Estimates of Households Residing in Public or Other Subsidized Housing: March 1980

(Numbers in thousands)

Table A-6. Comparison of CPS and Independent Estimates of Persons Covered by Medicaid in 1979

(Numbers in thousands)

Type of recipient	Source		CPS as a percent of independent estimate
	CPS estimate	Independent estimate	
Total	18,136	20,794	87.2
Cash public assistance recipients	13,219	17,184	76.9
Other recipients	4,917	3,610	136.2

Appendix B. Source and Reliability of the Estimates

SOURCE OF DATA

The estimates are based on data obtained in March 1980 and March 1981 from the Current Population Survey (CPS) conducted by the Bureau of the Census and from supplementary questions to the CPS. The monthly CPS deals mainly with labor force data for the civilian noninstitutional population. Questions relating to labor force participation are asked about each member 14 years old and over in every sample household. In addition, in March 1980 and March 1981, supplementary questions were asked about money income, noncash benefits, and work experience for the previous year. In order to obtain more reliable data for the Spanish-origin population, the March CPS samples were enlarged to include all households from the previous November sample which contained at least one sample person of Spanish origin. For this report, persons in the Armed Forces living off post or with their families on post are also included.

The present CPS sample was initially selected from the 1970 census files with coverage in all 50 States and the District of Columbia. The sample is continually updated to reflect new construction. The current CPS sample is located in 629 areas comprising 1,133 counties, independent cities, and minor civil divisions in the Nation. In the March 1980 and March 1981 samples, approximately 68,000 occupied households were eligible for interview. Of this number, about 3,000 occupied units were visited but interviews were not obtained because the occupants were not found at home after repeated calls or were unavailable for some other reason.

For a description of the previous CPS sample designs see the detailed reports in the series, Current Population Reports, Series P-60.

The estimation procedure used in this survey involved the inflation of the weighted sample results to independent estimates of the total civilian noninstitutional population of the United States by age, race, and sex. These independent estimates are based on civilian noninstitutional population controls from decennial censuses; statistics on births, deaths, immigration and emigration; and statistics on the strength of the Armed Forces. The estimation procedure for data in this report also included an additional adjustment so that the husband and wife of a household received equal weights.

Estimates in this report for 1979 and 1980 are based on the adjustment of weighted sample results to independent estimates of civilian noninstitutional population controls for age, race, and sex established by the 1980 Census of Population. Data published in Series P-23, No. 110 showing noncash benefit data in 1979 were based on population estimates derived from the 1970 census.

RELIABILITY OF THE ESTIMATES

Since the CPS estimates are based on a sample, they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey: sampling and nonsampling. The standard errors primarily indicate the magnitude of the sampling error. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. The full extent of nonsampling error is unknown. Consequently, particular care should be exercised in the interpretation of figures based on a relatively small number of cases or on small differences between estimates.

Nonsampling variability. Nonsampling errors can be attributed to many sources; e.g., inability to obtain information about all cases in the sample, definitional difficulties, differences in the interpretation of questions, inability or unwillingness on the part of the respondents to provide correct information, inability to recall information, errors made in collection such as in recording or coding the data, errors made in processing the data, errors made in estimating values for missing data, and failure to represent all units with the sample (undercoverage).

Undercoverage in the CPS results from missed housing units and missed persons within sample households. Overall CPS undercoverage as compared with the level of the 1980 decennial census is about 6.5 percent. It is known that CPS undercoverage varies with age, sex, and race. Generally, undercoverage is larger for males than for females and larger for Blacks and other races combined than for Whites. Ratio estimation to independent age-sex-race population controls, as described previously, partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that missed persons in missed households or missed persons in interviewed households have different characteristics than interviewed persons in the same age-sex-race group. Further, the independent population controls used have not been adjusted for undercoverage in the decennial census.

The estimates of noncash benefits and the estimates of the value of food stamps received (as derived from the March

CPS) are subject to underreporting. Underreporting in household surveys can be attributed to several factors. These factors include failure to report or underreporting benefits received and misclassification of the source of benefits. See also the section of this report entitled "Underreporting of Noncash Benefits".

Estimation of median incomes. Median incomes have been estimated using either Pareto interpolation or linear interpolation. Pareto interpolation assumes a decreasing density of population within an income interval, whereas linear interpolation assumes a constant density of population within an income interval. Estimates of median income and their associated standard errors have been calculated using Pareto interpolation if the width of the income interval containing the estimate is greater than $2,500. Otherwise, the computations have been done using linear interpolation.

Sampling variability. The standard errors given in tables B-1 and B-2 are primarily measures of sampling variability; that is, of the variation that occurred by chance because a sample rather than the entire population was surveyed. The sample estimate and its standard error enable one to construct confidence intervals—ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.

2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.

3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Standard errors may also be used to perform hypothesis testing - a procedure for distinguishing between population parameters using sample estimates. The most common types of hypotheses appearing in this report are 1) the population parameters are identical or 2) they are different. An example of this would be comparing the number of households receiving noncash benefits in 1980 versus the number of households receiving noncash benefits in 1979. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the parameters are different when, in fact, they are identical.

All statements of comparison in the text have passed a hypothesis test at the 0.10 level of significance or better, and most have passed a hypothesis test at the 0.05 level of significance or better. This means that, for most differences cited in the text, the estimated difference between parameters is greater than twice the standard error of the difference. For the other differences mentioned, the estimated difference between parameters is between 1.6 and 2.0 times the standard error of the difference. When this is the case, the statement of comparison will be qualified in some way, e.g., by use of the phrase "some evidence".

Note when using small estimates. Summary measures (such as means, medians, and percent distributions) are shown only when the base is 75,000 or greater. Because of the large standard errors involved, there is little chance that summary measures would reveal useful information when computed on a smaller base. Estimated numbers are shown, however, even though the relative standard errors of these numbers are larger than those for corresponding percentages. These smaller estimates are provided primarily to permit such combinations of the categories as serve each user's needs.

Table B-1. Standard Errors of Estimated Numbers of Households and Persons: 1980 and 1979

(Numbers in thousands)

Size of estimate	Standard error[1]	Size of estimate	Standard error[1]
75	11	7,500	111
100	13	10,000	127
250	21	15,000	154
500	29	25,000	192
1,000	41	50,000	247
2,000	58	100,000	269
3,000	71	125,000	243
5,000	91	160,000	139

[1]These values must be multiplied by the appropriate "f" factor in table B-3 to obtain the correct standard error.

Standard error tables and their use. In order to derive standard errors that would be applicable to a large number of estimates and that could be prepared at a moderate cost, a number of approximations were required. Therefore, instead of providing an individual standard error for each estimate, generalized sets of standard errors are provided for various types of characteristics. As a result, the sets of standard errors provided give an indication of the order of magnitude of the standard error of an estimate rather than the precise standard error.

The figures presented in tables B-1 and B-2 are approximations to standard errors of various estimates for households and persons in the United States. Estimated standard errors for specific characteristics cannot be obtained from tables B-1 and B-2 without the use of the "f" factors in table B-3. These factors must be applied to the generalized standard errors in order to adjust for the combined effect of the

Table B-2. Standard Errors of Estimated Percentages of Households and Persons: 1980 and 1979

Base of estimated percentage (thousands)	Estimated percentage[1]				
	2 or 98	5 or 95	10 or 90	25 or 75	50
75	2.1	3.3	4.5	6.6	7.6
100	1.8	2.9	3.9	5.7	6.6
250	1.2	1.8	2.5	3.6	4.1
500	0.8	1.3	1.8	2.5	2.9
1,000	0.6	0.9	1.2	1.8	2.1
2,000	0.4	0.6	0.9	1.3	1.5
3,000	0.3	0.5	0.7	1.0	1.2

125,000	0.05	0.08	0.11	0.2	0.2
160,000	0.05	0.07	0.10	0.14	0.2

[1]These values must be multiplied by the appropriate "f" factor in table B-3 to obtain the correct standard error.

sample design and the estimating procedure on the value of the characteristic.

Standard errors for intermediate values not shown in the generalized tables of standard errors may be approximated by linear interpolation. Standard errors of estimated means and medians are provided in the detailed tables.

Two parameters (denoted "a" and "b") are used to calculate standard errors for each type of characteristic; they are presented in table B-3. These parameters were used to calculate the standard errors in tables B-1 and B-2 and to calculate the "f" factors in table B-3. They also may be used to directly calculate the standard errors for estimated numbers and percentages. Methods for computation are given in the following sections.

Standard errors of estimated numbers. The approximate standard error, σ_x, of an estimated number can be obtained in two ways. It may be obtained by use of the formula

$$\sigma_x = f\sigma \qquad (1)$$

where f is the appropriate "f" factor from table B-3, and σ is the standard error on the estimate obtained by interpolation from table B-1. Alternatively, it may be approximated by using formula (2), from which the standard errors in table B-1 were calculated. Use of this formula will provide more accurate results than the use of formula (1).

$$\sigma_x = \sqrt{ax^2 + bx} \qquad (2)$$

Here x is the size of the estimate and a and b are the parameters in table B-3 associated with the particular type of characteristic.

Standard errors of estimated percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which this percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the "f" factor or parameters from table B-3 indicated by the numerator. The approximate standard error, $\sigma_{(x,p)}$, of an estimated percentage can be obtained by use of formula

$$\sigma_{(x,p)} = f\sigma \qquad (3)$$

In this formula, f is the appropriate factor from table B-3 and σ is the standard error on the estimate from table B-2. Alternatively, it may be approximated by using formula (4) from which the standard errors in table B-2 were calculated. Use of this formula will give more accurate results than use of formula (3).

$$\sigma_{(x,p)} = \sqrt{\frac{b}{x} \cdot p\,(100 - p)} \qquad (4)$$

Here x is the size of the subclass of persons or households which is the base of the percentage, p is the percentage ($0 < p < 100$), and b is the parameter in table B-3 associated with the particular type of characteristic in the numerator of the percentage.

Illustration of the use of standard error tables. Table C of this report shows that in 1980 there were 6,769,000 households receiving food stamps. Table B-1 shows the standard error of an estimate of this size to be approximately 105,000. In this situation, no "f" factor has to be applied to the standard error; i.e., f is equal to 1.0. Alternatively, using the parameters in table B-3 in formula (2) gives a standard error of

$$106{,}000 = \sqrt{(-0.000010)\,(6{,}769{,}000)^2 + (1{,}721)\,(6{,}769{,}000)}$$

Table B-3. "a" and "b" Parameters and "f" Factors for Computing Approximate Standard Errors of Estimated Numbers and Percentages of Households and Persons: 1980 and 1979

Characteristic	Parameters		"f" factor
	a	b	
HOUSEHOLDS			
Total households			
Race of householder:			
Total or White	-0.000010	1,389	0.90
Black and/or other races	-0.000087	1,255	0.85
Spanish origin	-0.000020	1,422	0.91
South Region	-0.000011	1,514	0.94
Inside metropolitan and central city areas	-0.000020	2,778	1.27
Food Stamp Recipiency, Free or Reduced-Price School Lunch Program, Residence in Publicly Owned or Other Subsidized Housing, Medicare and Medicaid Programs			
All income levels			
Type of residence	-0.000020	3,442	1.41
Region:			
Northeast	-0.000010	1,773	1.01
North Central	-0.000010	1,790	1.02
South	-0.000011	1,876	1.04
West	-0.000009	1,601	0.96
Race and Spanish origin:			
Total or White	-0.000010	1,721	1.00
Black and/or other races	-0.000089	1,876	1.04
Spanish origin	-0.000014	2,420	1.19
Type of household, age of householder, size of household, work experience of householder, and tenure	-0.000010	1,721	1.00
Below the poverty level			
Type of residence	0.000152	3,752	1.48
Region:			
Northeast	0.000078	1,932	1.06
North Central	0.000079	1,951	1.06
South	0.000083	2,045	1.09
West	0.000071	1,745	1.01
Race and Spanish origin:			
Total or White; Black and/or other races	0.000076	1,876	1.04
Spanish origin	-0.000014	2,420	1.19
Type of household, age of householder, size of household, work experience of householder, and tenure	0.000076	1,876	1.04

The 68-percent confidence interval as shown by the data is from 6,663,000 to 6,875,000. Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude with 95 percent confidence that the average estimate derived from all possible samples lies within the interval from 6,557,000 to 6,981,000 (using twice the standard error).

Of the 6,769,000 households receiving food stamps in 1980, 35.1 percent were Black. Table B-2 shows the standard error of 35.1 percent on a base of 6,769,000 to be approximately 0.8 percent. (An "f" factor of 1.04 was applied here.)

Alternatively, this standard error could have been derived by using the "b" parameter for Blacks from table B-3 in formula (4).

$$0.8 = \sqrt{\frac{1,876}{6,769,000}(35.1)(64.9)}$$

Consequently, the 68-percent confidence interval as shown by these data is from 34.3 to 35.9 percent, and the 95-percent confidence interval is from 33.5 to 36.7 percent.

Standard error of a difference. For a difference between two sample estimates the standard error is approximately equal to

$$\sigma_{(x-y)} = \sqrt{\sigma_x^2 + \sigma_y^2 - 2\rho\,\sigma_x\,\sigma_y} \qquad (5)$$

where σ_x and σ_y are the standard errors for the estimates x and y (from tables B-1 through B-3). The estimates can be numbers, percents, ratios, etc. The correlation coefficient ρ can be determined from table B-4 for year-to-year comparisons for income and poverty estimates and proportions; for other comparisons assume that ρ equals zero. Making this assumption will result in accurate estimates of standard errors for the difference between two estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive (negative) correlation between the two characteristics, the formula will overstate (understate) the true standard error.

Illustration of the computation of the standard error of a difference in estimates. Table A shows that the number of households receiving food stamps in 1980 was 6,769,000 and in 1979 the figure was 6,054,000. The apparent difference is 715,000. The standard error on the estimate 6,769,000 is

Table B-4. Year-to-Year Correlation Coefficients for Income and Poverty Estimates of Households and Persons: 1980 and 1979

Characteristic	Households		Persons	
	Income	Poverty	Income	Poverty
Total	0.35	0.35	0.30	0.45
White	0.35	0.30	0.30	0.35
Black and/or other races	0.35	0.35	0.30	0.45
Spanish origin	0.55	0.55	0.45	0.65

Note: These coefficients are based on CPS data obtained in March 1978 and March 1979.

106,000. The standard error on the 6,054,000 households receiving food stamps computed from formula (2) is 100,000. From table B-4 we obtain the correlation coefficient, $\rho = .35$. The standard error associated with the estimated difference of 715,000 is

$$118{,}000 \doteq \sqrt{(106{,}000)^2 + (100{,}000)^2 - 2(.35)(106{,}000)(100{,}000)}$$

This means that the 68-percent confidence interval around the 715,000 difference is from 597,000 to 833,000, i.e., 715,000 ± 118,000. A conclusion that the average estimate of the difference derived from all possible samples lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Thus, we can conclude with 68 percent confidence that the number of households receiving food stamps in 1980 is higher than the figure for 1979.

Standard error of a ratio. Certain mean values for persons in households shown in the tables of this report were calculated as the ratio of two numbers. For example, the mean number of persons per household is calculated as

$$\frac{x}{y} = \frac{\text{total number of persons in households}}{\text{total number of households}}$$

Standard errors for these means may be approximated as shown below. There are two cases to consider. In either case, the denominator y represents a count of households of a certain class, and the numerator x represents a count of persons with the characteristic under consideration who are members of these households.

Case 1: There is at least one person having the characteristic in every household of the class; for example, the mean number of persons per household, or the mean number of persons per household with a male householder. For ratios of this kind, the standard error is approximated by the following formula.

$$\sigma_{\frac{x}{y}} = \sqrt{\left(\frac{x}{y}\right)^2 \left[\left(\frac{\sigma_y}{y}\right)^2 + \left(\frac{\sigma_x}{x}\right)^2 - 2\rho\left(\frac{\sigma_x}{x}\right)\left(\frac{\sigma_y}{y}\right)\right]} \quad (6)$$

The standard error of the estimated number of households, σ_y, and the standard error of the estimated number of persons with the characteristic in those households, σ_x, may be obtained from formula (1). Alternatively, formula (2) and table B-3 may be used. In formula (6), ρ represents the correlation coefficient between the numerator and the denominator of the estimate. In the above example, and for other ratios of this kind, use 0.7 as an estimate of ρ.

Case 2: The number of persons having the characteristic in a given household may be 0, 1, 2, 3, or more; for example, the mean number of persons under 18 years of age per household. For ratios of this kind the standard error is approximated by formula (6) but ρ is assumed to be zero. If ρ is actually positive (negative), then this procedure will provide an overestimate (underestimate) of the standard error of the ratio.

Note: When computing the approximate standard error of a ratio and the numerator of the ratio is income, formula (7) for the standard error of an arithmetic mean should be used. If the ratio has persons in the numerator and households in the denominator then formula (6) with the appropriate value of ρ will give a result preferable to that of formula (7).

STANDARD ERRORS OF ESTIMATED MEANS AND MEDIANS

Estimated standard errors are provided for the means and medians of the published income distributions and do not need to be calculated by the user. However, because of the approximations used in developing the formula used to estimate the standard error of the mean, the standard error reported for this statistic will generally be an underestimate. Since some users may wish to combine two or more income distributions and compute means and medians for the combined distribution, the following sections have been provided to enable the user to calculate standard errors for these statistics.

Standard error of an arithmetic mean. To get a rough estimate of the standard error of a mean, the following formula can be used:

$$\sigma_{\bar{x}} = \sqrt{\frac{b}{y} \cdot s^2} \quad (7)$$

In this formula, y is the size of the base of the distribution

and b is a parameter which depends on the sample size, the sample design, the estimation procedure, and the type of characteristics. Values of b are given in table B-3. The variance, s^2, is given by the following formula:

$$s^2 = \sum_{i=1}^{c} p_i \bar{x}_i^2 - \bar{x}^2 \tag{8}$$

where $\bar{x}$ is the mean of the distribution, defined by $\sum_{i=1}^{c} p_i x_i$; c is the number of groups in the distribution; i indicates a specific group, taking on values of 1 through c; p_i is the proportion of total cases in the ith group; and $\bar{x}_i$ is the midpoint of the ith group (or discrete value of the ith group). $\bar{x}_i = (z_{i-1} + z_i)/2$, where z_{i-1} and z_i are the lower and upper interval boundaries, respectively, for group i. Group c is open-ended; i.e., no upper interval boundary exists. For this group, an approximate average value is

$$\bar{x}_c = \frac{3}{2} z_{c-1}$$

When two or more distributions are combined, the mean of the combined distribution is

$$\bar{x} = \frac{1}{y} \sum_j \bar{x}_j y_j$$

where $\bar{x}_j$ is the mean of the jth distribution, y_j is the base of jth distribution, and $y = \sum_j y_j$. This mean must be computed by the user.

Standard error of a median. The sampling variability of an estimated median depends upon the form of the distribution as well as the size of its base. An approximate method for measuring the reliability of an estimated median is to determine a confidence interval about it. (See the section on sampling variability for a general discussion of confidence intervals.) The following procedure may be used to estimate the 68-percent confidence limits of a median based on sample data.

1. Determine, using the standard error tables and factors or formula (4), the standard error of the estimate of 50 percent from the distribution;

2. Add to and subtract from 50 percent the standard error determined in step (1);

3. Using the distribution of the characteristic, calculate the values from the distribution corresponding to the two points established in step (2). These values will be the limits for the confidence interval.

For calculation of the confidence interval use Pareto interpolation for any point in an income interval greater than $2,500 width; use linear interpolation otherwise.

A 95-percent confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step (1).

The formulas used to implement step (3) for Pareto or linear interpolation are

Pareto:

$$x_{pN} = A_1 \exp\left[\ln\left(\frac{pN}{N_1}\right) \ln\left(\frac{A_2}{A_1}\right) \Big/ \ln\left(\frac{N_2}{N_1}\right)\right] \tag{9}$$

Linear:

$$x_{pN} = \frac{N_1 - pN}{N_1 - N_2} (A_2 - A_1) + A_1 \tag{10}$$

where N = total number of households or persons in the distribution.

x_{pN} = estimated upper and lower bounds for the confidence interval ($0<p<1$). For the purposes of calculating the confidence interval, p takes on the two values in step (2). Note that x_{pN} estimates the median when p = .50 is used in the formulas.

A_1 and A_2 = the lower and upper bounds, respectively, on the interval in which x_{pN} falls.

N_1 and N_2 = the estimated number of households or persons with incomes greater than A_1 and A_2, respectively.

exp = is the exponential function.

ln = is the natural logarithm function.

It should be noted that a mathematically equivalent result is obtained by using common logarithms (base 10) and antilogarithms.

For illustrations of the computation of a confidence interval for a median, see the source and reliability section of previous reports in the P-60 series.

FORM APPROVED: O.M.B. No. 41-R1201

1. 1st month letter sent Y N
2. 5th month letter sent Y N
3. HOUSEHOLD NUMBER
4. SEGMENT TYPE: ☐ Area ☐ Address ☐ Permit ☐ Con-Sup ☐ Special Place
5. SAMPLE
6. CONTROL NUMBER: PSU | Segment | Serial No.

7a. ADDRESS (Sheet ___ Line ___) What is your exact address? Include House No., St., Apt. No., or other identification

Place, State, ZIP code

7b. Is this your mailing address? Enter "Same" or specify if different. Include ZIP code.

7c. Special place name | Type code | Sample No.

ASK DURING 1st AND 5th MONTHS OF ENUMERATION

AREA SEGMENTS ONLY

7d. YEAR BUILT: ☐ Ask 1st mo. ☐ Do NOT ask

When was this structure originally built? ☐ Before 4-1-70 – Cont. interview ☐ After 4-1-70 – Complete 8a and 10–12, when required; end interview

8. ASK (in 1st and 5th month):
- ☐ a. Are there any occupied or vacant living quarters besides your own in this building? (1st: Y N Fill Table X; 5th: Y N Fill Table X)
- ☐ b. Are there any occupied or vacant living quarters besides your own on this floor? (1st: Y N Fill Table X; 5th: Y N Fill Table X)
- ☐ c. Is there any other building on this property for people to live in – either occupied or vacant? (1st: Y N Fill Table X; 5th: Y N Fill Table X)
- ☐ d. None

9. TENURE: Are your living quarters – Owned or being bought by you or someone in your household? ☐ Rented for cash? ☐ Occupied without payment of cash rent? ☐ (1st / 5th)

10–12. LAND USE/FARM SALES

10. ☐ RURAL – • Reg. units and Sp. pl. units coded 85–88 in Item 7c, ask 11. • Sp. pl. not coded 85–88 in 7c, skip to cc Item 14a. ☐ URBAN (Code A) – Skip to cc Item 14a

11. You told us your living quarters are (Read entry in cc Item 9): Does this place you (own/rent) have 10 acres or more? ☐ Y (B) ☐ N (C) (1st / 5th) Ask 12

12. During the past 12 months, how much did sales of crops, livestock and other farm products from this place amount to? Show flashcard: $1,000 or more ... ☐ (A); $ 250 to $999 ... ☐ (B); $ 50 to $249 ... ☐ (C); Under $50 ... ☐ (D)

NOTE: Transcribe to CPS-1, Item 5: • A (cc 10–CPS-1, 5a) OR • B or C (cc11–CPS-1, 5a) and A, B, C or D (cc12–CPS-1, 5b)

Line number (Circle line No. of resp.) 13.	REFERENCE PERSON/HOUSEHOLD ROSTER (Last name first) What are the names of all persons living or staying here? Start with the name of the person or one of the persons who (owns/rents) this home. 14a.	RELATIONSHIP TO REFERENCE PERSON (Example: Reference person, husband, wife, son, parent, brother, sister, uncle, cousin, daughter-in-law, lodger, lodger's son, lodger's wife, etc.) 14b.	HOUSEHOLD MEMBER (Is this usual place of residence? (If No, verify URE)) 14c.	What is ...'s date of birth? (Enter in numerals) 17a. Month 17b. Date 17c. Year	AGE LAST BIRTHDAY: Enter age as of end of survey week. If under 1 year of age, enter "0." 18a.	Month and year of age change (Enter in numerals) 18b. 18c.	MARITAL STATUS: Is ... now married, widowed, divorced, separated, or has ... never been married? M., Wid., Div., Sep., or N.M. 18d.	SEX (Circle M or F) 19.	Did ... live in the U.S. last March? 20.	If YES enter AF, If NO, leave blank 22.	What is the highest grade or year of regular school ... has ever attended? Enter code from below 23a.	Did ... complete that grade (year)? 23b.	What is the race of each person in this household? Show flashcard Enter code from below 24.	What is the origin or descent of each person in this household? Show flashcard Enter code from below 25.	What is the Social Security or Railroad Retirement number of each person in this household who is 14 years of age or older? Read names 26a.	CHANGES IN HOUSEHOLD COMPOSITION (Continue in notes if necessary) Line No. 26b.

VACATION REMINDER

Next month, during the week of the 19th we will again be calling on you. Is there any reason why we would not be able to contact you here?

16. LIVING QUARTERS (indicate type, access and kitchen facilities)

16a. HOUSING UNIT
- ☐ House, apartment, flat
- ☐ HU in nontrans. hotel, motel, etc.
- ☐ HU-perm. in trans. hotel, motel, etc.
- ☐ HU in rooming house
- ☐ Mobile home or trailer
- ☐ HU not specified above – Describe in notes

16b. ACCESS ☐ Direct ☐ Thru another unit

16c. COMPLETE KITCHEN FACILITIES
- ☐ For this unit only
- ☐ Also used by another household
- ☐ None

If "NONE," and unit vacant, did last occupants have complete kitchen facilities?
- ☐ For this unit only
- ☐ Also used by another household
- ☐ None

16d. OTHER UNIT
- ☐ Quarters not HU in rooming or boarding house
- ☐ Unit not permanent in transient hotel, motel, etc.
- ☐ Vacant tent site or trailer site
- ☐ Not specified above – Describe in notes

NOTES

30. USE OF TELEPHONE

30a. What is your telephone number?
- 1st mo. ☐ No. ____ ☐ No phone
- 5th mo. ☐ No phone ☐ Same ☐ No. ____

30b. Is a telephone interview acceptable? 1st month Y N; 5th month Y N

31. What is the best time to call or visit?

33. TOTAL FAMILY INCOME IN PAST 12 MONTHS (Show flashcard)

Which category on this card represents the total combined income of all members of this FAMILY during the past 12 months? This includes money from jobs, net income from business, farm or rent, pensions, dividends, interest, social security payments and any other money income received by members of this FAMILY who are 14 years of age or older?

- A ☐ Under $1,000
- B ☐ $1,000 to $1,999
- C ☐ 2,000 to 2,999
- D ☐ 3,000 to 3,999
- E ☐ 4,000 to 4,999
- F ☐ $ 5,000 to $ 5,999
- G ☐ 6,000 to 7,499
- H ☐ 7,500 to 9,999
- I ☐ 10,000 to 11,999
- J ☐ 12,000 to 14,999
- K ☐ $15,000 to $19,999
- L ☐ 20,000 to 24,999
- M ☐ 25,000 to 49,999
- N ☐ 50,000 and over

- employer directly . . ○
- friends or relatives . . ○
- Placed or answered ads . . . . . ○
- Nothing *(Skip to 24)* . . . . . ○
- Other *(Specify in notes, e.g., CETA, union or prof. register, etc.)* . . . . . ○

22B. Why did . . . start looking for work? Was it because . . . lost or quit a job at that time *(pause)* **or was there some other reason?**

- Lost job . . . . . ○
- Quit job . . . . . ○
- Left school . . . . . ○
- Wanted temporary work ○
- Other *(Specify in notes)* . ○

22C. 1) How many weeks has . . . been looking for work?
2) How many weeks ago did . . . start looking for work?
3) How many weeks ago was . . . laid off?

22D. Has . . . been looking for full-time or part-time work?

Full ○ Part ○

22E. Is there any reason why . . . could not take a job LAST WEEK?

Yes ○
- Already has a job . . . . ○
- Temporary illness . . . . ○
- Going to school . . . . . ○
- Other *(Specify in notes)* ○

No ○

22F. When did . . . last work at a full-time job or business lasting 2 consecutive weeks or more?

Within last 12 months *(Specify)* . . . . .

(Month)

- One to five years ago . . . . . ○
- More than 5 years ago . . . . . ○
- Nev. worked full-time 2 wks. or more ○
- Never worked at all . . . . . ○

(SKIP to 23. If layoff entered in 21A, enter job, either full or part time, from which laid off. Else enter last full time civilian job lasting 2 weeks or more, or "never worked.")

24. INTERVIEWER CHECK ITEM
(Rotation number)
First digit of SEGMENT number is:

○ 2, 3, 4, 6, 7, or 8 *(End questions)*
○ 1 or 5 *(Go to 24A)*

24A. When did . . . last work for pay at a regular job or business, either full- or part-time?

- Within past 12 months ○
- 1 up to 2 years ago . . . ○
- 2 up to 3 years ago . . . ○
- 3 up to 4 years ago . . . ○
- 4 up to 5 years ago . . . ○
- 5 or more years ago . . ○
- Never worked . . . . . ○

(Go to 24B) / *(Skip to 24C)*

24B. Why did . . . leave that job?

- Personal, family *(Incl. pregnancy)* or school ○
- Health . . . . . ○
- Retirement or old age . . . . . ○
- Seasonal job completed . . . . . ○
- Slack work or business conditions ○
- Temporary job completed . . . ○
- Unsatisfactory work arrangements *(Hours, pay, etc.)* ○
- Other . . . . . ○

24C. Does . . . want a regular job now, either full- or part-time?

- Yes . . . . . ○
- Maybe — it depends *(Specify in notes)* ○
- No . . . . . ○
- Don't know . . . . . ○

(Go to 24D) / *(Skip to 24E)*

24D. What are the reasons . . . is not looking for work?
(Mark each reason mentioned)

- Believes no work available in line of work or area ○
- Couldn't find any work . . . . . ○
- Lacks nec. schooling, training, skills or experience . . . ○
- Employers think too young or too old . . . . . ○
- Other pers. handicap in finding job ○
- Can't arrange child care . . . . . ○
- Family responsibilities . . . . . ○
- In school or other training . . . . . ○
- Ill health, physical disability . . . . . ○
- Other *(Specify in notes)* . . . . . ○
- Don't know . . . . . ○

24E. Does . . . intend to look for work of any kind in the next 12 months?

- Yes . . . . . ○
- It depends *(Specify in notes)* ○
- No . . . . . ○
- Don't know . . . . . ○

(If entry in 24B, describe job in 23 otherwise, end questions.)

25. INTERVIEWER CHECK ITEM
(Rotation number)
First digit of SEGMENT number is:

○ 2, 3, 4, 6, 7, or 8 *(End questions)*
○ 1 or 5 *(Go to 25A)*

25A. How many hours per week does . . . USUALLY work at this job?

25B. Is . . . paid by the hour on this job?

Yes ○ *(Go to 25C)*
No ○ *(Skip to 25D)*

25C. How much does . . . earn per hour?

Dollars	Cents
$	¢

(Ask 25D)

25D. How much does . . . USUALLY earn per week at this job BEFORE deductions? Include any overtime pay, commissions, or tips usually received.

$

(End questions)

23. DESCRIPTION OF JOB OR BUSINESS

23A. For whom did . . . work? *(Name of company, business, organization or other employer.)*

23B. What kind of business or industry is this? *(For example: TV and radio mfg., retail shoe store, State Labor Dept., farm.)*

CPS—665
INCOME SUPPLEMENT

Form Approved– O.M.B. No. 41-R2971

MARCH 1981

INTRODUCTION
(Optional)

We have just completed the questions about employment and unemployment. Each March, the Census Bureau also collects information about the economic situation of Americans and their families for the previous year. I am going to ask these questions now. We don't expect all answers to be perfect, but please think about each question and answer it the best you can.
