## TEXT TABLES

A. Persons, families, and unrelated individuals below the poverty level in 1981 and 1980 . . . . . 2
B. Comparison of poverty estimates for 1980 based on the current and revised poverty definitions. 4

## DETAILED TABLES

### Trends in Poverty Population

1. Persons below the poverty level, by family status, type of family, race, and Spanish origin: 1959, 1960, and 1965 to 1981 . . . . . 7
2. Persons below 125 percent of the poverty level, by family status, type of family, race, and Spanish origin: 1959, 1960, and 1965 to 1981 . . . . . 10
3. Persons 65 years and over below the poverty level, by sex, race, and Spanish origin: 1970 to 1981 . . . . . 13
4. Metropolitan-nonmetropolitan residence and region of persons and families below the poverty level, by race: 1959, 1970, 1975, 1979, 1980, and 1981 . . . . . 15
5. Selected characteristics of families below the poverty level, by type of family and race and Spanish origin of householder: 1959, 1970, 1975, 1979, 1980, and 1981 . . . . . 17
6. Selected measures of income deficit for families and unrelated individuals below the poverty level, by type of family and race: 1959, 1960, and 1965 to 1981 . . . . . 26

### Persons

7. Ratio of income to poverty level in 1981—persons, by family status, sex of householder, and race . . . . . 27
8. Farm-nonfarm residence and region—poverty status in 1981 of persons, by family status, sex of householder, and race . . . . . 29
9. Metropolitan-nonmetropolitan and poverty area residence—poverty status in 1981 of persons, by family status, type of family, and race . . . . . 33
10. Twenty largest standard metropolitan statistical areas—persons and families below the poverty level in 1981 . . . . . 41
11. Age and sex—poverty status in 1981 of persons, by family relationship, type of family, race, and Spanish origin . . . . . 42
12. Children under 3 years old per 1,000 women—poverty status in 1981 of women 15 to 44 years old and children under 3 years old, by metropolitan-nonmetropolitan residence, poverty area residence, and race . . . . . 45
13. Educational attainment—poverty status in 1981 of persons 15 years old and over, by age, sex, and race . . . . . 46

## DETAILED TABLES—Continued

### Persons—Continued

Page

14. Work experience—poverty status in 1981 of persons 15 years old and over, by age, sex, and race . . . 51
15. Selected characteristics of the aged—poverty status in 1981 of persons 60 years old and over, by age and sex . . . 65
16. Standard errors for selected characteristics of persons below the poverty level in 1981 . . . 71

### Families

17. Size of family—poverty status in 1981 of families, by type of family and race of householder . . . 72
18. Families, by number of related children under 18 years old—poverty status in 1981 of families, by type of family and race of householder . . . 73
19. Presence and age of related children—poverty status in 1981 of families, by type of family and age and race of householder . . . 74
20. Poverty area residence—poverty status in 1981 of families, by race of householder and selected characteristics . . . 78
21. Marital status—poverty status in 1981 of persons, family householders, and unrelated individuals 15 years old and over, by age, sex, and race . . . 89
22. Living arrangements—poverty status in 1981 of unrelated individuals 16 years old and over, by age, sex, and race . . . 95
23. Tenure—poverty status in 1981 of families and nonfamily householders, by selected characteristics . . . 97
24. Employment status in March 1982—poverty status in 1981 of family householders and unrelated individuals, by sex, race, and Spanish origin . . . 99
25. Number of workers—poverty status in 1981 of families with civilian householders, by sex and race of householder . . . 100
26. Work experience of householder—poverty status in 1981 of family householders, by presence of children, sex, and race . . . 103
27. Work experience of unrelated individuals—poverty status in 1981 of unrelated individuals, by age, sex, and race . . . 112
28. Major activity in survey week—poverty status in 1981 of persons 16 to 21 years old, by employment status, educational attainment, age, sex, and race . . . 115
29. Working mothers—poverty status in 1981 of women with own children under 18 years old, by work experience, age of children, type of family, and race . . . 117
30. Own children—poverty status in 1981 of own children under 18 years old, by age, type of family, and work experience and race of mother . . . 120
31. Total money income of families—families below the poverty level in 1981, by presence of related children under 18 years old and age, race, and Spanish origin of householder . . . 124
32. Total money income of unrelated individuals—unrelated individuals below the poverty level in 1981, by age, sex, race, and Spanish origin . . . 137
33. Total money income, by size of family—families and related children under 18 years old below the poverty level in 1981, by type of family and race of householder . . . 129
34. Type of income—poverty status in 1981 of families and unrelated individuals, by age, sex, and race of family householder or unrelated individual . . . 132
35. Size of income deficit—families and unrelated individuals below the poverty level in 1981, by presence of related children and sex and race of family householder or unrelated individual . . . 150
36. Standard errors for selected characteristics of families below the poverty level in 1981 . . . 151
37. Persons of Spanish origin—poverty status in 1981 of persons, by type of Spanish origin, type of residence, family status, and type of family . . . 152
38. Families of Spanish origin—poverty status in 1981 of families and unrelated individuals, by type of Spanish origin and other selected characteristics . . . 155
39. Selected characteristics of families below 125 percent of the poverty level in 1981 . . . 159
40. Selected characteristics of unrelated individuals below 125 percent of the poverty level in 1981 . 165
41. Selected characteristics of families with income under $15,000 in 1981, by total money income . . . 168
42. Selected characteristics of unrelated individuals with income under $15,000 in 1981, by total money income . . . 172

# Characteristics of the Population Below the Poverty Level: 1981

This report presents detailed social and economic statistics for the population of the United States below the poverty level in 1981 based on the March 1982 Current Population Survey (CPS). Poverty data are cross-classified by such characteristics as race, family relationship, type of residence, education, work experience, and type of income received. The estimates shown in this report for 1981 are based on a poverty definition that differs slightly from the definition used in earlier years. All comparisons in this text of data for 1980 and 1981 are made using the modified definition. See the section, "Changes in the Definition of Poverty" for further details.

The average poverty threshold for a family of four persons was $9,287 in 1981, about 10.4 percent higher than the comparable 1980 figure of $8,414. The poverty thresholds are updated every year to reflect changes in the annual average Consumer Price Index. (See appendix A for an explanation of the poverty definition.) In this text, the terms "poor" and "below the poverty level" are used interchangeably.

## HIGHLIGHTS

Between 1980 and 1981, the number of persons below the poverty level rose from 29.6 million to 31.8 million, an increase of 2.2 million or 7.4 percent. During the same period, the poverty rate rose from 13.2 to 14.0 percent. This means that approximately 1 out of every 7 Americans was living below the poverty level in 1981. Between 1979 and 1980, the number of persons below the poverty level rose by 3.2 million or 12.3 percent; the difference in the increases is not statistically significant.

Among the factors contributing to the increase in poverty were the recession that began in mid-1981 and the 10.4-percent increase in consumer prices during the year. The same factors also contributed to a decline of 3.5 percent in real median family income between 1980 and 1981. (See Current Population Reports, Series P-60, No. 134, p. 1).

The increase in poverty between 1980 and 1981 affected many segments of the U.S. population. Table A summarizes some of the major changes that occurred, by race, age, residence, and type of family.

- In 1981, there were 21.6 million Whites below the poverty level, 7.5 percent more than in 1980. The number of poor Blacks rose by about the same percentage (7.2 percent) to 9.2 million. The poverty rate in 1981 for Blacks was 34 percent, about three times the rate for Whites (11 percent).

- Following a large increase between 1979 and 1980, there was no significant change in the number of poor persons of Spanish origin in 1981 (3.7 million). Their poverty rate was 26 percent. (It should be noted that "Spanish origin" is not a racial classification and that persons of Spanish origin may be of any race.)

- The number of poor children under 18 years old rose from 11.5 million in 1980 to 12.3 million in 1981, and their poverty rate rose from 18 to 20 percent. About one-half of all children living in families with a female householder, no husband present, were below the poverty level in 1981, compared with 11 percent of children living in married-couple families.

- In contrast to the increase in poverty among children in 1981, the number of poor persons 65 years old and over remained unchanged at 3.9 million, and their poverty rate (15.3 percent) was also essentially the same as in the previous year. One reason for this may be that most elderly people are no longer working and, therefore, are less adversely affected by rising unemployment. In addition, the most important Government programs benefiting the elderly, including Social Security and Supplemental Security Income, are indexed to reflect changes in the price level.

- The increase in the poverty population occurred in all major geographic areas. Metropolitan and nonmetropolitan areas experienced increases of similar size in the number of poor persons between 1980 and 1981 (1.2 million and 990,000, respectively).

- Although the overall poverty rate for metropolitan areas was 12.6 percent in 1981, their central cities had a considerably higher rate (18.0 percent), and areas outside central cities had a lower rate (8.9 percent). The poverty rate in nonmetropolitan areas was 17.0 percent, up from 15.7 percent in 1980.[1]

[1] Poverty rates in 1981 for nonmetropolitan areas and central cities were not significantly different from one another.

- The number of poor persons also rose in both the South and in the other three regions combined (referred to in table A as "North and West"). In 1981, as in earlier years, the poverty rate was higher in the South (17.4 percent) than in the North and West (12.3 percent).

- There was a substantial increase in the number of nonfarm residents classified as poor, from 28.4 million to 30.6 million, but the number of farm residents below the poverty level was unchanged at about 1.3 million.

- The number of families below the poverty level increased from 6.3 million in 1980 to 6.9 million in 1981, and their poverty rate rose from 10.4 percent to 11.2 percent.

- Between 1980 and 1981, the number of poor married-couple families rose from 3.1 to 3.4 million, and their poverty rate went from 6.3 to 6.8 percent. Among families with a female householder, no husband present, the number in poverty rose from 3.0 to 3.3 million; there was some evidence of an increase in their poverty rate, from 33.3 to 34.6 percent.

- About one-half of all families below the poverty level in 1981 were maintained by women with no husband present. Among Black families, the comparable figure was 70 percent; for Whites, it was 39 percent.

- There was some evidence of an increase in the number of poor unrelated individuals between 1980 and 1981, from 6.3 million to 6.5 million. Of these 6.5 million, 2.2 million were male and 4.3 million were female; the number of males below the poverty level increased between 1980 and 1981, while the number of females was unchanged.

## CHANGES IN THE DEFINITION OF POVERTY

The poverty definition used to produce the estimates in this report differs slightly from the one used in previous Current Population Surveys. As a result of recommendations made in 1980 by a Federal Interagency Committee, the following technical revisions have been incorporated:

1. There are no longer separate sets of poverty thresholds for the categories, "Families with a female householder,

### Table A. Persons, Families, and Unrelated Individuals Below the Poverty Level in 1981 and 1980

(Numbers in thousands. Persons, families, and unrelated individuals as of March of the following year)

| Selected characteristics | Below poverty level | | | Poverty rate | | |
|---|---|---|---|---|---|---|
| | 1981 | 1980 | Difference (1981 minus 1980) | 1981 | 1980 | Difference (1981 minus 1980) |
| All persons | 31,822 | 29,640 | *2,182 | 14.0 | 13.2 | *0.8 |
| White | 21,553 | 20,049 | *1,504 | 11.1 | 10.4 | *0.7 |

| Female | 4,251 | 4,229 | 22 | 27.7 | 28.2 | -0.5 |

*Significant at the 95-percent confidence level.
**Significant between the 90-percent and 95-percent confidence levels.

[1]Persons of Spanish origin may be of any race.

no husband present" and "All other families." Instead, a weighted average of the two sets of thresholds is used for all families.

2. Differences in the poverty thresholds based on farm-nonfarm residence have been eliminated through the use of nonfarm thresholds for all families and unrelated individuals.

3. The poverty matrix has been extended to families of nine or more persons from the old cutoff of seven or more persons. The thresholds for the additional family sizes were developed by Mollie Orshansky of the Social Security Administration, using the same methodology employed to construct the original poverty index.

The modified poverty matrix provides a range of income cutoffs adjusted by family size and number of children under 18 years old. Unrelated individuals and two-person families are further differentiated by the age of the individual or family householder (under 65 years and 65 years and over). A set of poverty thresholds incorporating the three changes was computed using March 1979 CPS data for the income year 1978, which serves as the base year for the revised poverty definition. These thresholds have been adjusted to reflect the increase in the Consumer Price Index (CPI) between 1978 and 1981. The full poverty matrix and weighted average poverty thresholds for 1981 are shown in appendix A.

Tabulations of the March 1981 CPS using both the old and new poverty definitions indicate that the combined effect of the three modifications is quite small (table B). The total number of persons below the poverty level in 1980 was 29.3 million under the old definition and 29.6 million under the new one; the poverty rate rose from 13.0 to 13.2 percent. The new matrix also raised very slightly the number of poor families, from 6.2 to 6.3 million. In a few cases, the increases in poverty were more substantial. For example, the number of poor persons living on farms was 990,000 using the old matrix and 1.2 million using the revised matrix. This outcome is not surprising, since the thresholds applied to farm families are approximately 15 percent higher under the new definition. For a more detailed description of the revisions and their impact on the poverty data, see Current Population Reports, Series P-60, No. 133, "Characteristics of the Population Below the Poverty Level: 1980."

## COLLECTION AND LIMITATIONS OF POVERTY DATA

This report presents findings from the Income Supplement of the Census Bureau's Current Population Survey of March 1982. The information was collected from a sample of persons representing the civilian noninstitutional population and an estimated 871,000 members of the Armed Forces living off post or with their families on post in the United States. Because the collection of income data in the survey is restricted to persons 15 years old and over, unrelated individuals under 15 are excluded from this report.

The poverty definition used in this report is based on an index developed at the Social Security Administration (SSA) in 1964, and revised by Federal Interagency Committees in 1969 and 1980. A directive from the Office of Management and Budget, originally issued in 1969, established the Census Bureau's statistics on poverty as the standard data series to be used by all Federal agencies.[2]

The poverty concept is a statistical measure based on the Department of Agriculture's 1961 economy food plan. It reflects the different consumption requirements of families in relation to their size and composition, and the age of the family householder. A ratio of food expenditures to income of one-third, based on the Department of Agriculture's 1955 Survey of Food Consumption, was used to derive the original poverty thresholds from the economy food plan. For further details, see appendix A.

When analyzing CPS data on the poverty population, it is important to remember that these data are based on a sample and are therefore subject to sampling variability. Particular care should be exercised in the interpretation of figures based on relatively small numbers of cases as well as small differences between figures. An explanation of sampling variability can be found in appendix B, and tables 16 and 36 show the standard errors of a number of poverty estimates.

Data on income collected in the CPS are limited to money income received before payments for personal income taxes and deductions for Social Security, union dues, Medicare premiums, etc. Money income is the sum of the amounts received from earnings; Social Security and public assistance payments; dividends, interest, and rent; unemployment and workers' compensation; government and private employee pensions; and other periodic income. (Certain money receipts such as capital gains are not included.) Therefore, money income does not reflect the fact that many families receive part of their income in the form of nonmoney transfers such as food stamps, health benefits, and subsidized housing; that many farm families received noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that noncash benefits are also received by some nonfarm residents in the form of access to business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc.

These elements should be considered when comparing income levels. In addition, it should be noted that nonmoney income is not considered in calculating the poverty thresholds. In recent years, however, receipts from nonmoney transfers, such as food stamps, have become an increasingly important element in the income of poor persons. Data from the March 1982 CPS show that about 59 percent of all poor households received at least one of the following means-tested noncash benefits: food stamps, free or reduced-price school lunches, Medicaid, and publicly owned or other subsidized housing.[3]

Readers should be aware that for many different reasons there is a tendency in household surveys for respondents to

- Represents zero or rounds to zero.

[1]Persons of Spanish origin may be of any race.

underreport their income. Underreporting tends to be more pronounced for income sources that are not derived from earnings, such as Social Security, public assistance, unemployment compensation, and net income from interest, dividends, and rentals. Overall, income earned from wages or salary is more accurately reported than other sources of income, based on comparisons with independent estimates derived from administrative sources.

It also should be noted that the poverty thresholds used in this Census Bureau report were originally developed as a measure of income adequacy based on money income only.[4] Whether they would also serve as a measure of income adequacy for an income distribution which includes nonmoney as well as money income is an issue which deserves attention.

Beginning with the March 1980 survey, the CPS income supplement has included a group of questions on the receipt of selected noncash benefits during the previous year. The means-tested benefits covered in the March 1982 survey were: food stamps, free or reduced-price school lunches, public or subsidized housing, and Medicaid. Questions were also asked about the following nonmeans-tested benefits: Medicare, CHAMPUS or other military health care, employer-provided pension plans, and employer-provided group health insurance plans. Data from this survey are contained in Current Population Reports, Series P-60, No. 136, *Characteristics of Households and Persons Receiving Selected Noncash Benefits: 1981.* Technical Paper No. 50, *Alternative Methods for Valuing Selected In-Kind Transfer Benefits and Measuring Their Effect on Poverty,* focuses on five major noncash benefits: food stamps, free or reduced-price school lunches, Medicaid, Medicare, and publicly owned or subsidized housing. The paper presents three different methods for valuing these benefits, based on (1) market value, (2) recipient value, and (3) a poverty budget share approach. In recent years, there have been analyses of this subject made by a number of academic researchers as well as the Congressional Budget Office; however, this study is the first to make use of actual survey data on benefit recipiency, obtained from the March 1980 CPS. The report suggests that if selected benefits had been counted as income, the official estimate of poverty would have been reduced by 12 to 42 percent, depending on the range of benefits valued and the method used.

## RELATED MATERIALS

### Current Population Survey

**Current Population Survey Reports.** A detailed explanation of the poverty concept appears in *The Measure of Poverty, A Report to Congress as Mandated by the Education Amendments of 1974,* prepared by a Poverty Studies Task Force under the auspices of the Department of Health, Education, and Welfare. This report also discusses limitations of the poverty definition and presents alternative methods for measuring poverty.

[4] *Social Security Bulletin,* "Counting the Poor: Another Look at the Poverty Profile," January 1965.

A detailed description of the original poverty index developed by the Social Security Administration appears in the following articles by Mollie Orshansky published in the *Social Security Bulletin:* "Counting the Poor: Another Look at the Poverty Profile," January 1965, and "Who's Who Among the Poor: A Demographic View of Poverty," July 1965.

Data on poverty based on the original poverty definition appear in Current Population Reports, Series P-60, No. 54, *The Extent of Poverty in the United States: 1959 to 1966.* Comprehensive data and analysis of poor persons and families based on the revised definition of poverty appear in later reports in the P-60 series. Poverty data are also included in some reports in the P-20 and P-23 series of the Current Population Reports. All relevant titles are listed on the inside of the back cover of this report. Data based on the Current Population Survey showing the distribution of families and persons by income levels also appear in the P-60 series; the latest report is P-60, No. 137, *Money Income of Households, Families, and Persons in the United States: 1981.*

Detailed data on the receipt of noncash benefits in 1981, including the poverty status of recipients, appear in Current Population Reports, Series P-60, No. 136, *Characteristics of Households and Persons Receiving Selected Noncash Benefits: 1981.* Several approaches to the valuation of these benefits are explored in Technical Paper No. 50, *Alternative Methods for Valuing Selected In-Kind Transfer Benefits and Measuring Their Effect on Poverty.*

**Office of Economic Opportunity Tabulations.** These tabulations were originally sponsored by the Office of Economic Opportunity (OEO). They show characteristics of the poverty population such as education, work experience, and family relationship, usually with detailed cross-classifications by age. Requests for further information about these tabulations should be made in writing to Chief, Population Division, Bureau of the Census, Washington, D.C. 20233.

### Survey of Income and Education

The Survey of Income and Education (SIE) was a one-time survey of approximately 151,000 interviewed households nationwide, conducted in each State by the Bureau of the Census between April and July 1976. The purpose of the SIE was to provide estimates of the number of children 5 to 17 years old in poverty families in each State and the District of Columbia, as required by the Education Amendments of 1974.

Income and poverty data from the SIE have been published in a series of four reports (one for each of the four major regions in the Nation): Current Population Reports, Series P-60, No. 110 (Northeast); No. 111 (North Central); No. 112 (South); and No. 113 (West). Each report presents data for the divisions and States within the region and for the total United States. An additional report, Current Population Reports, Series P-20, No. 334, *Demographic, Social, and Economic Profile of States: Spring 1976,* presents summary data from the SIE on a wide variety of characteristics

(including poverty status) for the 50 States and the District of Columbia, divisions, regions, and the entire United States. Several of the tables include comparable data from the 1970 census.

## Decennial Censuses

Poverty data collected in the 1980 Census of Population have been published in Series PHC80-S1-1, *Provisional Estimates of Social, Economic, and Housing Characteristics,* which contains estimates based on a sample representing about 1.6 percent of the total population. This report contains data for the United States as a whole, each State, the District of Columbia, and SMSA's of 1,000,000 or more inhabitants. Its purpose was to provide users with early data on characteristics of the population and housing units.

Summary Tape File 3 (STF 3) is available for all States. This computer file contains poverty data cross-classified by race, age, type of family, and presence of children, for States, standard metropolitan statistical areas, counties, county subdivisions, and incorporated places. There are two report series based on STF 3: Series PHC80-3, *Summary Characteristics for Governmental Units and Standard Metropolitan Statistical Areas,* and Series PHC80-S2, *Advance Estimates of Social, Economic, and Housing Characteristics.*

Additional poverty data will be provided by Summary Tape Files 4 and 5. Major reports based on these STF's will be Series PC80-1-C, *General Social and Economic Characteristics,* and PC80-1-D, *Detailed Population Characteristics.* Inquiries concerning availability of printed reports, computer tapes, and microfiche may be addressed to Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233.

Because of differences in the questionnaires and data collection procedures, estimates of the number of persons below the poverty level from the 1980 census are generally higher than those reported in the March 1980 CPS. The number of poor persons in the 1980 census was 27.4 million, compared with 26.1 million in the CPS. The estimates of the number of poor families were 5.7 million and 5.5 million, respectively.

r REVISED.
[1] BEGINNING WITH 1979, INCLUDES MEMBERS OF UNRELATED SUBFAMILIES NOT SHOWN SEPARATELY. FOR EARLIER YEARS, UNRELATED SUBFAMILY MEMBERS ARE INCLUDED IN THE 'IN FAMILIES' CATEGORIES.
[2] LIMITED DATA FOR 1980 BASED ON REVISED POVERTY DEFINITION INTRODUCED IN 1981 ARE SHOWN IN TEXT TABLE B.
[3] PERSONS OF SPANISH ORIGIN MAY BE OF ANY RACE.
[4] INCLUDES MALE UNRELATED INDIVIDUALS.

NOTE: DATA FOR 1979 (REVISED) AND LATER YEARS BASED ON 1980 CENSUS POPULATION CONTROLS.

## Table 2. Persons Below 125 Percent of the Poverty Level, by Family Status, Type of Family, Race, and Spanish Origin: 1959, 1960, and 1965 to 1981

(NUMBERS IN THOUSANDS. PERSONS AS OF MARCH OF THE FOLLOWING YEAR. FOR MEANING OF SYMBOLS, SEE TEXT)

Note: The data for standard metropolitan statistical areas (SMSA's) and their central cities are based on SMSA's as defined in the 1970 census and do not include any subsequent additions or changes. The 20 SMSA's shown were selected on the basis of their population at the time of the 1970 census and may not be among the 20 largest on the basis of more recent population figures.

[2]LIMITED TO CIVILIANS.

# Appendix A. Definitions, Explanations, Limitations, and Comparability of Data

## DEFINITIONS AND EXPLANATIONS

**Population coverage.** This report includes the civilian noninstitutional population of the United States and approximately 871,000 members of the Armed Forces in the United States living off post or with their families on post, but excludes all other members of the Armed Forces. Unrelated individuals under 15 years old are also excluded from this report.

**Farm-nonfarm residence.** The farm population refers to rural residents living on farms. Beginning with the March 1980 survey, the CPS has employed a different definition of a farm than used in past Current Population Surveys or decennial censuses before 1980. Under the new definition, as used in the 1974 Census of Agriculture, a farm is any place in rural territory from which $1,000 or more of agricultural products were sold in the reporting year. All other households were classified as nonfarm which comprises persons living in urban areas and persons not on farms living in rural areas. Rural persons in institutions, motels, and tourist camps, and those living on rented places where no land is used for farming, are classified as nonfarm population. The new definition and its impact on the size and composition of the farm population are discussed in Current Population Reports, Series P-27, No. 52.

According to the old definition, farm residence was determined by responses to two questions: (1) "Does this place you (own/rent) have 10 acres or more?" and (2) "During the past 12 months, how much did sales of crops, livestock and other farm products from this place amount to (under $50, $50 to $249, $250 to $999, or $1,000 or more)?" The household was classified as being in the farm population if either a) the acreage response was "yes" and sales amounted to $50 or more, or b) the acreage response was "no" and sales amounted to $250 or more.

**Metropolitan-nonmetropolitan residence.** The metropolitan population consists of persons living in standard metropolitan statistical areas (SMSA'S) as defined in the 1970 census. Except in New England, an SMSA is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, SMSA's consist of towns and cities, rather than counties.

This report contains data for the 20 largest SMSA's and the central cities of the five largest SMSA's as defined in the 1970 census. The counties (or towns and cities) which comprised these SMSA's in the 1970 census can be found in 1970 Census of Population, Vol. 1, *Characteristics of the Population*, Part A, "Number of Inhabitants."

**Central cities.** Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. If only one central city is designated, then it must have 50,000 inhabitants or more. The area title may include, in addition to the largest city, up to two city names on the basis and in the order of the following criteria: (1) the additional city has at least 250,000 inhabitants or (2) the additional city has a population of one-third or more of that of the largest city and a minimum population of 25,000. An exception occurs where two cities have contiguous boundaries and constitute, for economic and social purposes, a single community of at least 50,000, the smaller of which must have a population of at least 15,000.

**Geographic regions.** The four major regions of the United States for which data are presented in this report represent groups of States, as follows:

*Northeast:* Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

*North Central:* Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri. Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

*South:* Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

*West:* Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

*North and West:* Northeast, North Central, and West Regions combined.

**Poverty areas.** For this report poverty areas are defined in terms of census tracts (in metropolitan areas) or minor civil divisions (townships, districts, etc. in nonmetropolitan areas) in which 20 percent or more of the population was below the poverty level in 1969.

For further details, see 1970 Census of Population Report PC(2)-9B, *Low-Income Areas in Large Cities;* and Supplementary Reports PC(S1)-65 to PC(S1)-103, *Low-Income Neighborhoods in Large Cities: 1970.*

**Tenure.** A housing unit is "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. A cooperative or condominium unit is "owner occupied" only if the owner or co-owner lives in it. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent. For renter-occupied units, information was also obtained as to whether the unit was publicly owned or subsidized by the Federal, State, or local government.

**Income.** For each person in the sample 15 years old and over, questions were asked on the amount of money income received in the preceding calendar year from each of the following sources: (1) money wages or salary; (2) net income from nonfarm self-employment; (3) net income from farm self-employment; (4) Social Security or railroad retirement; (5)Supplemental Security income; (6) public assistance or welfare payments; (7) interest on savings or other investments which pay interest; (8) dividends, income from estates or trusts, or net rental income; (9) veteran's payments or unemployment and worker's compensation; (10) private pensions or government employee pensions; (11) alimony or child support, regular contributions from persons not living in the household, and other periodic income.

All sources of income may be combined into two major types:

*Total money earnings.* The algebraic sum of money wages or salary and net income from farm and nonfarm self-employment.

*Income other than earnings.* The algebraic sum of all sources of money income except wages and salaries and income from self-employment.

It should be noted that although the income statistics refer to receipts during the preceding year, the characteristics of the person, such as age and labor force status, and the composition of families refer to the time of the survey. The income of the family does not include amounts received by persons who were members of the family during all or part of the income year if these persons no longer resided with the family at the time of enumeration. However, family income includes amounts reported by related persons who did not reside with the family during the income year but who were members of the family at the time of enumeration.

Data on consumer income collected in the CPS by the Bureau of the Census cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, Social Security, union dues, Medicare deductions, etc. Therefore, money income does not reflect the fact that many families receive part of their income in the form of nonmoney transfers such as food stamps, health benefits, and subsidized housing; that many farm families receive nonmoney income in the form of rent-free housing and goods produced and consumed on the farm; or that nonmoney income is also received by some nonfarm residents in the form of access to business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to underreport their income. From an analysis of independently derived income estimates, it has been determined that income earned from wages or salaries is much better reported than other sources of income, and is nearly equal to independent estimates of aggregate income.

The various sources for which income is reported are defined as follows:

*Money wages or salary* is total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions were made for taxes, bonds, pensions, union dues, etc.

*Net income from nonfarm self-employment* is net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include cost of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc. In general, inventory changes were considered in determining net income; replies based on income tax returns or other official records do reflect inventory changes. However, when values of inventory changes were not reported, net income figures exclusive of inventory changes were accepted. The value of saleable merchandise consumed by the proprietors of retail stores is not included as part of net income.

*Net income from farm self-employment* is net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his own account, as an owner, renter, or sharecropper. Gross receipts include the value of all products sold, government crop loans, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc. Operating expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farmhands, depreciation charges, cash rent, interest on farm mortgages,

farm building repairs, farm taxes (not State and Federal income taxes), etc. The value of fuel, food, or other farm products used for family living is not included as part of net income. In general, inventory changes were considered in determining net income only when they were accounted for in replies based on income tax returns or other official records which reflect inventory changes; otherwise, inventory changes were not taken into account.

*Social Security* includes Social Security pensions and survivors' benefits, and permanent disability insurance payments made by the Social Security Administration prior to deductions for medical insurance. Railroad retirement insurance checks from the U.S. Government are also included. Medicare reimbursements are not included.

*Supplemental Security income* includes payments made by Federal, State, and local welfare agencies to low income persons who are (1) aged (65 years old or over), (2) blind, or (3) disabled.

*Public assistance or welfare payments* include public assistance payments such as aid to families with dependent children and general assistance. Separate payments received for hospital or other medical care (vendor payments) are excluded from this item.

*Dividends, interest on savings or other investments, income from estates or trusts, net rental income or royalties* include dividends from stockholdings or membership in associations; interest on savings or any type of investment which pays interest; periodic receipts from estates or trust funds; net income from rental of a house, store, or other property to others; receipts from boarders or lodgers; and net royalties.

*Unemployment compensation, veterans' payments, or workers' compensation* include (1) unemployment compensation received from government unemployment insurance agencies or private companies during periods of unemployment and any strike benefits received from union funds; (2) money paid periodically by the Veterans' Administration to disabled members of the Armed Forces or to survivors of deceased veterans, subsistence allowances paid to veterans for education and on-the-job training, as well as so-called "refunds" paid to ex-servicemen as GI insurance premiums; and (3) workers' compensation received periodically from public or private insurance companies for injuries incurred at work. The cost of this insurance must have been paid by the employer and not by the person.

*Private and government employee pensions* include (1) private pensions or retirement benefits paid to a retired person or his survivors by a former employer or by a union, either directly or through an insurance company; (2) government employee pensions paid by Federal, State, county, or other governmental agencies to former employees (including members of the Armed Forces) or their survivors.

*Annuities, alimony, regular contributions from persons not living in the household, and other periodic income* include the following types of income: (1) periodic receipts from annuities or insurance; (2) alimony and child support; (3) contributions received periodically from persons not living in the household; (4) other periodic income such as military family allotments, net gambling winnings, and other kinds of periodic income other than earnings.

**Receipts not counted as income.** Receipts from the following sources were not included as income: (1) money received from the sale of property, such as stocks, bonds, a house, or a car (unless the person was engaged in the business of selling such property, in which case the net proceeds would be counted as income from self-employment); (2) withdrawals of bank deposits; (3) money borrowed; (4) tax refunds; (5) gifts; and (6) lump-sum inheritances or insurance payments.

**Total money income.** The algebraic sum of money wages and salaries, net income from self-employment, and income other than earnings represents total money income. The total income of a family is the algebraic sum of the amounts received by all income recipients in the family.

The income tables for families and unrelated individuals include in the lowest income group those who were classified as having no income in the income year and those reporting a loss in net income from farm and nonfarm self-employment or in rental income. Many of these were living on income "in kind," savings, or gifts; or were newly constituted families, unrelated individuals who had recently left families, or families in which the sole breadwinner had recently died or had left the household. However, many of the families and unrelated individuals who reported no income probably had some money income which was not recorded in the survey.

**Median income.** The median income is the amount which divides the distribution into two equal groups, one having incomes above the median, and the other having incomes below the median.

**Mean income.** The mean income is the amount obtained by dividing the total income of a group by the number of families or unrelated individuals (as appropriate) in that group.

**Income per family member.** The income per family member is the average amount of income available to every man, woman, and child in a family. Income per family member is derived by dividing the total family income of a group by the number of family members in the same group.

**Poverty definition.** Poverty statistics presented in this report are based on a definition developed by the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980.

Statistics presented in Census Bureau reports prior to publication of Current Population Reports, Series P-60. No. 68, *Poverty in the United States, 1959 to 1968,* were based on the poverty index developed by the Social Security Administration (SSA) in 1964. This index provided a range of income cutoffs adjusted by such factors as family size, sex of the family head, number of children under 18 years old,

and farm-nonfarm residence. At the core of this definition of poverty was the economy food plan, the least costly of four nutritionally adequate food plans designed by the Department of Agriculture. It was determined from the Department of Agriculture's 1955 survey of food consumption that families of three or more persons spent approximately one-third of their income on food; the poverty level for these families was, therefore, set at three times the cost of the economy food plan. For smaller families and persons living alone, the cost of the economy food plan was multiplied by factors that were slightly higher in order to compensate for the relatively larger fixed expenses of these smaller households. Annual revisions of these SSA poverty cutoffs were based on price changes of the items in the economy food budget.

As a result of deliberations of a Federal Interagency Committee in 1969, the following two modifications to the original SSA definition of poverty were recommended: (1) that the SSA thresholds for nonfarm families be retained for the base year 1963, but that annual adjustments in the levels be based on changes in the Consumer Price Index (CPI) rather than on changes in the cost of food included in the economy food plan; and (2) that the farm thresholds be raised from 70 to 85 percent of the corresponding nonfarm levels. The combined impact of these two modifications resulted in an increase of 360,000 poor families and 1.6 million poor persons in 1967.

In 1980, another interagency committee recommended three additional modifications that have been implemented in the March 1982 CPS as well as in the 1980 census: (1) elimination of separate thresholds for farm families, (2) averaging of thresholds for female-householder and "all other" families, and (3) extension of the poverty matrix to families with 9 or more members. For further details, see the section, "Changes in the Definition of Poverty."

The poverty thresholds rise each year by the same percentage as the annual average Consumer Price Index. Table A-1 shows the change in the CPI between 1959 and 1981 and the corresponding thresholds for a family of four.

**Alternate level.** Because the poverty definition currently in use by the Federal Government does not meet all the needs of the analysts of the data, a variation was introduced at the same time that modifications were made to the SSA poverty index. This alternate cutoff, set at 125 percent of the official government standard, is obtained by multiplying the income cutoffs at the poverty level by 1.25. Thus, the income cutoff for a family of four at 125 percent of the poverty level is $11,609 in 1981. Tables 2,39, and 40 present selected data for persons, families, and unrelated individuals below 125 percent of the poverty level. Also, some of the detailed tables shown in this report have been tabulated for those below 125 percent of the poverty level. Requests for these unpublished data, giving a specific description of the figures desired, may be made in writing to the Chief, Population Division, Bureau of the Census, Washington, D.C. 20233.

**Table A-1. Changes Between 1959 and 1981 in the Consumer Price Index and the Average Poverty Threshold for a Family of Four**

| Year | Consumer Price Index (1967=100) | Average threshold for a family of four persons[1] |
|---|---|---|
| 1981 | 272.4 | $9,287 |
| 1980 | 246.8 | 8,414 |
| 1979 | 217.4 | 7,412 |
| 1978 | 195.4 | 6,662 |
| 1977 | 181.5 | 6,191 |
| 1976 | 170.5 | 5,815 |
| 1975 | 161.2 | 5,500 |
| 1974 | 147.7 | 5,038 |
| 1973 | 133.1 | 4,540 |
| 1972 | 125.3 | 4,275 |
| 1971 | 121.3 | 4.137 |
| 1970 | 116.3 | 3,968 |
| 1969 | 109.8 | 3,743 |
| 1968 | 104.2 | 3,553 |
| 1967 | 100.0 | 3,410 |
| 1966 | 97.2 | 3,317 |
| 1965 | 94.5 | 3,223 |
| 1964 | 92.9 | 3,169 |
| 1963 | 91.7 | 3,128 |
| 1962 | 90.6 | 3,089 |
| 1961 | 89.6 | 3,054 |
| 1960 | 88.7 | 3,022 |
| 1959 | 87.3 | 2,973 |

[1] For years prior to 1981, average threshold for a nonfarm family of four is shown.

**Weighted average thresholds at the poverty level.** As shown in table A-2, the poverty cutoffs used by the Bureau of the Census to determine the poverty status of families and unrelated individuals consist of a set of 48 thresholds arranged in a two-dimensional matrix consisting of family size (from one person, i.e., unrelated individuals, to nine or more persons) cross-classified by presence and number of family members under 18 years old (from no children present to eight or more children present). Unrelated individuals and two-person families are further differentiated by the age of the individual or family householder (under 65 years and 65 years and over). The total family income of each family in the sample is tested against the appropriate dollar threshold to determine the poverty status of that family. If the family's total income is less than its corresponding cutoff, the family is classified as below the poverty level. The average thresholds shown in table A-2 were weighted by the presence and number of children. For a given size of family, the weighted average threshold for that group is obtained by multiplying the threshold for each presence and number of children category within the given family size by the number of families in that category. These products are then aggregated across the entire range of presence and number of children categories, and the total aggregate is divided by the total number of families in the group to yield the weighted average threshold at the poverty level for that size family.

**Table A-2. Poverty Thresholds in 1981, by Size of Family and Number of Related Children Under 18 Years Old**

| Size of family unit | Weighted average thresholds | Related children under 18 years | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | None | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 or more |
| One person (unrelated individual) | $ 4,620 | | | | | | | | | |
| Under 65 years | 4,729 | $ 4,729 | | | | | | | | |
| 65 years and over | 4,359 | 4,359 | | | | | | | | |
| Two persons | 5,917 | | | | | | | | | |
| Householder under 65 years | 6,111 | 6,086 | $ 6,265 | | | | | | | |
| Householder 65 years and over | 5,498 | 5,494 | $ 6,241 | | | | | | | |
| Three persons | 7,250 | 7,110 | 7,316 | $ 7,323 | | | | | | |
| Four persons | 9,287 | 9,375 | 9,528 | 9,218 | $9,250 | | | | | |
| Five persons | 11,007 | 11,306 | 11,407 | 11,119 | 10,847 | $10,681 | | | | |
| Six persons | 12,449 | 13,004 | 13,055 | 12,786 | 12,528 | 12,145 | $11,918 | | | |
| Seven persons | 14,110 | 14,962 | 15,056 | 14,734 | 14,509 | 14,091 | 13,603 | $13,068 | | |
| Eight persons | 15,655 | 16,734 | 16,882 | 16,578 | 16,312 | 15,934 | 15,455 | 14,955 | $14,829 | |
| Nine persons or more | 18,572 | 20,130 | 20,228 | 19,959 | 19,733 | 19,362 | 18,852 | 18,390 | 18,276 | $17,572 |

Because family composition does not remain constant from year to year, the weighted average thresholds for 1981 will not reflect, identically, the change in the CPI between 1981 and earlier years.

Since the basic thresholds used to determine the poverty status of families and unrelated individuals are applied to all families and unrelated individuals, the weighted poverty thresholds are derived using all families and unrelated individuals rather than just those families and unrelated individuals classified as below the poverty level. To obtain the weighted poverty thresholds for families and unrelated individuals below 125 percent of the poverty level, the weighted thresholds may be multiplied directly by 1.25.

**Income deficit.** Income deficit is the difference between the total income of families and unrelated individuals below the poverty level, and their respective poverty thresholds. In computing the income deficit, families reporting a net income loss are assigned zero dollars and for such cases the deficit is equal to the poverty threshold. This measure provides an estimate of the amount which would be required to raise the incomes of all poor families and unrelated individuals to their respective poverty thresholds. The income deficit is thus a measure of the degree of impoverishment of a family or unrelated individual. However, caution must be exercised in comparing the average deficit of families classified by the race or sex of the householder. Since the poverty thresholds used in this report are based on family size and composition, apparent differences in the average income deficits may, to some extent. be a function of the differences in these characteristics.

*Median income deficit.* The median income deficit is the amount which divides the distribution into two equal groups, one having an income deficit above the median and the other having an income deficit below the median.

*Mean income deficit.* The mean income deficit is the amount obtained by dividing the total income deficit of a group below the poverty level by the number of families or unrelated individuals (as appropriate) in that group.

*Deficit per family member.* The deficit per family member is the average amount of money necessary to raise every man, woman, and child in a family out of poverty. The deficit per family member is derived by dividing the total family income deficit of a group by the number of family members in the same group.

**Household.** A household consists of all the persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room, is regarded as a housing unit, when it is occupied or intended for occupancy as separate living quarters; that is, when the occupants do not live and eat with any other persons in the structure and there is either (1) direct access from the outside or through a common hall or (2) a kitchen or cooking equipment for the exclusive use of the occupants.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated persons sharing a housing unit as partners, is also counted as a household. The count of households excludes group quarters.

**Group quarters.** All persons who are not members of households are regarded as living in group quarters. Group quarters are living arrangements for groups containing five or more persons unrelated to the person in charge, such as residents of lodging and boarding houses. Persons living in military barracks and inmates of institutions were excluded from the survey.

**Householder.** The householder is the first adult listed on the CPS questionnaire. The instructions call for listing first the person (or one of the persons) in whose name the home is owned or rented. If the house is owned jointly by a married couple, either the husband or the wife may be listed first, thereby becoming the reference person, or householder, to whom the relationship of the other household members is recorded. One person in each household is designated as the householder. The number of householders, therefore, is equal to the number of households.

**Family.** The term "family" refers to a group of two or more persons related by birth, marriage, or adoption who reside together; all such persons are considered as members of one family. For example, if the son of the person who maintains the household and the son's wife are members of the household, they are treated as members of the parent's family. Every family must include a householder; two or more people living in the same household who are related to one another, but are not related to the householder, form an "unrelated subfamily" and are not included in the count of families.

**Subfamily.** A subfamily is a married couple with or without children, or one parent with one or more own single children under 18 years old living in a household but not including among its members the person or couple maintaining the household. Because a subfamily does not include a householder, it is by definition excluded from the count of families. There are two kinds of subfamilies, related and unrelated:

*Related subfamily.* A related subfamily is a subfamily whose members are related to the person or couple maintaining the household. The most common example of a related subfamily is a young married couple sharing the home of the husband's or wife's parents. Members of a related subfamily are also members of the householder's family.

*Unrelated subfamily.* An unrelated subfamily is a subfamily whose members are not related to the person or couple maintaining the household. Members of unrelated subfamilies may include such persons as guests, lodgers, or resident employees and their relatives living in a household. Unrelated subfamily members are not part of the householder's family. Even though unrelated subfamilies are not counted as families, they are treated as families for the purpose of determining whether their members are above or below the poverty level.

**Unrelated individuals.** The term "unrelated individuals" refers to persons 15 years old and over (other than inmates of institutions) who are not living with any relatives. An unrelated individual may (1) constitute a one-person household; (2) be part of a household including one or more other families or unrelated individuals; or (3) reside in group quarters such as a rooming house. Thus, a widow living by herself or with one or more other persons not related to her, a lodger not related to anyone else in the household, and a resident employee with no relatives living in the household are examples of unrelated individuals.

**Size of Family.** The term "size of family" refers to the number of persons who are living together and are related to the householder by birth, marriage, or adoption.

**Own children and related children.** "Own" children in a family are sons and daughters, including stepchildren and adopted children, of the householder. Similarly, "own" children in a subfamily are sons and daughters of the married couple or parent in the subfamily. "Related" children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption. All children shown as members of subfamilies are own children.

**Marital status.** The marital status classification indentifies four major categories: single, married, widowed, and divorced. These terms refer to the marital status at the time of the enumeration.

The category "married" is further divided into "married, spouse present," "separated," and "other married, spouse absent." A householder is classified as "married, spouse present" if the spouse was reported as a member of the household, even though he or she may have been temporarily absent on business or on vacation, visiting, in a hospital, etc., at the time of the enumeration. Persons reported as separated include those with legal separations, those living apart with intentions of obtaining a divorce, and other persons permanently or temporarily separated because of marital discord. The group "other married, spouse absent" includes married persons living apart because either the wife or the husband was employed and living at a considerable distance from home, was residing in an institution, had moved to another area, or had a different place of residence for any other reason except separation as defined above.

**Number of workers.** This number includes all persons in the family who worked at anytime during the year.

**Age.** The age classification is based on the age of the person at his last birthday.

**Race.** The population is divided into three groups on the basis of race: White, Black, and "other races." The last category includes Indians, Japanese, Chinese, and any other race except White and Black. "Other races" are sometimes shown in combination with the Black population.

**Persons of Spanish origin.** Persons of Spanish origin were identified by a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (and the origin of other household members) from a "flash card" listing ethnic origins. Persons of Spanish origin, in particular, were those who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or some other Spanish origin. It should be noted that persons of Spanish origin can be of any race.

**Years of school completed.** Data on years of school completed were derived from the combination of answers to questions concerning the highest grade of school attended by the person and whether or not that grade was finished. The questions on educational attainment apply only to progress in "regular" schools. Such schools include graded public, private, and parochial elementary and high schools (both

junior and senior), colleges, universities, and professional schools, whether day schools or night schools. Thus, regular schooling is that which may advance a person toward an elementary school certificate or a high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools was counted only if the credits obtained were regarded as transferable to a school in the regular school system.

**Labor force and employment status.** The definitions of labor force and employment status relate to the population 15 years old and over.

*Employed.* Employed persons include (1) all civilians who, during the survey week, did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a farm or in a business operated by a member of the family, and (2) all those who were not working but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, or labor-management dispute, or because they were taking time off for personal reasons, whether or not they were paid by their employers for time off, and whether or not they were seeking other jobs. Excluded from the employed group are persons whose only activity consisted of work around the house (such as own home housework, painting or repairing own home, etc.) or volunteer work for religious, charitable, and similar organizations.

*Unemployed.* Unemployed persons are those civilians who, during the survey week, had no employment but were available for work and (1) had engaged in any specific jobseeking activity within the past 4 weeks, such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) were waiting to be called back to a job from which they had been laid off; or (3) were waiting to report to a new wage or salary job within 30 days.

*Labor force.* Persons are classified as in the labor force if they were employed as civilians, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" is comprised of all civilians classified as employed or unemployed.

*Not in the labor force.* All civilians 15 years old and over who are not classified as employed or unemployed are defined as "not in the labor force." This group of persons who are neither employed nor seeking work includes those engaged only in own home housework, attending school, or unable to work because of long-term physical or mental illness; persons who are retired or too old to work; seasonal workers for whom the survey week fell in an off season; and the voluntarily idle. Persons doing only unpaid family work (less than 15 hours during the survey week) are also classified as not in the labor force.

**Occupation and class of worker.** Persons are classified according to the civilian job held longest during the year. Persons who held two jobs or more were reported in the job at which they worked the greatest number of weeks.

The occupation groupings included in this report were based on the classification system used in the 1970 census, as were the data included in previous Current Population Reports in the P-60 Series, starting with No. 81. A detailed comparison of the 1970 classification systems to those used during the 1960's may be found in the Bureau of the Census Technical Paper 26, *1970 Occupation and Industry Classification Systems in Terms of Their 1960 Occupation and Industry Elements.*

Class of worker refers to the subdivision of workers into three groups: wage and salary workers, self-employed workers, and unpaid family workers. The first group refers to persons working for wages, salaries, commissions, tips, pay "in kind," or at piece rate for private employer or for any government unit. The second group refers to persons working in their own business, profession, or trade, for profit or fees. The third group refers to persons working without pay in a business operated by a member of the household to whom they are related by birth or marriage.

**Work experience.** A person with work experience is one who, during the preceding calendar year, did any civilian work for pay or profit or worked without pay on a family-operated farm or business at any time during the year, on a part-time or full-time basis.

**Weeks worked in the income year.** Persons are classified according to the number of different weeks, during the preceding calendar year, in which they did any civilian work for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

**Part-time or full-time jobs.** A person is classified as having worked at part-time jobs during the preceding calendar year, if he worked at civilian jobs which provided less than 35 hours of work per week in a majority of the weeks in which he worked during the year. He is classified as having worked at full-time jobs if he worked 35 hours or more per week during a majority of the weeks in which he worked.

**Year-round, full-time worker.** A year-round, full-time worker is one who worked primarily at full-time civilian jobs (35 hours or more per week) 50 weeks or more during the preceding calendar year.

**Nonworker.** A nonworker is one who did not do any civilian work in the calendar year preceding the survey.

**Main reason for working part year.** For persons who worked 1 to 49 weeks during the year, the main reason for working part year is based on the response to the question "What were you doing most of the remaining weeks?"

**Main reason for not working.** For persons who reported that they did not work at a civilian job for pay or profit or on a

family-operated farm or business during the year, the main reason for not working is derived from the response to the question "What were you doing most of last year?"

**Rounding.** Percentages are rounded to the nearest tenth of a percent; therefore, the percentages in a distribution do not always add to exactly 100.0 percent. The totals, however, are always shown as 100.0. Moreover, individual figures are rounded to the nearest thousand without being adjusted to group totals, which are independently rounded; percentages are based on the unrounded numbers.

**Symbols.** A dash (–) represents or rounds to zero. The symbol "B" means that the base for the derived figures is less than 75,000. The symbol "X" means not applicable, "NA" means not available, and the symbol "r" means revised.

**Base figures.** The base figures shown for 1980 and later years were prepared by inflating weighted sample results to agree with independent estimates of the population based on statistics updated from the 1980 census. The base figures shown for 1969 to 1979 were based on statistics updated from the 1970 census, whereas the figures for the years 1961 to 1968 were inflated to estimates derived from the 1960 census. The data for the years prior to 1961 were based on the 1950 census. A more detailed description of this change can be found in an article entitled "Revisions in Current Population Survey," *Employment and Earnings,* Vol. 18, No. 8, February 1972, published by the Bureau of Labor Statistics.

The introduction of population controls and estimation procedures based on the 1980 census raised the number of persons from 217.8 million to 222.9 million in the March 1980 CPS and the number of families from 58.4 to 59.6 million. The number of persons and families below the poverty level rose proportionately, from 25.3 to 26.1 million, and from 5.3 to 5.5 million, respectively.

## LIMITATIONS OF THE POVERTY CONCEPT

In analyzing data on the low-income population, the following limitations should be noted. The poverty concept has been developed in order to identify, in dollar terms, a minimum level of income adequacy for families of different types in keeping with American consumption patterns. Based on an analysis of the percent of income devoted to food expenditures, an estimate was developed of the minimum cost at which an American family, making average choices, can be provided with a diet meeting recommended nutritional goals. Consequently, it is an overall statistical yardstick which reflects the different consumption requirements of families of different size, taking into account family composition. Insofar as individual circumstances or consumption patterns differ, the dollar value of the poverty threshold for a given family size may not represent the money income required by an individual family to maintain a level of economic well being equivalent to other families with similar incomes. For a discussion of the limitations of money income as a measure of economic status, see "Trends and Composition of the Low-Income Population," by Renee Miller and Arno Winard, Proceedings of the Social Statistics Section, American Statistical Association, 1974.

The original intent of the poverty definition was not for administrative use in any specific program; it was to be a statistical yardstick. In April 1973, the Interagency Committee on Income Distribution and Poverty was requested by the Statistical Policy Division of the Office of Management and Budget to conduct a thorough review of the statistics on income and poverty. Three subcommittees, one focusing on updating the poverty threshold, another on measuring cash income, and the third on measuring noncash income, met throughout the summer of 1973 and came up with a number of recommendations. One of the conclusions reached by the Subcommittee on Updating the Poverty Threshold was that the development of separate measures for eligibility in programs should receive high priority. For a summary of the research recommendations of the Interagency Committee see "Review of Poverty and Income Distribution Statistics" by Bette S. Mahoney, Statistical Reporter, Statistical Policy Division, Office of Management and Budget, January 1974.

A detailed review of the poverty definition was completed in 1976. The Education Amendments of 1974 required the Assistant Secretary of Education, Department of Health, Education, and Welfare, to supervise a "thorough study of the manner in which the relative measure of poverty for use in the financial assistance program authorized by Title I of the Elementary and Secondary Education Act of 1965 may be more accurately and currently developed." At the end of 1974 an interagency Poverty Studies Task Force was established under the leadership of HEW which undertook an intensive review of the present definition of poverty and of the implications of various alternative measurement schemes. The findings of this study have been summarized in the report entitled "The Measure of Poverty" which was transmitted to Congress in April 1976.

The impact on the poverty data of several frequently proposed changes in the poverty definition is described in "Improving the Poverty Definition," by Carol Fendler and Mollie Orshansky, *Proceedings of the Social Statistics Section,* American Statistical Association, 1979. The paper discusses the rationale for and results of two types of changes: (1) simplifying the poverty matrix by eliminating the farm-nonfarm differential and certain other variables, and (2) updating the thresholds to take into account newer data on nutritional needs and U.S. consumption patterns.

Because of increasing interest in the effect of the receipt of noncash benefits on the income and poverty data, the March 1980 CPS introduced supplemental questions covering a selected group of such benefits. Data on this subject from the March 1982 survey are presented in Current Population Reports, Series P-60, No. 136, *Characteristics of Households and Persons Receiving Selected Noncash Benefits: 1981.* Results of research conducted at the Census Bureau on the valuation of in-kind transfers are presented in Technical Paper 50, *Alternative Methods for Valuing Selected In-Kind Transfer Benefits and Measuring Their Effect on Poverty.*

## COMPARABILITY OF ESTIMATES FROM MARCH 1982 CPS WITH ESTIMATES FOR PREVIOUS YEARS

Estimates from the March 1982 CPS are in some instances not strictly comparable with estimates for previous years due to several factors. Among these factors are changes in (1) population controls and metropolitan residence definitions; (2) collection of income and work experience data; (3) noninterviews, nonresponses, and allocations; (4) questionnaire wording and procedures; (5) change in sample size; and (6) definition of the income universe. Each of these factors is discussed in the following sections, and readers should consider these differences when comparing current with previous years' estimates.

### Population Controls and Metropolitan Residence Definitions

Beginning with 1979, the data shown in this report are based on population controls derived from the 1980 census. The data for 1969 to 1978 reflect 1970 census-based population controls, while figures for previous years are tied in with 1960 census-based controls. Basically, these changes should have no substantial impact on summary measures, such as medians and means, and on proportional measures, such as percent distributions and poverty rates. However, the changes may have more impact on the population levels in different sub-groupings such as the total number of persons or families either overall, within some particular income interval, or below the poverty level. A detailed description of these changes appears in the Bureau of Labor Statistics report, *Employment and Earnings,* Vol. 18, No. 8, February 1972.

The figures shown for metropolitan areas are based on standard metropolitan statistical areas (SMSA's) as defined on the basis of the 1970 census; those published prior to the March 1973 CPS referred to SMSA's defined on the basis of the 1960 census. There are significant differences in the population classified as metropolitan from each of these definitions. For the 1970 definition of SMSA's, see 1970 Census of Population, Vol. 1, *Characteristics of the Population,* Part A, "Number of Inhabitants."

The number of poor persons in 1969 residing in metropolitan areas based on the 1970 definitions and procedures is about 760,000 higher than that based on the 1960 definitions and procedures. This difference arises partly because of the addition of new SMSA's and the expansion of existing ones, resulting in an increase in the size of the total metropolitan population.

**Comparability of metropolitan and nonmetropolitan data from the March 1981 CPS with data for previous years.** Changes in CPS design and procedures over the last several years have made the annual series of sample population data for metropolitan and nonmetropolitan areas inconsistent. Analytic comparisons of year-to-year changes in these figures should be avoided. Trends in metropolitan and nonmetropolitan population growth over the 1970-82 and 1976-82 periods should not be appreciably affected by the procedural changes.

Major revisions to the CPS sample design and estimation methods have involved the expansion of the number of sample units. The incorporation of approximately 10,000 supplemental housing units into the March CPS sample in 1977 was accompanied by new procedures for inflating the sample results to reflect national estimates. It was determined subsequent to the introduction of the additional sample that the new inflating (weighting) procedures used for processing both the March 1977 and March 1978 CPS supplement data had resulted in an apparent overestimate of the nonmetropolitan population and corresponding underestimate of the metropolitan population for those years. For the March 1979 CPS, another revision of the weighting process was introduced to correct the problem discovered in the earlier procedures. The result of this change was a large spurious increase in the metropolitan population and decrease in the nonmetropolitan population relative to March 1978 CPS levels.

The March 1979 and later metropolitan-nonmetropolitan population estimates also reflect other operational changes including the introduction of a coverage improvement sample designed to provide greater accuracy in survey estimation. The net effect of all changes in procedure was to increase the metropolitan area estimates. Research and detailed analysis of the impact of each procedural change on the population estimates is under way and the results will be issued in a forthcoming technical report.

### Collection of Income and Work Experience Data

This report presents data for persons and family householders with varying amounts of work experience. In the surveys from March 1966 to March 1969, civilian work experience data collected in the February and April surveys were matched with income data collected in the March survey for all households. In the surveys prior to March 1966 only persons included in the February and March surveys were matched.

Nonmatched persons included in the February and March interviews or the March and April interviews were almost always assigned work experience information from actual respondents with similar economic and demographic characteristics. Work experience values were estimated only when there was a nonmatched person with a given classification, but no respondent with similar economic and demographic characteristics.

No April or February 1969 survey record could be found for about 6 percent of the people included in the March 1969 survey. The major reasons for these nonmatches were migration, noninterviews, and coding errors. Beginning with the March 1970 survey, in order to eliminate the nonmatches and to improve the consistency between income and work experience data, both the income and work experience data were collected together in the March surveys.

The remaining persons, whose work experience data were assigned, resulted from inconsistencies between their work experience and income data and from persons who did not answer the work experience questions.

## Noninterviews, Nonresponses, and Allocations

In the March 1982 CPS, no interview was obtained for approximately 5 percent of the 62,000 households in the sample. No interview was obtained at these households during the enumeration week for reasons such as "no one home," "temporarily absent," or "refusals." In order to account for these households, the weights assigned to households in which interviews were obtained have been increased slightly. This "noninterview" adjustment procedure adjusts the weights of sample households by race of head and within a specified set of geographical restrictions.

The nonresponse problem, which is sometimes referred to as "item nonresponse," is a serious problem in most household surveys and is especially troublesome for income. In many cases, even though an interview is obtained, complete information for all of the income questions is not available, unknown, or refused. In March 1982 the income data were incomplete for about 28 percent of the persons 15 years old and over. About 34 percent of the families had one or more members with incomplete income information. In order that the maximum amount of information can be utilized, missing income items are imputed or allocated by values which are obtained from active respondents with similar economic and demographic characteristics.

Although nonresponse rates for families by poverty status are not available, it is known that families in the lower income intervals tend to have lower nonresponse rates than those in the middle and upper income intervals. This is due in part to the fact that lower income families have less complicated financial arrangements than those in other income groups. For a more detailed discussion of this topic see "Income Nonresponses in the Current Population Survey" by Mitsuo Ono and Herman P. Miller published in *Proceedings of the Social Statistics Section,* American Statistical Association, 1969.

## Questionnaire Wording and Procedures

A modified version of an experimental questionnaire which was tested on three-eighths of the March 1979 sample was used for the full sample beginning in March 1980. The experimental questionnaire contained a number of modifications designed to improve income reporting. For further discussion, see the section, "Modifications to the March 1980 CPS" in Current Population Reports, Series P-60, No. 130.

## Changes in Sample Size

Starting with the March 1977 CPS, the basic monthly sample was expanded from about 56,000 housing units to 68,000. The expanded sample was used until the March 1982 survey, when the sample size was reduced to about 62,000 households. Neither of these changes in sample size had any major effect on the data for the poverty population.

## Definition of the Income Universe

Starting in the March 1980 CPS, a decision was made to restrict the universe for presenting income data to persons 15 years old and over instead of 14 years old and over. This change was made to establish consistency between the results from the March 1980 CPS and the 1980 Census of Population. Although income data were collected for persons 14 years old and over, the income of the 14-year-olds was not used for processing and tabulation purposes.

The March 1980 CPS also incorporated the use of the "householder" concept rather than the traditional "head" concept. Under the new procedure, the householder is the first adult household member listed on the questionnaire. The instructions call for listing first the person (or one of the persons) in whose name the home is owned or rented.

Another change made in the March 1980 CPS was the exclusion of secondary families (now called unrelated subfamilies) from the count of all families. This modification was required because of the introduction of the householder concept, since unrelated subfamilies do not have a householder. For more discussion on all of the above-mentioned changes, see the section, "Modifications to the March 1980 CPS" in Current Population Reports, Series P-60, No. 130.

# OTHER LIMITATIONS OF THE DATA

Although every effort is made to reduce the errors of underreporting, nonreporting, or misreporting of income data in the Current Population Survey, they still occur because of various reasons. Some of these are (1) overlooking income received, especially small amounts of income types not regularly received, e.g., contributions from nonhousehold members, (2) reluctance to reveal certain types of income, e.g., public assistance, (3) rounding estimates, (4) misunderstanding the question, (5) lack of information, especially covering family members not present at the time of interview, (6) interviewers' errors, (7) processing errors, etc.

# Appendix B. Source and Reliability of the Estimates

## SOURCE OF DATA

Most of the estimates in this report are based on data obtained from the March 1982 Current Population Survey (CPS). However, some estimates are based on data obtained from the CPS in earlier years and from the 1960 decennial census.

The monthly CPS deals mainly with labor force data for the civilian noninstitutional population. Questions relating to labor force participation are asked about each member 14 years old and older in every sample household. In addition, supplementary questions are asked every March about money income for the previous year. In order to obtain more reliable data for the Spanish population, the March CPS sample was enlarged to include all households from the previous November sample which contained at least one person of Spanish origin. For this report, persons in the Armed Forces living off post or with their families on post are included.

The present CPS sample was initially selected from the 1970 census files with coverage in all 50 States and the District of Columbia. The sample is continually updated to reflect new construction. The current CPS sample is located in 629 areas comprising 1,148 counties, independent cities, and minor civil divisions in the Nation. In this sample, approximately 63,000 occupied households were eligible for interview. Of this number, about 3,000 occupied units were visited but interviews were not obtained because the occupants were not found at home after repeated calls or were unavailable for some other reason.

The following table provides a description of some aspects of the CPS sample designs in use during the referenced data collection periods.

The estimation procedure used in this survey involved the inflation of the weighted sample results to independent estimates of the total civilian noninstitutional population of the United States by age, race, and sex. These independent estimates were based on statistics from decennial censuses of population; statistics on births, deaths, immigration and emigration; and statistics on the strength of the Armed Forces. Beginning with reports containing income data for 1980, the independent population estimates used to obtain data for 1979 and later are based on the 1980 decennial census. In earlier reports in this series (P-60), data for 1971 through 1979 were obtained using independent population estimates based on the 1970 decennial census. For more details on this change, see the section of the text, "Introduction of 1980 Census Population Controls" in an earlier report (Series P-60, No. 133). The estimation procedure for the data in the report also involved a further adjustment so that husband and wife of a household received the same weight.

### Description of the March Current Population Survey

| Time period | Number of sample areas | Housing units eligible | |
|---|---|---|---|
| | | Interviewed | Not interviewed |
| 1982 | 629 | 60,000 | 3,000 |
| 1980 to 1981 | 629 | 65,500 | 3,000 |
| 1980 to 1981 | 629 | 65,500 | 3,000 |
| 1977 to 1979 | 614 | 55,000 | 3,000 |
| 1973 to 1976 | 461 | 46,500 | 2,500 |
| 1972 | 449 | 45,000 | 2,000 |
| 1967 to 1971 | 449 | 48,000 | 2,000 |
| 1963 to 1966 | 357 | 33,500 | 1,500 |
| 1960 to 1962 | [2]333 | 33,500 | 1,500 |
| 1959 | 330 | 33,500 | 1,500 |

[1]Three sample areas were added in 1960 to represent Alaska and Hawaii after statehood.

Note: Prior to 1966, income data were collected from approximately 75 percent of of occupied households in CPS.

## RELIABILITY OF THE ESTIMATES

Since the CPS estimates are based on a sample, they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaire, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey: sampling and nonsampling. The standard errors provided for this report primarily indicate the magnitude of the sampling error. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. The full extent of nonsampling error is unknown. Consequently, particular care should be exercised in the interpretation of figures based on a relatively small number of cases or on small differences between estimates.

**Nonsampling variability.** Nonsampling errors can be attributed to many sources, e.g., inability to obtain information about all cases in the sample, definitional difficulties, differences in the interpretation of questions, inability or unwillingness on the part of the respondents to provide correct information, inability to recall information, errors made in collection such as in recording or coding the data, errors made in processing the data, errors made in estimating values for missing data, and failure to represent all units within the sample (undercoverage).

Undercoverage in the CPS results from missed housing units and missed persons within sample households. Overall undercoverage, as compared to the level of the 1980 decennial census, is about 7 percent. It is known that CPS undercoverage varies with age, sex, and race. Generally, undercoverage is larger for males than for females and larger for Blacks and other races combined than for Whites. Ratio estimation to independent age-sex-race population controls partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that missed persons in missed households or missed persons in interviewed households have different characteristics than interviewed persons in the same age-sex-race group. Further, the independent population controls used have not been adjusted for undercoverage in the decennial census.

A coverage improvement sample was included in computing the estimates beginning in 1978 in order to provide coverage of mobile homes and new construction housing units which had no chance for selection under the 461 area CPS design. This sample is composed of approximately 450 sample household units which represent 237,000 occupied mobile homes and 600,000 new construction housing units. These new construction units are composed of those units where building permits were issued prior to January 1970 and construction was not completed by the time of the 1970 census (i.e., April 1970). The extent of other sources of housing undercoverage is unknown but believed to be small. The inclusion of this coverage improvement sample in the CPS does not have a significant effect on the estimates.

In most cases, the questionnaire entries for income are based on the memory or knowledge of one person, usually the wife. The memory factor in data derived from field surveys of income probably produces underestimates because the tendency is to forget minor or irregular sources of income. Other errors of reporting are due to misrepresentation or to misunderstanding as to the scope of the income concept. See also the section entitled "Other Limitations of the Data" in appendix A.

**Comparability with other data.** In using metropolitan and nonmetropolitan data, caution should be used in comparing estimates for 1977 and 1978 to each other or to any other years. Methodological and sample design changes occurred in these years resulting in relatively large differences in the metropolitan and nonmetropolitan area estimates. However, estimates for 1979 and later are comparable as are estimates for 1976 and earlier.

Caution should also be used when comparing estimates for 1980 and later, which reflect 1980 census-based population controls, to those for 1971 through 1979, which reflect 1970 census-based population controls. This change in population controls had relatively little impact on summary measures such as means, medians, and percent distributions, but did have a significant impact on levels. For example, use of 1980-based population controls resulted in about a 2 percent increase in the civilian noninstitutional population and in the number of families and households. Thus, estimates of levels for 1980 and later will differ from those for earlier years more than what could be attributed to actual changes in the population and these differences could be disproportionately greater for certain subpopulation groups than for the total population.

A number of changes were made in data collection and estimation procedures beginning with the March 1980 CPS. The major changes were the use of a more detailed income questionnaire, the use of the "householder" concept instead of the traditional "head" concept, the introduction of the new farm definition, and use of more detailed income intervals in the upper range of the income distribution. Due to these and other changes caution should be used in comparing estimates for 1979 through 1981 with estimates for earlier years. A description of these changes and the effect they had on the data is given in the section "Modifications to the March 1980 CPS" of an earlier report (Series P-60, No. 130).

**Sampling variability.** The standard errors given in tables B-1 through B-4 are primarily measures of sampling variability, that is, of the variation that occurred by chance because a sample rather than the entire population was surveyed. The sample estimate and its standard error enable one to construct confidence intervals, ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.

2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.

3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Standard errors may also be used to perform hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common types of hypotheses are 1) the population parameters are identical or 2) they are different. An example of this would be comparing the poverty rate for Whites versus the poverty rate for Blacks. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the parameters are different when, in fact, they are identical. All statements of comparison in the text have passed a hypothesis test at the 0.10 level of significance or better, and most have passed a hypothesis test at the 0.05 level of significance or better. This means that, for most differences cited in the text, the estimated difference between parameters is greater than twice the standard error of the difference. For the other differences mentioned, the estimated difference between parameters is between 1.6 and 2.0 times the standard error of the difference. When this is the case, the statement of comparison will be qualified in some way, e.g., by use of the phrase "some evidence."

**Note when using small estimates.** Summary measures (such as means, medians, and percent distributions) are shown when the base is 75,000 or greater. Because of the large standard errors involved there is little chance that summary measures would reveal useful information when computed on a smaller base. Estimated numbers are shown, however, even though the relative standard errors of these numbers are larger than those for the corresponding percentages. These smaller estimates are provided primarily to permit such combinations of the categories as serve each user's needs.

**Standard error tables and their use.** In order to derive standard errors that would be applicable to a large number of estimates and could be prepared at a moderate cost, a number of approximations were required. Therefore, instead of providing an individual standard error for each estimate, generalized sets of standard errors are provided for various types of characteristics. As a result, the sets of standard errors provided give an indication of the order of magnitude of the standard error of an estimate rather than the precise standard error.

## Table B-1. Standard Errors of Estimated Numbers: 1966 Through 1981 Total or White

(Numbers in thousands)

| Size of estimate | Standard error for persons | | | | Standard error for families and unrelated individuals | |
|---|---|---|---|---|---|---|
| | All income levels | | Below poverty level | | | |
| | Total | 65 years and over | Total | 65 years and over | All income levels | Below poverty level[1] |
| 100 | 14 | 14 | 28 | 17 | 13 | 14 |
| 250 | 22 | 22 | 45 | 27 | 21 | 22 |
| 500 | 31 | 30 | 63 | 38 | 29 | 31 |
| 1,000 | 43 | 42 | 89 | 54 | 41 | 44 |
| 2,500 | 68 | 65 | 140 | 82 | 65 | 72 |
| 5,000 | 96 | 86 | 197 | 108 | 91 | 106 |
| 10,000 | 134 | 103 | 276 | 128 | 127 | 162 |
| 25,000 | 204 | (X) | 423 | (X) | 192 | 307 |
| 50,000 | 268 | (X) | 566 | (X) | 247 | 532 |
| 100,000 | 314 | (X) | 696 | (X) | 269 | (X) |

X Not applicable.

[1]Standard errors for families and unrelated individuals of Spanish origin below the poverty level must be calculated using formula (2) and table B-8.

Note: See table B-5 for factors to be applied to the standard errors for other characteristics and table B-6 for factors for the years 1959 through 1965.

## Table B-2. Standard Errors of Estimated Numbers: 1966 Through 1981 Black and Other Races

(Numbers in thousands)

| Size of estimate | Standard error for persons | | | | Standard error for families and unrelated individuals | |
|---|---|---|---|---|---|---|
| | All income levels | | Below poverty level | | | |
| | Total | 65 years and over | Total | 65 years and over | All income levels | Below poverty level |
| 100 | 15 | 14 | 28 | 17 | 14 | 14 |
| 250 | 23 | 22 | 44 | 25 | 22 | 22 |
| 500 | 33 | 29 | 62 | 33 | 30 | 31 |
| 1,000 | 46 | 34 | 88 | 37 | 42 | 44 |
| 2,500 | 70 | (X) | 135 | (X) | 64 | 72 |
| 5,000 | 94 | (X) | 182 | (X) | 85 | 106 |
| 10,000 | 118 | (X) | 229 | (X) | (X) | (X) |
| 15,000 | 122 | (X) | 242 | (X) | (X) | (X) |

X Not applicable.

Note: See table B-5 for factors to be applied to the standard errors for other characteristics and table B-6 for factors for the years 1959 through 1965.

**Standard errors for data based on the CPS sample.** The figures presented in tables B-1 through B-4 are approximations to the standard errors of various CPS estimates shown in this report for the years 1966 through 1981. Tables B-1 and B-2 contain the standard errors of estimates of the number of total persons and persons 65 years old and over by poverty status. These tables also show the standard errors for families and unrelated individuals by poverty status for "Total or White" and "Black and Other Races," respectively. The last two columns of tables B-1 and B-2 pertaining to families should also be used for items which can typically appear only once in a given family, e.g., "Number of Heads of Families."

Tables B-3 and B-4 contain standard errors of estimated percentages of persons below the poverty level for the United States and of families and unrelated individuals regardless of poverty status for the United States.

Table B-5 presents the factors ($f_1$) to be used for other characteristics and table B-6 presents the factors ($f_2$) to be used for the years 1959 to 1965.

These factors must be applied to the generalized standard errors in tables B-1 through B-4 in order to adjust for the combined effect of sample design and the estimating procedure on the value of the characteristic. For example, to produce approximate standard errors for families below the poverty level in 1959 with seven or more members, use the factor 0.9 for family size from table B-5 and the factor 1.4 for 1959 from table B-6.

## Table B-3. Standard Errors of Estimated Percentages of Persons Below the Poverty Level: 1966 Through 1981

| Base of estimated percentage (thousands) | 2 or 98 | 5 or 95 | 10 or 90 | 25 or 75 | 50 |
|---|---|---|---|---|---|
| 75 | 4.6 | 7.1 | 9.8 | 14.1 | 16.3 |
| 100 | 3.9 | 6.1 | 8.5 | 12.2 | 14.1 |
| 250 | 2.5 | 3.9 | 5.3 | 7.7 | 8.9 |
| 500 | 1.8 | 2.7 | 3.8 | 5.5 | 6.3 |
| 1,000 | 1.2 | 1.9 | 2.7 | 3.9 | 4.5 |
| 2,500 | 0.8 | 1.2 | 1.7 | 2.4 | 2.8 |
| 5,000 | 0.6 | 0.9 | 1.2 | 1.7 | 2.0 |
| 10,000 | 0.4 | 0.6 | 0.8 | 1.2 | 1.4 |
| 25,000 | 0.2 | 0.4 | 0.5 | 0.8 | 0.9 |
| 50,000 | 0.2 | 0.3 | 0.4 | 0.5 | 0.6 |
| 100,000 | 0.12 | 0.2 | 0.3 | 0.4 | 0.4 |

Note: To estimate standard errors for persons at all income levels, divide these standard errors by 2.0. See table B-5 for factors to be applied to the standard errors for other characteristics and table B-6 for factors for the years 1959 through 1965.

Detailed standard errors of estimated numbers of persons and families below the poverty level are shown in tables 10, 16, and 36 of this report.

To calculate standard errors for persons and families in poverty it was necessary to use two parameters (denoted as "a" and "b") which are presented in tables B-7 through B-9. These parameters were used to calculate the tabulated standard errors in tables B-1 through B-4 and to calculate the factors in table B-5. They also may be used to calculate standard errors of estimated percentages. Direct computation of the standard errors will give more accurate results than the use of the standard error tables. Methods for direct computation are given in the following sections.

**Data based on 1960 census 1-in-1,000 sample.** Standard errors for data based on the 1960 census 1-in-1,000 sample are estimated by applying the appropriate factors given in tables B-5 and B-6 to the standard errors shown in tables B-1 through B-4.

**Standard errors of estimated numbers.** The approximate standard error $\sigma_x$, of an estimated number shown in this report can be obtained in two ways. It may be obtained by use of the formula

$$\sigma_x = f_1 \cdot f_2 \cdot \sigma \qquad (1)$$

where $f_1$ is the appropriate factor from table B-5, $f_2$ is the appropriate factor from table B-6, and $\sigma$ is the standard error for a characteristic obtained by interpolation from tables B-1 or B-2. Alternatively, the standard errors may be approximated by the following formula, (2), from which the standard errors were calculated in tables B-1 and B-2. Use of this formula will provide more accurate results than the use of formula (1) above.

$$\sigma_x = f_2 \sqrt{ax^2 + bx} \qquad (2)$$

Here x is the size of the estimate and a and b are the parameters in tables B-7 through B-9 associated with the particular type of characteristic.

**Standard errors of estimated percentages.** The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends on both the size of the percentage and the size of the total upon which this percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the factor or parameter indicated by the numerator. The approximate standard error, $\sigma_{(x,p)}$, of an estimated percentage can be obtained by use of the formula

$$\sigma_{(x,p)} = f_1 \cdot f_2 \cdot \sigma \qquad (3)$$

In this formula, $f_1$ is the appropriate factor from table B-5, $f_2$ the appropriate factor from table B-6, and $\sigma$ is the standard error for a characteristic in table B-3 or B-4. Alternatively, the standard errors may be approximated by the following formula, (4). Use of this formula will provide more accurate results than use of formula (3) above.

$$\sigma_{(x,p)} = f_2 \sqrt{\frac{b}{x} \cdot p\,(100-p)} \qquad (4)$$

Here x is the size of the subclass of persons, or families and unrelated individuals which is the base of the percentage, p is the percentage ($0 \leq p \leq 100$), and b is the parameter in tables B-7 through B-9 associated with the particular type of characteristic in the numerator of the percentage.

**Illustration of the use of standard error tables.** Table A of this report shows that in 1981 there were 31,822,000 persons below the poverty level. Table B-1 shows the standard error of an estimate of this size to be approximately 462,000. In this situation, no factors have to be applied to the standard error, i.e., both $f_1$ and $f_2$ are equal to 1.0. Alternatively, using the parameters in table B-7 in formula (2) gives a standard error of

$$471{,}000 \doteq \sqrt{(-0.000031)(31{,}822{,}000)^2 + (7{,}946)(31{,}822{,}000)}$$

## Table B-4. Standard Errors of Estimated Percentages for Families and Unrelated Individuals 1966 Through 1981

| Base of estimated percentage (thousands) | Estimated percentage | | | | |
|---|---|---|---|---|---|
| | 2 or 98 | 5 or 95 | 10 or 90 | 25 or 75 | 50 |
| 75 | 2.2 | 3.4 | 4.7 | 6.8 | 7.9 |
| 100 | 1.9 | 3.0 | 4.1 | 5.9 | 6.8 |
| 250 | 1.2 | 1.9 | 2.6 | 3.8 | 4.3 |
| 500 | 0.9 | 1.3 | 1.8 | 2.7 | 3.1 |
| 1,000 | 0.6 | 0.9 | 1.3 | 1.9 | 2.2 |
| 2,500 | 0.4 | 0.6 | 0.8 | 1.2 | 1.4 |
| 5,000 | 0.3 | 0.4 | 0.6 | 0.8 | 1.0 |
| 10,000 | 0.2 | 0.3 | 0.4 | 0.6 | 0.7 |
| 25,000 | 0.1 | 0.2 | 0.3 | 0.4 | 0.4 |
| 50,000 | 0.09 | 0.1 | 0.2 | 0.3 | 0.3 |

Note: See table B-5 for factors to be applied to the standard errors for other characteristics and table B-6 for the years 1959 through 1965.

**Table B-5. Factors to be Applied to Generalized Standard Errors in Tables B-1, B-2, B-3, and B-4 for Family Characteristics and for Persons and Families**

| Characteristics | Factor ($f_1$) Tables B-1 and B-4 | Factor ($f_1$) Table B-2 | Characteristic | Factor ($f_1$) All tables |
|---|---|---|---|---|
| Families by-- | | | Persons and families by-- | |
| Age of householder | 0.9 | 0.8 | Region | 1.0 |
| Employment status of householder | 1.1 | 1.1 | Farm | 1.4 |
| Work experience of householder | 1.1 | 1.1 | Nonfarm | 1.0 |
| Number of related children | 0.9 | 0.8 | Metro-nonmetro | 1.2 |
| Size of family | 0.9 | 0.8 | Spanish origin[1] | 1.2 |
| Number of workers | 1.1 | 1.1 | | |
| Educational attainment of householder | 0.9 | 0.8 | | |

[1]With table B-1, do not use this factor for families. Use formula (2) and table B-8 instead.

Note: Apply these factors to parameters of interest at the U.S. level. For characteristics not appearing in this table $f_1$ is assumed to be equal to 1.

Using the 471,000 estimate, the 68-percent confidence interval as shown by the data is from 31,351,000 to 32,293,000. The 95-percent confidence interval is from 30,880,000 to 32,764,000 (using twice the standard error). Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 95 percent of all possible samples.

Of the 31,822,000 persons below the poverty level, 9,173,000, or 28.8 percent, were Black. Table B-3 shows the standard error of 28.8 percent on a base of 31,822,000 to be approximately 0.7 percent.

Alternatively, this standard error could have been derived by using the "b" parameter for Blacks from table B-7 in formula (4).

$$0.7 = \sqrt{\frac{7{,}946}{31{,}822{,}000}(28.8)(71.2)}$$

Consequently, the 68-percent confidence interval as shown by these data is from 28.1 to 29.5 percent, and the 95-percent confidence interval is from 27.4 to 30.2 percent.

**Standard error of a difference.** For a difference between two sample estimates, the standard error is approximately equal to

$$\sigma_{(x-y)} = \sqrt{\sigma_x^2 + \sigma_y^2 - 2\rho\,\sigma_x\,\sigma_y} \qquad (5)$$

where $\sigma_x$ and $\sigma_y$ are the standard errors of the estimates x and y (from tables B-1 through B-4). The estimates can be numbers, percents, ratios, etc. The correlation coefficient $\rho$ can be determined from table B-10 for year-to-year comparisons for poverty estimates of numbers and proportions; for other comparisons assume that $\rho$ equals zero. Making this assumption will result in accurate estimates of standard errors for the difference between two estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive (negative) correlation between the two characteristics, the formula will overstate (understate) the true standard error.

**Illustration of the computation of the standard error of a difference in estimates.** Table A shows that the number of persons below the poverty level in 1981 was 31,822,000 and in 1980 the figure was 29,640,000. The apparent difference is 2,182,000. As shown above, the standard error on the estimate of 31,822,000 persons below the poverty level is 471,000. The standard error on the 29,640,000 low-income persons computed from (2) is 456,000. From table B-10 we obtain the correlation coefficient, $\rho$ = .45. The standard error associated with the estimated difference of 2,182,000 is

$$486{,}000 = \sqrt{(471{,}000)^2 + (456{,}000)^2 - 2(.45)(471{,}000)(456{,}000)}$$

**Table B-6. Factors To Be Applied to All Standard Errors: 1959 Through 1965**

| Year | Source of data | Factor ($f_2$) |
|---|---|---|
| 1959 | 1-in-1,000 sample of 1960 census | 0.6 |
| 1959 to 1964 | CPS | 1.4 |
| 1965 | CPS | 1.2 |
| All other years | CPS | 1.0 |

**Table B-7. Parameters for Estimated Numbers and Percentages of Persons, by Poverty Status, Age, Sex, Race, and Spanish Origin: 1966 Through 1981**

| Characteristic | Below the poverty level | | | | | | All income levels | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | All races and White | | Black and other races | | Spanish origin | | All races and White | | Black and other races | | Spanish origin | |
| | a | b | a | b | a | b | a | b | a | b | a | b |
| Total persons[1] | -0.000031 | 7946 | -0.000270 | 7946 | -0.000063 | 11528 | -0.000009 | 1885 | -0.000077 | 2155 | -0.000020 | 3000 |
| Male | -0.000064 | 7946 | -0.000577 | 7946 | -0.000130 | 11528 | -0.000024 | 1885 | -0.000232 | 2155 | -0.000043 | 3000 |

| Under 14 | -0.000052 | 6057 | -0.000052 | 6057 | -0.000052 | 6057 | -0.000056 | 1885 | -0.000308 | 2155 | -0.000089 | 3000 |
| 14 years and over[2] | -0.000019 | 3017 | -0.000178 | 3017 | -0.000032 | 4520 | -0.000011 | 1885 | -0.000105 | 2155 | -0.000021 | 3000 |
| 14 to 24 | -0.000077 | 3017 | -0.000542 | 3017 | -0.000122 | 4520 | -0.000043 | 1885 | -0.000329 | 2155 | -0.000080 | 3000 |
| 25 to 34 | -0.000098 | 3017 | -0.000939 | 3017 | -0.000169 | 4520 | -0.000058 | 1885 | -0.000511 | 2155 | -0.000105 | 3000 |
| 35 to 44 | -0.000134 | 3017 | -0.001253 | 3017 | -0.000230 | 4520 | -0.000080 | 1885 | -0.000727 | 2155 | -0.000145 | 3000 |
| 45 to 64 | -0.000070 | 3017 | -0.000765 | 3017 | -0.000117 | 4520 | -0.000043 | 1885 | -0.000466 | 2155 | -0.000077 | 3000 |
| 65 years and over | -0.000139 | 3017 | -0.001683 | 3017 | -0.000153 | 4520 | -0.000083 | 1885 | -0.001001 | 2155 | -0.000147 | 3000 |

[1]These parameters should be multiplied by 1.5 for metropolitan-nonmetropolitan residence categories.
[2]Use these parameters for work experience and employment status data for persons.

This means that the 68-percent confidence interval around the 2,182,000 difference is from 1,696,000 to 2,668,000, i.e., 2,182,000 ± 486,000. The 95-percent confidence interval on the difference of 2,182,000 is from 1,210,000 to 3,154,000. Therefore, a conclusion that the average estimate of the difference derived from all possible samples lies within a range computed in this way would be correct for roughly 95 percent of all possible samples. Since this interval does not contain zero, we can conclude with 95-percent confidence that the number of persons below the poverty level in 1981 is higher than the figure for 1980.

**Ratios.** There are two cases to consider when computing the approximate standard error of a ratio. In the case where the numerator of the ratio is income, formula (6) for the standard error of the arithmetic mean should be used. In cases where the ratio has persons in the numerator and families in the denominator, formula (7) with the appropriate $\rho$ will give a preferable result to that of formula (6).

**Computation of the standard error of an arithmetic mean.** The standard error of a mean can be approximated by formula (6). Because of the approximations used in developing formula (6), an estimate of the standard error of the mean obtained from that formula will generally underestimate the true standard error. The formula used to estimate the standard error of a mean is

$$\sigma_{\bar{x}} = \sqrt{\frac{b}{y} \cdot S^2} \qquad (6)$$

In this formula, y is the size of the base and b is a parameter which depends on the sample size, the sample design, the estimation procedure, and the type of characteristic. Values of b are given in tables B-7 to B-9. The variance, $S^2$, is given by the following formula:

$$S^2 = \sum_{i=1}^{c} p_i x_i^2 - \bar{x}^2$$

where x is the mean of the distribution, defined $\sum_{i=1}^{c} p_i x_i$; c is the number of groups; i indicates a specific class, taking on values 1 through c; $p_i$ is the percentage of total cases in the $i^{th}$ class; and $x_i$ is the midpoint of the $i^{th}$ class (or discrete value of the $i^{th}$ class).[1] When two or more distributions are combined, the mean of the combined distribution is:

$$\bar{x} = \frac{1}{y} \sum_j \bar{x}_j y_j$$

where $\bar{x}_j$ is the mean of the $j^{th}$ distribution, $y_j$ is the base of the $j^{th}$ distribution, and $y = \sum_j y_j$. This mean must be computed by the user.

**Standard error of a ratio.** Certain mean values, for persons in families, listed in the tables of this report were calculated as the ratio of two numbers. For example, the mean number of children per family with children is calculated as

$$\frac{x}{y} = \frac{\text{total number of children in families}}{\text{total number of families with children}}$$

Standard errors for these means may be approximated as shown below. There are two cases to consider. In either case, the denominator y represents a count of families of a certain class, and the numerator x represents a count of persons with the characteristic under consideration who are members of these families.

**Case 1:** There is at least one person having the characteristic in every family of the class; for example, the mean number

[1] For income tables of families below the poverty level use—$5,000 as the midpoint for "Loss" and $9,400 as the midpoint for "$8,000 and over." For incomes of unrelated individuals below the poverty level use—$5,000 as the midpoint for "Loss" and $3,600 for "$3,000 and over." For income tables for all families use—$5,000 for "Loss" and $41,000 for "$25,000 and over." For the income deficit table use $7,000 as the midpoint of the "$5,000 or more" interval and $3,000 for the "$1,500 or more" interval.

**Table B-8. Parameters for Estimated Numbers and Percentages of Families or Unrelated Individuals, by Poverty Status, Race, and Spanish Origin: 1966 Through 1981**

(For meaning of symbols, see text)

| Characteristic | All races and White | | Black and other races | | Spanish origin | |
|---|---|---|---|---|---|---|
| | a | b | a | b | a | b |
| Total families or unrelated individuals[1] | -0.000010 | 1721 | -0.000089 | 1876 | -0.000014 | 2420 |
| Families or unrelated individuals below the poverty level | 0.000076 | 1876 | 0.000076 | 1876 | -0.000014 | 2420 |
| Characteristics of families: | | | | | | |
| Age of householder | -0.000010 | 1389 | -0.000087 | 1255 | -0.000020 | 1422 |
| Employment status of householder | -0.000016 | 2078 | -0.000133 | 2078 | (X) | (X) |
| Work experience of householder | -0.000016 | 2078 | -0.000133 | 2078 | -0.000012 | 1661 |
| Number of related children under 18 years | -0.000010 | 1389 | -0.000087 | 1255 | -0.000020 | 1422 |
| Size of family | -0.000010 | 1389 | -0.000087 | 1255 | -0.000020 | 1422 |
| Number of workers | -0.000016 | 2078 | -0.000133 | 2078 | -0.000012 | 1661 |
| Educational attainment of householder | -0.000011 | 1389 | -0.000123 | 1255 | -0.000020 | 1422 |

Note: The parameters for family characteristics can be used to estimate standard errors for families at all income levels. See table B-6 for factors to be applied to standard errors for the years 1959 through 1965.

[1]These parameters should be multiplied by 1.5 for metropolitan-nonmetropolitan residence categories.

of children per family with children. For ratios of this kind, the standard error is approximated by the following formula:

$$\sigma\left(\frac{x}{y}\right) = \sqrt{\left(\frac{x}{y}\right)^2\left[\left(\frac{\sigma_y}{y}\right)^2 + \left(\frac{\sigma_x}{x}\right)^2 - 2\rho\left(\frac{\sigma_x}{x}\right)\left(\frac{\sigma_y}{y}\right)\right]} \qquad (7)$$

The standard error of the estimated number of families, $\sigma_y$, and the standard error of the estimated number of persons with the characteristic, $\sigma_x$, may be obtained from table B-1 or B-2. Alternatively, formula (2) and tables B-7 to B-9 may be used. In formula (7), $\rho$ represents the correlation coefficient between the numerator and the denominator of the estimate. In the above example, and for other ratios of this kind, use 0.7 as an estimate of $\rho$. This procedure can also be used to compute the standard error on the estimate of mean family size where

$$\frac{x}{y} = \frac{\text{total number of persons in families}}{\text{total number of families}}$$

and $\rho$ is again estimated to be approximately 0.7.

**Case 2:** The number of persons having the characteristic in a given family may be 0, 1, 2, 3, or more; for example, the

**Table B-9. Parameters for Estimated Numbers and Percentages of Persons and Families Below the Poverty Level, by Region and Farm-Nonfarm Residence: 1966 Through 1981**

| Region | Persons | | Families and unrelated individuals | |
|---|---|---|---|---|
| | a | b | a | b |
| North and West | -0.000032 | 8,184 | 0.000078 | 1,932 |
| Northeast | -0.000032 | 8,184 | 0.000078 | 1,932 |
| North Central | -0.000032 | 8,264 | 0.000079 | 1,951 |
| West | -0.000029 | 7,390 | 0.000071 | 1,745 |
| South | -0.000034 | 8,661 | 0.000083 | 2,045 |
| Farm | 0.000042 | 15,177 | 0.000085 | 3,452 |
| Nonfarm | -0.000031 | 7,946 | 0.000076 | 1,876 |

Note: To estimate standard errors for persons at all income levels divide the parameters by 4 and use the appropriate formula given in the text. For families and unrelated individuals at all income levels, use the same parameters that are shown in the table for families and unrelated individuals below the poverty level. See table B-6 for factors to be applied to standard errors for the years 1959 through 1965.

## Table B-10. Year-to-Year Correlation Coefficients for Poverty Estimates

| Characteristic | 1980-81[1] | | 1971-72 | | 1970-71 | |
|---|---|---|---|---|---|---|
| | Persons | Families | Persons | Families | Persons | Families |
| Total | 0.45 | 0.35 | 0.15 | 0.14 | 0.31 | 0.28 |
| White | 0.35 | 0.30 | 0.14 | 0.13 | 0.28 | 0.25 |
| Black | 0.45 | 0.35 | 0.17 | 0.16 | 0.35 | 0.32 |
| Other races | 0.45 | 0.35 | 0.17 | 0.16 | 0.35 | 0.32 |
| Spanish origin | 0.65 | 0.55 | 0.17 | 0.16 | 0.35 | 0.32 |

[1]These correlation coefficients are also applicable to all other years not specified.

mean number of children per family. For ratios of this kind the standard error is approximated by formula (7) but $\rho$ is assumed to be zero. If $\rho$ is actually positive (negative), then this procedure will provide an overestimate (underestimate) of the standard error of the ratio.

**Confidence interval and standard error of a median.** The sampling variability of an estimated median depends upon the form of the distribution as well as the size of its base. An approximate method for measuring the reliability of an estimated median is to determine a confidence interval about it. (See the section on sampling variability for a general discussion of confidence intervals.) The following procedure may be used to estimate the 68-percent confidence limits and hence the standard error of a median based on sample data.

1. Determine, using the standard error tables and factors or formula (4), the standard error of the estimate of 50 percent from the distribution;
2. Add to and subtract from 50 percent the standard error determined in step (1);
3. Using the distribution of the characteristic, calculate the values from the distribution corresponding to the two points established in step (2). These values will be the limits for the 68-percent confidence interval.
4. Divide the difference between the two points determined in step (3) by two to obtain the standard error of the median.

A 95-percent confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step (1).

The formula used to implement step (3) for linear interpolation is:

$$\text{Linear: } x_{pN} = \frac{N_1 - pN}{N_1 - N_2}(A_2 - A_1) + A_1 \qquad (8)$$

where. N = total number of families or persons in the the distribution.

$x_{pN}$ = estimated upper and lower bounds for the confidence interval ($0 \leq p \leq 1$). For the purposes of calculating the confidence interval, p takes on the two values in step (2). Note that the median can be approximated by using p = .50 in the formula.

$A_1$ and $A_2$ = the estimates which are the lower and upper bounds, respectively, on the interval in which the median falls.

$N_1$ and $N_2$ = the estimated number of families or persons greater than $A_1$ and $A_2$, respectively.

**Illustration of the computation of a confidence interval and the standard error for a median.** Using estimates from table 35 it can be shown that the median income deficit for poor families with a female householder (no husband present) was $3,414 in 1981. The size, or base, of the distribution from which this median was determined is 3,252,000.

1. Using formula (4), the standard error of 50 percent on a base of 3,252,000 is about 1.2 percentage points.
2. To obtain a 68-percent confidence interval on the estimated median, add to and subtract from 50 percent the standard error found in step (1). This yields percent limits of 48.8 and 51.2.
3. From table 35, the income of 1,836,000 (56.5 percent) of these families was at least $3,000, and the income deficit of 1,328,000 (40.8 percent) of these families was at least $4,000.

   Thus, the entire 68-percent confidence interval falls in the income deficit interval $3,000 to $3,999. Using formula (8), the lower limit on the estimate is found to be about

$$\frac{1{,}836{,}000 - (.512)\,(3{,}252{,}000)}{1{,}836{,}000 - 1{,}328{,}000}\,(\$4{,}000 - \$3{,}000) + \$3{,}000 = \$3{,}337.$$

   Similarly, the upper limit is found to be about

$$\frac{1{,}836{,}000 - (.488)\,(3{,}252{,}000)}{1{,}836{,}000 - 1{,}328{,}000}\,(\$4{,}000 - \$3{,}000) + \$3{,}000 = \$3{,}490.$$

   Thus, the 68-percent confidence interval on the estimated median is from $3,337 to $3,490.

4. The standard error of the median is, therefore, ($3,490 – $3,337)/2 = $77.
