TEXT TABLES

A. Households receiving means-tested noncash benefits—number, percent below the poverty level, and percent of poor receiving benefits: 1985 and 1984 . . . 2

B. Percent of households receiving means-tested noncash benefits, by selected characteristics: 1985 . . . 2

C. Percent distribution of means-tested noncash benefit households, by selected characteristics: 1985 . . . 3

D. Households receiving nonmeans-tested noncash benefits—number, median income, and percent below the poverty level: 1985 and 1984 . . . 4

DETAILED TABLES

1. Households and persons in households, by household money income and poverty status of the primary family or individual: 1985 . . . 7
2. Households with school children 5 to 18 years old and number of children 5 to 18 years old in households, by household money income and poverty status of the primary family or individual: 1985 . . . 12
3. Persons, by household money income and poverty status of the primary family or individual: 1985 . . . 15
4. Civilian wage and salary workers 15 years old and over, by wage or salary income and poverty status of the primary family or individual: 1985 . . . 16
5. Food stamp recipiency of households and persons in households, mean annual face value of food stamps, and mean number of months receiving food stamps, by household money income and poverty status of the primary family or individual: 1985 . . . 20
6. Free or reduced-price School Lunch Program participation—households with school children 5 to 18 years old and number of children 5 to 18 years old in households, by household money income and poverty status of the primary family or individual: 1985 . . . 30
7. Residence in publicly owned or other subsidized renter-occupied housing—households and persons in households, by household money income and poverty status of the primary family or individual: 1985 . . . 33
8. Households and persons in households with one or more members covered by Medicaid, by household money income and poverty status of the primary family or individual: 1985 . . . 37
9. Persons covered by Medicaid, by household money income and poverty status of the primary family or individual: 1985 . . . 42
10. Households, by number of selected means-tested public noncash benefits received, types of means-tested cash public assistance, and poverty status of the primary family or individual: 1985 . . . 43

DETAILED TABLES—Continued

Page

11. Regular-price School Lunch Program participation—households with school children 5 to 18 years old and number of children 5 to 18 years old in households, by household money income and poverty status of the primary family or individual: 1985 47
12. Households with one or more persons covered by Medicare, by household money income and poverty status of the primary family or individual: 1985 49
13. Persons 15 years old and over covered by Medicare, by household money income and poverty status of the primary family or individual: 1985 50
14. Civilian wage and salary workers 15 years old and over with employer- or union-provided pension plan coverage, by wage or salary income and poverty status of the primary family or individual: 1985 53
15. Civilian wage and salary workers 15 years old and over with employer- or union-provided pension and group health plans, by type of employer or union contribution, wage or salary income, and poverty status of the primary family or individual: 1985 ... 57
16. Households with one or more members covered by an employer- or union-provided pension plan, by household money income and poverty status of the primary family or individual: 1985 73
17. Civilian wage and salary workers 15 years old and over with an employer- or union-provided group health plan, by type of employer or union contribution, wage or salary income, and poverty status of the primary family or individual: 1985 74
18. Persons covered by an employer- or union-provided group health plan, by type of employer or union contribution, household money income and poverty status of the primary family or individual: 1985 94
19. Households with one or more persons covered by an employer- or union-subsidized health insurance plan, by household money income and poverty status of the primary family or individual: 1985 98
20. Persons with health care coverage, by source of coverage, household money income, poverty status of the primary family or individual, and age: 1985 99
21. Selected combinations of sources of income and noncash benefits received by households: 1985 101
22. Households receiving selected noncash benefits in 1979 to 1985, by race and Spanish origin 106
23. Households below the poverty level receiving selected noncash benefits in 1979 to 1985, by race and Spanish origin 107

Receipt of Selected Noncash Benefits: 1985

NOTE

Income and poverty data in this report for 1985 are the first estimates based entirely on households selected from the 1980 census-based sample design. Estimates by type of residence categories such as metropolitan, nonmetropolitan, farm, and nonfarm, which were omitted from the 1984 report because of the mixed 1970 and 1980 census sampling frame used for the March 1985 CPS, have been resumed in this report. The residence categories reflect metropolitan areas defined as of June 1984. In addition, the March 1986 CPS income supplement was revised to allow for the coding of larger earnings amounts on the questionnaire. A description of this change and its effect on estimates in this report can be found in the section discussing the revised earnings question.

INTRODUCTION

This report contains data on the characteristics of households and persons receiving noncash benefits in 1985. These data were obtained from the March 1986 Current Population Survey (CPS) conducted by the Bureau of the Census. Noncash benefits can be defined as benefits received in a form other than money that serve to enhance or improve the economic well-being of the recipient.

Data collection in March 1986 concentrated on two major categories of noncash benefits: those usually defined as public transfers and employer- or union-provided benefits to employees. In the area of public noncash transfers, the survey covered the following programs: the Food Stamp Program, the National School Lunch Program, public and other subsidized rental housing, Medicare health insurance, Medicaid health insurance, and CHAMPUS, VA, or military health insurance. Data were collected for two types of employer- or union-provided noncash benefits: pension plans and group health insurance plans. The income data in this report are limited to money income before the payment of Federal, State, local, or Social Security (FICA) taxes or any other deductions. They do not include the monetary value of any noncash benefits these households received.

MEANS-TESTED NONCASH BENEFITS

The number of households receiving at least one means-tested noncash benefit, which included food stamps, free or reduced-price school lunches, publicly owned or subsidized rental housing, and Medicaid was 14.5 million in 1985, not significantly different from the 1984 figure.

To qualify for means-tested benefits, household income or assets (resources) must fall below a specified level. The market value of noncash benefits intended for the low-income population was estimated to be $56.2 billion in 1985, $36.7 billion of which was in the form of Medicaid. Means-tested cash assistance totaled $30.2 billion in 1985.[1]

In 1985, 3.9 million households were publicly owned or renter subsidized, an increase of 211,000 from 1984 and the only means-tested program to show a statistically significant increase. Between 1984 and 1985 the number of households receiving food stamps declined 282,000 to 6.8 million. The number of households with children receiving free or reduced-price school lunches and households with one or more members covered by Medicaid were statistically unchanged.

About one-half of the households receiving means-tested noncash benefits had money incomes below the poverty level in 1985 (table A).[2] The poverty rate for households receiving food stamps was 73 percent, 52 percent for households receiving free or reduced-price school lunches, 55 percent for households in public or other subsidized rental housing, and 58 percent for Medicaid households.[3] None of the poverty rates were statistically different from the 1984 estimates.

About 59 percent of the households below the poverty level received some form of means-tested noncash benefits in 1985. The percentage of poor households with persons covered by Medicaid showed some evidence of a decrease from 1984. The percentage of poor households that were renter subsidized or publicly owned, receiving free or reduced-price school lunches, and those receiving food stamps were all unchanged from 1984.

The 6.8 million households receiving *food stamps* during 1985 accounted for 8 percent of all households (table B). The median total money income for these households was $6,160. Although only 8 percent of all households received food stamps, there were several subgroups with much higher rates. (See table B.) These include households with Black householders (22 percent), those with householders of Spanish origin (17 percent), and family households maintained by women with no husbands present (29 percent). The mean annual face value of food stamps received by all food stamp households in 1985 was $1,085.

[1]For further details concerning the valuation of noncash benefits, see Technical Paper 56, *Estimates of Poverty Including the Value of Noncash Benefits: 1985.*

[2]For this report, the poverty status of a household is based on the poverty status of the household's primary family or individual. The official poverty definition is based on all families and unrelated individuals and is based on cash income only.

[3]The poverty rate for households in public or subsidized housing was not statistically different from the poverty rate for households covered by Medicaid or those receiving free or reduced-price school lunches.

Table A. Households Receiving Means-Tested Noncash Benefits—Number, Percent Below the Poverty Level, and Percent of Poor Receiving Benefits: 1985 and 1984

(Households as of March of the following year. Households are classified according to poverty status of the primary family or individual)

Type of means-tested benefit	All households: Number (thousands) 1985	All households: Number (thousands) 1984	All households: Percent change	Percent of households below the poverty level: 1985	Percent of households below the poverty level: 1984	Percent of households below the poverty level: Difference (1985 minus 1984)	Percent of all poor households receiving noncash benefits: 1985	Percent of all poor households receiving noncash benefits: 1984	Percent of all poor households receiving noncash benefits: Difference (1985 minus 1984)
All households	88,458	86,789	*1.9	13.6	13.7	-0.1	(X)	(X)	(X)
Households with one or more means-tested benefits[1]	14,466	14,594	-0.9	48.9	49.7	-0.8	58.9	61.1	-2.2
Households receiving food stamps	6,779	7,061	*-4.0	72.9	72.5	0.4	41.2	43.0	-1.8

**Significant between the .05 and .10 levels.
X Not applicable.
[1]Detail does not add because some households have noncash benefits from more than one source.
[2]Based on poor households with children 5 to 18 years old.
[3]Based on poor households in renter-occupied housing.

Table B. Percent of Households Receiving Means-Tested Noncash Benefits, by Selected Characteristics: 1985

(Households as of March 1986. Households are classified according to the race of the family or nonfamily householder)

Characteristic	Number (thousands)	Percent: Total[1]	Food stamps	Free or reduced-price school lunches[2]	Public or other subsidized housing[3]	Medicaid
Total	88,458	100.0	7.7	21.4	11.9	9.2
White	76,576	100.0	5.8	16.3	9.4	7.1
Black	9,797	100.0	22.1	48.6	23.6	25.4
Spanish origin[4]	5,213	100.0	16.8	43.3	13.0	19.3
Households with—						
Children under 19 years old	35,152	100.0	12.9	21.4	14.5	12.6
Female family householder, no husband present	10,211	100.0	28.5	46.2	25.2	31.8
Householder 65 years old and over	18,596	100.0	5.9	32.7	27.4	12.3
Residence in the South	30,311	100.0	9.0	25.9	13.3	8.7

[1]Includes households not receiving means-tested noncash benefits, not shown separately.
[2]Based on households with school children 5 to 18 years old.
[3]Based on households in renter-occupied housing.
[4]Persons of Spanish origin may be of any race.

Free or reduced-price school lunches were received by children in 21 percent of all households with school children aged 5 to 18 years. About 46 percent of households maintained by women (no husband present) with children in school received free or reduced-price school lunches. The South, which contains about 35 percent of all households with school children 5 to 18 years old, accounted for about 43 percent of the total 5.8 million households receiving free or reduced-price school lunches. (See table C.) About 67 percent of the 4.4 million poverty households with school children received school lunches at a reduced price or for free.

About 12 percent of the 32.1 million renter-occupied households were residing in *publicly owned or other subsidized housing* in March 1986. Twenty-eight percent of the 7.5 million renter-occupied households below the poverty level resided in public or subsidized housing. Thirty-four percent of the households residing in public or subsidized housing had a householder 65 years old or over.

Of the 8.2 million households with members covered by *Medicaid,* 4.8 million (about 58 percent) had incomes below the poverty level. Medicaid covered 40 percent of all poor households. Of all households with Medicaid coverage, 40 percent had a female householder with no husband present.

PUBLIC NONMEANS-TESTED NONCASH BENEFITS

Households receiving public nonmeans-tested benefits are not required to meet income or asset guidelines. Two major public programs are covered in this report: Medicare and regular-price school lunches. (All school lunches served at schools participating in the National School Lunch Program are subsidized.) In 1985, the number of households with one or more members covered by Medicare (21.8 million), and the number of households with school children receiving regular-price school lunches (11.8 million) were significantly higher than in 1984. (See table D).

About 25 percent of all households in the United States contained one or more persons covered by *Medicare* during 1985. Of these, about 83 percent had a householder 65 years old or over. About 16 percent of the households with members covered by Medicare were below the poverty level in 1985. The 11.8 million households containing one or more children that usually purchased *regular-price school lunches* in 1985 represented 44 percent of all households with school children 5 to 18 years old. Four percent of the households with children purchasing regular-price school lunches were poor.

EMPLOYER- OR UNION-PROVIDED NONCASH BENEFITS

Two of the most important employer-provided noncash benefits are pension plans and group health insurance plans. The number of households in 1985 with one or more workers covered by an employer- or union-provided pension plan was 39.0 million. Households with members covered by group health insurance plans paid for, at least in part, by their employer or union numbered 50.8 million. Both increased by about 1.0 million from their 1984 levels.

Households in which one or more persons were covered by a *pension plan at work* during 1985 represented about 44 percent of all households and 58 percent of all households with a working householder. Households in which one or more members were covered by a *group health* plan at work that was paid for, in full or in part, by an employer or union represented 57 percent of all households and 75 percent of households in which the householder worked during 1985.

Table C. Percent Distribution of Means-Tested Noncash Benefit Households, by Selected Characteristics: 1985

(Households as of March 1986. Households are classified according to the race of the family or nonfamily householder)

Characteristic	Food stamps	Free or reduced-price school lunches	Public or other subsidized housing	Medicaid
Total . . . . . thousands . .	6,779	5,752	3,799	8,178
Percent distribution	100.0	100.0	100.0	100.0
White	65.4	62.9	62.9	66.8
Black	31.9	33.1	33.8	30.4
Spanish origin[1]	13.0	17.8	10.6	12.3
Households with—				
Children under 19 years old	66.7	100.0	46.7	54.1
Female family householder, no husband present	43.0	47.0	36.4	39.7
Householder 65 years old and over	16.2	3.3	33.9	28.0
Residence in the South	40.2	42.5	35.3	32.3

[1]Persons of Spanish origin may be of any race.

Table D. Households Receiving Nonmeans-Tested Noncash Benefits--Number, Median Income, and Percent Below the Poverty Level: 1985 and 1984

(Households as of March of the following year. Households are classified according to the poverty status of the primary family or individual)

Type of nonmeans-tested benefit	All households						Percent of households below the poverty level		
	Total			Median income[1] (in 1985 dollars)					
	Number (thousands)		Percent change	Value (dollars)		Percent change			Difference (1985 minus 1984)
	1985	1984		1985	1984		1985	1984	
All households	88,458	86,789	*1.9	23,618	23,215	*1.7	13.6	13.7	-0.1
Households with one or more nonmeans-tested benefits[2]	72,471	70,723	*2.5	26,850	26,497	*1.3	7.5	7.6	-0.1
Households with one or more members covered by Medicare	21,833	21,346	*2.3	14,050	13,994	0.4	15.9	15.4	0.5
Households receiving regular-price school lunches	11,772	11,084	*6.2	34,544	33,326	*3.7	4.5	5.8	*-1.3
Households with one or more members with an employer- or union-provided pension plan	38,983	37,959	*2.7	35,415	34,798	*1.8	1.9	2.1	-0.2
Households with one or more members with an employer- or union-provided group health insurance plan[3]	50,804	49,608	*2.4	32,628	32,181	*1.4	3.0	3.4	*-0.4

*Significant at the .05 level.
[1]For standard errors on median incomes see table 1.
[2]Detail does not add because some households have noncash benefits from more than one source.
[3]Includes only workers with group health insurance plans which were paid for in part (or all) by an employer or union.

REVISIONS TO THE EARNINGS QUESTION ON THE MARCH 1986 CPS

The Census Bureau has made a revision to the March CPS income supplement questionnaire in an effort to adapt to continually rising levels of annual income. Beginning with the March 1986 CPS, question number 48, which covers the amount of earnings received from the employer or own business for which the respondent worked the longest during the previous calendar year, was modified to permit coding of earnings amounts to a maximum of $299,999. Prior to March 1986, procedures allowed for coding of amounts to a maximum of $99,999. In March 1977, about 127,000 weighted sample persons reported receiving earnings in the previous calendar year in excess of the $99,999 maximum. In March 1986, when the revision was made, about 627,000 weighted sample persons reported receiving earnings in excess of this maximum. About 16,000 weighted sample persons reported earnings amounts that exceeded the revised maximum of $299,999.

This change in the questionnaire causes a break in the time series for some income measures. Overall, the revision added about $22.9 billion to the total aggregate income that would have gone undetected had the $99,999 limit continued. Mean income, income per household member, and shares of aggregate income by quintile were all affected by the revision and caution should be used when comparing the 1985 data to earlier years. (For further details see Current Population Reports, Series P-60, No. 154.)

NOTE ON LIMITATIONS AND DATA QUALITY

Although these data on noncash benefits provide information on the characteristics of households and persons receiving benefits, the data have some important limitations which must be noted before the results shown in this report are examined in detail.

1. The first limitation is the use of gross annual household income and poverty status based on gross annual income to classify households. It should be kept in mind that, of the public noncash transfer programs covered in this report, only the School Lunch Program uses annual income to determine eligibility for participation. Almost all "means-tested" noncash transfer benefits are based, instead, on monthly or quarterly income "accounting" periods. Households with periodically low monthly or quarterly income but relatively high annual income may legally qualify for benefits. In addition, eligibility for benefits for most types of in-kind programs are based on "countable" income (i.e., gross income less certain types of

excluded income and other allowable deductions). For example, the Food Stamp Program, which uses a monthly or quarterly accounting period, provides a standard deduction for all applicants and additional allowances for those with large housing (shelter) or medical care costs relative to income.

It should also be noted that most means-tested noncash transfer programs require an "asset" or "resource" eligibility test in addition to the income test. Therefore, low income alone does not guarantee eligibility. Finally, rules for eligibility may vary from State to State, as in the Medicaid program, and even from locality to locality, as in several public housing programs. The combined effect of these factors—the monthly or quarterly income accounting period, the income exclusions and deductions, the asset tests, and the variation in some programs by State and locality—may result in patterns of noncash benefit recipiency which are not fully explained by the annual gross income data presented in this report. Caution should be used, therefore, when examining the annual money income levels and their relationship to program eligibility.

2. A second limitation concerns household membership recorded in the survey. Household membership is defined as of the interview date in March 1986. However, most questions on noncash benefits referred to respective calendar years. In some cases, therefore, household members present during part or all of 1985 may have moved out or died by the time the survey was conducted. In other households, some persons may have been members of that household for only a short time. Current membership, therefore, may not always reflect the true economic status of the household during the year. Household members who contributed significantly to the total household income may have entered or left the household during the year prior to the interview in March 1986. Other individuals with little or no income and, hence, eligible for many noncash benefits, may have moved into households with relatively high incomes.

3. A third limitation which should be kept in mind, especially when examining the Medicare and Medicaid data, is that the CPS sample universe is limited to the civilian noninstitutional population. Persons residing in institutions (such as nursing homes, mental health facilities, and prisons), at the time of the interview in March were excluded from all estimates. The estimation procedure used in this survey involved the inflation of weighted sample results to independent estimates of the total civilian noninstitutional population of the United States by age, race, and sex. These independent estimates are based on the 1980 Census of Population.

4. A final limitation involves data quality. A summary evaluation of data quality for the noncash benefit data is presented in appendix A of this report.

VALUATION OF NONCASH BENEFITS

In September 1986, the Census Bureau released Technical Paper 56, *Estimates of Poverty Including the Value of Noncash Benefits: 1985.* This technical paper presented estimates of poverty based on both money income and the value of selected noncash benefits. The amounts assigned to these noncash benefits were derived using three valuation techniques: 1) market value, 2) cash equivalent value, and 3) poverty budget share value. Each technique was further refined to include the values of 1) food and housing, 2) food, housing, and medical care for the noninstitutionalized population, and 3) food, housing, and medical care including the institutionalized population. By including the value of noncash benefits the report indicates that the number of poor in 1985 would be reduced by between 8 and 35 percent from the current money income poverty definition depending on the valuation technique used.

Table 1. Households and Persons in Households, by Household Money Income and Poverty Status of the Primary Family or Individual: 1985

(Numbers in thousands. Households as of March 1986. For meaning of symbols, see text)

Characteristic	Total	Household money income: Under $2,500	$2,500 to $4,999	$5,000 to $7,499	$7,500 to $9,999	$10,000 to $12,499	$12,500 to $14,999	$15,000 to $19,999	$20,000 and over	Median income (dollars): Value	Median income (dollars): Standard error	Mean income (dollars): Value	Mean income (dollars): Standard error	Below current poverty level: Number	Below current poverty level: Poverty rate

[1] Persons of Spanish origin may be of any race.

Note: Although some children pay the regular price for lunches that are set by the participating schools, the 'full established' price school lunch program is also subsidized and funded by a combination of federal funds and matching state funds.

[1]Detail does not add because some households receive benefits from more than one source.
[2]Persons of Spanish origin may be of any race.

Appendix A. Definitions and Explanations

Population universe of the CPS. The CPS sample covers the civilian noninstitutional population of the United States and Armed Forces members living off post or with their families on post, but excludes all other members of the Armed Forces. The sample includes the 50 States and the District of Columbia but excludes Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Trust Territory of the Pacific Islands. Estimates shown in this report are, therefore, restricted to this universe.

Noncash benefits. Noncash benefits can be defined as benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. The data collection in March 1986 concentrated on two major categories of noncash benefits: those which could be defined as public transfers and those which could be categorized as employer- or union-provided benefits to employees. In the category of public noncash transfers, the survey covered the following programs: the Food Stamp Program, the National School Lunch Program, public and other subsidized housing, Medicare health insurance, Medicaid health insurance, and CHAMPUS, VA, or other military health care. Data were collected for two types of employer- or union-provided noncash benefits: pension plans and group health insurance plans.

MEANS-TESTED

To qualify for means-tested benefits, household income or assets (resources) must fall below a specified level. A description of each of the means-tested noncash transfers covered in this report is included in this section.

Food stamps. The Food Stamp Act of 1977 defines this Federally funded program as one intended to "permit low-income households to obtain a more nutritious diet."[1] Food purchasing power is increased by providing eligible households with coupons which can be used to purchase food. The Food and Nutrition Service of the U.S. Department of Agriculture (USDA) administers the Food Stamp Program through State and local welfare offices. The Food Stamp Program is the major national income support program which provides benefits to all low-income and low-resource households regardless of household characteristics (e.g., sex, age, and disability). The questions on participation in the Food Stamp Program in the March CPS were designed to identify households in which one or more of the current members received food stamps during 1985. Once a food stamp household was identified, a question was asked to determine the number of current household members covered by food stamps during the year. Questions were also asked about the number of months food stamps were received during the year and the total face value of all food stamps received during that period.

Free or reduced-price school lunches. The National School Lunch Program is designed "to help safeguard the health and well-being of the Nation's children by assisting the States in providing an adequate supply of foods"[2] for all children at moderate cost. Additional assistance is provided for children determined by local school officials to be unable to pay the "full established" price for lunches. The program is administered by the Food and Nutrition Service of the U.S. Department of Agriculture (USDA) through State educational agencies or through regional USDA nutrition services for nonprofit private schools. The program is funded by a combination of Federal funds and matching State funds.

All students eating lunches prepared at participating schools pay less than the total cost of the lunches. Some students pay the "full established" price for lunch (which itself is subsidized), while others pay a "reduced" price for lunch, and still others receive a "free" lunch. Program regulations require students receiving free lunches to live in households with incomes below 125 percent of the official poverty level. Those students receiving a reduced-price school lunch live in households with incomes between 125 percent and 195 percent of the official poverty level. The data in this report, however, do not distinguish between recipiency of free and reduced-price school lunches.

The questions on the March 1986 CPS provided a very limited amount of data for the school lunch program. Questions concerning the school lunch program were designed to identify the number of members 5 to 18 years old in households who "usually" ate a hot lunch; this defined the universe of household members usually receiving this noncash benefit. This was followed by a question to identify the number of members receiving free or reduced-price lunches.

Public or other subsidized housing. There are several programs designed to "remedy the unsafe and unsanitary housing conditions and the acute shortage of decent, safe, and sanitary

[1]For title XIII of P.L. 95-113, *The Food Stamp Act of 1977,* declaration of policy.

[2]From P.L. 79-396, *The National School Lunch Act of 1946,* declaration of policy. P.L. 91-248 further amended the P.L. 79-396 to provide free and reduced-price school lunches for children of needy families in 1970.

dwellings for families of low income."[3] Among these, the most important are Low Rent Public Housing and Sections 8, 236, and 101 (rent supplements) of the U.S. Housing Act. Low rent public housing projects are owned, managed, and administered by a local housing authority. Partial financing may be provided by the State or the Department of Housing and Urban Development. Participation in public housing is determined by two factors: program eligibility and the availability of housing. Income standards for initial and continuing occupancy vary by local housing authority, although the limits are constrained by Federal guidelines. Rental charges, which, in turn, define net benefits, are set by a Federal statute not to exceed 25 percent of net monthly money income. A recipient unit can either be a family of two or more related persons or an individual who is handicapped, elderly, or displaced by urban renewal or natural disaster.

There are some programs through which housing assistance is provided to low-income families and individuals living in publicly or privately owned dwellings. Two of the more common types of programs in which Federal, State, and local funds are used to subsidize private sector housing are Sections 8 and 101, rent supplement plans. The difference between the "fair market" rent and the rent charged to the tenant is paid to the owner by a government agency. Under an interest reduction program (e.g., Section 236), the amount of interest paid on the mortgage by the owner is reduced so that subsequent savings can be passed along to low-income tenants in the form of lower rent charges.

There were two questions dealing with public and low-cost housing on the March CPS supplement questionnaire. The first question identified residence in a housing unit owned by a public agency. The second question identified beneficiaries who were not living in public housing projects, but who were paying lower rent due to a government subsidy. These questions differed from other questions covering noncash benefits in that they established current recipiency status (as of the third week in March 1986) rather than recipiency status during reference year. No information on Federally subsidized homeownership (e.g., Section 235) or subsidized mortgage interest guarantees (e.g., FHA and VA) was collected.

Medicaid. The Medicaid Program is designed "to furnish medical assistance on behalf of needy families with dependent children, and of aged, blind, or permanently and totally disabled indivduals whose incomes and resources are insufficient to meet the costs of necessary medical services."[4] The program is administered by State agencies through grants from the Health Care Financing Administration of the Department of Health and Human Services. Funding for medical assistance payments consists of a combination of Federal, State, and in some cases, local funds.

Medicaid is for the most part a categorical program with complex eligibility rules which vary from State to State. There are two basic groups of eligible individuals: the categorically eligible and the medically needy. The major categorically eligible groups are all Aid to Families with Dependent Children (AFDC) recipients and most Supplemental Security Income (SSI) recipients. Other categorically eligible groups are (1) those who meet basic State cash assistance eligibility rules (the aged, blind, or disabled; needy single parents with children; and, in some States, needy unemployed parents with children who are not currently receiving money payments), and (2) needy persons who meet categorical eligibility standards but are institutionalized for medical reasons (e.g., low-income elderly persons in nursing homes). However, such institutionalized persons are not included in the CPS universe and, therefore, are not reflected in these statistics.

In roughly one-half of the States, coverage is extended to the medically needy: persons meeting categorical age, sex, or disability criteria whose money incomes and assets exceed eligibility levels for cash assistance but are not sufficient to meet the cost of medical care. In such States, qualifying income and asset levels are usually above those set for cash assistance. Families with large medical expenses relative to their incomes and assets may also meet medically needy eligibility standards in these States.

The Medicaid question on the March CPS attempted to identify all adults who were covered by Medicaid at *any* time during 1985. The term "covered" means enrolled in the Medicaid program, i.e., had a Medicaid medical assistance card or incurred medical bills which were paid for by Medicaid. In order to be counted, the person *did not* have to receive medical care paid for by Medicaid.

After data collection and creation of an initial microdata file, further refinements were made to assign Medicaid coverage to children. In this procedure, all children under 21 years old in families were assumed to be covered by Medicaid if either the householder or spouse reported being covered by Medicaid. (This procedure was required mainly because the Medicaid coverage question was asked only for persons 15 years old and over.) All adult AFDC recipients, and their children, and SSI recipients living in States which legally require Medicaid coverage of all SSI recipients were also assigned coverage. The data shown in this report exclude children covered by Medicaid in households in which no adult member was covered by Medicaid.

NONMEANS-TESTED

Households receiving nonmeans-tested benefits are not required to meet income or asset guidelines. Following is a description of the nonmeans-tested programs covered in this report.

Medicare. The Medicare Program consists of two separate but complementary health plans designed to provide adequate medical care for the aged and disabled. The Basic Hospital Insurance Plan (Part A) "is designed to provide basic protec-

[3]From P.L. 75-412, *The United States Housing Act of 1937*, declaration of policy.

[4]From title XIX of the 1965 Amendments to P.L. 89-97, *The Social Security Act*, "Grants to States for Medical Assistance Programs," declaration of policy.

tion against the costs of hospital and related post-hospital services."[5] This plan also covers many persons under 65 years old who receive Social Security or Railroad Retirement benefits based on long-term disability. Part A is financed jointly by employers and employees through Social Security payroll deductions. Qualified persons 65 years old and over who are not otherwise eligible for Part A benefits may pay premiums directly to obtain this coverage. The Medical Insurance Plan (Part B) is a voluntary plan which builds upon the hospital insurance protection provided by the basic plan. It provides insurance protection covering physicians' and surgeons' services and a variety of medical and other health services received either in hospitals or on an ambulatory basis. It is financed through monthly premium payments (about $15.50 per month in 1985) by each enrollee and subsidized by Federal general revenue funds.

The Medicare question on the March CPS attempted to identify all persons 15 years old and over who were covered by Medicare at any time during 1985. The term "covered" means enrolled in the Medicare Program. In order to be counted, the person *did not* necessarily have to receive medical care paid for by Medicare.

Regular-price school lunches. All school lunches served at schools participating in the National School Lunch Program are subsidized. Unless qualified for free or reduced-price lunches, students eating lunches prepared at participating schools pay the "full established" price which is less than the total cost of the lunches.

Employer- or union-provided group health insurance plans. The March CPS collected a limited amount of information on employer- and union-provided group health insurance for civilians 15 years old and over who worked during 1985. Workers who participated in group health insurance plans of any kind were asked whether or not their employer or union helped pay for all, part, or none of the health insurance premium for 1985.

Employer- or union-provided pension plans. Civilians 15 years old and over who worked during 1985 were asked about their participation in pension plans provided by employers or unions. This report assumes pension plans receive contributions from the employer or union or at least some benefit is derived by obtaining the pension plan from the employer or union.

CHAMPUS, VA, or other military health care. All active and retired military personnel and their dependents are eligible for medical treatment at any Department of Defense (DOD) installation medical facility. (Currently, DOD operates 180 hospitals.) Additionally, DOD operates the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) to provide reimbursement (after payment of a deductible) for covered medical care rendered in civilian facilities to wives and children of active military personnel, to retired military personnel and their dependents, and to dependents of deceased personnel (unless eligible for Part A of Medicare). The program is designed for those unable to use government medical facilities for reasons of distance, overcrowding of such facilities or the unavailability of appropriate treatment at a military medical center.

The Veterans Administration (VA) operates 172 hospitals, 107 long-term facilities and 229 outpatient clinics for the care of individuals with active service in the Armed Forces who were discharged from duty other than dishonorably. Priority is given to patients with service-related ailments.

MONEY INCOME

The income data shown in this report are restricted to money income received during the calendar year 1985, the year preceding the March survey. The amounts shown are "gross" money income figures, that is, before deductions for any taxes, union dues, Medicare premiums, etc. The money income amounts shown exclude the value of noncash or in-kind benefits such as 1) food, in the form of food stamps and school lunches from the National School Lunch Program; 2) medical benefits, such as Medicare, Medicaid, and employer-provided group health insurance; 3) subsidized housing; and 4) employer-provided pension plans. These elements should be considered when comparing income levels. It should also be noted that household surveys tend to underestimate income received because of nonsampling errors such as underreporting, misreporting, nonreporting, and nonresponse. A discussion of these nonsampling errors is contained later in appendix C.

Total money income. Total money income is the sum of the amounts of income received from all sources covered by the March CPS. These sources are described in detail below. The CPS definition of money income excludes several sources of income. Excluded are (1) proceeds from the sale of property such as stocks, bonds, houses, land, or any other personal property; (2) withdrawals from savings accounts or other types of savings funds; (3) refunds or rebates of any type; (4) loans; (5) gifts; and (6) any one-time or lump-sum amounts such as insurance settlements or inheritances.

Earnings. The CPS collects individual amounts from three sources of earnings: (1) wages or salaries received by employees working for pay; (2) net nonfarm self-employment income received by persons operating their own nonfarm business, partnership, or professional practice; and (3) net farm self-employment income received by persons operating farms. Total money earnings is the sum of amounts received from these three sources. This amount may have a negative value (a loss) since losses can be reported for self-employment income.

Types of earnings. As mentioned above, the CPS collects information on three earnings types. Each of these types (1)

[5]As specified in Section 1811 of title XVIII of the 1965 Amendments to P.L. 89-97; *The Social Security Act*, "Health Insurance for the Aged."

wages and salary, (2) nonfarm self-employment, and (3) farm self-employment are described below.

Wages and salary are money received before deductions by persons working as employees. Included are the amounts earned from all jobs. In addition to "normal" wages and salary, the amount includes overtime pay, bonuses, tips, and severance pay. Wages and salary includes pay received by Armed Forces members in the CPS universe. It excludes money received for expense accounts or any food or lodging received as part of pay.

Nonfarm self-employment is the net income (gross receipts minus expenses) from a person's own business, professional practice, or the person's share of the net income from a partnership. The amount includes net income from all businesses, professional practices, and partnerships that the person owned and operated. The amount *does not* include earnings from incorporated businesses.

Farm self-employment is the net income (gross receipts minus expenses) a person receives from their own farm operation. It includes both owners and renters of farm land and sharecroppers. The amount covers net income from all farming operations. Income received from renting land on shares is included as farm income. Income received from renting land for cash is included as rental income, not as farm income. The farm income amounts *do* include amounts from incorporated farm operations because CPS editing procedures prevent the classification of farms as incorporated.

Cash public assistance or welfare. Cash public assistance or welfare includes payments under the Aid to Families with Dependent Children (AFDC or ADC) program, Supplemental Security Income (SSI), and payments often categorized as General Assistance. Other public assistance which may have also been included are payments from the Emergency Assistance Program, Cuban Refugee Assistance, and assistance for paying home heating and cooling expenses. One amount was recorded representing the total amount of public assistance or welfare received from the sources mentioned above.

Private pensions. Pensions received by retired or disabled workers or by the survivors of deceased workers which are paid by a previous private employer or union or from a retirement or disability plan purchased by the recipient. These pensions *exclude* those received from the Federal government, military, or from State or local governments.

Median income. The median income is the amount which divides the distribution into two equal groups, one having incomes above the median, and the other having incomes below the median. The medians for households are based on all households. The medians for persons are based on the distributions of persons with income.

Mean income. The mean income is the amount obtained by dividing the total income of a group by the number of units in that group (households, families, unrelated individuals, or persons). The means for households, families and unrelated individuals are based on the total. The means for persons are based on the number of persons with income.

Poverty definition. In this report, the poverty status of the household is based on the income of the primary family or individual. Primary families and individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980. The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits, the most important of which are covered in this report. For estimates of the value of noncash benefits and their effect on the measurement of poverty, see Technical Paper 56, *Estimates of Poverty Including the Value of Noncash Benefits: 1985*. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. It was determined from the Department of Agriculture's 1955 Survey of Food Consumption that families of three or more persons spent approximately one-third of their income on food; the poverty level for these families was, therefore, set at three times the cost of the

Table A-1. Annual Average Consumer Price Index (CPI): 1947 to 1985

(1977 = 100)

Economy Food Plan. For smaller families and persons living alone, the cost of the Economy Food Plan was multiplied by factors that were slightly higher in order to compensate for the relatively larger fixed expenses of these smaller households. Households are classified according to the poverty status of the family or nonfamily householder. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index (CPI). The average poverty threshold for a family of four was $10,989 in 1985, about 3.6 percent higher than the comparable 1984 cutoff of $10,609. For further details, see Current Population Reports, Series P-60, Nos. 152 and 154.

Table A-2. Weighted Average Poverty Thresholds: 1985

Size of family unit	Threshold
One person (unrelated individual)	$ 5,469
15 to 64 years	5,593
65 years and over	5,156
Two persons	6,998
Householder 15 to 64 years	7,231
Householder 65 years and over	6,503
Three persons	8,573
Four persons	10,989
Five persons	13,007
Six persons	14,696
Seven persons	16,656
Eight persons	18,512
Nine persons or more	22,083

DEFINITIONS FOR SOCIAL AND DEMOGRAPHIC CHARACTERISTICS

Household. A household consists of all persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters; that is, when the occupants do not live and eat with any other persons in the structure and there is either (1) direct access from the outside or through a common hall or (2) a kitchen or cooking equipment for the exclusive use of the occupants.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit or a group of unrelated persons sharing a housing unit as partners is also counted as a household. The count of households excludes group quarters, however, persons in group quarters are included in the estimates for persons. Group quarters are living arrangements for groups containing five or more persons unrelated to the person in charge, such as residents of lodging and boarding houses.

Householder. The householder is the person (or one of the persons) in whose name the home is owned or rented. If the home is owned or rented jointly by two persons, such as a husband and wife, either one, but only one, may be designated as the householder.

Family. The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together; all such persons are considered members of the same family. Thus, if the son of the householder and the son's wife are in the household, they are treated as part of the householder's family. The householder's family is designated as the "primary" family. Other family units may also exist within the household. These are unrelated subfamilies which consist of two or more persons related to each other by blood, marriage, or adoption, but none of which are related to the householder or the spouse of the householder.

Unrelated individuals. The term "unrelated individuals" refers to persons 15 years old and over who are not living with any relatives. An unrelated individual may (1) constitute a one-person household, (2) be part of a household including one or more other families or unrelated individuals, or (3) reside in group quarters (such as a rooming house). Thus, a widow living by herself or with one or more other persons not related to her, a lodger not related to the householder or to anyone else in the household, and a servant living in an employer's household with no relatives are examples of unrelated individuals.

Unrelated individuals may be designated as "primary" or "secondary". Primary individuals are unrelated individuals who are also householders. Secondary individuals are household members other than a householder who are not related to any other person in the household.

Age. The age classification is based on the age of the person at the last birthday prior to the day of the interview in March.

Race. The population is divided into three groups on the basis of race: White, Black, and "other races." The last category includes Indians, Japanese, Chinese, and any other race except White and Black. "Other races" are sometimes shown in combination with the Black population.

Persons of Spanish origin. Persons of Spanish origin were determined on the basis of a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (or the origin of some other household member) from a "flash card" listing ethnic origins. Persons of Spanish origin, in particular, were those who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or some other Spanish origin. It should be noted that persons of Spanish origin may be of any race.

Own children and related children under 18 years of age. "Own" children in a family are sons and daughters, including stepchildren and adopted children of the householder. "Related" children in a family include own children and all

other children in the household who are related to the householder by blood, marriage, or adoption.

School children. Data in table 2 and in those tables covering school lunch participation are restricted to households with school children 5 to 18 years old. School children were defined to be all persons between the ages of 5 and 18 and all never married, nonhouseholders attending school at or below the high school level during the reference year (1985). This procedure should provide a slight overestimate of households with school children.

DEFINITIONS OF WORK EXPERIENCE AND OCCUPATION CHARACTERISTICS

The work experience characteristics shown in this report refer to work during the calendar year preceding the March survey. The definitions relate to the population 15 years old and over.

Work experience. A person with work experience is one who, during the preceding calendar year, did any work for pay or profit or worked without pay on a family-operated farm or business at any time during the year.

Weeks worked. Persons are classified according to the number of different weeks in which they did any work for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

Part-time or full-time jobs. Persons are classified as having worked at part-time jobs during the preceding calendar year, if they worked at jobs which provided less than 35 hours of work per week in a majority of the weeks in which they worked during the year. They are classified as having worked at full-time jobs if they worked 35 hours or more per week during a majority of the weeks in which they worked.

Did not work. Refers to a person who did not do any work during the preceding calendar year.

Occupation and industry. The occupation and industry data in this report refer to the worker's longest job during the preceding calendar year. The occupation and industry groupings shown in this report are based on the classification system used in the 1980 Census of Population. For details concerning the system for classifying industries and occupations, see the February 1983 issue of Employment and Earnings by the Bureau of Labor Statistics.

Weeks unemployed. For persons working less than 52 weeks, weeks unemployed represent the number of weeks looking for work or on layoff from a job.

DEFINITIONS OF GEOGRAPHICAL DETAIL

Geographic regions. The four major regions and nine Census divisions of the United States represent groups of States as follows:

Northeast:

New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Middle Atlantic: New Jersey, New York, and Pennsylvania.

Midwest:

East North Central: Illinois, Indiana, Michigan, Ohio, and Wisconsin.

West North Central: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

South:

South Atlantic: Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia.

East South Central: Alabama, Kentucky, Mississippi, and Tennessee.

West South Central: Arkansas, Louisiana, Oklahoma, and Texas.

West:

Mountain: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.

Pacific: Alaska, California, Hawaii, Oregon, and Washington.

North and West:

Northeast, Midwest, and West combined.

Metropolitan-nonmetropolitan residence. The population residing in metropolitan statistical areas (MSA's) constitutes the metropolitan population. MSA's are defined by the Office of Management and Budget for use in the presentation of statistics by agencies of the Federal Government. An MSA is a geographic area consisting of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. The definitions specify a boundary around each large city so as to include most or all its suburbs. Entire counties form the MSA building blocks, except in New England where cities and towns are used. The former term SMSA was changed to MSA in 1983.

An area qualifies for recognition as an MSA if (1) it includes a city of at least 50,000 population, or (2) it includes a Census Bureau-defined urbanized area of at least 50,000 with a total metropolitan population of at least 100,000 (75,000 in New England). In addition to the county containing the main city or urbanized area, an MSA may include other counties having

strong commuting ties to the central county. If specified conditions are met, certain large MSA's are designated as consolidated MSA's (CMSA's) and divided into component primary MSA's (PMSA's).

Central cities. The largest city in each MSA is always designated a central city. There may be additional central cities if specified requirements, designed to identify places of central character within the MSA, are met. Although the largest central cities are generally included in the title of the MSA, there may be central cities that are not part of the title. The balance of the MSA outside the central city or cities often is regarded as equivalent to "suburbs."

In July 1985, the CPS began carrying the metropolitan statistical area definitions announced by the Office of Management and Budget on June 30, 1984. Figures published from the CPS in the early 1980's and throughout most of the 1970's referred to metropolitan areas as defined on the basis of the 1970 census. Since there are important differences in the population classified as metropolitan using the 1970 and 1984 definitions, comparisons should be avoided.

The new CPS metropolitan estimates have consistently been higher than independent estimates of the metropolitan population prepared by the Census Bureau; the new CPS nonmetropolitan estimates have been lower than the independent estimates. For example, between July 1985 and August 1986 the magnitude of the monthly differences varied from 900,000 to 2.5 million persons, so that the proportion of the population living in metropolitan areas according to the CPS has ranged from 0.4 to 1.0 percentage points higher than the independent estimate. The difference in level between the two sets of estimates is partially attributable to the basic CPS sample design, which, because of sampling variability, includes an oversample of metropolitan households and an undersample of nonmetropolitan households. The monthly variations result from the exit and entrance of rotation groups, each with slightly different metropolitan-nonmetropolitan proportions, into the sample. The apparent overestimation of metropolitan and underestimation of nonmetropolitan population in the CPS relative to the Bureau's independent estimates should be taken into account when using the data.

Appendix B. Source and Reliability of Estimates

SOURCE OF DATA

The estimates are based on data obtained in March 1986 from the Current Population Survey (CPS) conducted by the Bureau of the Census and from supplementary questions to the CPS. The monthly CPS deals mainly with labor force data for the civilian noninstitutional population. Questions relating to labor force participation are asked about each member 14 years old and over in every sample household. In addition, in March 1986, supplementary questions were asked about money income, noncash benefits, and work experience for the previous year. In order to obtain more reliable data for the Spanish-origin population, the March CPS sample was enlarged to include all households from the previous November sample which contained at least one sample person of Spanish origin. For this report, persons in the Armed Forces living off post or with their families on post are also included.

The present CPS sample was initially selected from the 1980 census files with coverage in all 50 States and the District of Columbia. The sample is continually updated to reflect new construction. The current CPS sample is located in 729 areas comprising 1,973 counties, independent cities, and minor civil divisions in the Nation. In the March 1986 sample, approximately 60,500 occupied households were eligible for interview. Of this number, about 2,500 occupied units were visited but interviews were not obtained because the occupants were not found at home after repeated calls or were unavailable for some other reason.

For a description of the previous CPS sample designs see the detailed reports in the series, Current Population Reports, Series P-60.

The estimation procedure used in this survey involves the inflation of the weighted sample results to independent estimates of the total civilian noninstitutional population of the United States by age, race, sex, and Hispanic/non-Hispanic. These independent estimates are based on statistics from the decennial censuses of population; statistics on births, deaths, immigration and emigration; and statistics on the strength of the Armed Forces. Beginning with reports containing income data for 1980, the independent population estimates used to obtain data for years 1979 and later are based on the 1980 census. In earlier reports in this series (P-60), data for 1971 through 1979 were obtained using independent population estimates based on the 1970 decennial census, 1979 being the bridge year. For more details on this change, see the section of the text, "Introduction of 1980 Census Population Controls," Series P-60, No. 132. The estimation procedure also involved a further adjustment so that husband and wife of a household received the same weight.

RELIABILITY OF ESTIMATES

Since the CPS estimates are based on a sample, they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey—sampling and nonsampling. The standard errors primarily indicate the magnitude of the sampling error. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. Bias is the difference, averaged over all possible samples, between the estimate and the desired value. Obviously, the accuracy of a survey result depends on the sampling and nonsampling errors measured by the standard error and on the bias and other types of nonsampling error not measured by the standard error. Consequently, particular care should be exercised in the interpretation of figures based on a relatively small number of cases or on small differences between estimates.

Nonsampling variability. Nonsampling errors can be attributed to many sources; e.g., inability to obtain information about all cases in the sample, definitional difficulties, differences in the interpretation of questions, inability or unwillingness on the part of the respondents to provide correct information, inability to recall information, errors made in collection such as in recording or coding the data, errors made in processing the data, errors made in estimating values for missing data, and failure to represent all units with the sample (undercoverage).

Undercoverage in the CPS results from missed housing units and missed persons within sample households. Overall CPS undercoverage as compared with the level of the 1980 decennial census is about 7 percent. It is known that CPS undercoverage varies with age, sex, and race. Generally, undercoverage is larger for males than for females and larger for Blacks and other races combined than for Whites. Ratio estimation to independent age-sex-race population controls, as described previously, partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that missed persons in missed households or missed persons in interviewed households have different characteristics than interviewed persons in the same age-sex-race group. Further, the independent population controls used have not been adjusted for undercoverage in the decennial census.

The estimates of noncash benefits and the estimate of the value of food stamps received (as derived from the March CPS) are subject to underreporting. Underreporting in household surveys can be attributed to several factors. These factors include failure to report or underreporting benefits received and misclassification of the source of benefits. See also the section of this report entitled "Underreporting of Noncash Benefits".

Sampling variability. The standard errors given in tables B-1 and B-2 are primarily measures of sampling variability; that is, of the variation that occurred by chance because a sample rather than the entire population was surveyed. The sample estimate and its standard error enable one to construct confidence intervals—ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Standard errors may also be used to perform hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common types of hypotheses appearing in this report are: 1) the population parameters are identical or 2) they are different. An example of this would be comparing the number of households receiving noncash benefits in 1985 versus the number of households receiving noncash benefits in 1984. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the parameters are different when, in fact, they are identical.

To perform the most common test, let x and y be sample estimates for two characteristics of interest. A subsequent section explains how to derive a standard error on the difference x-y. Let that standard error be σ_{DIFF}. Compute the ratio $R = (x-y)/\sigma_{DIFF}$. If this ratio is between -2 and +2, no conclusion about the parameters is justified at the 0.05 level of significance. If, on the other hand, this ratio is smaller than -2 or larger than +2, the observed difference is significant at the 0.05 level. In this event, it is commonly accepted practice to say that the parameters are different. Of course, sometimes this conclusion will be wrong. When the parameters are, in fact, the same, there is a 5-percent chance of concluding that they are different.

All statements of comparison in the text have passed a hypothesis test at the 0.10 level of significance or better, and most have passed a hypothesis test at the 0.05 level of significance or better. This means that, for most differences cited in the text, the estimated difference between parameters is greater than twice the standard error of the difference. For the other differences mentioned, the estimated difference between parameters is between 1.6 and 2.0 times the standard error of the difference. When this is the case, the statement of comparison will be qualified in some way; e.g., by use of the phrase "some evidence".

Comparability of data. Caution should be used when comparing estimates for 1980 and later, which reflect 1980 census-based population controls with earlier years. This change in population controls had relatively little impact on summary measures such as means, medians, and percent distribution, but did have a significant impact on levels. For example, use of 1980-based population controls resulted in about a 2-percent increase in the civilian noninstitutional population and in the number of families and households. Thus, estimates of levels for 1980 and later will differ from those for earlier years by more than what could be attributed to actual changes in the population and these differences could be disproportionally greater for certain subpopulation groups than for the total population.

Previously, the only postcensal figures for the size of the Hispanic population came from the CPS itself (i.e., the old procedure did not have a separate population control for Hispanics). These figures proved to be low relative to the census and not stable over time. The new CPS procedure for Hispanics makes use of independent postcensal estimates for the Hispanic population as control totals to solve these problems. One consequence of the use of the new procedure is that besides the expected increase in the levels of the Hispanic population, there were increases in the levels of persons and households in poverty. Thus, this change in procedure will affect comparisons across years; and caution should be used when comparing current estimates with those for earlier years.

Note when using small estimates. Summary measures (such as means, medians, and percent distributions) are shown only when the base is 75,000 or greater. Because of the large standard errors involved, there is little chance that summary measures would reveal useful information when computed on a smaller base. Estimated numbers are shown, however, even though the relative standard errors of these numbers are larger than those for corresponding percentages. These smaller estimates are provided primarily to permit such combinations of the categories as serve each user's needs. Also, care must be taken in the interpretation of small differences. For instance, even a small amount of nonsampling error can cause a borderline difference to appear significant or not, thus, distorting a seemingly valid hypothesis test.

Standard error tables and their use. In order to derive standard errors that would be applicable to a large number of estimates and that could be prepared at a moderate cost, a number of approximations were required. Therefore, instead of providing an individual standard error for each estimate, generalized sets of standard errors are provided for various types of characteristics. As a result, the sets of standard errors provided give an indication of the order of magnitude of the standard error of an estimate rather than the precise standard error.

The figures presented in tables B-1 through B-4 are approximations to standard errors of various estimates for households and persons in the United States. To obtain the approximate standard error for a specific characteristic the appropriate standard error in tables B-1 through B-4 must be multiplied by the "f" factor for that characteristic given in table B-5. These factors must be applied to the generalized standard errors in order to adjust for the combined effect of the sample design and the estimating procedure on the value of the characteristic.

Standard errors for intermediate values not shown in the generalized tables of standard errors may be approximated by linear interpolation. Standard errors of estimated means and medians are provided in the detailed tables.

Two parameters (denoted "a" and "b") are used to calculate standard errors for each type of characteristic; they are presented in table B-5. These parameters were used to calculate the standard errors in tables B-1 through B-4 and to calculate the "f" factors in table B-5. They also may be used to directly calculate the standard errors for estimated numbers and percentages. Methods for computation are given in the following sections.

Standard errors of estimated numbers. The approximate standard error, σ_x, of an estimated number can be obtained in two ways. It may be obtained by use of the formula

$$\sigma_x = f\sigma \qquad (1)$$

where f is the appropriate factor from table B-5, and σ is the standard error on the estimate obtained by interpolation from tables B-1 or B-2. Alternatively, it may be approximated by using formula (2), from which the standard errors in tables B-1 and B-2 were calculated. Use of this formula will provide more accurate results than the use of formula (1).

$$\sigma_x = \sqrt{ax^2 + bx} \qquad (2)$$

Here x is the size of the estimate and a and b are the parameters in table B-5 associated with the particular type of characteristic.

Standard errors of estimated percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which this percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the "f" factor or parameters from table B-5 indicated by the numerator. The approximate standard error, $\sigma_{(x,p)}$, of an estimated percentage can be obtained by use of the formula

$$\sigma_{(x,p)} = f\sigma \qquad (3)$$

In this formula, f is the appropriate factor from table B-5 and σ is the standard error on the estimate from table B-3 or B-4. Alternatively, it may be approximated by using formula (4), from which the standard errors in tables B-3 and B-4 were calculated. Use of this formula will give more accurate results than use of formula (3).

$$\sigma_{(x,p)} = \sqrt{\frac{b}{x} \cdot p\,(100-p)} \qquad (4)$$

Here x is the size of the subclass of persons or households which is the base of the percentage, p is the percentage ($0 < p < 100$), and b is the parameter in table B-5 associated with the particular type of characteristic in the numerator of the percentage.

Illustration of the use of standard error tables. Table A of this report shows that in 1985 there were 6,779,000 households receiving food stamps. Table B-1 shows the standard error of an estimate of this size to be approximately 111,000. In this situation, no "f" factor has to be applied to the standard error; i.e., f is equal to 1.0. Alternatively, using the parameters in table B-5 in formula (2) gives a standard error of

$$111{,}000 = \sqrt{(-0.000010)(6{,}779{,}000)^2 + (1{,}896)(6{,}779{,}000)}$$

Using the 111,000 estimate, the 90-percent confidence interval as shown by the data is from 6,601,000 to 6,957,000. Similarly, the 95-percent confidence interval is from 6,557,000 to 7,001,000 (using twice the standard error). Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way

Table B-1. Standard Errors of Estimated Numbers of Households and Persons: 1985

(Numbers in thousands)

Size of estimate	Standard error[1]	Size of estimate	Standard error[1]
75	12	7,500	117
100	14	10,000	134
250	22	15,000	162
500	31	25,000	203
1,000	43	50,000	264
2,000	61	100,000	299
3,000	75	125,000	284
5,000	96	160,000	218

[1]These values must be multiplied by the appropriate "f" factor in table B-5 to obtain the correct standard error.

Table B-2. Standard Errors of Estimated Numbers of Households and Persons Below the Poverty Level: 1985

Size of estimate	Standard error[1]	Size of estimate	Standard error[1]
75	12	7,500	142
100	14	10,000	170
250	23	15,000	223
500	32	25,000	323
1,000	46	50,000	560
2,000	67	100,000	1,023
3,000	83	125,000	1,253
5,000	112	160,000	1,575

[1]These values must be multiplied by the appropriate "f" factor in table B-5 to obtain the correct standard error.

would be correct for roughly 95 percent of all possible samples.

Table C shows that of the 6,779,000 households receiving food stamps in 1985, 31.9 percent were Black. Using formula (3) with f = 1.04 and σ = .76 (from table B-3), the standard error of the estimated number of households receiving food stamps is approximately (1.04)(.76) = 0.8.

Alternatively, this standard error could have been derived by using the "b" parameter for Blacks from table B-5 in formula (4).

$$0.8 = \sqrt{\frac{2{,}067}{6{,}779{,}000}\ (31.9)(68.1)}$$

Consequently, the 90-percent confidence interval as shown by these data is from 30.6 to 33.2 percent, and the 95-percent confidence interval is from 30.3 to 33.5 percent.

Standard error of a difference. For a difference between two sample estimates the standard error is approximately equal to

$$\sigma_{(x-y)} = \sqrt{(\sigma_x)^2 + (\sigma_y)^2 - 2\varrho\sigma_x\sigma_y} \qquad (5)$$

where σ_x and σ_y are the standard errors for the estimates x and y as calculated using formula (2). The estimates can be numbers, percents, ratios, etc. The correlation coefficient ϱ can be determined from table B-6 for year-to-year comparisons for income and poverty estimates; for other comparisons assume that ϱ equals zero. Making this assumption will result in accurate estimates of standard errors for the difference between two estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

Illustration of the computation of the standard error of a difference in estimates. Table A shows that the number of households receiving food stamps in 1985 was 6,779,000 and in 1984 the figure was 7,061,000. The apparent difference is 282,000. As shown above, the standard error on the estimate 6,779,000 is 111,000.

The standard error on the 7,061,000 households receiving food stamps computed from formula (2) is 114,000. From table B-6 we obtain the correlation coefficient, $\varrho \doteq 0.35$. The standard error associated with the estimated difference is:

$$128{,}000 = \sqrt{(111{,}000)^2 + (114{,}000)^2 - 2(.35)(111{,}000)(114{,}000)}$$

This means that the 95-percent confidence interval around the 282,000 difference is from 26,000 to 538,000, i.e.,

Table B-3. Standard Errors of Estimated Percentages of Households and Persons: 1985

Base of estimated percentage (thousands)	Estimated percentage[1]				
	2 or 98	5 or 95	10 or 90	25 or 75	50
75	2.2	3.5	4.8	6.9	7.9
100	1.9	3.0	4.1	6.0	6.9
250	1.2	1.9	2.6	3.8	4.4
500	0.9	1.3	1.8	2.7	3.1
1,000	0.6	0.9	1.3	1.9	2.2
2,000	0.4	0.7	0.9	1.3	1.5
3,000	0.4	0.5	0.8	1.1	1.3
5,000	0.3	0.4	0.6	0.8	1.0
7,500	0.2	0.3	0.5	0.7	0.8
10,000	0.2	0.3	0.4	0.6	0.7
15,000	0.16	0.2	0.3	0.5	0.5
25,000	0.12	0.2	0.2	0.4	0.4
50,000	0.09	0.13	0.2	0.3	0.3
100,000	0.06	0.09	0.13	0.2	0.2
125,000	0.05	0.08	0.12	0.2	0.2
160,000	0.05	0.08	0.10	0.15	0.2

[1]These values must be multiplied by the appropriate "f" factor in table B-5 to obtain the correct standard error.

Table B-4. Standard Errors of Estimated Percentages of Households and Persons Below The Poverty Level: 1985

Base of estimated percentage (thousands)	Estimated percentage[1]				
	2 or 98	5 or 95	10 or 90	25 or 75	50
75	2.3	3.6	5.0	7.2	8.3
100	2.0	3.1	4.3	6.2	7.2
250	1.3	2.0	2.7	3.9	4.5
500	0.9	1.4	1.9	2.8	3.2
1,000	0.6	1.0	1.4	2.0	2.3
2,000	0.5	0.7	1.0	1.4	1.6
3,000	0.4	0.6	0.8	1.1	1.3
5,000	0.3	0.4	0.6	0.9	1.0
7,500	0.2	0.4	0.5	0.7	0.8
10,000	0.2	0.3	0.4	0.6	0.7
15,000	0.16	0.3	0.4	0.5	0.6
25,000	0.13	0.2	0.3	0.4	0.5
50,000	0.09	0.14	0.19	0.3	0.3
100,000	0.06	0.1	0.14	0.2	0.2
125,000	0.06	0.09	0.12	0.18	0.2
160,000	0.05	0.08	0.11	0.16	0.18

[1]These values must be multiplied by the appropriate "f" factor in table B-5 to obtain the correct standard error.

282,000 ± 2.0 (128,000). A conclusion that the average estimate of the difference derived from all possible samples lies within a range computed in this way would be correct for roughly 95 percent of all possible samples. Because the 95-percent confidence interval does not include zero, we can conclude there is a difference between the number of households receiving food stamps in 1984 and 1985.

Standard error of a ratio. Certain mean values for persons in households shown in the tables of this report were calculated as the ratio of two numbers. For example, the mean number of persons per household is calculated as

$$\frac{x}{y} = \frac{\text{total number of persons in households}}{\text{total number of households}}$$

Standard errors for these means may be approximated as shown in the following cases. There are two cases to consider. In either case, the denominator y represents a count of households of a certain class, and the numerator x represents a count of persons with the characteristic under consideration who are members of these households.

Case 1:
There is at least one person having the characteristic in every household of the class; for example, the mean number of persons per household, or the mean number of persons per household with a male householder. For ratios of this kind, the standard error is approximated by the following formula:

$$\sigma\left(\frac{x}{y}\right) = \sqrt{\left(\frac{x}{y}\right)^2\left[\left(\frac{\sigma_y}{y}\right)^2 + \left(\frac{\sigma_x}{x}\right)^2 - 2\varrho\left(\frac{\sigma_x}{x}\right)\left(\frac{\sigma_y}{y}\right)\right]} \quad (6)$$

The standard error of the estimated number of households, σ_y, and the standard error of the estimated number of persons with the characteristic in those households, σ_x, may be obtained from formula (1). Alternatively, formula (2) and table B-5 may be used. In formula (6), ϱ represents the correlation coefficient between the numerator and the denominator of the estimate. In the above example, and for other ratios of this kind, use 0.7 as an estimate of ϱ.

Case 2:
The number of persons having the characteristic in a given household may be 0, 1, 2, 3, or more; for example, the mean number of persons under 18 years of age per household. For ratios of this kind the standard error is approximated by formula (6) but ϱ is assumed to be zero. If ϱ is actually positive (negative), then this procedure will provide an overestimate (underestimate) of the standard error of the ratio.

Note: When computing the approximate standard error of a ratio and the numerator of the ratio is income, formula (7) for the standard error of an arithmetic mean should be used. If the ratio has persons in the numerator and households in the denominator, then formula (6) with the appropriate value of ϱ will give a result preferable to that of formula (7).

STANDARD ERRORS OF ESTIMATED MEANS AND MEDIANS

Estimated standard errors are provided for the means and medians of the published income distributions and do not need to be calculated by the user. However, because of the approximations used in developing the formula used to estimate the standard error of the mean, the standard error reported for

[1]For standard errors of Spanish-origin levels, formula (2) must be used with the "a" and "b" parameters. No appropriate "f" factor exists for use with table B-1 or B-2.

this statistic will generally be an underestimate. Since some users may wish to combine two or more income distributions and compute means and medians for the combined distribution, the following sections have been provided to enable the user to calculate standard errors for these statistics.

Standard error of the mean. The formula used to estimate the standard error of a mean is

$$\sigma_{\overline{x}} = \sqrt{\frac{b}{y} \cdot S^2} \qquad (7)$$

In this formula, y is the size of the base of the distribution and b is a parameter which depends on the sample size, the sample design, the estimation procedure, and the type of characteristic. Values of b are given in table B-5. The variance, s^2, is given by the following formula:

$$S^2 = \sum_{i=1}^{c} p_i \; \overline{x}_i^2 - \overline{x}^2 \qquad (8)$$

where $\overline{x}$ is the mean of the distribution, defined by

$$\sum_{i=1}^{c} p_i \overline{x}_i$$

c is the number of groups in the distribution; i indicates a specific group, thus taking on values of 1 through c.

p_i is the estimated proportion of households, families or persons whose values, for the characteristic (x-values) being considered, fall in group i.

$\overline{x}_i = (z_{i-1} + z_i)/2$, where z_{i-1} and z_i are the lower and upper interval boundaries, respectively, for group i.

$\overline{x}_i$ = is assumed to be the most representative value for the characteristic for households, families, or persons in group i. Group c is open-ended, i.e., no upper interval boundary exists. For this group an approximate average value is

$$\overline{x}_c = \frac{3}{2} Z_{c-1}$$

When two or more distributions are combined, the mean of the combined distribution is:

$$\overline{x} = \frac{1}{y} \sum_j \overline{x}_j y_j$$

where $\overline{x}_j$ is the mean of the jth distribution, y_j is the base of the jth distribution, and $y = \sum_j y_j$. This mean must be computed by the user.

Table B-6. Year-to-Year Correlation Coefficients for Income and Poverty Estimates of Households and Persons: 1984 and 1985

Characteristic	Households		Persons	
	Income	Poverty	Income	Poverty
Total	0.35	0.35	0.30	0.45
White	0.35	0.30	0.30	0.35
Black and/or other races	0.35	0.35	0.30	0.45
Spanish origin	0.55	0.55	0.45	0.65

Note: These coefficients are based on CPS data obtained in March 1978 and March 1979.

Standard error of a median. The sampling variability of an estimated median depends upon the form of the distribution as well as the size of its base. An approximate method for measuring the reliability of an estimated median is to determine a confidence interval about it. (See the section on sampling variability for a general discussion of confidence intervals.) The following procedure may be used to estimate the 68-percent confidence limits and hence the standard error of a median based on sample data.

1. Determine, using the standard error tables and factors or formula (4), the standard error of the estimate of 50 percent from the distribution.
2. Add to and subtract from 50 percent the standard error determined in step (1).
3. Using the distribution of the characteristic, calculate the values from the distribution corresponding to the two points established in step (2). These values will be the limits for the 68-percent confidence interval.
4. Divide the difference between the two points determined in step (3) by two to obtain the standard error of the median.

For calculations of the confidence interval in step (3), use Pareto interpolation for any point in an income interval greater than $2,500 in width; use linear interpolation otherwise.

A 95-percent confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step (4).

The formulas used to implement step (3) for Pareto or linear interpolation are

Pareto:

$$X_{pN} = A_1 \exp\left[\ln\left(\frac{pN}{N_1}\right)\ln\left(\frac{A_2}{A_1}\right)\Big/\ln\left(\frac{N_2}{N_1}\right)\right] \quad (9)$$

Linear:

$$X_{pN} = \frac{N_1 - pN}{N_1 - N_2}\left(A_2 - A_1\right) + A_1 \quad (10)$$

where N = total number of households or persons in the distribution.

x_{pN} = estimated upper and lower bounds for the confidence interval ($0 < p < 1$). For the purposes of calculating the confidence interval, p takes on the two values in step (2). Note that x_{pN} estimates the median when $p = 0.50$ is used in the formulas.

A_1 and A_2 = the lower and upper bounds, respectively, on the interval in which x_{pN} falls.

N_1 and N_2 = the estimated number of households or persons with incomes greater than A_1 and A_2, respectively.

exp is the exponential function.

ln is the natural logarithm function.

It should be noted that a mathematically equivalent result is obtained by using common logarithms (base 10) and antilogarithms.

Use of the above procedure could result in standard errors which differ from those given in the detailed tables. The main reason for this discrepancy is due to use of a more detailed distribution in determining the published standard errors. Linear interpolation was almost always used to compute the published medians and standard errors. However, when using the published distributions, which have been collapsed, use of Pareto interpolation will give more accurate results.

This procedure is needed only for determining standard errors for medians obtained by combining published distributions. Note that when combining distributions the resulting median may lie in an open-ended interval. To calculate its standard error the user must call Population Division of the Census Bureau to obtain the detailed distribution.

Illustration of the computation of a confidence interval and the standard error for a median using Pareto interpolation. Table 1 of this report shows that the median income in 1985 for households with a householder of Spanish origin is estimated to be $17,465. Table 1 also shows that the base of the distribution from which this median was determined is 5,213,000.

1. Using formula (4) with b = 2,067, the standard error of 50 percent on a base of 5,213,000 is about 1.0 percentage points.

2. To obtain a 68-percent confidence interval on the estimated median, add to and subtract from 50 percent the standard error found in step (1). This yields percent limits of 49.0 and 51.0.
3. From table 1, the income of 2,951,000 (56.6 percent) of all households was at least $15,000 and the income of 2,315,000 (44.4 percent) of these households was at least $20,000. The entire 68-percent confidence interval falls in the income interval $15,000 to $20,000. Since the width of this interval is greater than $2,500, Pareto interpolation

must be used. Thus, using formula (9), the lower limit of the estimate is found to be approximately

$$\$15{,}000 \exp\left[\ln\left(\frac{(.510)(5{,}213{,}000)}{2{,}951{,}000}\right)\ln\left(\frac{\$20{,}000}{\$15{,}000}\right)\Big/\ln\left(\frac{2{,}315{,}000}{2{,}951{,}000}\right)\right] = \$16{,}974$$

Similarly the upper limit is approximately

$$\$15{,}000 \exp\left[\ln\left(\frac{(.490)(5{,}213{,}000)}{2{,}951{,}000}\right)\ln\left(\frac{\$20{,}000}{\$15{,}000}\right)\Big/\ln\left(\frac{2{,}315{,}000}{2{,}951{,}000}\right)\right] = \$17{,}799$$

Hence, the 68-percent confidence interval on the estimated median is from $16,974 to $17,799.

4. The standard error of the median is, therefore, ($17,799 − $16,974)/2 = $413.

(Note: Published standard errors are calculated using linear interpolation. A different standard error may be obtained for reasons cited above; e.g., for the above illustration, table 1 gives a standard error of $409.)

Appendix C. Underreporting

This appendix discusses some important aspects of underreporting and its measurement. The general survey phenomenon that is commonly termed underreporting actually refers to the tendency of household surveys to underestimate the number of income or noncash benefit recipients and/or the amount received. There are three main aspects of underreporting. These are 1) failure to report receipt of income or noncash benefit by type, 2) underreporting of the amount received, or 3) misclassification of the type received.

Accurately measuring the extent of underreporting is difficult for many of the types. There are two main components of measuring underreporting: 1) the number of recipients and 2) the total amount received. Measuring the survey undercount of recipients for both income and noncash benefits for the March CPS is extremely difficult because independent estimates (benchmarks or controls) for the CPS noninstitutional, "ever-received during the year" recipient concept are difficult to validate. For this reason, independent estimates for some of the income and noncash benefits have not been made. In addition, problems in obtaining comparable data, adjusting to the CPS concepts, and errors in the independent estimates themselves dictate that these estimates of underreporting should be used with caution.

The derivation of accurate underreporting estimates for amounts of income is easier but still not without similar problems. In general, better administrative data are available for the annual amount of income received than for the number of recipients. Some of the more important problems associated with development of the independent controls for income amounts are adjusting independent estimates to the CPS income concept, significant differences between alternate sources of independent estimates for the same income type, especially for self-employment income, interest, dividends, and rents, and periodic revisions to the sources of independent estimates that delay availability of data and significantly alter estimates of underreporting. Table C-1 shows estimates of underreporting for amounts of aggregate income in 1983 by type. Tables C-2 through C-4 show underreporting of noncash benefits by type.

Money income. The data in table C-1 shows comparisons of CPS aggregate money income in 1983 with independent estimates.

Comparisons of the 1984 CPS estimates with the independent totals reveal that overall income in the survey after allocation is underreported by about 10 percent. However, wide variations are found in the amount of underreporting by source of income. Underreporting varied from about 55 percent for interest income to only about 1 percent for wage and salary income. Both reported and allocated proportions of CPS aggregate incomes are shown in table C-1.

In 1983, $442.2 billion, or about 20 percent of the total aggregate income was allocated as a result of nonresponses to the income questions. About 13 percent of the $13.8 billion of the CPS public assistance or welfare income in 1983 was allocated, while about 33 percent of the $104.1 billion of non-

Table C-1. Comparisons of CPS Aggregate Money Income in 1983 with Independently Derived Estimates, by Income Type

(Billions of dollars)

Source of income	Independent estimate	CPS estimate	CPS as a percent of independent
Total	2,402.5	2,164.9	90.1
Wages and salaries	1,632.3	1,616.3	99.0
Self-employment	112.6	130.1	115.5
Social Security[1]	155.2	142.3	91.7
Supplemental Security Income	9.0	7.6	84.9
Aid to Families with Dependent Children	13.8	10.5	76.0
Interest, dividends, and rental income	315.3	143.2	45.4
Veterans' payments	14.0	8.8	63.3
Unemployment compensation	26.1	19.7	75.5
Workers' compensation	14.1	6.6	47.0
Private, government, and military pensions	110.1	79.7	72.4

[1]Includes Railroad Retirement benefits.

farm self-employment income was allocated. Other sources of income with allocated proportions of 30 percent or above include interest and dividends.

Food stamps. The Department of Agriculture (USDA) makes available monthly estimates of households and persons receiving food stamps and the total face value of the food stamps received. These data can be used to derive independent estimates comparable to the March 1986 CPS data. These comparisons are shown in table C-2.

The CPS estimates of 6,799,000 households and 19,423,000 persons receiving food stamps are 67.5 percent and 71.2 percent of the independent estimates, respectively; and the CPS estimate of $7.4 billion annual value received is 69.0 percent of the independent estimate. The independent estimate of the number of households and persons receiving food stamps was made by 1) first excluding from program counts data for Puerto Rico, Guam, the Virgin Islands, and other outlying areas; 2) computing the number of household or person months in which food stamps were received; and 3) computing the annual recipient estimate by dividing the number of household or person months by the average number of months in which food stamps were received as reported on the March 1986 CPS. The derivation of the independent estimates did not include adjustments for decedents or for persons residing in institutions in March 1986 but receiving food stamps in calendar year 1985.

School lunch participation. The USDA publishes monthly estimates of average daily participation in the free, reduced-price, and regular-price segments of the school lunch program. These data are shown in table C-3 for March 1986, a month that is representative of average participation in the school lunch program. The data exclude Puerto Rico, Guam, and the Virgin Islands.

The CPS estimate of free or reduced-price school lunch recipients was 11,000,000, about 97.0 percent of the USDA monthly figure for March. Comparison of estimates of regular-price participation shows the CPS estimate of 18,469,000 was 154.4 percent above the USDA monthly estimate of 11,959,000.

The apparent overestimate of participants paying regular-price school lunch may be the result of several factors. First, the CPS estimate for regular-price school lunches includes both public and private schools, some of which serve lunches but are not involved in the National School Lunch Program. Second, the estimated participants from CPS were identified as "usually" eating school lunch. For this group, it is likely that the average daily number of lunches is lower than the number of students "usually" eating lunch. There does not appear to be sufficient data to adequately adjust the USDA figures to the CPS concept, therefore, the comparisons must be viewed with caution.

Table C-2. Comparison of CPS and Independent Estimates of Food Stamp Recipients and Aggregate Face Value of Food Stamps: 1985

(Numbers in thousands. Dollars in millions)

Recipient or value	Source		CPS as a percent of independent
	CPS estimate	Independent estimate	
Households receiving food stamps	6,799	10,074	67.5
Persons receiving food stamps	19,423	27,270	71.2
Face value of food stamps	$7,355	$16,663	69.0

Table C-3. Comparison of CPS and Independent Estimates of School Lunch Recipients: 1986

(Numbers in thousands)

Type of school lunch	Source		CPS as a percent of independent
	CPS estimate	Independent estimate	
Total	29,469	23,299	126.5
Free or reduced-price school lunch	11,000	11,338	97.0
Regular price school lunch	18,469	11,959	154.4

Table C-4. Comparison of CPS and Independent Estimates of Households Residing in Public or Other Subsidized Housing: March 1986

(Numbers in thousands)

Type of housing	Source		CPS as a percent of independent
	CPS estimate	Independent estimate	
Total	3,799	3,493	108.8
Low income public housing	(NA)	1,227	(X)
Section 8 (including Section 202)	(NA)	2,133	(X)
Rent supplements (Section 101)	(NA)	29	(X)
Section 236	(NA)	103	(X)

NA Not available. X Not applicable.

Public or other subsidized housing. The March 1986 CPS identified 3,799,000 households in public or other subsidized rental housing. A comparison of the CPS estimates with comparable estimates obtained from the Department of Housing and Urban Development (HUD) indicate that the CPS estimate is about 108.8 percent of the independent HUD figure. (See table C-4.) It is likely that the CPS estimate contains subsidized units that were not counted in the independent estimate. These might include military personnel, student housing, or other smaller HUD or USDA programs, etc. Without more detailed questions on the CPS and more detailed administrative data it is difficult to refine this comparison.

Medicaid. Development of independent estimates for Medicaid coverage required data from several sources within the Department of Health and Human Services (HHS) and some important assumptions. A comparison indicates that the CPS estimate of 19,204,000 was about 2.8 percent higher than the independently derived estimate of 18,674,000. The independent estimate derived from data from the Health Care Finances Administration is based on persons receiving medical care during fiscal year 1985. This estimate does not include persons covered under "State only" medical assistance programs primarily in New York and California. At this time we have no reasonably accurate estimate of this group.

The CPS was edited extensively for Medicaid coverage. All recipients of AFDC and most SSI recipients were assigned Medicaid coverage. This added a substantial number of recipients. In addition, own children of AFDC recipients and spouses (in States with unemployed father allowances) were assigned coverage.

Medicare. The independent estimates of persons covered by Medicare which have been adjusted for decedents and the institutionalized are probably the most reliable of all independent estimates. The CPS estimate of 29,068,000 Medicare beneficiaries is about 1.2 percent higher than the independent estimate of 28,716,000 for 1985. As in the case of Medicaid, edits significantly affected the CPS estimate. The edit which was most significant involved the assignment of Medicare coverage to all Social Security income recipients age 65 years old and over.

HOUSING UNIT COVERAGE

16a Unit is —
☐ In a Special Place — *Skip to 17a above*
☐ Not in a Special Place — *Go to 16b*

16b ASK IF NOT APPARENT
Do all persons in this household live or eat together?
☐ Yes — *Go to 16c*
☐ No, neither live or eat together — *Fill Table X for the person or group of persons not living or eating with the Reference Person.*

16c ASK IF NOT APPARENT
Does any other household on the property live or eat with this household?
☐ Yes — *Redefine the unit to include space occupied by all persons who live or eat together. Apply merged unit procedures if appropriate.*
☐ No

USE OF TELEPHONE (27–28) LEAD-IN: **Since households included in this survey are interviewed again during each of the next 3 months, we attempt to conduct the followup interviews by telephone.**

	1st	5th
27a **Is there a telephone in this house/apartment?**	Y — *Skip to 27c* N	Y — *Skip to 27c* N
27b **Is there a telephone elsewhere on which people in this household can be contacted?**	Y — **Where?** N — *Skip to 28*	Y — **Where?** N — *Skip to 28*
27c **Is a telephone interview acceptable?**	Y N — *Skip to 28*	Y N — *Skip to 28*
27d **What is the telephone number of the phone where you would like to be called?**		☐ Home ☐ Office
28 **When is the best time to call or visit?**		a.m. p.m.

30 VACATION REMINDER: **Next month during the week of the 19th we will again be calling on you. Is there any reason why we would not be able to contact you here?** ← *(Read vacation reminder)*

UPDATE: Update 23a and 23b in 5th month AND in February, July, and October.

29 TOTAL FAMILY INCOME IN PAST 12 MONTHS *(Show flashcard)*

Which category on this card represents the total combined income of all members of this FAMILY during the past 12 months? This includes money from jobs, net income from business, farm or rent, pensions, dividends, interest, social security payments and any other money income received by members of this FAMILY who are 14 years of age or older?

A ☐ Less than $5,000		H ☐ $20,000 to $24,999	
B ☐ $5,000 to $7,499		I ☐ 25,000 to 29,999	
C ☐ 7,500 to 9,999		J ☐ 30,000 to 34,999	
D ☐ 10,000 to 12,499		K ☐ 35,000 to 39,999	
E ☐ 12,500 to 14,999		L ☐ 40,000 to 49,999	
F ☐ 15,000 to 17,499		M ☐ 50,000 to 74,999	
G ☐ 17,500 to 19,999		N ☐ 75,000 and over

- friends or relatives . . ○

Placed or answered ads . . . . . ○
Nothing *(Skip to 24)* . . . . . ○
Other *(Specify in notes, e.g., TPA, union or prof. register, etc.)* . . . . . ○

22B. At the time . . . started looking for work, was it because he/she lost or quit a job or was there some other reason?

- Lost job . . . . . ○
- Quit job . . . . . ○
- Left school . . . . . ○
- Wanted temporary work . . ○
- Change in home or family responsibilities ○
- Left military service . . . . . ○
- Other *(Specify in notes)* . . . . ○

22C. 1) How many weeks has . . . been looking for work? ⊘⊘ I I 2 2 3 3

2) How many weeks ago did . . . start looking for work? 4 4 5 5 6 6 7 7

3) How many weeks ago was . . . laid off? 8 8 9 9

22D. Has . . . been looking for full-time or part-time work?

Full ○ Part ○

22E. Could . . . have taken a job LAST WEEK if one had been offered?

Yes ○ No ○ Why not?

- Already has a job . . . . . ○
- Temporary illness . . . . ○
- Going to school . . . . . ○
- Other *(Specify in notes)* ○

22F. When did . . . last work at a full-time job or business lasting 2 consecutive weeks or more?

- Within last 12 months *(Specify)* . . ○
- *(Month)* _____
- One to five years ago . . . . . ○
- More than 5 years ago . . . . . ○
- Never worked full-time 2 wks. or more . . . . . ○
- Never worked at all . . . . . ○

(SKIP to 23. If layoff entered in 21A, enter job, either full or part time, from which laid off. Else enter last full time job lasting 2 weeks or more, or "never worked.")

24. INTERVIEWER CHECK ITEM *(Rotation number)* First digit of SEGMENT number is:

- ○ 2, 3, 4, 6, 7 or 8 *(Skip to 26)*
- ○ 1 or 5 *(Go to 24A)*

24A. When did . . . last work for pay at a regular job or business, either full- or part-time?

- Within past 12 months ○
- 1 up to 2 years ago . . . ○
- 2 up to 3 years ago . . . ○
- 3 up to 4 years ago . . . ○
- 4 up to 5 years ago . . . ○
- 5 or more years ago . . ○ *(Go to 24B)*
- Never worked . . . . . ○ *(Skip to 24C)*

24B. Why did . . . leave that job?

- Personal, family *(Incl. pregnancy)* or school . . . . . ○
- Health . . . . . ○
- Retirement or old age . . . . . ○
- Seasonal job completed . . . . . ○
- Slack work or business conditions ○
- Temporary nonseasonal job completed . . . ○
- Unsatisfactory work arrangements *(Hours, pay, etc.)* ○
- Other . . . . . ○

24C. Does . . . want a regular job now, either full- or part-time?

- Yes . . . . . ○ *(Go to 24D)*
- Maybe – it depends *(Specify in notes)* ○
- No . . . . . ○ *(Skip to 24E)*
- Don't know . . . . . ○

24D. What are the reasons . . . is not looking for work? *(Mark each reason mentioned)*

- Believes no work available in line of work or area ○
- Couldn't find any work . . . . . ○
- Lacks nec. schooling, training, skills or experience . . . . ○
- Employers think too young or too old . . . . . ○
- Other pers. handicap in finding job ○
- Can't arrange child care . . . . . ○
- Family responsibilities . . . . . ○
- In school or other training . . . . . ○
- Ill health, physical disability . . . . . ○
- Other *(Specify in notes)* . . . . . ○
- Don't know . . . . . ○

24E. Does . . . intend to look for work of any kind in the next 12 months?

- Yes . . . . . ○
- It depends *(Specify in notes)* ○
- No . . . . . ○
- Don't know . . . . . ○

(If entry in 24B, describe job in 23, otherwise, skip to 26)

25. INTERVIEWER CHECK ITEM *(Rotation number)* First digit of SEGMENT number is:

- ○ 2, 3, 4, 6, 7 or 8 *(Skip to 26)*
- ○ 1 or 5 *(Go to 25A)*

25A. How many hours per week does . . . USUALLY work at this job? ⊘⊘ I I 2 2 3 3 4 4 5 5 6 6 7 7 8 8 9 9

(Fill 13A below)

13A. DESCRIPTION OF LONGEST JOB (Items 47A–E) IN THIS CPS-665:
Yes O No O

3. CONTROL NUMBER

6. PSU NO.	7. SEGMENT NO.	8. SERIAL NO.	9. HOUSEHOLD NO.

INTRODUCTION
(Optional)

We have just completed the questions about employment and unemployment. Each March, the Census Bureau also collects information about the economic situation of Americans and their families for the previous year. I am going to ask these questions now. We don't expect all answers to be perfect, but please think about each question and answer it the best you can.

77. INTERVIEWER CHECK ITEM
TENURE (from Control Card Item 10)
- Owned or being bought O
- Rented ..... O
- No cash rent ..... O

78. How many housing units are in this structure?
1 O 2 O 3–4 O 5–9 O 10+ O

79. INTERVIEWER CHECK ITEM
- Some household members 5–18 years old O (Ask 80)
- No household members 5–18 years old O (Skip to 81)

80. During 1985 how many of the children in this household usually ate a complete hot lunch offered at school?
- O All
- O Some, but not all – Mark number
- O None

81. INTERVIEWER CHECK ITEM (from Control Card Item 29)
A O B O C O D O E O F O G O H O I O J O K O L O M O N O
(If c.c. Item 29 is A-I or NA, fill 82) (End questions)

82. INTERVIEWER CHECK ITEM
- All or some marked in 80 ..... O (Ask 83)
- None marked in 80 or 80 blank O (Skip to 84)

83. During 1985 how many of the children in this household received free or reduced price lunches because they qualified for the Federal School Lunch program?
- O All
- O Some, but not all – Mark number
- O None

84. INTERVIEWER CHECK ITEM
- Owned marked in 77 ..... O (Skip to 87)
- Rented or no cash rent marked in 77 O

85. Is this house in a public housing project, that is, is it owned by a local housing authority or other public agency?
Yes O (Skip to 87) No O

86. Are you paying lower rent because the Federal, State, or local government is paying part of the cost?
Yes O No O

87. Did anyone in this household get food stamps at any time during 1985?
Yes O No O (Skip to 91)

88. How many of the people now living here were covered by food stamps during 1985?
All O

89. In how many months of 1985 were food stamps received?
All O

90. What was the value of all the food stamps received during 1985?
(Add monthly amounts to obtain annual figure)
$ (Nearest dollar)
(Ask 91)

91. What type of fuel is used most to heat this house (apartment)?
- Gas – Probe
  - from underground pipes O
  - bottled, tank, or LP ... O
- Electricity ..... O
- Fuel oil, kerosene, etc. ... O
- Coal or coke ..... O
- Wood ..... O
- Other ..... O
- No fuel used ..... O

92. Since October 1, 1985, was your household without heat for one or more days because you were unable to pay the utility or fuel bill?
Yes O No O

93. The government has an energy assistance program which helps pay heating costs. This assistance can be received directly by the household or it can be paid directly to the electric company, gas company or fuel dealer.
Since October 1, 1985, has this household received assistance of this type from the federal, state, or local government?
Yes O (Ask 94) No O (End questions)

94. Altogether, how much energy assistance has been received since October 1, 1985?
$ (Nearest dollar)

- Different county, this State
- Different state *(Specify)*
- Outside United States

Form CPS-665—Continued

IF CIVILIAN 14+, BEGIN WITH ITEM 29A. IF CURRENT ARMED FORCES MEMBER, BEGIN WITH ITEM 48A.

18A. LINE NUMBER — POP. STAT. (CIV 14+ O, A.F. O) — 18D. AGE — 18G1. Sex (Male O, Female O) — OFFICE USE ONLY

29A. Did . . . work at a job or business at any time during 1985?
Yes O (Skip to 33) No O

29B. Did . . . do any temporary, part-time, or seasonal work even for a few days during 1985?
Yes O (Skip to 33) No O

30. Even though . . . did not work in 1985, did he/she spend any time trying to find a job or on layoff?
Yes O No O (Skip to 32)

31. How many different weeks was . . . looking for work or on layoff from a job? (Mark weeks)

32. What was the main reason . . . did not work in 1985?
Ill or disabled and unable to work O
Retired O
Taking care of home or family O
Going to school O
Could not find work O
Doing something else O
(Skip to 51A)

33. During 1985 in how many weeks did . . . work even for a few hours? Include paid vacation and sick leave as work. (Mark weeks and Go to 34)

34. INTERVIEWER CHECK ITEM
Number of weeks in item 33 is:
1–49 O (Skip to 36)
50–51 O (Ask 35)
52 O (Skip to 39)

35. Did . . . lose any full weeks of work in 1985 because he/she was on layoff from a job or lost a job?
Yes O
No O
(Skip to 39)

36. You said . . . worked about (entry in Item 33) weeks in 1985. How many of the remaining (52 minus entry in Item 33) weeks was . . . looking for work or on layoff from a job? (Mark weeks and ask 37)
None O (Skip to 38)

37. Were the (entry in Item 36) weeks . . . was looking for work (or on layoff) all in one stretch?
Yes – 1 stretch O
No – 2 stretches O
No – 3+ stretches O
(Go to 38)

(If the entries in Items 33 and 36 add to 52 weeks, skip to Item 39. If not, ask 38)

38. What was the main reason . . . was not working or looking for work in the remaining weeks of 1985?
Ill or disabled and unable to work O
Taking care of home or family O
Going to school O
Retired O
No work available O
Other (Specify) O

39. For how many employers did . . . work in 1985? If more than one at same time, only count it as one employer.
1 O (Skip to 41)
2 O
3+ O
(Ask 40)

40. Did . . . look for work between jobs in 1985?
Yes O No O

41. In the weeks that . . . worked, how many hours did . . . usually work per week? (Mark hours) (Go to 42)

42. INTERVIEWER CHECK ITEM
Number of hours in item 41 is:
1–34 O (Skip to 44)
35+ O (Ask 43)

43. Did . . . work less than 35 hours for at least one week in 1985? Exclude time off with pay because of holidays, vacation, days off, or sickness.
Yes O (Ask 44)
No O (Skip to 46)

44. How many weeks did . . . work less than 35 hours in 1985? (Mark weeks)

45. What was the main reason . . . worked less than 35 hours per week?
Could not find a full time job O
Wanted to work part time or only able to work part time O
Slack work or material shortage O
Other O
(Ask 46)

46. What was . . .'s longest job during 1985? (Compare with entry in CPS-1 Item 23)
Same as item 23 O (Skip to 48A or 48B)
Different from item 23 or item 23 blank O (Specify in 47A–47E)

47A. For whom did . . . work?

47B. What kind of business or industry is this?

47C. What kind of work was . . . doing?

47D. What were . . .'s most important activities or duties?
