¹ 1990 census counts are as published in 1990 census reports and thus do not include any changes published subsequently due to boundary changes or to the Count Question Resolution program.

² Data shown for places are for census designated places (CDPs) which are statistical areas defined for concentrations of population outside of incorporated places. All places shown for Hawaii are CDPs. Hawaii is the only state that has no incorporated places recognized by the U.S. Census Bureau. By agreement with the state of Hawaii, the U.S. Census Bureau does not show data separately for the city of Honolulu, which is coextensive with Honolulu County.
